SANITARY STEEL COUCHES DAVENPORTS AND FOLDING BEDS

A BIG SAVING IN PRICE

CONVENIENT, COMFORTABLE, VERMIN PROOF AND INDESTRUCTIBLE.

AMEWORK is made of the best quality high carbon steel, guaranteed not to bend or e rods, bars, posts and rails are elded or riveted in such manner as e maximum of strength. Finished onze, or in black and gold bronze as in each description.

ING WORK consists of our new special hairpin ric, made of the best quality heavy oven and interlaced in such man- be absolutely non-sagging and It is fastened at each end to the by a large number of high carbon elical springs, combining strength, d durability.

This illustration shows the construction of our PATENT SPECIAL HAIRPIN FABRIC used on our Sanitary Steel Couches and Davenports. It is fastened at each end to the steel frame with spiral springs and the closely woven links run lengthwise. The strongest, and comfortable spring fabric ever devised.

31 This Combination Couch is made of the best quality high carbon t, guaranteed not to bend or break. It ngth and durability with utility, clean- nfort. When used as a couch as shown illustration, the sides are dropped. as a bed, as shown in the small illus- he sides are raised, making a com- size bed. The soft, pliable, elastic s pad and bolster are constructed to in either position perfectly. When he couch cover it makes an exception- and comfortable couch. The size of n the sides are dropped is 74 inches nches wide. The size of the double th sides are raised is 74x50 inches.

ISH. The frame of the Sanitary Com- bination Steel Couch is finished ity gold bronze. The patent hairpin fabric is tin coated and the spe- cial helical steel springs are japanned—a finish that prevents rust or corrosion and does not wear off or become dull.

This small illustration shows the end construction of the steel frame f our No. 1A2531 Sanitary Steel Couch. The top cross rail and posts are heavy angle shaped Bessemer steel, 1½ inches wide. The posts are firmly braced in the upper cor- ered to the 1¼-inch angle Bessemer king this frame extra strong and rigid.

ELASTIC FELT MATTRESS PADS FOR OUR SANITARY STEEL COUCHES AND DAVENPORTS.

THE ELASTIC FELT MATTRESS PADS used on our Sanitary Steel Couches and Davenports are made of excellent quality white cotton felted into layers, strictly clean, sanitary and very comfortable, a soft yet compact and durable mattress pad which easily conforms to the couch, whether open or closed. fitted with strong tapes on all sides by which the mattress pad is securely tied to the outer edges of the couch or davenport These elastic felt mattress pads are covered with a strong, firm and serviceable denim twill ticking and securely tufted. All our mattress pads used on our Sanitary Steel Davenports, except on No. 1A2541, which has a pillow stitched edge, are made with square box edges like a mattress, only thinner so that they will conform to the shape of the davenport in any position. Sanitary Steel Couches and Davenports cannot be used without a mattress pad. A regular mattress is too thick and stiff and will not fold nor conform to the shape of the couch or davenport in the folding or unfolding. We list below five Elastic Felt Mattress Pads especially made and adapted for use on the Sanitary Steel Couches and Davenports illustrated and described on this page. **Be sure to order the Elastic Felt Mattress Pad which is adapted for use on the Sanitary Steel Couch or Davenport which you select.**

No. 1A2541 Elastic Felt Mattress Pad for use on our No. 1A2529 Sanitary Steel Couch. Made of elastic felted cotton. Covered with denim twill ticking, dark olive green color. Has pillow stitched edge and tufted top and bottom with tapes for fastening mattress pads to side rods. Our No. 1A2543 Elastic Felt Mattress Pad with full boxed edge, weight, 18 pounds, at the slight difference in price is a much better value. Weight, 16 pounds. Price.....$2.85

No. 1A2543 Elastic Felt Mattress Pad for use on our No. 1A2529 and No. 1A2531 Sanitary Steel Couches. Made of elastic felted cotton with good quality denim twill ticking in dark olive green color. Full boxed edges, securely tufted top and bottom. Strong tapes attached to sides to fasten it securely to couch frame. Exceptionally comfortable and durable. We especially recommend this mattress pad in preference to No. 1A2541. Weight, 18 pounds. Price.....$3.25

No. 1A2547 Elastic Felt Mattress Pad for use on our No. 1A2533 Sanitary Steel Davenport. Filled with elastic felted cotton. Covered with good quality denim twill ticking, dark olive green color. Has firmly bound full box edges, full tufted top and bottom. Sides have strong tapes for fastening mattress pad to side rails of Sanitary Steel Davenport frame. Weight, 20 pounds. Price.....$3.65

No. 1A2549 Elastic Felt Mattress Pad for use on our No. 1A2537 Sanitary Steel Davenport. Filled with elastic felted cotton. Superior quality, strong, serviceable denim twill ticking covering in dark olive green color. Full boxed edges with ruffled curtain front. Accurately and firmly tufted top and bottom. Strong tape attached to sides to fasten mattress pad to frame of steel davenport. Soft, sanitary, serviceable and comfortable mattress pad. Weight, 20 pounds. Price.....$3.95

No. 1A2552 Elastic Felt Wedge Bolster, for use on our No. 1A2529 and No. 1A2531 Sanitary Steel Couches. Filled with elastic felted cotton and covered with denim to match the pad. It is wedge shaped with boxed edges on three sides. Has hinged center so that it can be folded and placed beneath the couch cover when sides are dropped. Weight, 5 pounds. Price.....$1.05

THIS SANITARY STEEL COUCH, $3.90

EXCEPTIONAL VALUE

Shipped from Kansas City, Mo.

THE SPRING used on this splendid Combination Sanitary Steel Couch is made with our new special hairpin double fabric of the best quality steel interwoven and interlaced in such manner as to be absolutely noiseless. The fabric is attached to the angle steel bars at each end by 21 oil tempered high carbon steel coil springs absolutely non-sagging, strong, durable and comfortable. In this spring the annoying squeak so common to all other makes of steel couch springs is entirely eliminated. Best quality casters.

THIS ILLUSTRATION shows our No. 1A2531 Sanitary Steel Couch with mattress, bolster and couch cover made up as a couch. The price, $3.90, does not include the mattress, bolster or couch cover. See price list below for prices of mattress and bolster. Refer to page 453 for prices of couch covers.

OUR PRICE, $3.90, means a saving of $1.50 to $2.00 to our customers, as compared with what you will have to pay for a sanitary steel couch similar in design and construction offered by other dealers.

HIGHEST GRADE MATERIAL, CONSTRUCTION AND FINISH

IRON BEDS

A BIG SAVING IN PRICE

OUR IRON BEDS.

Clean, sanitary, vermin proof and indestructible. Whether you want an iron bed at the lowest price ($1.61) ever quoted by any firm for a strictly reliable article, or a massive and handsome porcelain polish finish chill-less iron bed, you will find it on this and the following pages. The latest up to date styles speak for themselves. The quality is backed by our guarantee. The rails are made of Bessemer steel in angle shape and will not bend or break. Great care is taken in the fitting of the tongue and groove by which the rail is fastened to the head and foot ends. They stand firmly and will support any weight of persons. Best quality brass tubing, highly polished and burnished, coated with best quality French lacquer, which absolutely preserves the polish and prevents tarnishing.

THE FINISH.

We guarantee the finish of our Iron Beds to be the best that can be made. The enamel is baked in a large oven heated to a very high degree of temperature. This produces a finish that is impervious to water, and all our iron beds can be cleaned of finger marks or other soiling by washing with soap and water.

THE COLOR.

We furnish all our Iron Beds in white enamel unless otherwise ordered. Under the description of each bed it specifically states whether furnished in single solid color or in combination colors. Many designs of beds are much more attractive in single solid color, and for that reason we furnish certain patterns in single solid color only. When beds are ordered in combination colors or in a solid color except white, shipment will be made direct from factory near Chicago, and from three days' to one week's time is required before shipment can be made. **Special colors,** solid or in combination, **not mentioned** in the description of each bed, will be furnished at an additional cost of $1.00.

VERNIS MARTIN ALL GOLD FINISH. This beautiful high grade finish was introduced in this country [illegible] and has become deservedly popular. It derives its [illegible] from its inventor, a Frenchman, Vernis Martin. It [illegible] a three-coat finish, consisting of a priming foundation [illegible] thoroughly baked and hardened, a second coat of [illegible] bronze, and, lastly, a third coat of the best quality [illegible] nish. The color is a transparent, rich golden tint, [illegible] resembling the high grade all brass beds.

HOW TO ORDER.

When ordering a metal bed be careful to state the [illegible] wanted, also the color, otherwise white will be [illegible] We illustrate our beds made up with bolster, [illegible] and covering, but the price quoted is for the bed [illegible] Springs, mattresses and pillows are illustrated and [illegible] scribed on pages 631 to 634.

THE BED.

Consists of head end, foot end and metal spring. It is so constructed that the spring forms the side rails of the bed, which reduces the cost much lower than the regular iron bed with regular spring. Height of head end, 54 inches; foot end, 41 inches. Continuous corner posts and top rails, ⅞-inch steel tubing. Five vertical filling rods and two cross rods of solid steel 5-16 inch thick. Finished in white enamel with gilt chills or Vernis Martin (all gold finish). Full size, 54-inch or 42-inch width only.

THE SPRING.

Has a heavy steel wire fabric fastened to the angle steel frame at each end by steel spiral helical springs, guaranteed not to sag, and very strong and durable. The side rails of the spring fit into the grooves on the heavy castings on the corner posts.

LOOK AT THIS IRON BED

For

$5.65

We are proud of the style and the quality is backed by our guarantee. This bed is made of the best quality Bessemer steel. Head end, 58 inches high. Corner posts and shapely curved top rails are 1 1-16 inches in diameter. Vertical scroll cross filling rods are 5-16 inch thick, made of solid steel. Large smooth cast chills on the corner posts and on the top and bottom rails. Filling rods and cross rods are joined to each other and to the corner posts and top rails with heavy cast chills, perfectly smooth and clean, special care being taken to eliminate the sharp ragged edges. Finished in white enamel, pink, pea green, light blue or dead black, with gilt decorations on the chills; also furnished in combinations of pea green and white, olive green and white, blue and white, or Vernis Martin (all gold finish). It is especially attractive in pea green and white, or light blue and white, with gilt decorated chills, or in Vernis Martin (all gold finish). **Be sure to state color desired,** otherwise white enamel will be shipped. Read what we say about color of beds on page 622. Furnished in 54-inch width only. Shipping weight, about 150 pounds.

Handsome in Design, High Grade in Construction.

BRASS BEDS

Beautiful in Finish. Big Saving in Price.

WE INVITE SPECIAL ATTENTION **to this splendid line of Brass Beds, as illustrated below.** They are made for us by two of the largest and best known manufacturers of brass beds in the United States. You will find each bed is made of better material, better in finish, more perfectly fitted, more durable and in every way more satisfactory than brass beds made by the average factory and sold by the average dealer. **Every improvement in brass bed construction is embodied in the construction of our brass beds.** They are the perfect product of the best skilled workmen, from the highest grade material obtainable at any price.

THE DESIGNS **are strikingly attractive and graceful in outline.** They embody all the new, up to date ideas in brass bed construction, selected with a view to combining the greatest strength and solidity with a handsome appearance, the product of years of experience, and we offer them to our customers with the positive assurance and guarantee that in no retail store or other catalog house can they be equaled at our price in elegance of design and perfection of construction, combined with beauty and finish.

THE METAL. **The raw material which enters into the construction of our brass beds** is specially and thoroughly tested before being worked up into the finished product. No rusty scrap or corroded stock is used. Every post, rod, knob, husk, rail and mounting is made from the choicest high grade stock. All the raw material is rigidly examined, and thoroughly experienced and competent inspectors carefully examine each finished piece, making it practically impossible for any defect to pass.

THE FINISH **of a brass bed is the most important feature next to material and construction.** Each piece, post, rod and is burnished and polished in the most perfect manner until the surf as smooth as a mirror. To preserve this perfectly polished surfa entire bed is given several coatings of best amber hot process lacquer. Each piece is heated to the required temperature by ele during the successive coats of lacquer. This prevents the finis tarnishing. The best lacquer is to polished brass what varnish is to There are as many grades of lacquer as there are grades of varnish use the best grade. The **satin lacquered finish** is produced in the manner and with the same high grade imported material, with a coating and the finished surface has a velvety sheen which enhan beauty and requires special care, applied by hand with a camel hair by the best skilled workmen.

THE PACKING. **We use special care in the packing of our brass** Each bed is carefully wrapped in tissue pa cotton flannel and securely packed in a strong wooden crate in such ner as to prevent any possibility of injury. We guarantee every reach our customer in the same perfect condition it leaves the factory.

OUR PRICES. **We challenge any firm on earth to furnish the quality of brass beds at the same or anywhere near same prices we ask.** In fact, we know by actual comparison and the goods that we are saving our customers 35 to 50 per cent of the asked by other dealers.

Each bed carefully wrapped in tissue paper and cotton flannel and securely crated. Shipped fr Kansas City, Mo., or factory near Chicago, as noted in description.

DEPENDABLE, DURABLE, COMFORTABLE

BED SPRINGS

A BIG SAVING IN PRICE

OUR STEEL FRAME SPRINGS

are made of the best quality high carbon Bessemer steel. The end bars are made of heavy angle steel 1¼ inches wide on each flange. The side rails are made of angle steel or drawn steel tubing as mentioned in the description of each spring. Each of the four corners is securely joined by heavy bolts and steel castings or steel corner braces, a method of construction not found in steel frame springs generally sold by others, and makes the frame absolutely firm and strong and will not become loose and rickety.

This illustration shows the construction of our patent special hairpin fabric used on our Sanitary Steel Couches and Davenports. It is fastened with spiral springs at the ends and the closely woven links running lengthwise. The strongest, most durable and comfortable spring fabric ever devised.

THE WOVEN WIRE FABRIC

used on our springs is made of the best high tension steel wire. It has an extra closely woven fine mesh with heavy corded edges and reinforced with extra heavy cords throughout the entire surface of the fabric. The fabric is securely and firmly fastened at each end to the crossbars and is guaranteed not to become loosened nor pull out.

LOOK AT THIS FOR $4.11

The best Steel Frame Spring made. The side rails of the frame are made of heavy 1½-inch drawn steel tubing. The end bars are made of heavy angle steel 1½ inches wide. A special feature in the construction of this spring is the heavy steel corner castings, which fasten the steel tube side rails to the angle steel end bars and raise the spring fabric 4 inches above the side rails as shown in the small illustration, making the bed as comfortable on the edge as in the center. The patent special hairpin fabric used on this spring is fastened to the angle steel end bar with twenty-five steel helical springs at each end. Each side of the fabric is further strengthened by a wide steel band, making the strongest, most durable and most comfortable spring fabric ever devised. The frame is finished in the best quality of gold bronze. The hairpin fabric is finished with heavy anti-rust tin coating. This splendid spring is adapted for light, medium or heavy weight persons, and will give years of service and perfect satisfaction. Furnished for either wood or metal beds, all sizes. No slats are needed when used on metal beds, and the ordinary wood slats are needed when used on wood beds. **Be sure to state the kind and size of bed for which the spring is desired.** Shipped from Kansas City, Mo. Shipping weight, about 60 pounds.

Shows Patent Railed Corners.

No. 1A2813 Price for iron beds, all sizes.....$4.11
Price for wood beds, all sizes..... 4.06

THE CENTER SUPPORTS

springs, except No. 1A2700, are of heavy steel wire. The cone spiral steel springs are interlaced interlocked by heavy steel lengthwise and crosswise. Fa to the end bars by steel rods and spiral helical springs. By this of construction the weight of the is evenly distributed throughout surface and prevents sag stretching.

HOW TO ORDER A BED S

First—Springs for metal beds extended end bars, and as we all springs for either wood or beds, be sure to state whether spring is wanted for wood or bed. **Second**—Give the exact and width of bed inside. If there any projections, always take shortest distance in measuring. —When writing out your order put down the width of the measurement of the bed, spe the number of feet and inches example, if your bed measures wide and 6 feet long, write plainly, thus: 4-0x6-0; never 4x6. If your bed measures inches wide by 6 feet long thus: 4-4x6-0. We cannot for springs unless you state you have a wood or metal give the exact length and the bed inside. **Fourth**—If No. 1A2814 or No. 1A2815 beds, be sure to order slats other springs, if ordered beds, have extension ends are required.

Our Avondale All Steel Spring, $2.82.

Angle Steel Frame. Spiral Steel Spring Support.

This Spring is made entirely of Bessemer steel, and has angle steel ends and side rails, with the corners braced at one end, and strong cast corner connections that prevent twisting. Fabric is alternate single and double weave, strongly corded on edge and through the body. Side edges reinforced with heavy steel wire. Fabric is elevated above the side rails and supported by twenty-one steel spiral springs, interlaced with heavy cross wires, and attached to the end bars with steel rods and six spiral springs. Shipped from Kansas City, Mo. Shipping weight, about 60 pounds.

Price for wood beds..... 3.26

The Celebrated National Spring, $3.11.

Widely Advertised by Others for $6.00.

This Spring has tubular steel side rails 1⅜ inches in diameter fastened to the heavy angle steel end bars with heavy steel castings. The fabric is made of steel wire links running lengthwise and crosswise, joined by small steel plates. At each end of the fabric are twenty-nine high carbon steel wire coil springs attached to the angle steel end bars. No slats are needed when used on metal beds. Wood slats should be used for wood beds. A special feature is the heavy steel corner construction shown in the small illustration which raises the fabric above the side rail, making a comfortable edge. This spring is practically indestructible and is adapted for use by light weight, medium weight or heavy weight persons. Furnished in full size and 4-foot widths only. Shipped from Kansas City, Mo. Shipping weight, 70 pounds.

No. 1A2806 Price for iron beds.....$3.11
Price for wood beds..... 3.07

Our Faultless Special Angle Steel Spring, $3.

Patent Double Hairpin Fabric.

The frame of this Spring is made of heavy angle shaped high carbon Bessemer steel, 1½ inches wide. The corners are firmly bolted and braced, a feature of construction not generally found in angle steel frame springs. Equipped with our patent hairpin fabric, as illustrated at top of the page. Particular attention is called to the manner in which the links are constructed and joined, running lengthwise, closely woven and will not stretch nor sag. Steel coil springs at each end attached to the hairpin fabric and the steel end bars. A special this method of construction is the equal distribution of the weight of the body needed for use on metal beds. **Be sure to state size and kind of bed for which desired.** Shipped from Kansas City, Mo. Shipping weight, about 60 pounds.

Our Cambridge Hairpin Fabric Spring, $3.2

Double hairpin fabric All Steel Spring. Side rails made of heavy 1¼-inch drawn steel tubing, curved at each end, which raises the fabric on the edge 3 inches from top of side rail. End bars made of heavy angle steel 1¼ inches wide. Fitted with our patent hairpin fabric, as shown in small illustration at top of page. This fabric is fastened to the angle steel end bars by steel spiral helical springs, distributing weight of the body equally over entire surface. Furnished in full size and 4-foot widths only for either wood or metal beds from Kansas City, Mo. **Be sure to state size and kind of bed for which spring** Shipping weight, 60 pounds.

Price for wood beds.....

Our Monarch All Steel Spring, $4.10.

Heavy Raised Corner Castings. Heavy Rope Wire Edge.

This is the strongest, most substantial steel frame woven fabric Bed Spring made. It has heavy tubular steel side rails, 1½ inches in diameter, and heavy angle steel end bars 1¼ inches wide. Frame is finished in best quality gold bronze. A special feature in the construction of this spring, not found in other makes of springs, is the heavy corner castings which raise the fabric 4 inches above the side rails, making the entire surface of the spring from edge to edge exceptionally soft and comfortable. The fabric is the closest woven pencil weave, heavy surface, and has heavy rope wire edges. The steel coil spring sus pered Bessemer steel spiral springs securely interlaced and faster steel coil helical springs. Furnished in full size and 4-foot or metal beds. **Be sure to state kind and size of bed when orde** 70 pounds. Shipped from Kansas City, Mo.

SOLID COMFORT STEEL COIL SPRING

No. 1A2815 Price, all sizes.....$2.92

This, our Solid Comfort Steel Coil Spring, has, full size, 120 reverse steel springs (smaller sizes in proportion). Made of the best quality high carbon Bessemer steel wire, oil tempered. The coils are securely fastened at the top and bottom by our patent interlocking construction. We absolutely guarantee these springs to neither bend nor break and never to become loosened. This method of construction permits this spring to be used either side up, and will support persons of uneven weight without sagging or rolling. Heavy steel border wire is used around the edge on the top and bottom. We especially recommend this spring in the interests of our customers in preference to any wood frame spring. Made for either metal or wood beds and specially adapted for wood beds. To fit this spring to a metal bed it is necessary to purchase a set of iron slats. To fit it to a wood bed use the ordinary wood slats. We especially recommend our No. 1A2822 All Steel Coil Spring with angle steel bottom at $3.60 for metal beds, as no slats are needed. **Be sure to state kind and size of bed for which spring is wanted.** Furnished in all sizes. Shipping weight, about 30 pounds.

OUR PATENT STEEL BED SLAT

For Iron or Brass Beds.

Best quality high carbon Bessemer steel. Each slat is made of four side bars, divided in the center, with hooks at the ends which rest on the side rails of the bed. Adjustable to any width of metal bed. All our springs can be furnished to fit brass or iron beds without using slats, except Nos. 1A2814 and 1A2815. A set (four slats) is needed to fit either of these two all steel coil springs to a metal bed.

No. 1A2730 Price, per set of four slats $1.45

No. 1A2731 Same slat as above, except it is not adjustable. Price, per set of four slats.....$1.29

When ordering No. 1A2731 slat you must give the exact width of the metal bed, measuring from outside to outside of the side rails when the bed is set up.

Waverly Steel Coil Spring, $1.52. | **Our Garland Steel Coil Spring, $3.56.** | **Double Deck Steel Coil Spring, $4.96.**

No. 1A2822 Price for iron bed.....$3.60
Price for wood bed..... 3.56

Strong and rigid steel base frame. Twelve steel bars securely joined together by three rows of steel braces. Suitable for any weight person. Top in the full size is composed of 120 highly tempered steel spiral springs (smaller sizes in proportion), securely bound together with our patent interlocking top, and fastened at the base to the steel bars. No slats are required with this spring when used on metal beds, and only three wood slats necessary when used on wood beds. Finished in black japan. **Be sure to state kind and size of the bed for which you wish to use this spring.** Shipping weight, about 50 pounds.

No. 1A2824 Price for metal bed.....$6.36
Price for wood bed, without steel frame. 4.96

This is called a Double Deck Spring because the Bessemer steel spiral springs are about one-third longer than the spiral springs used in single deck steel coil springs. In the full size springs (smaller sizes in proportion) there are 117 of these long highly tempered steel coil springs firmly fastened with heavy steel wires running lengthwise and crosswise. When made for metal beds the springs are fastened on the bottom side to a rigid angle steel frame with heavy steel cross slats. Finished in black japan. No slats required for this spring when used on metal beds. Furnished in all sizes. **Be sure to state kind and size of bed for which spring is wanted.** Shipping weight, about 70 pounds.

WOOD FRAME SPRINGS

e rails and end bars of our Wood Frame Springs are made of seasoned hardwood, coating of good quality varnish. They will not warp nor split. The corner con-
exceptionally strong, being fastened with heavy iron bolts. They can be used
ood or metal beds as desired. **When made for wood beds** the side rails are set at the extreme outer edge of fabric on each side. **When made for metal beds** the side rails are set inward 2 inches from the edge of the fabric, which allows the end bars at each of the four corners to rest on the iron side rail of the bed, and the side rail of the spring to fit inside the side rail of the metal bed.

Price for wood bed, all sizes..... 2.19

Hard maple frame, firmly fastened at each of the four corners with strong bolts. Fabric has a close mesh, single weave, with corded edges and thirteen inner cords distributed uniformly across the surface. Fabric is supported by three rows of steel coil springs made of the best quality of high carbon steel wire and intercoiled with heavy steel cross wires and border wires, attached to the frame with steel rods and spiral steel springs. All sizes except for the 36-inch bed. **Be sure to state size and kind of bed for which spring is wanted.** Shipping weight, 45 pounds.

BOX SPRING MATTRESSES

OUR BOX SPRING MATTRESSES are made for us by the largest, best known and most reliable manufacturer of this kind of goods in the world. Only the very best skilled workmen are employed and the highest grade of materials used. We absolutely guarantee that we will give you a box spring that cannot be excelled in strength, durability and comfort.

THE FRAME is made of thoroughly air seasoned and kiln dried Northern hardwood, perfectly joined and firmly bound crosswise with heavy slats. The joints are all glued and nailed, making them absolutely
The illustration shows the frame made with a rabbet edge for use on metal
ended edges rest upon the side and end rails, thus doing away with bed slats.
the edges are made straight.

NGS are extra long, double cone shaped and made from the best high carbon spring steel, oil tempered. They are securely fastened to the cross slats
heavy staples and tied, cross tied eight ways and knotted at the top with the best quality Italian hemp twine, and then covered with a clean burlap. A heavy rattan extends entirely around the spring, to which the outer row of springs is firmly attached, giving a strength and durability much greater than all other makes of box springs. In our full size box mattress we use seventy-two springs and a proportionate number in the smaller sizes.

The width of upholstered springs for metal bedsteads is always the **same as the outside measure of the rails,** 54 inches, 48 inches, 42 inches, 36 inches, and the regular length is 76 inches. Springs for a wood bed are regular 1-inch space all around. If the bed spring measures 54 inches by 76 inches, the regular size of spring for wood bed should be 4 feet 4 inches by 6 feet 2 inches. **Be sure to state whether the spring is for a wood or metal bed.** Shipping weight, about 100 pounds.

No. 1A2832 Box Spring With Flax Fiber and Cotton Top. The flax fiber used on the top of this mattress is made from the best quality flax, absolutely clean and wholesome. It is covered with a layer of cotton, and makes a very comfortable and satisfactory filling. Covered with a good grade of sateen ticking. Price..... **$9.95**

No. 1A2833 Elastic Felt Top Box Spring. Elastic felt, as shown in the illustration, used on our box mattresses is made of pure, long staple white cotton, thoroughly cleaned, carded and woven into sheets or layers the full size of the mattress. These sheets are placed on a foundation of flax fiber and have great tensile strength, softness and resiliency and will not pack, spread or lump, which makes an exceptionally good bed. Covered with a good grade of heavy sateen ticking. Price..... **$11.45**

No. 1A2836 Long Curled Hair Top. The best box mattress in the market. Read what we say on page 633 about the hair used on the top of a fine flax fiber foundation in our mattresses. This box mattress is made up with the very best quality satin finished ticking obtainable. Price..... **$13.95**

COTS, CRIBS AND CRADLES

We call special attention to the construction of our Cots, Cradles, Cribs and Folding Beds, as they are all made with screw construction so that when shipped they are packed in a condensed and small package, thereby greatly reducing the freight charges. Anyone can set up our cradles, cribs or folding beds without any difficulty, as the parts do not require special fitting. K. D. means knocked down, or in other words, in parts. By shipping goods knocked down the freight charges are greatly reduced. Shipped from Kansas City, Mo.

FEATHERS AND PILLOWS

ENTIAL QUALITIES OF A GOOD A perfectly satisfactory pillow must clean, sanitary and odorless. It ellent and buoyant, with a springy nsure perfect comfort and the best g qualities. Feathers when taken l contain oil and animal matter on quills. This must be entirely If left on the quill, it will decom- ful smelling and insanitary pillow Every feather we sell in the bulk ow is cleaned and purified by our ns. The feathers are placed in drums and subjected to alternat- of hot and cold blasts of air, which e animal and foreign matter and clean and wholesome. The life, buoyancy of the feathers are in- 50 per cent by this special process.

THERS AND PILLOWS, from the the highest price, are pure, clean, wholesome, the equal in quality of in the best and most exclusive large city rice one-third to one-half more than we ask.

WER GRADES OF FEATHERS AND consisting of chicken, duck and mixed will find clean, sanitary and wholesome. ked by our binding guarantee of quality. to call your special attention to our Purity ers and Pillows. They are a specially a superfine choice quality (the coarse eing taken out) with the greatest possible y, buoyancy, resiliency and softness. In the of stock they cannot be excelled.

HITE LIVE GOOSE FEATHERS. These a special super-extra grade of pure snowy Small in size with a slender stem and shape than any other feathers. The ume is the finest fiber and the lower part own. The animal oil is entirely removed the greatest buoyancy, softness and re- ght, airy, absolutely sanitary and non- ey make the best pillow it is possible to

TURKEY. DUCK. WHITE GOOSE. GRAY GOOSE. CHICKEN.

THE ILLUSTRATION above is an exact photographic reproduction of the five different kinds of feathers used in our pillows.

PURITY BRAND PILLOWS
TRADE MARK
EXTRA QUALITY

OUR PURITY BRAND TRADE MARK as illustrated above is stitched on the ticking of each pillow and stenciled on outside of muslin bag of feathers of the several grades, as mentioned in list below.

OUR PURITY BRAND FEATHERS AND PILLOWS. Each one of the grades of our Purity Brand Feathers and Pillows, as mentioned in the list below, is extra choice in quality. They are specially selected, have the largest filling capacity and buoyancy per pound and without doubt or question are the most cleanly, sanitary, sweet, pure and wholesome product that can be obtained.

PRIME GRAY LIVE GOOSE FEATHERS. These feathers are plucked from the live gray fowl; are a little larger in size with a slightly coarser stem and less curl than the prime white live goose feathers. The wing, tail and large body feathers are all taken out of this grade. In softness, elasticity and buoyancy these feathers are excelled only by our Prime White Live Goose grade. The animal oil is entirely removed and they are absolutely pure, sanitary and odorless.

PRIME LIVE DUCK FEATHERS. These feathers have a filling capacity, a buoyancy and softness almost equal to live goose feathers. In their original state when plucked from the fowl they contain more oily animal matter. In this grade the coarse wing, tail and body feathers are eliminated. Every particle of oily animal matter is removed by our special curing process of subjecting them to alternating currents of steam, hot and cold air, which renders them absolutely odorless, wholesome and hygienic.

TURKEY FEATHERS. In this grade the small size feathers only are used. The quill or stem is practically removed from the plume of the feather by perfect machinery which also eliminates the oily animal matter, as this oil is lodged on the stem. The fiber of the upper part of the plume is coarser in texture than any other feather, but the lower part has a soft downy texture. **This feather, by our special process of curing, is rendered buoyant, soft, odorless, wholesome and resilient and makes a very satisfactory pillow.**

CHICKEN FEATHERS. In the preparation of these feathers for pillows the same special care is taken as in the better grade feathers. The large coarse feathers are removed, the smaller dry plucked ones only being used. They are subjected to our special process, thoroughly cured by steam, hot and cold blasts of air and crushed to increase their buoyancy and filling capacity. This feather is guaranteed odorless, sanitary and hygienic and will make a satisfactory pillow at a very low price.

Steam Cured Feathers.

52 Grade C3. Mixed feathers. Steam dressed A better quality than is offered by any other price, but we do not recommend this grade. recommend our No. 1A2955 as the best moder- thers which are entirely satisfactory. **31c**

Sanitary, Clean and Hygienic

MATTRESSES

Dependab Durable Comforta

Our CLIMAX BRAND Mattresses are MADE, not "Stuffed." The filling material is placed within the ticking in layers of uniform thickness. The tufting and stitching accurately done. The best mattresses of this kind that modern machinery and skilled workmanship can produce.

GUARANTEED QUALITY CLIMAX BRAND MATTRESSES

OUR CLIMAX BRAND TRADE MAR illustrated at the left is printed on a label and stitched on the end of Cl Mattresses described on this and the next Look for the label.

The Above Label Is a Guarantee That the Mattress Is Made of Clean, New Stock Throughout and Is Thoroughly Sanitary and Hygienic.

OUR CLIMAX MATTRESSES are made by the very latest improved modern electric machines. Ordinary mattress makers and mattress factories are not equipped with these labor saving machines, and as a result, the mattresses made in ordinary factories cost more to produce, and the materials entering into their construction are not properly cleaned and prepared.

THE FILLING MACHINE is a modern invention devised for perfect inner construction or building of mattresses. The ordinary method of stuffing a mattress ticking, no matter how carefully done, leaves filling in lumps, and when in use a short time, becomes full of bumps and hollows. The filling machine spreads each layer of filling in a perfectly uniform length and thickness, one layer upon another and compresses them to desired thickness. The ticking is drawn over them, one end of sewed up ticking having been left open for filling process.

THE SEA MOSS, CORN HUSKS AND FLORIDA MOSS used in our mattresses are all run through a large electric machine called the "Picker" and "Blower" which removes every particle of dust, grit and other impurities generally found in best grade of mattresses sold elsewhere.

THE EXCELSIOR used in the construction of our Combination Mattresses is made from selected white basswood. It is cut and curled into long spiral shape fiber. This fiber is very elastic and absolutely clean and sanitary. Excelsior used by many other dealers is made from brash fibered stock which easily breaks, mats and packs.

THE HUSKS we use in our mattresses are specia corn husks as they come from th inner soft layers only being used. These layers are curled into spiral shape and strands over which clean spread.

SEA MOSS is a purely vegetable fiber which grow tom of the sea. The mere name mean much, as there are several qualities of use only the very best imported quality, which has the and medicinal qualities for which it is renowned. W guarantee our sea moss to be the best quality known

THE FELTED COTTON used in the construction mattresses we guar absolutely new, clean cotton. Many other dealers quality of cotton linters and many others use a which is nothing more than ground rags. We do not sell them under any The cotton used in our mattresses is put through a felting machine which layers of even thickness.

THE TICKING should be of a quality that will not stretch nor tear and strong enough to prevent a spreading of the mattress. W a ticking that will not stand the test. The grades we use are very closely fabric, guaranteed to give perfect satisfaction.

THE TUFTING. The filling having been properly prepared and placed in mattress is put into the tufting machine which make biscuit shape tufts, depending on kind of filling used in mattress. All tufts are and accurately and evenly placed same distance apart.

ABOUT CHEAP MATTRESSES.

It is not economical for anyone to buy a mattress that is not made of dependab and constructed in such a manner as to give several years of satisfactory service. W the past offered a plain excelsior mattress as low as $1.37 and a cotton top exce as low as $1.68, but we have dropped them from the list of mattresses which we of furnish you a full size plain excelsior mattress for $1.37, or a cotton top excels for $1.68, which are made of better material, better finish and better constructi can buy of any other firm at these prices. If you want either of these mattress your order for No. 1A3098, plain excelsior mattress, price $1.37, or for No. 1A3 excelsior mattress, price $1.68, and either will be shipped to you at once. For the ference in price we recommend our No. 1A3108 or No. 1A3111, as shown in the

REVERSIBLE EXCELSIOR MATTRESS.

Felted Cotton Top and Bottom. Good Quality Ticking.

No. 1A3108 This mattress has a filling in the center of the best grade of white basswood ribbon band excelsior of uniform thickness from end to end and from side to side. The top and bottom are overlaid with thick sheets of clean new cotton. It is covered with a good quality of ticking and has full bound edges, closely stitched ends and sides and diamond tufted. The top and bottom have deep tufts, evenly and accurately placed the same distance apart and held in place with strong tufting stays. This mattress is made, not stuffed. The usual method of filling a mattress ticking, no matter how carefully done, leaves the filling uneven and after being used a short time it is full of bumps. The filling in our mattresses is spread in uniform layers from end to end and side to side, and compressed to the proper thickness. A mattress that can be used either side up and will prove perfectly satisfactory.

HUSK COTTON TOP MATTRESS

Spiral Curled Soft Inner Blades. Felted Cotton Top. Good Ticking.

No. 1A3111 This Mattress is made in three layers. The lower section of the inner soft blades of corn husks, carefully selected, hand stripped and They are thoroughly dried and cured, and by our special process curled shape strands. The top section is made of clean new felted cotton, below thin layer of choice selected white basswood excelsior, to securely hold the in place. Each layer is uniform in thickness throughout the mattress and to the proper thickness. It is covered with an excellent quality of twill ticking deep diamond shape tufts, securely held in place with strong tufting stays are full bound and the sides and ends closely stitched.

We specially recommend this mattress as it makes a sanitary, comfortable iceable bed and will prove exceptionally satisfactory in every way. A hus mattress is generally sold in stores and other channels of trade at $4.50 to

REVERSIBLE HUSK MATTRESS.

Felted Cotton Top and Bottom. Five Uniform Layers. Excellent Ticking.

No. 1A3118 This Mattress is filled with selected Tennessee corn husks, hand cleaned, stripped and curled into spiral shape strands and laid in the center of the mattress in uniform layers. The top and bottom overlaid with thick sheets of clean new felted cotton with a thin layer of fine excelsior between the cotton and the husks to more firmly hold the cotton layers in place. It is covered with a superior quality of strong serviceable ticking with full bound edges, closely stitched ends and sides and with deep diamond shape tufting with strong tufting stays. Each tuft is evenly and accurately placed the same distance apart. Some mattress makers in order to quote a low price use an inferior grade of husks containing the coarse rusty rough outer blade and butts. We use nothing but the choice selected soft inner blades. The wearing qualities and comfort of a mattress are almost double when it is reversible (can be used either side up). **WE CHALLENGE THE MOST CAREFUL INSPECTION AND COMPARISON.** You will find our husk mattress like the old fashioned kind in material, and constructed by the best modern improved method which insures a perfect evenness of the filling layers and will always be comfortable and durable. We highly recommend this mattress to those who want a serviceable and comfortable bed at a moderate price.

WHITMORE RED CROSS ELASTIC FELT MATTRESSES

Built, Not Stuffed.

Interlacing Fibrous Sheets Laid One Above the Other.

Uniform Thickness.

Perfectly Tufted and Stitched.

Solid Comfort in Every Square Inch.

An Occasional Sun Bath Will Keep it in Perfect Condition.

NONE GENUINE WITHOUT THIS TRADE MARK.

Every mattress bears a genuine Whitmore trade mark label, exact copy of which is shown below. Shipped from Kansas City, Mo.

THE BINDING on the Genuine Whitmore Elastic Felt Mattress shown on this page is a special quality high grade tape, with the name "Whitmore" woven in the center, as shown in this illustration.

HOW THEY ARE MADE Our felt mattresses are made entirely from cotton and it is the wonderful method of treating this cotton that results in their superior qualities. The cotton we use is absolutely pure and is treated by process of air, dry heat and steam, which cures, cleans and prepares the fibers for successive handling. The cotton fibers in passing through the felting machine are formed one layer over another which unite and interlace into a light, airy, fibrous sheet. The felt sheets are laid one upon another and compressed to a fraction of original thickness and enclosed in the ticking. The softness is evenly distributed and it is impossible for our elastic felt mattress to bunch up, mat down or shift. The tufts are the same distance apart and of the same tension. Stitching and boxing of the border is carefully done.

THE IDEAL BED. You will never know what real comfort is until you [illegible] rest means until you sleep on one of our elastic felt mattresses. This is our offer: [illegible] us your order. Enclose our price. If you desire, send your order at the same time [illegible] any other mattress advertised by others. Compare them both carefully. Note the [illegible] construction and finish, etc. Try both mattresses. After comparison, test and trial, if [illegible] do not find our mattress far superior, then you are under no obligations to [illegible] Return our mattress at our expense, and we will return your money, including [illegible] charges.

SAMPLES FREE. As there are many inferior grades of so called elastic felt mattresses on the market, we will, upon request, send postpaid free of all charges, sample of ticking and felt used in our Whitmore sanitary elastic mattress. You will find them much better, quality for quality, than any other make.

45 POUNDS

A FULL WEIGHT MATTRESS SHOULD WEIGH 45 POUNDS. We call special attention to the weight of our mattresses. Our full size mattresses weigh 45 pounds unpacked and the smaller sizes in proportion, as noted in the list below. **All weights guaranteed.** Many other dealers offer mattresses of weight which weigh only 40 pounds. We could sell our mattresses at still lower prices by reducing weight, but a full size mattress which weighs only 40 pounds as offered by other dealers is too [illegible] and will prove unsatisfactory.

We guarantee this mattress to be the same grade sold by other dealers at $10.00 to $11.00 and possesses the same qualities found in elastic felt mattresses of this grade. It is covered with a good grade of ticking, full bound and tufted. **A good mattress at a moderate price.**	$6.25	$6.15	$5.60	$5.20	$4.90	$3.80	$2.[illegible]
No. 1A3151 Our Reliance Elastic Felt Mattress. This mattress is made of an excellent quality of felt which we guarantee will give entire satisfaction. It should be compared with mattresses generally sold at from $11.00 to $12.00. It is covered with a good grade of satin finished ticking, full bound and tufted. Has standard 4-inch border and the one-piece 4-foot and 4-foot 6-inch sizes are fitted with two handles on each side for convenience in handling. For the difference in price, we highly recommend this mattress in preference to the Sterling grade.	7.25	7.00	6.65	6.15	5.75	4.40	3.[illegible]
No. 1A3152 Our Dreamland Elastic Felt Mattress. In this mattress we use a choice quality of elastic felt. It is heavier in weight, of longer fiber stock and tensile strength than you will find in any mattresses offered by any other dealer at $12.00 to $14.00. It is covered with a fine quality satin finish ticking, with large cotton tufts, full bound edges, and standard 4-inch border. Many other dealers offer a full size mattress weighing only 40 pounds as full weight. A full weight, full size mattress should weigh 45 pounds to prove satisfactory.	8.75	8.65	8.05	7.70	7.05	.....	.....
No. 1A3153 Our Luxury Elastic Felt Mattress. Better than mattresses sold by others at $15.00. Made of extra long fiber white felt of the greatest resiliency and buoyancy. An interwoven and interlaced texture absolutely pure in stock and uniform in thickness. Covered with an extra fine quality satin finish ticking. Top and bottom closely tufted; sides and ends closely stitched, full bound edges and standard 4-inch border. A perfectly ideal bed; every square inch of a springy softness that insures absolute comfort from head to foot. Will not pack, mat nor lump, and will last a lifetime. **Full 45 pounds weight.**	10.35	10.10	9.50	8.55	8.10	.....	.....

GENUINE WHITMORE RED CROSS BRAND

EAT REDUCTION IN PRICE **An exceptionally favorable contract for the materials used in this mattress enables us to reduce our price to $11.95. ıave never before been able to sell this mattress for less than $12.95. Now is the time to buy.**

OD BED **is a physical necessity. An absolutely even elastic surface, soft and springy yet firm, is the necessary quality od mattress.** In this Genuine Whitmore Superba Elastic Felt Mat- attained the absolute perfection of mattress building. The elastic d in this mattress is of a special grade, made from pure white cot- great tensile strength and purity. These fibers are rigidly ınd carefully inspected, and by a chemical process every trace of y is removed and rendered absolutely germproof, mothproof, ver- f and waterproof. The carefully prepared material is lightly blown ınd by mechanical rotary air pressure is made into loose, flaky The sheets are then placed into a mammoth felting machine, the re drawn, curled and formed into double sheets, each joining and ıg one within the other into a perfect single sheet, wonderfully beautiful, light, airy and absolutely sanitary and perfectly non- nt. These thick, elastic, white sheets are then laid one upon er, compressed to about one-fifth their original thickness and enclosed in a handsome **mercerized French pattern art ticking,** cut to match, top and bottom, sides and ends accurately stitched and tufted. The tufting of the Genuine Whitmore Superba Elastic Felt Mattress is perfectly done. Each tuft is of the same size, space and tightness of tension. The finest quality of hemp twine and cotton stays absolutely guaranteed not to pull through or fall out. This insures an absolute uniformity of thickness, softness and elasticity, when every square inch exactly duplicates the other, making a perfect and ideal bed which brings comfort from head to foot. **Imperial roll edge** and **rounded corners** are special features of this Superba Elastic Felt Mattress. The roll is closely and carefully stitched around the entire outer edge on both sides, the best and most durable method of construction which not only preserves the shape but improves the appearance. In purity of stock, perfection of construction, comfort giving and wearing qualities this mattress cannot be excelled at any price. It has an extra wide 5-inch border, and the one-piece mattress, 4-foot and 4-foot 6-inch sizes, are fitted on both sides with handles, as shown in the illustration.

AD WHAT WE SAY ABOUT FREIGHT CHARGES. All mat- are carefully packed in heavy paper and new burlap, and safe guaranteed. For other elastic felt mattresses see pages 633 We have them as low as $5.25.	$11.95	$11.25	$10.55	$9.75	$9.45	$6.65

MBER, THE FREIGHT TO ANY RAILROAD STATION IN NITED STATES **on this mattress is but a very small item compared with what you save in price.** We do not his mattress freight prepaid. If we did we would have to make prices so as to cover freight charges to the most distant points, e customer living 100 miles away would be helping to pay the to the customer 500 miles away. This mattress weighs, packed for rt, about 55 pounds. The freight for 100 miles from Kansas City, Mo., 25 cents, for 200 miles 35 cents, for 300 miles 40 cents, for 500 miles 45 nd for 1,000 miles $1.05, and greater or less distances in proportion, see the freight charges amount to practically nothing as compared hat you save in price by buying from us.

LES FREE. **If there is any doubt in your mind of the superior quality of the Whitmore Superba Elastic Felt Mattress** as compared with felt mattress, regardless of name, make or price, do not order any felt mattress have sent to us for a sample of the ticking and the super-extra grade of snowy stic felt, which we will be pleased to send to you upon request, postpaid and free Compare the felt and ticking furnished by any other d you will find the elastic felt used in the Genuine Superba Elastic Felt Mattress so far superior in length e strength of the fiber, in springy softness and elasticity, e white purity of color that it is in a class by itself, ualed and unrivaled mattress The ticking is a very closely tile fabric with qualities that e excelled.

50 POUNDS. **We call special attention to the weight of this Superba Elastic Felt Mattress.** It weighs **50 pounds,** unpacked, in the full size, other sizes in proportion, as noted in the price list above. **All weights guaranteed.** Many other dealers offer mattresses as full weight which weigh only 40 pounds. We could sell our mattresses at still lower prices by reducing the weight, but a full size mattress which weighs only 40 pounds as offered by other dealers is too thin and will prove unsatisfactory.

SIX MONTHS' TRIAL.

Send us your order for this Genuine Whitmore Superba Elastic Felt Mattress, enclose the price, $11.95, and when you have received it, compared, examined and tested it, by sleeping on it for six months, we give you the privilege of returning it to us and we will immediately return your money together with the freight charges.

BETTER STILL, **at the same time you send us your order for this splendid mattress** send your order to any other dealer for any other mattress, regardless of **name, make or price,** and when you receive them place them side by side, examine the filling, the ticking, the sewing, the tufting, and if, after comparison, test and trial, you do not find our mattress far superior in every way you may return it to us and we will at once return your money, together with the freight charges.

UP TO DATE DESIGNS

UPHOLSTERED FURNITURE

BEST IN QUALITY

NO ARTICLES of furniture in the modern home are more important than a parlor suite, divan, fancy chairs and couch. No class of furniture offers so great an opportunity for deception as upholstered furniture. It is not enough to say that a piece of parlor furniture is attractive in appearance. The essential qualities of a perfectly satisfactory piece of upholstered furniture are strength and durability of construction in the frame and spring work, lasting and serviceable wearing qualities in the coverings, combined with beauty and harmony of design. In our upholstered furniture the frames are made of thoroughly seasoned wood. They are mortised, glued and fastened in a dependable, workmanlike manner, insuring substantial and lasting wearing qualities. The surfaces are sanded smooth, the carvings carefully cut and cleaned, the wood filler and varnish used are of high standard of quality that insures a clear, transparent color and sheen that do not readily become dull with age. The springs are made of the best quality high carbon and are fastened at the top and bottom in the strongest possible manner.

THE FRAMES OF OUR COUCHES are made of carefully selected, thoroughly seasoned, Northern hardwood. The front rails are faced with handsomely figured quarter sawed oak veneer, a method of construction adopted by all makers of strictly first class furniture. By this method of construction shrinkage, warping or checking is prevented and the handsomest grain of the wood is brought out.

THE COVERING MATERIALS

To give our customers a better understanding of the materials which we use in upholstering our furniture, we give below a description of the ture of the different materials. When parlor suites are upholstered in Velour or Figured Silk Damask, each piece comprising the suite is upholstered in a different shade, but all shades are selected with great care so they will harmonize. We will furnish the entire suite in the same color throughout if desired, but we recommend a combination of colors except in materials which can be procured in only two colors, such as Single Tone Plush, Two-Tone Plush, Crushed Plush and Car Plush. When these materials are used it is advisable to have the suite upholstered in the same color throughout.

FIGURED VELOUR.

Our high colored figured velour is a cloth universally known and is the kind of covering most generally used. It is woven like velvet, but with a higher and heavier pile, is soft and has the velvet effect. The high colorings are put into the ground of the cloth by an extra process. **The body colors are red, green or brown, and the pattern combinations of artistic colors, which make the total effect very striking.** There are many grades of velour on the market, but **WE USE NONE BUT THE BEST.**

SINGLE TONE PLUSH.

An entirely new covering for upholstering purposes, and has proven to possess most excellent wearing qualities. The body of the cloth is woven in a block pattern of one solid color with a raised effect. It has a raised nap. An exceptionally desirable and attractive covering. **We can furnish this covering in single tone solid colors of myrtle green, deep red or tobacco brown.**

TWO-TONE PLUSH.

This is one of the very latest and most desirable weaves in coverings for upholstering furniture. The nap of the cloth, which is very long, is woven in fancy block patterns and combinations of green and black, red and black, tobacco brown and black with a solid color background in a terry effect to correspond with the nap. This cloth is very heavy and made of selected materials and colorings, and is used only on high grade furniture. It is guaranteed to have exceptionally good wearing qualities and is a handsome, strikingly attractive material that is sure to please.

VERONA PLUSH.

This luxurious fabric is one of the handsomest coverings for high grade furniture it is possible to procure. It is made with a raised figure of handsome floral design in two colors, combinations of green **and black** or red and black with background to match the body of the cloth. The large **floral figure** is made with a long nap, the same as the finest plush cloth and is extra heavy. Only the strongest colors are used, giving the furniture when finished a most luxurious appearance.

CRUSHED PLUSH.

This covering is universally known and is made in several different grades. It is made of a specially selected high grade fur with extra long nap, very closely woven into the cloth and the entire piece put through the crushing process, which brings out the rich shaded effects of this splendid covering. The color is absolutely **fast and guaranteed not to fade.** The splendid wearing qualities of the fine quality of this covering which we use cannot be excelled. We want you to compare this splendid **QUALITY** of crushed plush with the ordinary grades generally used by other manufacturers, and you will readily note the better texture, longer nap, closer weave and better colors in the cloth used on our furniture. Furnished in **dark red, dark olive green and dark golden brown colors only.**

FIGURED SILK DAMASK.

This material has been used for many years and has proven a very desirable material for parlor suites, fancy chairs and rockers. The cloth is made up of handsome flowers woven into the cloth and not printed. Yarns are well selected and dyed before being woven into the tapestry, thereby producing fast colors. Flowers are all silk on a mercerized ground, giving it a rich and lustrous appearance that will outwear the all silk damask. The cloth is made up of colors to harmonize, and when made into suites a different grade is generally used on each piece. Our customers can select a color for each piece the same as all furniture is upholstered after the order is received, but we advise leaving selection of color to the manufacturer, who employs the most skilled mechanics with many years experience.

BROCADED PLUSH.

One of the most popular upholstery coverings. It is adapted for use on any style of furniture. Excellent wearing qualities. Thick, closely woven nap on a heavy fancy patterned woven warp, securely interlocked. The nap is woven in figures (brocaded). The colors are absolutely fast and have a mercerized silk finish with a lustrous sheen. Furnished in olive green or dark red colors only. The background in colors to match the body of the cloth.

PLAIN SILK PLUSH.

Plain silk plush is one of the most popular upholstery materials used for parlor suites, fancy chairs and rockers. It is especially attractive when used as coverings for chairs. The nap of the cloth is made of the finest silk yarns, woven very close, and has a luxurious velvet sheen. It is all silk and the yarns are dyed before weaving, thus making the colors absolutely fast. **We furnish this handsome covering in olive green or in solid colors,** either of which will harmonize with almost all surroundings.

PANNE PLUSH.

This is one of the most attractive and best wearing coverings used in the upholstery furniture. It has a heavy linen warp with a **silk nap, very closely woven.** It has a lustrous appearance. It is used only on high grade furniture and is specially adapted for the covering used on three-piece parlor suites. This cloth is very heavy and will stand the most exacting taste. **We furnish this covering in dark olive green, solid color** which will harmonize with almost all surroundings.

CAR PLUSH.

Car plush is one of the best staple coverings that has ever been produced. It takes its name, car plush, from the fact that it is so extensively used in covering cars and is especially selected for this purpose on account of its durability. Fabrics that look well do not wear well soon go out of style, but a couch covered with car plush is always in style and will look well and wear like leather.

There are many grades of car plush, some being made with the pile of the cloth of wool and mohair mixed, others with cashmere and mohair mixed, or in other combinations, the cheapen the cost of production. We use only the very best grade of genuine all wool car plush, which is the only fabric that will hold its color absolutely, and there is no other even including wool, silk or linen, that will hold its color as well as mohair. We guarantee it not to fade. **We can furnish it either in deep red, myrtle green or tobacco brown.**

OUR LEATHER COVERINGS.

Owing to the many inferior grades of leather offered by some dealers, we illustrate and describe the different grades of leather obtained from a hide, in order that our customers may not be deceived by any of the inferior couches, davenports and parlor pieces which are offered at a much less price when covered with the cheapest quality of leather.

THE ILLUSTRATION shows a section of a hide split into three parts. The part marked No. 1 shows the outside of the hide which has a natural grain and a soft, pliable surface, and is the **A grade, the very best quality genuine No. 1 leather.** It is the quality which we recommend **and back by our binding guarantee.**

THE PART MARKED No. 2 LEATHER is taken from the **middle of the hide and is not so soft and pliable,** has an artificial grain and is susceptible to heat and cold and likely to crack and lose its finish. **This is a grade commonly used by many dealers** and is called genuine No. 1 leather. We do not recommend this quality. **We quote it only to meet competition.**

THE PART MARKED No. 3 is the part of the hide next to the flesh. It **is the poorest grade of split leather.** It is soft and spongy, and artificially grained in imitation of the No. 1 quality. This part of the hide is worthless as upholstery covering. It will crack and peel very easily with use.

IMITATION LEATHER.

There are several grades of this covering, the cheaper quality being made with a light weight fabric in the back and with an inferior quality of leatheroid coating. We use a much **superior quality** of imitation leather on our upholstered furniture as compared with that used by most dealers. **The imitation leather we use will give excellent service** and is exceptionally attractive in appearance.

Fabrikoid leather is one of the best and most widely known grades of imitation leather. It serves as a substitute for leather in upholstering furniture, and can be produced at a very much lower cost. The body material is made of **heavy sateen fabric,** coated, finished and grained to exact imitation of the finest grade of hand buffed black leather. It is guaranteed by the manufacturer not to crack nor peel off. Very much has been said about the lasting qualities of Fabrikoid leather; in fact the manufacturers of the material are so outspoken in the matter that they declare it will wear fully as well as genuine leather, and we do not hesitate to state that it will certainly wear far better than any of the inferior grades of leather, and in appearance it takes an expert to detect the difference between it and leather

Imitation Spanish leather. The body of the material is made of **sateen fabric,** on the upper side of which is a coating of leatheroid fully grained in a perfect imitation of Spanish leather. It is soft and pliable and is guaranteed by the manufacturer not to crack nor peel. We finish it in nut brown color.

Compare the EXTRA FINE QUALITY, the Harmony, Beauty and Fastness of Color, Closeness of Weave and Firmer Textile Structure of the High Grade Coverings We Use on Our Upholstered Furniture With the Ordinary Grade Generally Used by Other Dealers.

BE SURE TO READ THIS

We give above a description of the textures of some of the different materials used on our upholstered furniture, and while the descriptions doubt give an excellent idea of the nature of the materials, yet it is impossible to fully describe the handsome designs and harmonious colors parlor suites, couches, divans, davenports, rockers and chairs, or the beautiful new textures which are produced from season to season by the facturers who make this class of work a specialty. In order to make it possible for our customers to see exactly what materials are used, made special arrangements with the manufacturers of the upholstering goods to supply **extra large samples** from which to make a selection. **return the sample of covering** you select, with the order. It will prevent any mistake with pattern or color. All our upholstered furniture after your order is received. About ten days' time is required before shipment is made.

SAMPLES FREE. If there is any doubt in your mind of the superior quality of the covering materials used on our upholstered furniture, as compared with those offered by any other dealer, regardless of name, make or price, DO NOT ORDER any upholstered piece of furniture until you have sent to us for a sample of the covering materials used on our upholstered furniture, which we are pleased to send to you upon request, postpaid, as explained below. Compare those furnished by any other dealer and you will find the covering materials used in our furniture so far superior in figured pattern, harmony, beauty and fastness of color, closeness of weave and textile strength, that they are in a class by themselves.

By special arrangement with the manufacturers of the different materials used in our Upholstered Furniture Department we are able to furnish complete sets of the different kinds of materials in the different shades used on our upholstered furniture. These sets are made up of extra large pieces and will enable you to make a selection of the material and color which you desire far better than you could without the samples or from a description only.

SET No. 1 consists of extra large sample coverings for Parlor Suites, odd Rockers and Chairs. This set contains samples of Figured Velour, Single Tone Plush, Two-Tone Plush, Verona Plush, Crushed Plush, Brocaded Plush, Plain Silk Plush, Silk Damask and Panne Plush. These samples show the full pattern or figure of the goods and all the different colorings in each particular pattern. This complete set will be sent to you by mail or express, prepaid, on receipt of $1.00 **and when they are returned to us at our expense** we will return your $1.00, or if you send us an order at the same time you return the set of samples we will allow you $1.00 on your order.

SET No. 2 contains extra large sample coverings for Couches, Davenports, Roman Davenports and Bed Couches. This set consists of large pieces of Figured Velour, Single Tone Plush, Two-Tone Plush, Crushed Plush, Verona Plush and Car Plush. These samples show the full pattern or figure of the goods and show all the different colors of each particular pattern. This complete set will be sent by mail or express, prepaid, on receipt of $1.00, **and when they are returned to us at our expense we will return your $1.00, or if you** send us an order at the same time you return the set of samples **we will allow you $1.00** on your order.

BE SURE TO STATE whether you want Set No. 1, showing sample covering for Parlor Suites, Rockers and Chairs, or Set No. 2 for Couches, Davenports and Bed Couches, as the materials in these sets are not alike and we send but one set upon receipt of $1.00. If you want to order a Parlor Suite, Rocker or Chair and a Couch, Davenport or Bed Couch, we recommend that you send $2.00 and get both sets under the same conditions as we offer one set.

REMEMBER THAT IT COSTS YOU NOTHING to use the samples and return them, we will return your money **full or credit it on your order and the samples are sent prepaid and are** returned at our expense. We would gladly furnish either of these complete sets of large samples without asking the $1.00 deposit, but you can understand that there are a great many samples in a set and a large amount of material is used to make one of these complete sets of samples, the actual cost of each set being more than $2.00, and only as a matter of good faith we request this deposit of $1.00 for each set.

SPECIAL SETS OF SMALL SAMPLES. We also furnish free, without cash deposit, small samples of each kind of covering used on all of our upholstered furniture. These samples show the quality and color of the material, but only a part of the figured pattern of the goods. **If you should desire any of these small samples, be sure to state the number of the pieces of furniture and the kind of covering desired.** They will be sent to you at once, postpaid.

DO NOT DELAY YOUR ORDER by writing for samples, since we can take order from the descriptions given **of the different covering materials which we use in upholstering our furniture.** We are willing that you should order direct from this catalog and these descriptions, by ordering or writing for samples and we will send the goods to you with the understanding and agreement that they must reach you in perfect condition and that they prove entirely satisfactory to you and that you will find that you have made a saving in price; otherwise the goods can be returned to us and we will refund your money.

IS A BIG DIFFERENCE THE METHODS UCH CONSTRUCTION

COUCHES

IT IS THIS DIFFERENCE THAT COUNTS IN THE YEARS OF SERVICE

E LATEST, BEST AND MOST POPULAR STYLES—FRAMEWORK, SPRINGS, COVERINGS UNQUESTIONED IN QUALITY

Couches are built to wear, to give perfect comfort and tion with constant daily use. The frames are and rigid. Made of seasoned wood in the pop- iden finish. In the coverings, springs, canvas ffing we use a much better grade of material generally used by the average manufacturer. aterials are purchased in carload lots. We u to read every word we say about the style ality of our upholstery coverings on page 636. ice to you is the actual manufacturing cost ly one profit and we save you at least one- a price. We take almost the entire output of the largest and best known couch factories. ouch is shipped under our binding guarantee ity.

THIS PICTURE SHOWS OUR GUARANTEED INDESTRUCTIBLE ALL STEEL SPRING CONSTRUCTION.

Our Guaranteed All Steel Spring Construction.

The high grade of wire used is a guarantee of the lasting qualities of the spring construction which we use in all of our better grade couches, as mentioned in the description of each number. When no mention is made of the all steel construction we use the old method of tying the springs with twine. The number of springs used is mentioned in the description of each couch and varies according to the style. Every spring is cone shaped and drawn from the best high carbon spring steel wire. The springs on the bottom sides are coiled and set into steel band irons which run crosswise on the bottom and are fastened to the top of the side rail and can never get loose. They are reinforced with a steel wire running lengthwise on the bottom into which the springs are intercoiled. The top of the spring is tied and cross tied with steel wire. Clean, sanitary, can't break loose. Always comfortable.

Look! Only $8.25

A Regular $12.00 Couch Elsewhere.

No. 1A3438

Just look at this big value before you buy a couch elsewhere! e style speaks for itself, and if every customer knew the reliable ality of the framework, springs and coverings as we know them re would not be the slightest chance for any dealer to sell you a aper quality at a much higher price. The frame is made of cially selected hardwood, veneered with quarter sawed oak, in a h golden color, high gloss finish. Deep carvings made of oak, heavy claw feet. It is 74 inches long and 27 inches wide, ing edges with seven rows of deep tufts securely fastened with celebrated steel tufting buttons, guaranteed not to pull It has our indestructible all steel construction, as described the top of this page, with twenty-four springs in the body and r springs in the head, twenty-eight springs in all. Illustration shows No. IA3604 open with removable mattress.

Our Patent Removable Mattress

The picture at the left shows our Patent Removable Mattress. Comfort, cleanliness and durability are combined in this bed couch mattress. The wonderful superiority of this mattress over the regular bed couch mattress cannot be fully appreciated until seen, examined and compared with the bed couch mattresses used by other dealers. **Made with full bound heavy ticking, guaranteed not to stretch or tear.** Filled with flax fiber and cotton, securely tufted and stitched. Attached to the sides of the frame by a very simple device and can be detached for airing with little effort. No bed is absolutely perfect, from a cleanly and hygienic point, unless it can be taken out frequently and given a good airing.

If you do not find our Patent Removable Mattress, together with the high grade woven wire spring with steel coil spring supports, cleaner, more durable and more comfortable, in fact, worth many times the slight additional cost, you may return this bed couch to us and we will immediately return your money, together with transportation charges. **We furnish any bed couch or bed lounge on this page with our Patent Removable Mattress at $1.00 more than prices quoted.**

Dependable Material, Construction and Finish.

DAVENPORT BED SOFAS

Easily Operated.

HOW THEY ARE MADE.

Frame made of thoroughly seasoned wood, carefully selected and well finished. The panels in the ends and the front rails, as mentioned in the description of each piece, are made of three-ply built-up stock, a method of frame construction adopted by makers of strictly first class furniture. Built in four sections. The ends bolted at the four corners to the box frame of the seat. The seat and back built on a separate hardwood frame are attached to the back posts and sides with our patent automatic ratchet folding attachment, a mechanically perfect device. Below the seat of each davenport is a roomy box the full length and width of the seat, which will hold the bed clothing necessary for a comfortable bed.

THE SEAT AND BACK.

Supported by the best high carbon steel coil spring construction, fastened at the top and bottom in the strongest possible manner, insuring an elastic and durable construction. When upholstered in leather the filling is a good grade of hair; when upholstered in the cloth coverings, a fine quality of flax fiber and felted cotton is used. When upholstered in leather or imitation leather (imitation leather), the tufts are diamond shape, and when upholstered in the cloth coverings the tufts are blocks shape.

We furnish armored nickel steel sliding casters for the davenport bed sofa. Will not mar hardwood floors. Saves the rugs on rugs and carpets.

This Picture Shows No. 1A3657 Open for Use as a Bed.

HOW TO OPERATE.

The illustration to the left shows our No. 1A3657 made up as a bed, 73x45 inches. All davenports on this page open up the same manner. Each one is fitted with an automatic device which it is easily converted into a large size bed and back again to a davenport sofa. To change into a bed, raise the seat, which is counterbalanced; when seat is raised the back lowers automatically; when back is on a level push seat up until it clicks. The seat can then be lowered to a level, completing the bed. To change back to a davenport, raise the seat until the ratchet clicks, then bear down on seat and the back will rise and the seat lower automatically; simple and easy; nothing to get out of order, and can be operated by a child.

Folds and Unfolds With One Easy Operation

Easifold Davenport Sofa Beds ly all the latest and best im- ments in automatic sofa bed ction. They are all made with nary backs, as shown in illus- s below. The seat cushion is uble construction and when p from inner edge, it is easily ed into a full size bed, 47 wide and 72 inches long. This supported by a sanitary all fabric linked to the all steel ame with high tension spiral s. The construction of the upper is all steel, thus making to operate and absolutely y and non-breakable. In our d Bed you do not sleep upon holstering, but upon a high spring. The frames are made roughly seasoned hardwood and finished in golden oak or mahogany finish as mentioned in each description. The arms are wide and the front posts cut from extra heavy stock. The entire frame is massive, strong and rigid. Seat and back are covered with the latest designs in high grade upholstering materials, as mentioned in the price list below. Each davenport is made with the best knockdown construction in four sections. The seat, back and two arms fasten at the corners with lock joints. It is very easily set up.

Sliding Casters are furnished **free** with each davenport, made of armored nickel steel, will not mar hardwood floors. Saves the wear on carpets and rugs.

No. 1A3690 **Massive thoroughly seasoned hardwood frame.** Top rail, arms, front posts and front rail faced with quartered oak veneer, polished golden finish. Also in birch imitation mahogany finish if desired. Size bed opened, 47x72 inches. Seat and back upholstered with a full set steel cone shape springs. Size outside, 83x32 inches. **READ WHAT WE SAY ABOUT CONSTRUCTION, AND ABOUT COVERINGS ON PAGE 636.**

picture shows our No. 1A3690 changed into a bed.

SPECIAL FEATURES.

The important features of our Easifold Davenports are:

1st—It is not necessary to move the bed away from the wall in order to open it.

2d—The simplicity of construction makes it the easiest davenport bed to operate.

3d—Construction of the seat cushion is entirely separate from the bed spring, and you do not sleep upon the upholstering.

4th—There is ample room for mattress and bed clothing inside.

We can furnish a good quality 18-pound Elastic Felt Mattress with each bed, if desired, as stated in price list. We recommend that you buy one of our Elastic Felt Mattresses for the bed you select as it is not complete without one, and we insure a perfect fit and solid comfort. Shipped from Kansas City, Mo. Shipping weight, about 315 lbs.

ROMAN DIVANS

THIS COMBINATION PIECE is a modern invention, but its general utility has been quickly recognized. It is exceptionally useful on account of the numerous ways in which it may be utilized. Either end can be lowered to any angle desired by an automatic attachment; in so doing there are no straps or strings to pull. When ends are lowered for use as a couch, as shown in illustration, it is as comfortable as any couch, being as long and wide as any regular couch. When in use as a divan or sofa it cannot be excelled for comfort.

HOW TO OPERATE. In order to lower the arms raise them to their upright position and by pushing them still a little higher the automatic ratchet will disconnect and the arm will lower to a level, and it can then be raised to any position desired.

THE FRAMES are made of thoroughly seasoned wood, specially selected to secure a fine grain and we guarantee them not to warp or shrink.

Each Roman Divan can be opened like this.

This picture shows No. 1A3641 with arms lowered as a couch.

No. 1A3641

THE SPRINGS are the best carbon steel coil springs securely fastened top and bottom and covered with a duck canvas and filled with a of tow and thick layer of elastic The deep tufts are made with metal tufted buttons, guaranteed pull out.

THE COVERINGS are selected their wearing qualities and the and harmonious effects are fully on page 636. You will find our are more lasting, more satisfactory least one-third lower in price than thing offered by other concerns proaches our goods in quality and

THE LEGS on all our Divans are being fastened to the frame by and are easily put on. Shipped and back detached, thereby much lower freight rate.

All the pieces on this page shipped Kansas City, Mo.

No. 1A3626

This Combination Roman Divan is made of thoroughly seasoned hardwood. The deeply carved scrolls are of solid oak, golden finish. Heavy claw feet. Length, 38 inches inside arms when used as davenport and 74 inches long when both ends are lowered for use as a couch, as shown in illustration above. Width, 23 inches. Deeply tufted, with spring edge front; coverings of the very latest designs as described on page 636. For a more detailed description of construction and operation, see article above on construction and operation. Shipped from Kansas City, Mo. Shipping weight, 120 pounds. **Always order by number and be sure to state the kind and color of covering desired.**

Illustration Shows Figured Velour.

Five-Piece Parlor Suite in birch, mahogany finish, highly polished. Better upholstery coverings, finer weaves, richer colorings, more than coverings offered by the average dealer. You will be immensely pleased with the style and quality of our coverings.

If you are interested in parlor furniture you surely have noticed suites of this style and quality offered by other dealers for $12.00 to $15.00 more than the price we ask. The frames are made of birch in a perfect imitation mahogany polished finish. It has roll design top panels and curved front seats. Heavy shapely curved arms and front posts. Reception chairs have heavy braces attached to back seat. The full spring seats have spring front edges made with all steel independent spring construction. Deep boxed fronts of each seat have corded edge. The backs are diamond tufted. When you buy a parlor suite the style and quality at our price, you make a good investment. You will be highly pleased when you receive and place it in your home. Securely crated and shipped from Kansas City, Mo. Shipping weight about 280 pounds.

Prices That Mean a Big Saving to Our Customers.

COLLAPSIBLE GO-CARTS

Handsome Designs Latest and Best Improvements

Don't buy elsewhere. Select any one of these seven Collapsible Go-Carts and save fully one-third in price. The quality is unquestioned. The very best materials and the most perfect mechanical construction. In Ordering Be Sure to Mention Color of Upholstering.

THE FRAME is the most important and vital part of any vehicle. Many collapsible go-carts are made fine in appearance, but in actual use the defects are soon discovered. Our collapsible go-carts have all the latest and best improvements, combining lightness in weight, the greatest strength and durability and are the easiest to operate of any go-carts made.

This illustration shows the collapsible go-cart folded.

THE SMALL ILLUSTRATION TO THE LEFT shows how our collapsible go-carts can be folded into a compact form.

THE LEATHER CLOTH COVERING which we use is the best substitute for genuine leather that has ever been made. It is waterproof and the body of the material is strong fabric coated, finished and grained to look like genuine leather.

THE HOODS have strong steel ribs and are adjustable by patent ratchet attachment. **THE WHEELS** have crescent shaped rims, metal spokes fastened to the rim and hub like a bicycle. **THE TIRES.** We use an extra good quality of ½-inch tires, whereas most manufacturers use only a ⅜-inch tire.

A Regular $8.00 Value

Our Price, $5.45

The Newest Improved

Sewing Machines

READ THIS PAGE FIRST AND CAREFULLY

We mention frequently on the following pages our TWENTY-YEAR GUARANTEE and our THREE MONTHS' TRIAL OFFER

We reproduce both these unequaled propositions below, word for word. Read them first and then read them again after you have selected from the following pages the machine that best meets your requirements.

CERTIFICATE No._____

CERTIFICATE OF GUARANTEE

This is to Certify that this sewing machine is warranted to be perfect in material and manufacture and to be perfect in operation if properly managed. This machine has been carefully inspected and adjusted, and there are no defects in material or workmanship. It has been delivered to the transportation company in perfect condition, carefully packed, and we guarantee it to reach your station in good order. This means that if it is damaged in transit it may be returned to us and we will pay all expenses connected with the transaction and send a new machine without extra charge.

With fair usage we hereby agree to make good any defect in material or workmanship for a period of twenty years. Natural wear and tear on any of the parts is not considered a defect in material or workmanship.

This guarantee does not apply to attachments, or the breaking of needles, shuttles, bobbins or belts.

Dated at Chicago, this_____day of_____A. D. 19___

Se

This is the longest, strongest and most binding guarantee issued by any sewing machine maker or seller, and applies to every machine in our line except the Homan.

This three months' trial offer is as plain as simple language can make it. You cannot read two meanings out of it or fail to have confidence in the concern that makes it or in the machine it covers.

Three Months' Trial Contract

This is to Certify that this machine is sold by us with the understanding and agreement that if it does not prove entirely satisfactory in every respect to the purchaser that it may be returned at any time within three months from date it is received, and the full amount paid for the machine, including freight charges, will be returned to the purchaser at once.

Sears Roebuck & Co.

To sell sewing machines on three months' trial and under a twenty-year guarantee would be a money losing business if **QUALITY OF THE MACHINES DID NOT MAKE SUCH A PLAN AND TERMS PERFECTLY SAFE FOR US.** make this liberal offer because of the confidence we have in our goods; because of the most critical inspections to which different parts are subjected before they are put together, and because we know positively that every sewing machine ich passes the tests to which it is subjected in the final inspection room, where it is put to all kinds of sewing tests, is going give satisfaction when used for household and family sewing of any kind.

It is deeds and not words that count. We cannot describe our new and perfected sewing machines without using enthu-tic language, but we know that our **words** can really **PROVE** nothing to you. That is why we make this liberal offer of a e months' **actual trial,** and that is why we make a binding twenty-year guarantee a part of our terms of sale.

We are the largest dealers in sewing machines in the world selling direct to the consumer. The enormous volume of our iness enables us to offer the very best grades of sewing machines at a saving to you of from $5.00 to $25.00 on our regular chines and of from $20.00 to $45.00 on any **Franklin** Sewing Machine you may purchase.

We desire particularly to call your attention to our new nklin Sewing Machine. Read the description closely. npare it for quality, improved features and price with any 00 to $65.00 machine owned by any of your friends or hbors.

The new **Franklin** is a duplicate, with several added rovements, of a sewing machine which can be bought only ough agents at prices ranging from $45.00 to $65.00. The t which we wish to strongly emphasize to you is that it s no more to manufacture the machine that has been sold the thousands through agents at from $40.00 to $65.00 than oes to manufacture the **Franklin** Sewing Machine.

THEN WHY PAY FROM $20.00 to $45.00 merely for a ME?

Take a moment here to consider the two methods of selling and you will quickly see why there is such an enormous difference between the price of the **Franklin** and its well known high priced duplicate that is sold through agents.

When you buy a **Franklin** it is sold to you direct from the factory. All the extra profits and the unnecessary selling and handling expenses, amounting to between $20.00 to $45.00 included in the price of the agent's machine, are done away with in our direct method of selling from the factory. Where the agent sells one machine, we sell hundreds.

Remember, it has not been low prices alone that have built up our tremendous sewing machine business, but low prices combined with quality and the absolute protection afforded by our guarantee.

Digitized by Google

Low Priced Machines

IF YOU WANT TO BUY A SEWING MACHINE and cannot afford to pay from $18.45 to $25.95 (according to the style of cabinet) for one of the best machines that money can buy (our high grade sewing machines), see pages 674 to 683, or cannot afford to pay even $12.70 to $16.20 (the price of our high arm Minnesota Model "C" Machines), we will be pleased to accept your order for our Belmont machine at $11.60, or even our Homan machine at $10.20, and guarantee to furnish you at these prices a far better sewing machine than you can procure from any other dealer at anywhere near the price.

WE WERE THE FIRST to offer high grade machines at prices far below the old time high prices of the "agency" machines, and have through this method built up a sewing machine business of such magnitude that we can furnish today a sewing machine of the very highest grade, second to none, and by many considered the very finest sewing machine in the world, at about half the price you would be obliged to pay for a strictly high grade machine if purchased from anyone else.

A REPUTATION such as ours can only be established through good merchandise at money saving prices. We have come to the conclusion, after a number of years' experience in the sale of very cheap machines, that our customers and friends are not entirely satisfied with such a purchase. A sewing machine is only satisfactory when it will give the very best of service at all times, and as it is an article that in most cases is purchased but once in a lifetime, we do not consider it an economy for anyone to buy a machine that is not guaranteed for at least twenty years and will compare favorably with the best known makes of machines that have been on the market for the last forty years.

REMEMBER that we will sell you our Homan machine at $10.20. If you want it, just send your order accompanied by $10.20 and the machine will be sent you. Remember, we will be glad to get your order for our Belmont machine at $11.60 if you feel that that is all you care to invest in a sewing machine, and we will take great pleasure in entering your order and will make prompt shipment and guarantee that either of these machines, by comparison with any other sewing machine at anywhere near these prices, will be far better in every way. But if you want to buy a machine that will carry our twenty-year guarantee and give the very best of satisfaction for the entire period of our guarantee, then

WE RECOMMEND that you buy our high grade sewing machine in preference to any other sewing machine made. Read the description of these machines carefully, pages 674 to 683, then order one on approval without any obligation to keep it, and satisfy yourself.

No. 26A381 **Belmont Five-Drawer Drop Head Cabinet Machine, with complete accessories and with complete set of extra attachments.** Shipping weight, 120 pounds.
Price..... **$11.60**
Guaranteed Twenty Years.

No. 26A382 **Homan Five-Drawer Drop Head Sewing Machine with complete accessories and with extra set of attachments.** Shipping weight, 120 pounds.
Price..... **$10.20**
Guaranteed Five Years.

The Belmont and Homan Machines
Are Shipped From Kansas City, Mo.

LESS THAN $1.00 A YEAR is what one of our high grade machines will cost you. You can figure this out yourself by taking the price of the machine which you select and which is regulated by the style of cabinet you choose, and divide this amount by 20, the number of years for which we guarantee the machine. As an illustration, our most popular six-drawer drop head automatic lift machine is priced at $19.95. If this investment were divided into twenty years it would mean only $1.00 a year. Can you afford to invest your money in a cheap sewing machine when you realize that our high grade sewing machine will represent such a small annual expenditure? If you want a sewing machine that will do really fine work of all kinds, it is surely worth $1.00 a year and you cannot afford to invest your money in a sewing machine that will be likely to give you trouble and cause you annoyance and last but a comparatively short time.

NO ONE HAS A MONOPOLY of the English language and, therefore, our statements may be, and are, repeated in practically the same words by a number of other dealers. We do not ask you to merely accept our statement of the facts regarding our ability to supply you with a far better sewing machine for the money you have to invest than any other dealer or manufacturer will, but we ask you to order a machine from us, place it in competition with any other machines that may be offered to you and then decide for yourself after having tested them thoroughly to your entire satisfaction. We invite comparison; in fact, we will feel far better satisfied if you will only make the comparison and let the machine talk for itself.

Our Minnesota $7.30 Improved Hand Machine

$7.30 AND $9.20

No. 26A390 Price, with extra attachments..... **$7.30**
Shipping weight, about 35 pounds.

AT $7.30 we furnish our Minnesota Hand Machine with iron base without cover, as illustrated on the left. For $9.20 we furnish the machine complete with wooden base and a fine bent wood cover. This is a very convenient machine for those who travel and for women who are unable for various reasons to operate a treadle power machine.

THIS IS A FIRST CLASS, RELIABLE MACHINE, having every improvement that is found on our high grade stand sewing machines, and capable of doing the widest range of work. It has an automatic bobbin winder, self threading vibrating steel shuttle, self setting needle clamp, tension liberator, all the latest improvements, combining simplicity, durability and strength in construction, speed and light running qualities, unequaled for ease of management and capacity for a wide range of hemming, felling, binding, tucking, ruffling, gathering, seaming, etc.; adapted to every variety of sewing from the lightest muslin to the heaviest cloth.

Wood Base and Cover.

No. 26A395 Price, with extra attachments..... **$9.20**
Shipping weight, 60 pounds.

THE BEARINGS are of the best hardened steel and are adjustable. We will not admit that this machine is equaled by any hand machine on the market, regardless of price or name. One particular point of superiority lies in its feed, which is the four-motion feed, the same as is used upon our high grade stand machine. This feed is absolutely positive, its movements being regulated by the eccentric lever but does not require the use of coil springs to obtain the four movements of the feeding mechanism.

OTHER POINTS OF EXCELLENCE lie in its self setting needle, positive stitch regulator, and a device by which the gearing is released, thus enabling the operator to wind the bobbin without operating the working parts of the machine. We furnish an instruction book and a full set of accessories free of charge with the machine.

No. 26A390 **Minnesota Hand Machine with complete accessories,** with iron base, no cover, and with extra set of attachments.
Price..... **$7.30**

No. 26A395 **Minnesota Hand Machine, with complete accessories,** with wood base and cover, and with extra set of attachments.
Price..... **$9.20**

Minnesota Model "C" Head

The Minnesota Model "C" Head

been constructed with a view to furnishing an extra arm machine, one that will give unqualified satis-, to meet the needs of our customers who desire a m priced machine which will do a large range of heavy and light, equally well. While the parts are aranteed absolutely first class material, they are not fine construction and finish as our Franklin or nota Models "A" and "S" heads, but larger, er and better finished than our Belmont and Homan

Design.

Model "C" Head is of the very latest design, with ully rounded lines which give it a handsome, well doned and strong appearance.

Size.

head is extra large size, having as much room the arm as the largest family sewing machine head. of arm from bed plate, 5¼ inches; from needle base of arm, 8½ inches; size of bed plate, 7x14

Finish.

head is finished with three coats of enamel, each ing thoroughly baked and hardened before the next on and carefully rubbed down to a smooth surface, ally treated to a coat of special varnish which is ked at a high degree of heat, which makes the practically indestructible and of a beautiful rich nel. Before the enamel is put on, the head is to a coat of anti-rust preparation which prevents ck from cracking, checking or peeling, which so ly occurs with other makes of machines.

Decoration.

arm and bed plate are decorated with handsome figures in a combination of silver and gold, es- designed for this machine.

Nickel Plating.

rim of the balance wheel, face plate, shuttle slides, plates, stitch regulating plate, presser bar lifter and screw heads are all heavily nickel plated and form a handsome contrast to the black enamel finish.

The Needle Bar.

The needle bar is round and made to fit perfectly. It is absolutely positive in its action, insuring even and automatic operation on materials of any weight and thickness.

Self Setting Needles.

The needle bar is constructed with a groove so that the needle can only be placed in the proper position. It is not necessary to guess at the height or position of the needle, as is the case with many other makes of machines.

The Shuttle.

The shuttle is cylindrical in shape, made of the finest cold rolled steel. It is absolutely self threading, being open at one end for inserting the bobbin, after which the thread is instantly drawn into place by two motions of the hand.

The Shuttle Carrier.

The shuttle carrier is made of steel and is fitted with a spring lining, which holds the shuttle firmly in place and prevents it from rattling when the machine is in operation.

The Double Four-Motion Feed.

The double four-motion feed is made of the very best drop forged steel, hardened, constructed with four sets of teeth, two sets on each side of the needle, which carry the goods forward firmly and evenly; as the action of the feed is entirely controlled and operated by the main shaft it is strong and certain in its movements. When you get the machine the feed will be regulated for ordinary family sewing.

The Presser Bar.

The presser bar is round and fitted with a presser bar adjuster by which the pressure on the goods is regulated. At the factory, before shipping the machine, this bar is regulated to give the proper pressure for most household materials, and it is only necessary for you to adjust this bar when sewing on extra light or extra heavy materials.

The Presser Foot.

The presser foot has a very large under surface, which extends on both sides of the needle and holds any goods firmly in place over the feed. The forward part of the presser foot nearest the operator is curved upward so that the foot will not catch in seams or fleecy materials.

The Take-Up.

Both the needle bar and take-up are driven by the shaft head at the left end of the main shaft, and therefore act simultaneously and in perfect harmony, insuring perfect stitching.

The Tension.

The tension is placed on top of the arm and consists of two flexible nickel plated steel plates, through which the thread passes. The pressure on the thread is regulated by a small thumbscrew. By pressing a small projection on the lower tension plate, called the tension release, the goods being sewed can be taken away from under the presser foot without bending the needle or breaking the thread.

Stitch Regulator.

The stitch can be regulated to run from seven to twenty-four stitches to the inch by means of a regulator which is located on the bed plate just below the bobbin winder in easy reach of the operator.

Thread Cutter.

To do away with the necessity of using scissors and to prevent the breaking or cutting of the thread too short, our Model "C" head is provided with a sharp steel thread cutter.

Bobbin Winder.

The bobbin winder is automatic in operation. It is strongly made, well finished and well nickel plated. It is so simple a child can operate it.

Bearings.

All bearings are made of steel, especially selected for its durable qualities, and properly fitted so as to minimize the friction and prevent wear. All bearings are fitted with adjusting devices, whereby any lost motion caused by the slight wear through years of constant use can be taken up.

The Attachments

Will be furnished with or without the machines and at cost price, 75 cents per set, and comprise a full set of all the latest patent foot attachments, which will be furnished by no other dealer.

We furnish the following set packed in a handsome velvet lined metal box, as shown in the illustration: One ruffler, one shirring blade, one under braider, one tucker, one short foot, one binder and one set of hemmers, different widths up to ⅝ of an inch. Our price for full set, 75 cents. Be sure to state if you wish the attachments shipped with your machine. If ordered separately, allow 20 cents extra for postage.

Instruction Book Free.

We furnish with every Model "C" sewing machine a book of instructions telling how to operate the sewing machine. This book covers every point, makes everything so plain and simple that anyone without any previous experience can learn to run the machine at once and do perfect work; tells you how to get the best results, how to take care of your machine, tells where to oil and when. It tells you how to use the different attachments, the ruffler, tucker, hemmers and binders and contains the illustrations of these attachments in use.

Accessories Free.

We furnish free with our Minnesota Model "C" machine a complete set of accessories such as are furnished with all high grade machines, consisting of

1 quilter.
5 bobbins and 1 in the machine.
1 large screw-driver.
1 foot hemmer.
1 oil can filled with oil.
1 cloth guide.
11 needles and 1 in the machine.
1 shuttle screw-driver.

Automatic Lift
Ball Bearing Stand

Automatic Head Lifting Device.

Operated without the use of any springs. u raise the lid and the head comes up into ce automatically; close the lid and the d drops back and is hidden from view. is automatic head lifting device has stood test of time. It has been supplied on hun- ds of thousands of machines and is giving sfaction without exception.

No. 26A355 Price, $14.70

Five-Drawer Style

With Ball Bearing Stand and Automatic Lift

Closed View No. 26A355.

THE HEAD. The machine is furnished with the genuine Minnesota Model "C" high arm head, which is fully described on page 659.

THE WOODWORK is something entirely new, and has been specially designed for this particular model. The carvings are very handsome and are pressed into the wood itself, making a heavy embossed figure, far more satisfactory than the carving which is glued on to the drawer front.

THE TABLE is made of selected nicely grained solid oak. The lid is made of built-up stock. The front edge of the table is handsomely shaped and has a triple swell. When the machine is not in use the head is lowered from view, the lid covers it, and with the metal drum at the bottom completely protects the head from dust and injury.

THE DRAWER FRAMES are the skeleton type, very light, but substantial and strong.

THE DRAWERS are very large and roomy. The fronts are specially shaped, with a triple swell to correspond with the design and shape of the table. The embossing on the drawer fronts is a work of art and makes this the handsomest set of woodwork supplied on any sewing machine that is sold up to $25.00. The drawers are fitted with brass plated pulls made to harmonize with the carvings. Each drawer is fitted with a lock, and one key locks them all.

THE CENTER DRAWER is made with the triple swell to correspond with the outline of the table, and is very convenient for supplies, such as needles, bobbins and thread.

FINISH—Our Minnesota Model "C" woodwork is handsomely finished, and receives the same care and attention which are given the woodwork furnished with machines for which you would have to pay about $25.00. This woodwork is finished in the latest golden oak color, a most popular finish.

THE ATTACHMENTS for the Minnesota Model "C" head are illustrated and fully described on page 659.

THE STAND—For this special Minnesota Model "C," we are supplying our highest grade ball bearing metal pitman, the identical stand which is supplied on all Minnesota Model "A" Machines.

The High Arm MINNESOTA MODEL "C" Sewing Machine

Five-Drawer Drop Head with Automatic Lift and Ball Bearing Stand

Automatic Head Lifting Device.

Operated without the use of any springs. You raise the lid and the head comes up into place automatically; close the lid and the head drops back and is hidden from view. This automatic head lifting device has stood the test of time. It has been supplied on hundreds of thousands of machines and is giving satisfaction without exception.

No. 26A356

The New Five-Drawer Automatic Lift Crescent Style Model "C"

Closed View No. 26A356.

Description of Model "C" Woodwork

MATERIALS. Only the most select grade of solid oak is used in the construction of our Model "C" woodwork. It is carefully selected with reference to grain and color and is thoroughly air seasoned and kiln dried to insure against warping, splitting and cracking.

DESIGN. The Minnesota Model "C" Cabinet is a model of beauty and artistic design. It is made on the lines of the high grade up to date furniture.

TABLE. The table is made of selected nicely grained solid oak. The lid is made of built up stock. This construction has proven the most durable, being practically indestructible. The front edge of the table is handsomely shaped. When the machine is not in use, the head is lowered from view, the leaf covers it and with the drum at the bottom completely protects the head from dust. When the machine is closed it makes a very convenient stand and frequently takes the place of a table used for such purposes.

DRAWER FRAMES. The drawer frames in which the side drawers are fitted are of the latest skeleton type, very handsome in appearance and made to correspond in design and style with the table and drawers.

DRAWERS. The crescent shaped drawers are very large and roomy, made of nicely figured veneered oak to harmonize with the table. The fronts are handsomely fitted with brass plated drawer pulls. The center drawer is made with double swell front, interior is partitioned off for bobbins, needles and other accessories which are in constant demand when the machine is being used. Every drawer is fitted with a lock and one key fits them all.

FINISH. In point of finish, our Model "C" machine is strictly first class and of the very latest golden oak color, the popular finish put on high grade oak furniture. Before the finish is put on, the woodwork is most carefully sandpapered, so that the varnish, which is of the very best quality, produces a hard glossy surface. The table is hand rubbed and polished.

THE STAND. This Minnesota Model "C" Sewing Machine is fitted with our regular Minnesota Model "A" Ball Bearing Stand, which has four complete sets of ball bearings—two in the wheel and two in the pitman.

THE ATTACHMENTS. The attachments for the Model "C" Sewing Machine are illustrated and fully described on page 659.

Description of Model "C" No. 26A358 Woodwork

MATERIAL. Only the most select grade of solid oak is used in the construction of this set of woodwork. It is carefully selected with reference to grain and color, and is thoroughly seasoned and dried to insure against warping, splitting and cracking.

DESIGN. This new style Model "C" woodwork is the handsomest and most elaborate set of woodwork ever supplied with a low priced machine.

TABLE. The table is made of selected, nicely grained solid oak. The lid is made of built-up stock, with handsome quarter sawed oak top. When the machine is not in use, the head is lowered from view, the leaf covers it and, with the drum at the bottom, completely protects the head from dust.

DRAWER FRAMES. The drawer frames, in which the side drawers are fitted, are very handsome in appearance, with handsome embossings on the fronts surrounding the drawers, made to correspond in design with the table.

THE DRAWERS. Extra large sized, very strongly made, with handsome embossed fronts. Each drawer fitted with cast brass drawer pull. The center drawer is made to contain bobbins, needles, and other accessories which are in constant demand when the machine is being used. The four side drawers are fitted with locks and one key fits them all.

FINISH. In point of finish, our New No. 26A358 Model "C" Machine is strictly first class and of the very latest golden oak color.

Full Desk Cabinet Style

Equipped With Minnesota Model "C" Head

Fully Described on Page 659

Quick Shipment From Kansas City, Mo.

THE WOODWORK.

This handsome full oak desk cabinet is made of the very best oak, thoroughly air seasoned and kiln dried. The door is made with specially selected quarter sawed oak three-ply veneered panel, ornamented with handsome design carvings and massive moldings and caps. Please note the rich and tasteful decorations on this cabinet. The paneled sides are made of three-ply veneered stock with selected plain oak for the outside. The lid is made of built-up stock with specially selected quarter sawed oak top. This construction prevents warping and cracking. The inside of the door is fitted with a wooden pocket to hold the oil can, bobbins, screwdriver and other accessories so they will be convenient for use when the machine is being operated. The cabinet is the product of the finest cabinet makers, finished throughout in a strictly first class manner; every piece and part is thoroughly sandpapered before it is put together, insuring perfect cabinet work. The varnish used on this cabinet is strictly high grade. It brings out the rich golden oak finish which is so popular. It is worked over and hand rubbed, giving a rich glossy appearance. We attach a metal drip pan underneath the head on each and every one of these cabinets so that there is absolutely no danger of any oil dripping on the garments of the operator. The cabinet rests on four rollers so that it can be easily moved about.

BALANCE WHEEL.

This cabinet is fitted with a ball bearing balance wheel which is illustrated in such a way as to show the two sets of ball bearings. This gives the same rapidity of action and ease of operation as the ball bearing arrangement on a bicycle. The bearing is simple in construction, no getting out of order, all the parts easily accessible so that the balls or bearings can be replaced at any time in the future if in the years to come there is reason to replace anything. By means of the ball bearings all friction is eliminated and the running of the machine is made a real pleasure.

The complete set of extra Steel Foot Attachments is illustrated on page 659.

THREE MONTHS' TRIAL.

MINNESOTA
Model "X" Head

Will Do Any Work, Light Heavy, Fancy or Plain Sewg, That Can Be Done on ny Family Sewing Machine

DESIGN. By referring to the illustration, it will be seen that the nesota Model "X" Head is extremely handsome and pleasing in arance, the general design being worked out in easy curves and ded corners so as to avoid any suggestion of harshness or angu-y.

IZE. Our Model "X" Head is the regular standard high arm, family , and measures 5¼ inches in height under the arm, 8½ inches from e to upright part of arm. The bed plate is 7 inches by 14 inches These measurements provide sufficient space for practically any y sewing.

INISH. The finish of the head is as fine as can be put on a sew-nachine. Three coats of the highest grade of enamel are used, each being separately baked at a high temperature, rubbed down to a th surface by hand and finally beautifully decorated in an elab-design worked out in bright colors, after which it is given a coat ecial varnish, also baked in a high degree of heat, which gives the ine a durable, rich and lustrous finish. Before the enamel is put e head is treated to a coat of anti-rust preparation, which prevents inish from cracking, checking or peeling off, which so frequently s with other makes of machines.

ICKEL PLATING. All of the bright parts, including the face are first copper plated, then nickel plated and finally highly ed.

OCKSTITCH. Our Model "X" is a regular lockstitch machine, is the popular type adopted by all manufacturers of high grade sewing machines.

PERATING PARTS. All operating and working parts in this ne are made of the finest cold rolled steel that can be obtained.

TRA STRONG AND LARGE FEED. Particular care has been to this very important part of the "Model "X". The feed motion olutely positive and is not controlled by springs in any way. The uction is that of an absolutely positive four-motion movement, ng the Model "X" to cross thicker seams, without any assistance the operator, than is possible to do with any other style feed n.

SHUTTLE MOVEMENT. The Model "X" construction is that of the short shuttle lever, insuring light running and greater speed than is possible on any other style of shuttle sewing machines.

SHORT NEEDLES. The Model "X" uses a very short needle, which means less trouble from breaking needles. The Model "X" uses the same style needle as is used on the Singer shuttle machine.

DISC TENSIONS. The Model "X" is equipped with the very best tensions that can be made. The discs are all hardened and surfaced in such a way that there is an even smooth tension all the time.

AUTOMATIC BOBBIN WINDER. Makes it easy to wind bobbins, and insures a perfectly wound bobbin at all times, which is necessary for a perfect stitch.

SIMPLE AND LIGHT RUNNING. The Minnesota "X" Head is constructed with few running or operating parts, rendering it easy to understand and operate, light running and free from vibration and noise, doing away with the liability to get out of order, common to so many machines. The mechanism is so constructed that the full line of parts in the Minnesota head operate entirely independent of one another and all driving power is supplied direct from the main shaft, without the agency of the numerous connections, cogs and many unnecessary devices used in some machines to operate the feed, shuttle and needle power. The operator does not need to tamper with or adjust these parts, regardless of the weight of goods being sewed. This construction has made the Minnesota "X" Head famous as the most durable and simplest head ever produced.

ADJUSTMENT. The operating parts in our Minnesota machines receive the finest and most accurate adjustment, are tested on all kinds of materials, and pass other numerous inspections, so that it is practically impossible for a Minnesota "X" machine to leave our factory unless perfect in construction and adjustment.

EASY TO OIL. By means of convenient oil holes and a removable metal plate on the back of the arm all bearings are easily gotten at to oil. This is a most important feature, as thorough lubrication prevents friction and wear.

Attachments for Our Model "X" Machines

We Use the Celebrated Greist Attachments.

The attachments for our Minnesota Model "X" Sewing Machine are made by the Greist Manufacturing Company, the largest manufacturing plant devoted exclusively to the manufacture of sewing machine attachments. This illustration shows the Model "X" attachments arranged in a velvet lined metal box. Each attachment may be kept in its particular place as provided for by the construction of the box. The complete set includes one ruffler, one shirring blade, one tucker, one under braider, one binder, one short foot and one set of four hemmers, up to ⅝ of an inch wide. The attachments are made of steel, heavily nickel plated and polished.

Instruction Book Free.

We furnish, free of charge, with every Minnesota Model "X" Sewing Machine a book of instructions telling how to operate the sewing machine. This book covers every point, makes everything so plain and simple that anyone without previous experience can learn to run the machine at once and do perfect work; tells you how to get the best results, how to take care of your machine, tells you where to oil and when. It tells you how to use the different attachments, the ruffler, tucker, hemmers and binders, and contains illustrations of these attachments in use.

Accessories Furnished Free.

We furnish with every Minnesota Model "X" machine a complete set of accessories, such as are usually furnished with every high grade machine, consisting of five bobbins (and one in the machine), one oil can filled with oil, one hemmer screw, one foot hemmer and feller, one package of eleven assorted needles (and one in the machine), one quilter, one shuttle screwdriver, one larger screwdriver and one instruction book.

esk Cabinet Sewing Machine

Equipped With Our Minnesota Model "X" Head

Full Desk Quartered Oak Cabinet, Ball Bearing Machine
Actual $30.00 to $35.00 Value

$18.75

Closed View.

These illustrations of the machine open and closed show how practical the arrangement is. It makes a beautiful ce of furniture; a nice stand, table or music cabinet, and can quickly and easily changed into a sewing machine, providing re than the usual room for work.

The cabinet is beautifully finished and ornamented; rich not over elaborate; a model of good taste in every way. Minnesota Model "X" Sewing Machine Head with which it quipped is fully described on page 665.

The Model "X" Full Desk Cabinet is made of selected air oned and kiln dried quarter sawed oak. The top is made uilt-up stock, five layers of wood, the grain of each layer ing crosswise, while the top layer is of selected quarter d oak, finished and hand rubbed to a mirror like polish. icular pains are taken in selecting the lumber used for the of our cabinets, and the special manner in which they are insures them against warping, cracking or splitting. The is strongly built of quartered oak, with specially selected grained quartered oak panel. The panels in both sides of abinet are also of specially selected quarter sawed veneered The molding on the doors, besides being handsome and mental, adds materially to the strength of the cabinet. The is locked by means of a turn bolt and brass knob.

A tape measure 18 inches long, accurately divided and beautifully colored to match the woodwork, is transferred on this , directly in front of the head, where it is most convenient for the use of the operator.

Ball Bearings. Our Model "X" Full Cabinet Machine is as light running as the drop head style; is fitted with our cele- d bicycle ball bearing hanger, found only on our cabinet machines, which gives the same rapidity of action and ease of ation to the machine as the ball bearing arrangement to a bicycle. All wearing parts are made of steel, case hardened and d out, and the steel balls are the best in the market. Simple in construction, no getting out der. All parts are easily accessible, so that the balls or cups can be replaced at any time. All on eliminated and operation a pleasure.

Machine Open.

Remember, we give you a three months' trial and a twenty-year guarantee, as explained on page 657.

The Minnesota Model "A" Head

THE MINNESOTA MODEL "A" is a strictly high grade up to date sewing machine from every viewpoint. It will pay you to read this description very carefully, because particular attention should be given to the sewing machine head when making your selection, and after you have decided upon the head, the other parts, such as the woodwork and stand are of minor consideration. It is the head that does the work. This fact must not be overlooked. If the sewing machine head itself is not properly constructed, if the material used in its construction is not properly made and treated, if the parts are not made to gauge, then no matter how large the head of the sewing machine, no matter how high its praises are sung, you have an inferior article, one which may give satisfaction for a time, but in the end will not stand the test.

SPECIAL FEATURES which have made our Minnesota Model "A" Sewing Machine famous from one end of the country to the other.

In the purchase of an article which, as a rule, will last a lifetime, there are a number of important points which should not and must not be overlooked. Consider carefully the following features of the Model "A" Head, and if you have thought of buying another machine, make a comparison of these points before you place your order.

INDEPENDENT POSITIVE CAM TAKE-UP insures a perfect stitch on all kinds of material, because there are no springs used in this construction; therefore, there is a steady, regular tension which is necessary for an even and perfect stitch.

DISC TENSION. Another aid and insurance for a perfect stitch.

AUTOMATIC TENSION RELEASE. By raising the presser foot all tension on the thread is released, and you can draw the work from under the presser foot without any danger of bending or breaking needles or breaking your thread—a great help because it allows the operator to use both hands when removing or changing the position of the work.

EXTRA LARGE AND STRONG FEED. Particular attention has been paid to this very important part of the Model "A" machine. We believe we have as perfect a feed as it is possible to produce. Our Model "A" machine will cross thicker seams without any assistance from the operator than is possible to do with any other machine.

SPECIAL NEEDLE PLATE. The needle plate is made with teeth cut into the crossbar, which keeps the feed perfectly clean and free from lint and always insures perfect action.

SHORT NEEDLES. Our Minnesota Model "A" Heads use a very short needle, which means less trouble in breaking needles. These needles may be purchased from any sewing machine agent or dealer in any and all parts of the country. This is a great advantage, although we are in a position always to supply the needles at a much lower price.

ROUND AND HARDENED NEEDLE BAR. Proved by experience to give better satisfaction and will last longer than the square bar or the soft needle bar.

EXTRA LARGE SHUTTLE. Compare the shuttle of the Model "A" Head with the shuttle used by any other machine and you will find it will hold far more thread than any of them.

AUTOMATIC BOBBIN WINDER makes it easy to wind bobbins and insures a perfectly wound bobbin at all times, which is necessary for a perfect stitch.

These are the principal features which should be considered and examined when purchasing a machine. They are the wearing points and the parts which have the same relation to a sewing machine that the heart has to the human body, or the engine to a locomotive or an automobile. If you find a machine that has these points, you will make no mistake in ordering it, because it must necessarily give satisfaction as far as working parts are concerned.

DESIGN OF HEAD. This head is made and shaped with a view to the most perfect operation of the various parts, and yet not neglecting those perfect lines that make it the handsomest, most roomy and most shapely high arm sewing machine head possible to construct.

SIZE OF HEAD. Our Minnesota Model "A" is a high arm sewing machine head, with a working space under the arm of 5¼x8½ inches. This is the same size as those machines for which agents ask from $40.00 to $65.00. The bed plate measures 7x14 inches.

NICKEL PLATING. All of the bright parts of this head are heavily nickeled over copper plate, then highly polished. This insures a nickel finish that will not crack, peel, rust nor wear off. This applies to the working parts underneath the bed of the machine as well as to those parts that are exposed to view. The highly polished nickel plated parts on the outside of the head, in contrast with the rich black enamel finish, add greatly to the general handsome appearance of the machine.

COLOR ORNAMENTATION. The Model "A" Head is elaborately ornamented in a special old gold design, which, in contrast with the black enameling and the elaborate nickel trimmings and graceful outlines, makes it the handsomest sewing machine head possible to produce.

THE ENAMELING. All the parts that are not nickel plated are finished in black enamel. The highest grade enamel is used, three coats being applied, each coat being separately baked on at a high temperature, rubbed down to a smooth surface by hand and finally given a coat of special varnish, baked on at a high degree of heat, making the surface extremely hard and giving the machine a rich, heavy, lasting, fast black luster. Before the machine is enameled it is treated to one coat of special anti-rust preparation which prevents the enamel from cracking, checking or peeling, which so often occurs with other makes of machines.

MINNESOTA MODEL "A" Sewing Machine

New Double Wing Pocket Cabinet Automatic Lift Style

The No. 26A102 machine is equipped with the swing end double wing pocket cabinet. This is an exclusive style, manufactured only for us. Order one of these machines, take it home and try it, use it for three months, compare it with other machines, and if you are not satisfied or sure that you have greater value for $20.70 in the new style No. 26A102 Minnesota Model "A" Sewing Machine than your neighbors have in any machine for which they have paid from $40.00 to $65.00, you may return the machine at our expense and get your money back.

No. 26A102 Price..... $20.70

Equipment.

THE HEAD. The Big Min nesota New Model "A" Hea fully described on page 668.

WOODWORK. Made of th finest and best selected grade of quarter sawed oak.

THE STAND. Our cele brated light running ba bearing stand, with doub ball bearing metal pitman.

ATTACHMENTS AND A CESSORIES. Illustrated an described on page 669.

HEAD LIFTING DEVICE. This machine is equipped with our celebrated Minnesota automatic head lifting device, perfect and simple, yet extremely strong; operated without springs; one hand does the work.

The woodwork used on the No. 26A102 Sewing Machine differs from the ordinary woodwork supplied with other machines. Please observe its simplicity and yet its richness. This design and style is made only for Sears, Roebuck and Co. The carvings are tasteful and artistic. There is nothing gaudy or glaring to attract the attention for the moment only. Every detail has been carefully considered, with the result that we have not only the most beautiful woodwork, but the most practical as well.

This machine is fitted with the newest, latest and most up to date drawer cases made. These swinging drawer cases cover and entirely conceal the drawers. The compartments arranged on both drawer cases are very practical and handy to get at. Only the highest and most expensive grade of quarter sawed oak is used in the construction of this woodwork. Besides the special compartments in the drawer cases, there are four of the regular sewing machine drawers, two on each side. The drawers are large and roomy, and the upper right hand drawer is fitted with a special compartment to hold extra bobbins and needles, according to their different s The drawers are strongly made and are fitted with a neat wo pull, capped with a brass escutcheon.

A tape measure 18 inches long, correctly divided and beautifully colored to match the woodwork, is transferred on this table directly in front of the head, where it is most convenient for the use of the operator.

ur New Library Table Sewing Machine

An Exclusive Style and One of the Most Practical Sewing Machine Improvements of Recent Years

Equipped With Our Minnesota Model "A" Sewing Machine Head

$23.70

A library table which can be converted in a minute into sewing machine is certainly a most practical idea for any ome. When it is to be used as a table, as you will see om the illustration, there is nothing to indicate that it is y more than a nicely finished and practical library table. he sewing machine head is cleverly hidden. It is the work but a minute to change this beautiful table into a prac- al sewing machine with more table surface than any her sewing machine. It makes a much firmer, stronger d more substantial sewing machine than any other man- actured. There is nothing about it to get out of order. he special features which make it possible for us to suc- ssfully conceal a complete, light running, latest style, ll bearing sewing machine in a library table, are made d attached to the table in such a way that it is only nec- ary to touch two levers (also concealed) to bring the adle and balance wheel into position. When these levers lease the treadle and balance wheel they also lock auto- atically, making only one operation necessary to arrange ese parts for immediate use.

THE SEWING MACHINE HEAD is attached to the table a manner similar to the regular drop head styles, and that is necessary to get at the head is to remove the se top of the table, which is very light, but strong and bstantial on account of being made of veneered stock.

THE TABLE is made of selected highly figured quarter ved golden oak. The legs are massive, exceptionally ong and are firmly braced by a convenient and useful er shelf. One side of the table is fitted with a drawer itable for attachments, accessories, thread, etc.

THE FINISH throughout is such as is put only on the est furniture, being hand rubbed and highly polished, d brings out the beautiful grain of the wood as perfectly it is possible to be shown.

HE TABLE is constructed with a double top. The upper t serves as a cover for the head and when removed can used as a lap board, which is always a great convenience a sewing room.

This illustration shows our Library Table Sewing Machine closed. You will observe how it completely conceals all evidence of a sewing machine and looks exactly like any high grade library table. Can be changed ready for sewing in less than a minute.

A TAPE MEASURE 18 inches long, accurately divided and beautifully colored to match the woodwork, is transferred on this table, directly in front of the head, where it is most convenient for the use of the operator.

Illustration shows our Library Table Sewing Machine open, ready for work, giving the advantages of the highest grade sewing machine, with the additional advantage table surface. Takes less than a minute to make the change.

The Franklin Sewing Machine Head

The Franklin Sewing Machine is the very best sewing machine you can buy. Dealers and agents have been charging $40.00 to $65.00 and have sold millions of sewing machines identical in construction with the Franklin, with the exception of one or two improvements which we have made on the Franklin head. The Franklin Sewing Machine, part for part, with the exception of those one or two changes, is an exact duplicate of a world wide known sewing machine, which for years has been sold only through dealers and agents for $40.00 to $65.00.

It will pay you to read this description very carefully, because particular attention should be given to the sewing machine head when making your selection. It is the head that does the work.

We call this machine the Franklin because we are not at liberty to call it by the name of the manufacturer, but if you were to see it you would quickly recognize it and know it to be the best family sewing machine in the world.

A good sewing machine, with ordinary care and for the regular family sewing, should last a lifetime. Our Franklin Sewing Machine is manufactured and constructed for this purpose, and we wish to call your attention to some of the important parts which will aid you in making your selection of a sewing machine.

Special Features of the Franklin Sewing Machine, to Which We Call Particular Attention

Independent Positive Cam Take-Up.

Insures a perfect, as well as an elastic stitch, because there are no springs in this construction, therefore you always have the same steady, regular pull, which is necessary for an even and perfect stitch.

Disc Tensions.

The Franklin is equipped with the very best tensions that can be made. The discs are all hardened and surfaced in such a way that there is an even smooth tension all the time.

Extra Strong and Large Feed.

Particular care has been given to this very important part of the Franklin. The feed motion is absolutely positive and is not controlled by springs in any way. The construction is that of an absolutely positive four-motion movement, enabling the Franklin to cross thicker seams, without any assistance from the operator, than is possible to do with any other style feed motion.

Shuttle Movement.

The Franklin construction is that of the short shuttle lever, insuring light running and greater speed than is possible on any other style of shuttle sewing machines.

Short Needles.

The Franklin uses a very short needle, which means less trouble from breaking needles. The Franklin uses the same style needle as is used on the Singer shuttle machine.

Automatic Bobbin Winder.

Makes it easy to wind bobbins, and insures a perfectly wound bobbin at all times, which is necessary for a perfect stitch.

The Bed Plate.

The Franklin machine is so constructed that the bed plate is perfectly smooth. All users of sewing machines realize what an advantage this is over those machines having elevations around the feed and needle plate.

These are some of the principal features which should be considered when purchasing a sewing machine. They are the wearing points and parts, which have the same relation to the sewing machine that the heart has to the human body. If you find a machine that has these points, you will make no mistake in buying it, because it must necessarily give satisfaction as far as wearing parts are concerned.

Design of Head.

The head is made and shaped with a view to the most perfect operation of the various parts and still not neglecting those perfect lines that make it the handsomest and most roomy and most shapely high arm sewing machine possible to construct.

Size of the Head.

The Franklin is a strictly high arm sewing machine head, with the working space under the arm of 5¼x8½ inches. There is no family sewing machine manufactured that has larger working space under the arm than the Franklin. This applies to machines that sell anywhere from $35.00 to $75.00.

Nickel Plating.

All of the bright parts of the head are heavily nickeled over copper plate, then highly polished. This insures a nickel finish that will not crack, peel, rust nor wear off. The highly polished nickel plated parts on the outside of the head, in contrast with the rich black enamel finish, add greatly to the general handsome appearance of the machine.

Color Ornamentation.

The Franklin head is elaborately ornamented in a special Egyptian design, the outlines and coloring of which, in contrast with the black enameling and the elaborate nickel trimmings, make it the handsomest sewing machine head possible to produce.

The Enameling.

All the parts that are not nickel plated are finished in black enamel. The highest grade enamel is used, three coats being applied, each coat being separately baked on at a high temperature, rubbed down to a smooth surface by hand and finally given a coat of special varnish, baked on at a high degree of heat, making the surface extremely hard, and giving the machine a rich heavy, lasting, fast black luster. Before the machine is enameled it is treated to one coat of special anti-rust preparation, which prevents the enamel from crackling, checking or peeling, which so often occurs with other makes of machines.

Digitized by Google

ETAILED CONSTRUCTION OF FRANKLIN SEWING MACHINE HEAD AND PARTS

he Operating Parts

The illustrations below show the simplicity of construction of the Franklin head. There fewer parts in the Franklin head than in any other sewing machine g manufactured today. Remember, this construction is not an eriment. Millions of sewing machines have been sold with prac-lly the identical construction of the Franklin head. Many ma-es, even some of the well known makes, and practically all of the hines handled by other mail order houses or local dealers, retain the old time complicated construction, using many rods and bars to connect the operating parts with the main shaft, also employing springs, cushions, pads, cogs and other unnecessary devices to partly control the movements of the needle, feed and take-up. The constant aim of the best known manufacturers of sewing machines throughout the world is to simplify this principle of construction by decreasing, as far as possible, the number of working parts and make each part independent of the others, and thereby positive in its action. Reference to the illustration showing the main shaft construction will give you an idea of how simple the transmitting power construction of the Franklin machine is. Every piece and part entering into the construction of this machine is tested and gauged, that is, measurements are taken and the parts must be uniform; if they are not, they are discarded and are not allowed to go into the stock room. This means that the various parts are interchangeable, and a Franklin part will fit any Franklin head without any filing or readjusting.

The Franklin machine is a lockstitch type, which is the popular stitch made on all high grade sewing machines. It is self threading at every point, excepting the eye of the needle, which is the only opening through which the end of the thread must be passed.

The Disc Tension.

The upper tension of the Franklin is of the modern disc type, and adjusts itself on all classes of work. The tension is located on the side of the cam house, nearest the operator. This location of the tension is not only far more convenient to the operator, but brings the point at which the tension is applied to the thread much nearer to the eye of the needle, thus reducing the amount of thread under tension and doing away in a large measure with the stretch in the thread, which on old style machines frequently causes bad stitching and skipping of stitches. Reference to the illustration shows the thread controlling spring fastened to the tension stud, so as to leave no ends exposed to catch in the dust rag when cleaning the ns, as will be found on so many other machines the disc type of tension.

The Tension Liberator.

p or arm has been added to the disc against which ring acts, pressure on which releases the tension ables the operator to draw the goods from under esser foot without the danger of bending or break-s needle.

Double Feed.

feed is made of the best qual-up forged steel. In its op-the needle passes between the s of teeth, so that it will feed well whether you are sewing or sewing a material which the entire feed.

Movement Positive ith Four Motions.

feed in this machine is op-by four movements. The feed up, takes a firm hold on the goods, which es forward the full length of the stitch, rops, releasing the goods, and comes back towards the operator, ready for the next These four movements are provided en-y the main shaft, insuring positive action er heavy or light work. There are posi-o springs used to aid our feed movement.

The Needle Plate.

This illustration shows the under view of the needle plate. Note the saw tooth edge on the small bar in the opening of the needle plate. This narrow bar fits into a corresponding groove in the feed and serves to steady the feed, as well as strengthens the needle plate. Its object is to make the feed self cleaning and in y prevent any dust or lint from gathering in the f the feed.

The Independent Take-Up.

The take-up in this machine is driven by a rotary cam on the end of the main shaft, making it positive in its action, insuring a perfect stitch, and with no springs to get out of order or break. The positive action of this take-up makes it unnecessary to alter the tension when the length of stitch or weight of material is changed. Reference to the illustration above shows the take-up as it appears on the machine.

The Presser Bar.

The presser bar is made of cold rolled steel and is drawn to size.

The Presser Foot.

Made to fit properly. Cannot be set wrong. It has a large surface to fully cover the feed, and the forward part nearest the operator is curved upward so that the foot will not catch in the seams of fleecy materials. The presser foot is nicely nickel plated and polished.

The Thread Cutter.

As shown in the illustration, a thread cutter is attached to the presser bar, by the aid of which the thread can be easily cut, obviating the use of scissors, or the danger of cutting or breaking the thread too short.

Franklin Instruction Book.

Anyone can learn to operate the Franklin Sewing Machine by means of the complete and elaborate book of instructions which we furnish free with each machine. Our instruction book is found far more satisfactory than the personal instructor because you always have the book at hand ready for reference, and it explains in the plainest and simplest manner, with the aid of illustrations, not only how to take care of your machine, but also how to use all the attachments, and teaches you to do all kinds of fancy work.

The Shuttle and Shuttle Carrier.

The shuttle is a perfect self threading cylindrical type. It is large in size, made of the finest drawn steel, hardened, ground and finished. It is absolutely self threading, being open at one end for inserting the bobbin, after which the thread is instantly drawn into place by two movements of the hands; there are no holes to pass through and the shuttle can be threaded with the eyes shut. It has a perfect tension, which is practically automatic and does not require regulating for any ordinary work. The bobbin is large and carries a large amount of thread.

The shuttle carrier, or body in which the shuttle rests, is made of stamped steel, hardened and nicely nickel plated. This is the lightest shuttle carrier made. It is adjustable, so that when the shuttle shows signs of wear after many years of use, the carrier may be moved closer to the shuttle race, thus enabling the operator to use the same shuttle for many years with the same satisfaction as when new.

Automatic Bobbin Winder.

The bobbin winder on the machine is nickel plated throughout, and is the most perfect bobbin winder ever produced. It is so simple that a child can operate it. The thread is wound on the bobbin automatically and so evenly and smoothly as to make the bobbin work perfectly in the shuttle, producing an even tension and greatly improving the perfection of the stitch. This also prevents the breaking of the lower thread, which is liable to occur with an unevenly wound bobbin.

The bobbin winder is always in position and ready to operate. It is operated by means of the belt, which is placed in contact with the small pulley wheel of the bobbin winder.

We take particular pride in the Franklin bobbin winder, and guarantee you will not be able to find a better finished bobbin winder, no matter how much you pay for your machine.

Needle and Thread Scale.

NUMBER OF COTTON	SIZE OF NEEDLE	NUMBER OF SILK
100-150	0	000-00
80-100	8	TWIST
60-80	1/2	A-B
40-60	1	C
30-40	2	D
24-30	3	E

A scale indicating the proper needle to be used with the different sizes of thread is stamped on the forward shuttle slide. Breaking of the thread and needle, as well as skipping of stitches, often occurs if incorrect size of needle or thread is used.

The New Self Oiling Shuttle Race

is found on all Franklin machines. This new improvement, this self oiling device for the shuttle race, solves the problem of keeping the race properly oiled without danger of getting too much oil on the race and soiling the upper and lower threads. A small oil cup is drilled in the bed plate in such a way that every time the shuttle passes this cup it comes in contact with the slightest particle of oil.

The Franklin Attachments and Accessori

The highest recommendation that can be given a set of attachments is that they are made by the Greist Manufacturing Company, the makers of the most complete, improved and expensive attachments on the market, and whose attachments are used by all makers of well known standard and agency machines. Our Franklin attachments are made by this concern expressly for our Franklin Sewing Machines. They are made of the very best tempered steel, heavily nickel plated, and will last twice as long and do double the variety of work possible with cheaper attachments. We furnish this complete high grade set of attachments, as illustrated herewith, absolutely free of charge with all Franklin Sewing Machines. The complete set, packed in a handsome velvet lined metal box, consists of one tucker, one ruffler, one shirring blade, one short braider foot, one under braider, one binder, and one set of four hemmers of different widths up to 5/8 inch. The illustrations on this page represent some of the attachments in operation. The manner of operation and complete detailed instructions showing how to operate the machine and use all of the various attachments are thoroughly explained in **our illustrated Franklin Instruction Book, furnished free** charge with every machine. A person never having used a sewing machine or attachments before will quickly learn to operate the Franklin with no trouble whatever. The illustrations in the instruction book are larger than those shown on this page and every operation is carefully explained in detail, so that the Franklin Instruction Book is of far greater service to the operator than a personal instructor, who tells you so many things in so short a space of time that when they are through you remember scarcely anything that was said.

Accessories Furnished Free of Charge With All Franklin Sewing Machine

We furnish with every Franklin Sewing Machine a complete set of accessories, such as is usually furnished with every high-grade machine, consisting of one quilter, five bobbins (and one in the machine), one bed plate screw, one large nickel plated screwdriver, one small nickel plated shuttle screwdriver, an oil can filled with oil, one foot hemmer, a package containing eleven needles (and one in the machine), and the most complete and finely illustrated instruction book ever furnished with any sewing machine.

e Woodwork of the Franklin Sewing Machine

have said the Franklin Sewing ine is the best and highest grade g machine you can buy. This also s to the woodwork furnished with ighest grade machine. It combines gth, high quality of workmanship uperior finish, all of which tends to it the most beautiful appearing work supplied with any sewing ine.

Illustration showing a section of five-ply built-up stock used in the construction of our Franklin woodwork. This construction has been found the most satisfactory and practically insures against warping, cracking or splitting. It is the way piano cases are made and everybody knows they are made to last a lifetime. That is why we insist on this style of construction for our sewing machine woodwork, particularly the Franklin style.

ition showing closed style of drawer

MATERIALS. Every piece of wood used in the construction of the Franklin woodwork is carefully selected, so that only the highest grade and most expensive quartered oak is used in its construction. The same care has been used in the selection of the hardware, locks and table hinges, so that all of the material has been carefully selected with a view to having it serve its purpose a lifetime.

THE TABLES are made of air seasoned, kiln dried, highest grade quartered oak.

A TAPE MEASURE 18 inches long, carefully divided and beautifully colored to match the woodwork, is transferred on this table, ly in front of the head, where it is most convenient for e of the operator.

THE TOP LID is made of built-up stock (see illustration to the left), five different layers of wood glued together, with the grain of each layer of wood running diagonally with the grain of the layer above, this construction having been found the most satisfactory insurance against warping, cracking or splitting. It is the method of construction used in the manufacture of the most expensive and highest grades of furniture. The same method of construction is followed in the manufacture of all high grade, life guaranteed pianos, and that is why we insist upon this method of construction for our Franklin machines.

THE DRAWER CASES. The Franklin machines are furnished in both styles of open and closed drawer cases.

THE DRAWERS are large and roomy, and are positively the strongest drawers made.

WHEN THE MACHINE IS CLOSED the head is protected on some styles by means of a metal drum and on others by a wooden apron. Both styles are arranged so that they protect the garment of the operator from the dropping oil when the machine is being used.

Illustration showing drawer with outside carvings used with open drawer cases.

We take particular pride in the finish of our Franklin woodwork. The stock is so fine and it is so beautifully filled, sandpapered and hand rubbed that after the three coats of varnish are put on, and then hand rubbed and polished again, the natural figure and grain of the quartered oak is brought out in the most beautiful effect. The color is a rich shade of golden oak.

The Franklin Ball Bearing Stand

Franklin Stand, especially designed for the Franklin Sewing e, is the neatest, best appearing and strongest stand made. piece is perfectly true, smooth and of unusual strength, so that he different parts are put together they fit perfectly. Particular d attention are paid to the finish and enameling of this stand.

E PARTICULAR FEATURE of this new stand is the ball bearustment and the manner in which the balance wheel is attached. t other machines the wheel is attached to the leg of the machine, s. on the Franklin stand the wheel is securely attached to the guard, which, in turn, is secured to the leg of the machine by of three lugs, distributed in such a manner that the wheel guard only securely attached to the leg of the machine, but this wheel guard acts as a brace and an extra support for the leg. On the ordinary sewing machine stand the pitman is fastened to the left of the wheel. On the Franklin it is attached to the right of the wheel, between the balance wheel and the leg, so that it is impossible for the garments of the operator to come in contact with the pitman when operating the machine. This arrangement of the pitman, besides making the machine lighter running and easier to operate, allows more space between the legs of the machine, making it far more comfortable and easier to sew on our Franklin machine than on any other machine on the market. By referring to the illustrations you will note the leg is a little wider and is designed to conform with the balance wheel. This is a point which is overlooked on most machines, and for that reason the iron work on other machines has an ungainly appearance, because, as a rule, the portion of the leg where the wheel is attached is always considerably narrower and the wheel consequently projects beyond the sides of the leg.

BALL BEARING BALANCE WHEEL. All our Franklin machines are equipped with this new, latest improved ball bearing hanger. The hanger is the large balance wheel and shaft fastened to the wheel guard, as shown in the illustration to the right. As this wheel supplies the operating power to the head, the bearings on which it revolves are naturally subjected to considerable strain. By the introduction of the ball bearings all friction is removed, and the wheel revolves with the same freedom and rapidity as the ball bearing crank hanger of the bicycle. The application of the ball bearings to the balance wheel is one of the greatest improvements and the greatest aid to the light running qualities of the machine, and we have demonstrated by actual experiments and tests that our ball bearing hanger is at least 20 per cent lighter running than any ball bearing device or arrangement used on any other sewing made. By the aid of the ball bearings a machine is made not nter running, but exceedingly easy to operate and very rapid in The arrangement of the ball bearings with the balance wheel me as that on all high grade bicycles. The axle on which the evolves passes through two steel cups, each of which contains ll steel balls, which are fitted in a patent ball retainer, which reduces friction and prevents the bearings from crowding and grinding. The cones are fitted into the balance wheel, and by turning the journal to the right or the left, it is possible to adjust the bearings so that the balance wheel will at all times run lightly and noiselessly. The cups and cones used on our stand are turned out of a solid bar of steel, after which they are ground out, tempered and hardened, and with proper oiling from time to time they will last a lifetime.

THE PITMAN. All Franklin machines are equipped with our new double ball bearing nickel plated steel pitman. These pitmans have a complete set of ball bearings at each end. They are adjusted at the factory and require no more care or attention than the regular wooden pitman. The metal pitman, with ball bearings, besides reducing friction and making the machine run easier, cannot get out of order as easily as the wooden pitman.

THE BRACES. The side frames, or legs, of the stand are joined together by a four-arm brace, bolted at the top and bottom, making the stand absolutely rigid. This is very essential, as it lessens the vibration and so causes our machines to make less noise and last longer than those machines which are built on weak and wabbly stands.

DRESS GUARD. The dress guards on these stands are another very strong feature. This guard covers and protects the entire wheel. This makes it impossible for the dress or apron to become caught in the wheel. Besides serving to protect the dress, it acts as a very strong brace for the leg and also acts as an anchor for the balance wheel, which is attached to the dress guard.

TREADLE. The treadle is of the openwork style, with full ends, pivot bearing, as shown by the dotted lines in the illustration; accurately trued, putting the entire machine under easy control of the operator.

OIL GUARD. The oil guard, immediately under the treadle, extends from side frame to side frame, is securely bolted, strengthens the frame and prevents the oil from dropping on the floor or carpet.

CASTERS. We use the highest grade sewing machine casters made. They are of a large size, making it easy to move the machine from place to place, are carefully fitted and never break.

The above illustration shows the ball bearings in the balance wheel and steel pitman.

INSPECTION. All parts are accurately trued and tested for strength; not a casting is allowed to be used that has a sand hole or defect or that isn't true to gauge. After the stand has been properly assembled the balance wheel and treadle are operated by steam power at a very high rate of speed, whereby the balance wheel makes a great many more revolutions than any operator could possibly make. If there is the slightest flaw in the iron or in the construction or adjustment of the stand, it becomes evident through this test and the stand is then rejected; and, as a result, for strength, beauty, design, finish, for easy running and for perfect control of the machine by the operator, we furnish a higher grade sewing machine stand than is furnished by any other maker.

$20.75

WOODWORK. The quality of the material and the general contruction is very much the same as the high grade woodwork which is generally described on page 677. The design of the cabinet, while plain, is very attractive and is strongly built. It is in every particular as tasteful as shown in the illustration. The quarter sawed oak panels on the door and sides of the cabinet are arched. The door is decorated with artistic wood carvings, which give the cabinet a very rich and elegant appearance. A compartment securely fastened to the door is arranged to contain the attachments and accessories and such other supplies as are in constant demand when sewing. This compartment, as may be seen by reference to the illustration, is most conveniently arranged so that it will not be necessary for the person using the machine to move a chair or even change position when sewing to use any of the attachments or accessories contained in this compartment. The cabinet is fitted with four large wooden casters, making it very easy to move from one part of the room to another. We attach a metal drip pan underneath the head on each and every one of these cabinets so that there is absolutely no danger of any oil dripping on the garments of the operator.

A TAPE MEASURE, 18 inches long, accurately divided and beautifully colored to match the woodwork, is transferred on this cabinet, directly in front of the head, where it is most convenient for the use of the operator.

THE BALL BEARING BALANCE WHEEL. The large ball bearing balance wheel, which is fully described on page 677, is attached to an extra strong panel, which is fastened to the side of the cabinet. We supply with these cabinets the metal pitman with ball bearings at both ends, which is illustrated and fully described on page 677.

ATTACHMENTS. For complete description of the Franklin Attachments, see page 676.

About Sewing Machine Supplie

There are a great many machines in use for which it is difficult and in some cases impossible to get new parts. The factories originally making these machines have either gone out of existence or have destroyed the tools and machinery necessary for making the different parts of their earlier models. We are in a position to supply parts for almost every sewing machine and will always supply these parts at the lowest possible price. If you want a new shuttle or an extra supply of bobbins, and you do not find the name of your machine on our shuttle list, send your old shuttle or an illustration, together with 75 cents and the extra postage and if it is at all possible we will fill your order for the shuttle, returning to you whatever balance we can, according to the price of the shuttle. It is impossible for us to list the names of all the different sewing machines which are in use at the present time because there are so many factories making sewing machines for a great many different customers, each of whom requires a different name on the machine. If you need any bobbins for your machine either an illustration of the shuttle or a sample bobbin and send us the remittance accordi style bobbin which you require for your machine.

We are in a position to supply attachments for almost any make of machine. In separate attachments, it is best to send a sample to us because an illustration is not For example: The Greist attachment factory makes a ruffler for every well known and the illustration is the same for all machines, the difference in the construction ruffler being so slight as not to be noticeable in the illustration.

If you are ordering parts or supplies for one of our sewing machines, mention the the head and give the head number, which you will find stamped upon the front shuttle on the bed plate under the front slide, or upon the bed plate behind the upright part of

NEEDLES
For All Makes of FAMILY SEWING MACHINES.

It is very important to use only the very best needles. A machine will not work with poorly made needles. SEWING MACHINE OIL.

To obtain the best results from your sewing machine, to insure and warrant its always running easy and lasting a long time you must use good oil. For this reason we have had prepared for us a special extra high grade sewing machine oil, and we recommend our customers to include a bottle of this oil when they purchase a machine.

No. 26A4083 Price, per 4-ounce bottle..8c

If mail shipment, postage and packing extra, 12 cents.

SHUTTLES.

All manufacturers have made changes in the styles of shuttles used in their machines and nearly every make eral different kinds of shuttles, so that in ordering, it is not only necessary to mention the name of the shuttle but to send a picture of the shuttle or the old one as sample. In addition to remitting for cost of shuttle, include 4 cents pay the postage. When ordering, do not fail to send illustration or old shuttle as a sample to insure securing duplicate, and wherever possible give the head number of the machine.

In many cases it will be found necessary to adjust the shuttle carrier so that the new shuttle, which is larger than the worn shuttle, will fit properly.

NEEDLE THREADER.

One of the handiest attachments ever manufactured is the sewing machine needle threader, illustrated and described herewith. We have tested and compared this needle threader with all other styles on the market and find it the only satisfactory needle threader that is manufactured. There is nothing about it to get out of order, nor can it be easily broken. By means of it you can thread the needle quickly without straining your eyes and without pushing the machine from one part of the room to the other so that the light will properly strike the eye of the needle and enable you to see the eye. The attachment is simplicity itself and is always ready. Even people who have good eyesight have trouble in threading needles. This attachment does away with all that trouble, with all worry and annoyance in threading.

MUSICAL INSTRUMENTS

EL PROUD OF THE FACT that we are the largest dealers in musical merchandise in the world. or qualities and splendid values we have given our customers are the n of our success.

OW PRICES are rendered possible by our economical method of sale, actual cost prices with profit added. Our cost is the lowest. Our enormous le us to make the most favorable contracts. We take output of several American and European We represent some of the best makers of France and Italy, and their instruments, ady enjoy an enviable reputation abroad. can only from us.

USTOMERS number hundreds of thousands and include professionals as well as amateurs ers. Colleges, normal schools and other institutions where ought have become our steadiest customers chiefly through one trial d with us. In fact one of the largest universities in the West buys its struments exclusively from this department. Doesn't this demonstrate the which our many thousands of customers have placed in us?

FREE

With every Violin, Guitar, Mandolin, Banjo and with valve band instruments, we give free of charge a course of 50 lessons with the best Correspondence School of Music in America, the only charge made by the school being for postage, blanks and other stationery, which does not exceed 12½c per week. Customers ordering any of the above instruments will receive lessons from well known masters, among them the Director of the Chicago Symphony Orchestra, America's foremost guitarist, the world's greatest mandolinist, and a well known banjo virtuoso.

OUR LIBERAL TEN DAYS' TRIAL OFFER. We will ship any musical instrument you may select to any point in the United States under the distinct agreement that if after a ten days' thorough trial you are not satisfied that the instrument represents better value than you can get elsewhere, if you do not find that the tone and the quality are of the same identical grade as found in instruments sold for double the price we ask, if you are not fully satisfied in every way to keep the instrument, then return it to us at our expense and we will return all of your money, including transportation charges. Under these terms it will be to your interest to favor us with your order if in the market for any musical instrument.

OUR GUARANTEE. Every musical instrument we sell is guaranteed for the period of one year against defects in material or workmanship and we agree to make good by exchange or repair any instrument that should show such defects.

VIOLINS OF CHARACTER AND BEAUTY

LUE OF A VIOLIN. There is no article in the world the value of which is so little known as the violin, herefore been the custom of dealers to charge as much as the customer to pay, basing their prices on fictitious or imaginary qualities the were supposed to possess. There are only two fundamental things ermine the actual value of a violin: materials and workmanship. grades of material (wood, varnish, etc.) and the workmanship (model, construction, etc.) depend the ultimate results of whether the instrusive a good tone or not. Nobody but an expert is truly able to judge two qualities. The manager of our Music Department has made a life violins and relative values and is therefore competent to judge them smallest detail.

OUR LINE OF VIOLINS was never so complete and of such high grade as at the present time. Our instruments are all constructed in accordance with the best known principles and of the best possible materials. Quality is never sacrificed to price. We earnestly solicit a comparison of our violins with those offered by other dealers, and we guarantee to give a better looking, better constructed, and better toned instrument at about one-half of their price. Our instruments are carefully tested and examined before shipping. Our violins are full size except Nos. 12H299¼, 12H310¼, 12H313¼, which are furnished in three-quarter and seven-eighth size.

THE BOWS included are of much better quality than other dealers are offering. We do not handle red wood or maple bows as the woods are too light and will not retain their shape. With our bows the best results can be obtained.

THE CASES AND FITTINGS which we give with our violins are of good quality, well made, useful and lasting.

See pages 694 and 696 for a complete line of 'Cellos and Basses and furnishings for same.

COMPETITION VIOLIN OUTFIT

$2.95

THIS OUTFIT IS THE BEST VALUE ever offered for the money and anyone desiring a complete outfit for general use should not fail to examine this famous bargain. The violin we furnish with this outfit is the well known Stradivarius model, with two-piece curly maple back, sides of the same material and top of silver spruce. Inlaid edges. The body of the instrument is finished in brown shaded to yellow. The violin is double lined. The tone is remarkably pleasing considering the low price at which we sell it.

FOR THIS OUTFIT OTHER DEALERS ASK $6.00 OR MORE.

SEND $2.95 with your order and we will send you this outfit, and if you do not find it the greatest bargain you ever saw or heard of and perfectly satisfactory to you in every respect, you can return it to us at our expense and we will cheerfully return your money.

The bow which we furnish with this outfit has a good stick and will give satisfaction and must not be confused with the flimsy light beechwood bows usually included by other dealers with their violins.

JEAN BAPTISTE VUILLAUME
MODEL VIOLIN AND OUTFIT

JEAN BAPTISTE VUILLAUME of Paris, France, was without question the greatest copyist that ever lived, and while his own instruments were patterned after the Stradivarius, they have a slight French individuality. The violin we are offering has a good full round tone of very pleasing quality and represents a splendid value at the low price at which we are offering it. Back made of two pieces of good quality maple nicely flamed, with sides of same material; spruce top. Both top and back edges are very carefully inlaid with genuine wood purfling. Neck and scroll are very neatly cut from good quality flamed maple. The body of the violin is finished in rich reddish color blending into the natural color of the wood, with edges finished in natural color. The fingerboard, tailpiece and pegs are genuine ebony. The internal construction of the instrument is very good, being fully lined. We would like to have you compare this violin with anything that may be offered by other dealers and you will be convinced that we are giving you the best value for the money.

Don't forget that the bow we supply is made of genuine Brazil wood, with a fine curve and good weight. It will enable you to get good results.

No. 12H303¼ OUTFIT CONSISTS OF:

One Vuillaume model violin (as described).
One fine Brazil wood bow, with inlaid ebony frog.
One leather bound, flannel lined canvas case.
One piece clear rosin.
One set Glendon brand silver tone violin strings.

MAGGINI MODEL VIOLIN AND OUTF

THE VIOLIN which we offer with this outfit is modeled after the celebrated Maggini violin, and skillfully and durably made, being double lined and blocked. It has the characteristic purfling and scroll of the well known Maggini and is the very best violin ever offered in an outfit at this price. The back is made of two pieces of flamed maple and the sides are constructed of the same material. The top is made of a selected piece of thoroughly seasoned spruce, and the tailpiece, fingerboard and pegs are of solid ebony. The body of the instrument is finished in a brilliant red color with lower bout shaded and edges in natural color and covered with fine transparent varnish. The neck is of finely finished maple and the scroll is gracefully cut. It has a strong and pleasing tone, smooth and even on all four strings.

$5.55

WE SHIP THIS OUTFIT to the customer with the assurance that it saves money if purchased in the regular way for less than $11.00. We are willing to have the purchaser compare it with anything his local dealer may offer at these prices, and if he does not find that it is equal, and in many points superior, he can return the entire outfit to us and we will return the money paid and pay the transportation charges both ways. We call special attention to the fact that we give a genuine Brazil wood bow with this outfit which we guarantee will give good and lasting service.

No. 12H304¼ OUTFIT CONSISTS OF:

STAINER MODEL VIOLIN AND OUTFIT

A $13.00 VALUE

THIS VIOLIN IS AN EXACT COPY of the famous Stainer violins, a characteristic of which is the extremely bulging top and back and a long flat scroll. Great care has been used to pattern this instrument exactly after this celebrated model. The back of the instrument is made of two pieces of highly flamed, well seasoned maple, and the sides are of the same material. The top is made of well seasoned spruce, the soundholes are graceful and very sharply and neatly cut and the purfling is accurately and evenly inlaid. Double lined and blocked. The body of the violin is a deep red color blending into the natural color of the wood. The tailpiece, fingerboard and pegs are of solid ebony. It has a loud and robust tone especially adapted for orchestra playing. The quality of the bow we include will make playing easy as it is well balanced and elastic. If you will compare it with the violins usually sold by dealers throughout the country, you will find that you cannot purchase an instrument of this grade elsewhere for less than $13.00.

$6.45

No. 12H305¼ OUTFIT CONSISTS OF:

AMATI MODEL VIOLIN AND OUTFIT

IT IS WITH GENUINE PLEASURE that we offer our customers this outfit. We know the splendid merits of the instrument and the usefulness and satisfaction giving qualities of every article we include with it, and feel confident of a hearty approval from those who may order one. The Amati violins are great favorites, owing to their pleasing, soft tone, the neat model and appearance. The construction of this violin is scientifically perfect. It is double lined, carefully blocked and properly proportioned. The back is made in accordance with the Amati style of one piece of selected curly maple. The sides are made of maple and the top of very old thoroughly seasoned silver spruce. The soundholes are of the small, graceful Amati pattern, and the purfling is very fine and beautifully inlaid. The instrument is finished in a reddish brown color, slightly shaded, and the transparent varnish with which it is coated is highly polished and brings out many beauties in the grain of the wood. The tailpiece, fingerboard and pegs are of solid ebony, and the scroll is neatly cut. As a good bow is an absolute necessity to good playing, we include with our outfit a Brazil bow with extra wide frog and full supply of hair. This is the violin outfit for which your dealer is obtaining from $15.00 to $17.00, and we will be glad to have you compare it with any instrument at this price offered by any other dealer.

GUARNERIUS MODEL AND OU

THIS OUTFIT is fully as great a bargain as any in our line. The violin which goes to make it up is carefully selected, and is the best considering the price of the outfit. Our buying advantage is so great that we are in a position to get the very lowest possible prices upon all classes of goods, and as we import all of these goods from Europe we are able to give the lowest importing price with but our one small profit added. Every bit of advantage we can gain, either in buying or selling, we give our customers in the form of low prices.

DESCRIPTION—Guarnerius model violin, of perfect workmanship and construction. Needless to say that it is blocked and fully lined. The back is made of beautifully flamed two-piece back made of selected and well seasoned maple. The sides are made of maple and the top of especially selected Cremona spruce. The soundholes are of the characteristic Guarnerius pattern and the purfling is neatly and tastefully inlaid. The instrument is a deep rich brown throughout, covered with a splendid transparent varnish and highly polished. The tailpiece, fingerboard and pegs are of solid ebony, and the scroll is accurately and gracefully cut. In tone you will be pleased with the tone which is mellow and of great carrying power.

THE BOW we give is right in length, weight and balance. We guarantee it will give service and satisfaction.

No. 12H314¼ OUTFIT CONSISTS OF:

One violin as described.
One imitation snakewood bow, carved frog.
One wood case, with nickel lock, handle and spring clasps, flannel lined.
One piece of Bernadel rosin.
One Howe's Violin School.
One extra set Acme Professional strings.
One set of violin tuning pipes, A, D, G.
One book, Popular Fiddle Tunes.
One fingerboard chart.
One course of fifty lessons with the most prominent correspondence school of music in America.

No. 12H314¼ Outfit complete. Wt., 10 lbs. Price.....

Z Z Find Meriden Model 10 and You Will Find a $4.00 Rifle for $2.38.

OTHERS CHARGE $25.00 FOR THE SAME GRADE OUTFIT.

OUR HIGHEST GRADE STAINER AND OUTFIT

MANY ORCHESTRA PLAYERS prefer the Stainer model violins for their especially loud, penetrating tone, yet they are very popular as solo instruments. It would hardly be fair to compare this violin with Stainers sold by other dealers, for if the quality, workmanship and tone were equal they would be compelled to ask $25.00 or more. Our great buying power and method of sale "from maker to you" with but our one profit accounts for the high standard of quality at our low price. All intermediate profits represent your saving.

$12.45

THIS VIOLIN is a copy of the celebrated violins of Jacob Stainer. It has a two-piece back made of old, thoroughly seasoned maple, beautifully figured and flamed. The sides are maple and the top is made of carefully selected, old Cremona spruce. It has all the characteristic Stainer features, such as bulging top and back; is fully lined and blocked and the tailpiece, fingerboard and pegs are made of solid ebony. The instrument is finished in a rich orange-wine color. It is covered with beautiful transparent varnish polished to a high degree. We know that you will be charmed with the tone quality of this violin: It will surprise you with its smoothness and coloring. Our bow is equal to the violin. A fine straight grained stick, that balances and draws well. So with case and trimmings, everything sure to give satisfaction to the most exacting.

No. 12H315¼ OUTFIT CONSISTS OF:

- One Stainer model violin as described.
- One black varnished wooden case, full flannel lined, lock, hinges and patent spring clasps.

GENUINE KOSCHAT VIOLIN AND OUTFIT

QUALITY HAS BEEN IMPROVED BUT THE PRICE REMAINS THE SAME.

ALERS THROUGHOUT THE COUNTRY were handling violins and other musical merchandise of the same high grade as we include *it, they would be compelled to charge you from $25.00 to $30.00 for it; but this class of outfits is* had from them. They do not use enough to import direct or to make a contract with the makers to their entire output. Their supply must come from the jobber or wholesaler, who in turn pays the ...'s agent a commission for importing the merchandise. Add to this the maker's profit and you will have ...ee profits which you finally must pay, the maker's, the import agent's or representative's, the wholesaler and finally the dealer's, besides the accumulation of expenses as freight and cartage from one place to ...ve buy from the maker and sell direct to you, thus you pay only two profits instead of four, and two ...transportation instead of four.

KOSCHAT, the maker, is so well known that we need to give no ...y word of the following description, place your order with us, and then ...not find the outfit satisfactory and up to your expectations in every par... that we have saved you half in the price, you will do us a favor by ...it and we will return your money and all transportation charges.

DUSLY AS GOOD AS OTHER DEALERS' $30.00 OUTFITS, YET WE IMPROVED IT.

No. 12H318¼ OUTFIT CONSISTS OF:

- ...e Koschat violin as described.
- ...h form case, made of pulp, ...ed lined, nickel plated lock ...ps.
- ...e model Brazil wood violin ...ony frog, full German silver ...ble eye.
- ...er's chin rest.
- ...course of fifty lessons with the best correspondence ...music in America.
- One auto rosin in new style patent box.
- One set waterproof strings.
- One German silver mute.
- One tuner with pipe for each string.
- One fingerboard chart.
- One Guckert's $2.00 instruction book.
- One Witmark's Violin and Piano Folio.

...2H318¼ Complete outfit. Price.....**$14.85**

DESCRIPTION. The violin is copied from the famous Stradivarius of 1714. The back and sides are made of selected narrow flamed curly maple, the top is made from well seasoned evenly grained spruce, with "ff" holes neatly and gracefully cut. The neck and scroll are made of curly maple and are elegantly carved. The fingerboard and tailpiece are made of genuine ebony and the pegs of rosewood. The varnish is deep, rich amber in color and is transparent, bringing out clearly the beautiful flaming. The edges and the neck are finished in natural color. The tone is sweet though powerful and penetrating, adapting this instrument for solo as well as for orchestra purposes.

A VIOLIN WITH A SPLENDID FINISH AND BRILLIANT TONE

...UTFITS OF THIS GRADE ARE GENERALLY SOLD FOR $35.00.

HEBERLIN STRADIVARIUS VIOLIN AND OUTFIT

Certificate.

THIS OUTFIT is high grade in every respect, and every article in it is fully guaranteed by us. The maker of the violin which we send with this outfit is among the best known violin makers of Europe and we have been able to arrange with him to furnish us with a limited number of these instruments, which we can supply in an outfit at this exceptionally low price. The violin is guaranteed to be perfect in every respect and is accompanied by a numbered certificate countersigned with the autograph of the maker. Should anyone attempt to sell you a Heberlin violin you can easily detect the fraud by asking for the certificate. We show a facsimile of the certificate which goes with every one of these violins.

$17.95

THE VIOLIN is a genuine Stradivarius model of a very smooth and sweet tone, even on all four strings, has two-piece highly flamed maple back, nicely figured maple sides and top of old, well seasoned Cremona silver spruce. The fingerboard and tailpiece are of solid ebony and the pegs of rosewood. The violin is double lined throughout and carefully blocked. The body is a very deep rich wine-red with edges and scroll finished in natural wood, adding greatly to the instrument's appearance. A fine and satisfactory instrument in every respect, and one which will please amateur and professional alike. **Remember** that the bow as well as all other articles are first class in every way. They will give you good and lasting service.

No. 12H322¼ OUTFIT CONSISTS OF:

- One genuine Heberlin violin as described.
- One morocco leather covered case, velvet lined, nickel lock and clasps.
- One genuine snakewood bow, fancy ivory frog.
- One Becker's chin rest.
- One piece Bernadel rosin.
- One set professional gut strings.
- One German silver mute.
- One tuner, four pipes, E, A, D, G.
- One fingerboard chart.
- One Henning's Practical Method for Violin.
- One Mammoth Violin Collection.
- One course of fifty lessons with the best correspondence school of music in America.

...ERT GOETZ TRUE COPY VIOLIN AND OUTFIT

A RARE AND EXCEPTIONAL VALUE

WANT A VIOLIN that has the appearance of being 100 years old, a violin that is a copy of a genuine old Stradivarius, so carefully made and so faith... ...d that no one but an expert could tell it from the original, then you must positively consider our ...s true copy violin before placing your order elsewhere.

GOETZ IS A VIOLIN MAKER of rare skill and enviable reputation and although he makes instruments of different finishes, our ...ttention was attracted to his ability to imitate the works of old masters.

...OLIN *which we selected for our customers is not only an exact copy of the model,* but has the indelible marks of time and wear on wood and varnish faithfully reproduced upon it.

...OLINS when finished in the usual way and after a certain price is arrived at have more or less the same appearance, so that a $30.00 violin does not look any better than a $20.00 one.

...OU BUY an imitation old violin of the workmanship, materials and careful detail work of our Goetz no one will be able to set a value upon it except it be considerably ...the price you paid for it.

...RECOMMEND most highly our Goetz true copy violin to you whether you are a student, an amateur, a professional violinist or a soloist. It is an instrument of ...beauty, a musical instrument in the truest sense of the word and one that will give the utmost ...r all time and under all conditions.

...RTICLE included in this outfit is equal to the violin. To play properly you must have a good bow and that's what we give; a case must be strong and we give you one that ...e violin and last you a good long time. Everything first class and ...service.

No. 12H332¼ OUTFIT CONSISTS OF:

- ...lin as described.
- ...odel bow, full German ...d and of the very best ...ambuco wood, ...covered throughout with ...of leather, velvet lined ...mmed. (See illustration.)
- One piece genuine Bernadel rosin.
- One Wichtl's complete violin instructor.
- One extra set of Verona Italian strings.
- One German silver violin mute.
- One book most popular violin pieces.
- ...of fifty lessons with the most prominent correspondence school ...erica.

A FEW CHOICE VIOLIN VALUES

Learn to play the violin under a renowned teacher. We give you a scholarship certificate.

Although our line of violin outfits is very complete and of varied prices, a good many of our customers either only need a new violin or prefer to pick their own case, bow, etc. To accommodate them we quote on this page a few violins which do not include at the price any case, bow, rosin or other articles whatsoever, except No. 12H250¼, which, as shown in illustration, is furnished with a special carved chin rest, the value being figured on the instrument alone.

IF YOU NEED A BOW, CASE, ROSIN or other accessories we would advise you to get them with your order for the violin and thus save transportation charges. On pages [illegible] we show a splendid line of cases and a very complete and satisfactory giving [illegible] besides trimmings and strings of all varieties. Our prices are graded according to [illegible] you can make your selection according to your own ideas, taste and means.

DON'T FORGET A CASE AND BOW AND A FEW SMALL ITEMS ADD VERY LITTLE TO THE COST OF THE SHIPMENT.

SPECIAL STRADIVARIUS MODEL VIO[illegible]

Never before have we offered this high grade instrument at such a [illegible] It is made of old, well seasoned wood especially selected for its [illegible] qualities. The color of the body is deep, rich red, blending into a [illegible] tint. The scroll is handsomely hand carved and the tailpiece, the [illegible] and pegs are made of genuine ebony. The pegs and tailpiece are [illegible] inlaid with mother of pearl. The nut is made of ivory, which is [illegible] and contrasts very nicely with the ebony of the fingerboard. The violin is also fitted with a genuine ebony [illegible] engraved chin rest. The entire instrument is covered with beautiful transparent varnish, which shows off [illegible] the wood very nicely, but the real beauty of this violin does not lie in its elegant appearance but in its [illegible] It is double lined throughout and blocked so as to insure the permanency of its tone. For a fancy bow to go with this violin we would recommend our No. 12H4548. Don't forget to order and allow price of a case and other accessories if you need them. Shipping weight, 6 pounds.

No. 12H250¼ Price..... $7[illegible]

ORCHESTRA FAVORITE

The brilliant tone of this violin has gained for it immense popularity among orchestra leaders and performers. It also recommends itself on account of its fine and dignified appearance and the extremely low price at which we are quoting it, the actual cost to make with only our one small profit added. DESCRIPTION—Model, accurate copy of one of the famous Stradivarius violins. It has a two-piece back of seasoned maple highly figured and flamed. Maple sides of the same grade as the back. Spruce top of a fine and even grain selected with care for its sonority. The edges of the violin are worked out with care and the soundholes exquisitely cut. It is inlaid with genuine purfling. The neck is worthy of the balance of the instrument. Well cut of perfect proportions, with an elegant scroll. Trimmings (fingerboard, tailpiece, end pins and pegs) of solid ebony, in a dull rich finish. Color, a rich amber red without any shading, but with edges finished in the natural color of the wood. Varnish, an especially prepared quality of a brilliant luster which brings out most beautifully the grain of the wood and its color. The violin is double lined, graded and blocked. We recommend this violin in every way as superior to instruments usually sold at $18.00 to $22.00. Save transportation charges by purchasing bow, case, etc., with your violin, as our price does not include any. Shipping weight, 9 pounds.

No. 12H254¼ Price..... $11.25

FERRARI STRADIVARIUS VIOLIN

This violin is made by Angelo Ferrari, a well known maker of [illegible] skill and enviable reputation. It will be necessary for you to see [illegible] violin before its actual beauty of outline, perfection of workmanship, [illegible] details of construction, superb finish and above all its splendid [illegible] tone will become apparent. We have made the technical description [illegible] violin as clear as possible in the hope it will appeal to you [illegible] as it does to us who are familiar with its merits. THE MODEL is [illegible] from the best of the few instruments made by Stradivarius [illegible] back, which is made of an especially fine quality of highly flamed maple. SIDES of the same material. THE TOP [illegible] Alpine spruce very uniform in grain. THE PURFLING or inlaying both at the top and back is set with [illegible] and care. THE NECK is made of finely figured maple with the scroll most artistically hand carved on [illegible] sides in a beautiful Venetian style. THE COLOR of this instrument is a superb and striking reddish amber [illegible] center of the body to a golden yellow. THE VARNISH is transparent; thus bringing out the colors as well as [illegible] of the wood. THE FLUTED TAILPIECE and pegs and dull finished fingerboard are of jet black [illegible] MATERIALS are thoroughly seasoned and specially selected. THE WORKMANSHIP is positively the best [illegible] put in a violin at the price we ask. Every detail artistically carried out. We cannot ask you to compare [illegible] as it is beyond all comparison. The Ferrari violins at their price stand in a class by themselves. Order [illegible] and try one of them and be convinced. Good bows, strong cases and necessary accessories quoted on pages 689 and 690. Purchase what you need with the instrument and save transportation charges.

No. 12H256¼ Price.....(Shipping weight, 9 pounds.)..... $17[illegible]

LUDWIG CONCERT VIOLIN

This Violin is a copy of the celebrated Stradivarius violin, beautifully worked out by the artist, L. Ludwig, a man who has given most of his years to violin making. We have bought and sold all the violins Ludwig has been able to make in the last six years and we received nothing but unsolicited praise of their merits. It has a two-piece back of carefully selected well seasoned maple, beautifully figured and flamed. The sides are of maple and the top is made of carefully selected even grain, thoroughly seasoned silver spruce. The neck is made of fine curly maple of perfect measurement, and the scroll is very carefully carved and finished. The model is perfect in every respect. The measurements are correct and such as will give the best possible tone results. The edges are very carefully worked out and the corners shaped, and the purfling inlaid with greatest accuracy. The soundholes are carefully and delicately cut. Don't forget that the first requisite of a violin is tone, and the tone of a violin depends entirely upon the selection of the materials and care with which the details of construction are carried out. The body of the violin is finished in a brownish red color, covered with a specially prepared Bergamo oil varnish, giving the instrument a dull velvetlike appearance, the richness and beauty of which cannot be described. All trimmings are of the best quality jet black ebony wood. The tailpiece and pegs are handsomely carved in fancy design, opaque in finish, matching to perfection the style of instrument. This violin has a rich, strong and harmonious tone, which is bound to increase in volume and sweetness with use. We know the tone will charm you. Each violin bears a label on the inside with the maker's autograph. Do not allow yourself to be deceived by imitations with which the market is flooded. This is a violin that cannot be duplicated for less than $45.00 to $50.00. No description we could give in these pages could do justice to the instrument. We guarantee that it will improve with age. Any of our Pernambuco wood bows and leather cases will make splendid companions to this violin. If you need either or both don't fail to include them in your order. Shipping weight, 9 pounds.

No. 12H258¼ Price..... $22[illegible]

PERFECT IMITATION OF AN OLD "STRAD."

GENUINE CURATOLI VIOLIN

Of the modern school of violin makers Antonio Curatoli is one of the leading exponents. His violins are very well [illegible] wherever exhibited and tried they never fail to bring forth the highest praise. Many of the principal colleges, [illegible] and players of reputation highly endorse his instruments, both for their exquisite workmanship and tonal qualities. [illegible] copyist in the strictest sense of the word. Not only does he reproduce the models, but makes them under the strict [illegible] Italian makers, copies the marks of age in the wood as well as the varnish, so that no one but an expert could tell his [illegible] instrument hundreds of years old. The violin we are offering is an exact copy of one of Antonius Stradivarius' very best models of about the year [illegible] varius was the greatest maker that ever lived and such of his violins that are still available sell for $5,000.00 to $10,000.00.

DESCRIPTION—Back and sides made of highly flamed maple. Top, Cremona silver spruce. Neck, maple finely figured, with the scroll [illegible] in elegant outlines. Trimmings, Madagascar ebony, plain but rich in finish. Materials, thoroughly seasoned and selected with the greatest of [illegible] musical properties, which naturally insures a tone that will improve with age and playing. Workmanship, the best; every particle of the work [illegible] Curatoli himself. Edges evenly worked out, the purfling set in with extreme care, the sound bar of the right thickness and size; the lining, blocks [illegible] work of an artist; only happy when the best in him has been produced. Color, rich golden amber, except where marks of age are. Varnish, fine transparent oil varnish, evenly laid on, giving it a superbly rich appearance. Tone, loud and even on all four strings and at the same time of a pleasing, [illegible] round quality, suitable for solo or orchestra work. Shipping weight, about 10 pounds.

HANCE TO BUY A GOOD VIOLIN AT LESS THAN COST

WE HAVE ON HAND a few violins which through climatic conditions or in handling were checked or cracked at top. **These violins** have been so carefully repaired that these small defects are hardly visible; furthermore, they were adjusted, fitted with new strings and are in as good a playing condition as any new violin. **Rather than sell** these instruments to jobbers we are giving our customers an opportunity to obtain a violin at a great sacrifice in price. **If you contemplate** studying the violin and don't wish to invest in a large amount of money until you know that you will be able to master it, take advantage of this great offer. **AS WE HAVE only a very limited number of these violins we urge you to order at once. Also state first, second and third choice.** Your money returned if you are not fully satisfied.

NOTE—AS WE CANNOT INCLUDE at such low prices any bows, cases or other trimmings, should you need such we recommend that you order now from the catalog and include with shipment, thus saving additional transportation charges.

No. 12H106¼ A few violins, Stradivarius in model, blood red in color, with carved scroll, fancy pearl inlaid pegs and tailpiece and with an ebony carved chin rest. OUR VIOLIN REPAIR SHOP.

We are prepared to undertake repairing of any kind, from the simplest to the most difficult, from plain gluing of loose parts, to the careful repairing or renewing of others. All in a most artistic manner.

Our facilities for first class repairing are unequaled. We were very fortunate in securing the services of very competent and conscientious workmen who came to this country direct from the violin centers of Europe; men who have given a great part of their lives to the art of violin making and understand it thoroughly from the standpoint of construction, selection of woods, varnish and the principle of sounds. They are completely equipped with the best of tools, a variety of well seasoned materials and all modern conveniences to facilitate accurate workmanship.

We cannot tell you how much the cost of repairing your violin will be, as repair charges are figured on the actual time employed by our experts, plus the cost of the materials used, and these are determined by the condition of the instrument. **Send us your violin by express prepaid,** we will carefully examine it and we will then advise you how much it will cost.

We guarantee that any violin which we might agree to repair will be put in an absolutely first class playing condition and that it will give the same amount of service and satisfaction as any new violin.

When sending your violin the address on the box should be in the form given below and it will come to the direct attention of our repair shop.

N CASES OF FINE APPEARANCE AND LASTING QUALITY.

We know our cases will give satisfaction as we know by whom and how they are made. judge a case by the outside appearance alone, as when the frame is covered with leather ch material it does not show. The bodies of our cases are made of selected materials, strong in construction and will not get out of shape. **"Beauty is only skin deep,"** and this, indeed, is true of most cases. Should anybody offer cases of similar appearance to ours at lower, or even equal price, we must warn you to be careful. The foundation or life of the case may be poor. **No one can sell our quality at anywhere near our price.**

THE FINEST VIOLIN CASE MADE. $5.95

Seal Grain Leather Covered. Silk Plush Lined.

$11.00 Value.

Black Only.

This case is built on scientific principles. It is made of four plies of veneer glued across grain to prevent the weather from ever affecting it, and we guarantee it will never warp nor lose in any way its beautiful lines. Cheap cases are made of one thickness of wood and pressed into shape by steam, and are therefore easily affected by moisture or heat. Our case is covered with heavy genuine seal grain leather, fitted with steel leather covered valance, which renders the case dust and rain proof, with nickel plated patent lock, spring clasps and trimmings. It is lined with silk plush, has string and rosin compartment and spring bow holders. Retails regularly at $9.00 to $11.00. Comes in black only. Shipping weight, 8 pounds.

IN BOWS.

In purchasing a violin bow the quality of the wood of which the stick is made must be the first consideration. It must combine stiffness with elasticity and a well balanced weight. The very best bows are made of Pernambuco wood, which grows in South America and which Francis Tourte, the most celebrated of all bow makers and properly called the "Stradivarius of the bow," discovered in 1870 as the best for the purpose. Brazil wood also makes a very good stick a good weight, spring and resistance and gives satisfaction. A good many bows are made of maple, beechwood and redwood, but as they are too light and non-elastic and therefore rove unsatisfactory, **we do not handle them. Our bows** have fine sticks, well curved and balanced, and we know they will give satisfaction.

The Ideal Chin Rest.

This is the very latest idea in a Chin Rest and one which will certainly please every violinist. It is made with a very deep cup. This gives the chin of the performer a very strong grip on the violin. It is very carefully and durably made, and is very easily fastened to the violin. When once attached it will not work loose. It is made of solid ebony, and has nickel plated attachments.
No. 12H4609 Price.... 58c
Postage extra, 7 cents.

GUITARS OF GUARANTEED QUALITY

R LINE OF GUITARS we offer wonderful values. For $1.89 we sell an instrument that is superior in every way to those others at as high as $3.00 to $4.00. We could sell guitars as low as $1.25, but d be cheaply made, and in your interest we decline to handle them. Don't be erefore, if lower price should be offered you. The quality would necessarily ed.

UITARS are made by expert mechanics, according to the best principles of construction, are perfect in model and nt, thoroughly braced and lined. They are perfect in tune, scale and their tone is brilliant and powerful. The materials ell seasoned and the best that money and experience can buy. of all our guitars from the cheapest to the highest is the nsistent with the price charged.

ARANTEE OUR INSTRUMENTS for one year against splitting or warping and good by repair, exchange or refund any instrument that may show either fects.

CONVINCE YOU. Order one of our guitars, compare it with the instruments other merchants are offering, try it for ten days, and if for whatsoever you are not pleased with it and satisfied that you received a splendid bargain, us and we will return your money and all transportation charges. The trial will cost you Will other dealers do as much? If they don't it is because they know their instruments cannot stand comparison with ours, and if they do, we know it is their instrument that will be returned.

FREE
with each guitar a course of fifty lessons with the best Correspondence School of Music in America, under the direction of one of the world's greatest guitarists.

SOME OF OUR GUITARS are made in four sizes—Standard, Concert, Grand Concert and Auditorium. The larger the size the greater the volume of tone and carrying power. To enable you to select size desired, we give below a table of the dimensions.

STANDARD SIZE—Length of body, 18⅜ inches; total length, 36⅜ inches; width, small end, 9 inches; width, large end, 12½ inches; depth, small end, 3⅛ inches; depth, large end, 3¾ inches.

CONCERT SIZE—Length of body, 18¾ inches; total length, 37 inches; width, small end, 9⅝ inches; width, large end, 13 inches; depth, small end, 3⅛ inches; depth, large end, 3¾ inches.

GRAND CONCERT SIZE—Length of body, 19 inches; total length, 38 inches; width, small end, 10 inches; width, large end, 14 inches; depth, small end, 3⅜ inches; depth, large end, 4 inches.

AUDITORIUM SIZE—Length of body, 19½ inches; total length, 38½ inches; width, small end, 10¼ inches; width, large end, 14½ inches; depth, small end, 3⅜ inches; depth, large end, 4 inches.

The auditorium size guitars are made to order only, and require from two to three weeks' time to make and ship.

Total length of instruments may vary up to ¼ inch on account of neck.

With each guitar we send an extra set of strings, one Magic Capo d'Astro, one book of Guckert's chords and one lettered fingerboard chart. Shipping weight, 12 pounds.

THE MOZART, $3.95

Made in Standard Size Only.

AT $3.95 we are offering a guitar made by skillful mechanics, of perfect proportions, of good, well seasoned materials, with tasty ornaments, a splendid finish, and above all, a good clear, brilliant tone. Such a guitar would ordinarily be sold for $6.00 to $8.00.

A Neat Decoration.

This is an exact reproduction of the inlay. It consists of small blocks of white and black wood arranged to represent a cord which is surrounded by three narrow strips of alternate green, white and black woods, producing a very pretty effect.

DESCRIPTION.

The body is finished by patent process in perfect imitation of rosewood with a Vermont spruce top finished in natural color. **The neck** is finished in imitation mahogany, is well cut and easy to manipulate, with rosewood veneered heelpiece. **The fingerboard** is of walnut, ebony stained, evenly fretted and with pearl position indicators. **The patent heads** are brass, screw pattern with black buttons. This guitar is fitted with nickel plated **tailpiece**, ebonized **bridge** and Glendon silvered steel **strings**. **The ornaments** are as follows: Top and back bound with white celluloid and adorned with wood inlay as shown in illustration, in colors to harmonize with body of guitar. It is beautifully varnished and polished.

The above description will only partially convey to you the real merits of this guitar. It is made not only to sell and look upon, but to produce a beautiful tone. Shipping weight, 12 pounds.

No. 12H607¼ Standard size. Price..... **$3.95**

THE SCHUBERT, $6.95

In this instrument we are offering a genuine **Flemish oak highly ornamented Guitar**, with a wonderful tone and superb finish, at minimum cost; the actual cost to manufacture with but one small profit added.

Very Rich and Attractive.

The center of this ornament consists of blocks of different colors, set so as to represent a cord bound with narrow strips on each side and by another combination of little blocks in black and white, finally framed in by narrow straight strips. The assortment of colors, while very striking, harmonizes most beautifully with the entire guitar.

DESCRIPTION.

The body of this guitar is made of genuine quarter sawed Flemish oak, beautifully grained and with Eastern spruce top in natural color. The top, back edge and soundhole are bound with white celluloid and inlaid with wood ornaments in different colors as illustrated. It has a genuine mahogany neck with heel rosewood veneered. The top of the neck's head is rosewood veneered and inlaid with a large mother of pearl star. It has brass screw pattern patent heads. **The fingerboard** is made of ebony, carefully fretted, has four mother of pearl position dots and is furthermore bound with white celluloid. This binding prevents the rough edges of the frets from coming in contact with the hands of the performer, thus facilitating the playing. Ebony bridge with German Silver saddle, ebony bridge and end pins with mother of pearl dots. The guitar is covered with fine transparent varnish beautifully polished, and its tone is round, sweet and powerful. A guitar of the same grade will sell elsewhere at double our price. Shipping weight, 12 pounds.

No. 12H611¼ Standard size. Price..... **$6.95**
No. 12H612¼ Concert size. Price..... **7.65**

ERENATA, $2.45

Body is made of poplar and by special patent process, finished in splendid imitation of genuine arter sawed oak. **Top** is spruce, und with white celluloid and inid with one strip of black purng. **Soundhole** is also inlaid with o rings of black, white and red od in alternate order. **Neck** ined in imitation mahogany with el piece veneered with rosewood. tent **heads** are brass, with black luloid buttons. **Fingerboard,** itation ebony with raised frets d three pearl position dots. **Trimmings,** nickel plated tailpiece, bonized bridge, end pin and steel **strings**. **The tone** is sweet, pleasing and robust.

No. 12H602¼ Standard size. Price..... **$2.45**
Shipping wt., 12 lbs.

THE FIGARO.

Same description as No. 12H602¼, except in imitation mahogany, with no celluloid binding and not so highly finished. **Our advice is that you purchase one of the better grades,** but if $1.89 is all you care to invest, we guarantee this guitar to be equal to ones sold by others at $3.00 to $4.00.

No. 12H590¼ Standard size. Price, **$1.89**
Shipping wt., 12 pounds.

THE TOREADOR, $3.25

Standard Size Only.

This is one of the prettiest guitars we offer in our low priced line.

The body is in a perfect imitation of finely grained mahogany. **The top** is made of spruce, the edges bound with white celluloid and inlaid with variegated woods in an assortment of colors. Same ornament around soundhole. The back edge also is bound with white celluloid and has a very pretty strip of decalcomania in the middle. **The neck** is made of selected material, mahogany finish, with rosewood heel piece. **Fingerboard** is stained in imitation of ebony and fitted with raised frets. Has three genuine mother of pearl position dots. **Patent heads** are brass, with black celluloid buttons. **Tailpiece,** nickel plated. **Bridge,** ebonized. **Strings,** Glendon steel. The tone is charming and of good volume.

No. 12H604¼ Standard size. Price **$3.25**
Shipping weight, 12 pounds.

THE JUANITA, $4.55

Standard Size Only.

This guitar is certainly a beauty and were you to compare it with instruments sold at 30 to 50 per cent higher in price, you would find it the best value from every standpoint.

Back and sides of this guitar are made of fine quarter sawed northern oak. **The top** is made of selected spruce. The top, back edges and soundhole are bound with white celluloid and inlaid with fine designs of wood purfling. The back is inlaid down the middle with a strip of colored woods. **The neck** is finished in imitation mahogany, with rosewood heel piece. **The fingerboard** is accurately fretted and inlaid with three pearl position dots. **Patent heads** are screw pattern made of brass. **Trimmings,** nickel plated tailpiece, ebonized bridge and end pin, steel strings. **It has a good full,** round and sympathetic tone and is suitable for club as well as solo playing.

No. 12H609¼ Standard size. Price, **$4.55**
Shipping weight, 12 lbs.

THE VERDI, $5.65

Standard Size Only.

This guitar is made in imitation rosewood, but you must not make the mistake of thinking this one of the cheap imitations so common on the market. Our factory employs a strictly patent process and the imitation is so perfect that nobody but an expert can tell the difference between this guitar and a genuine rosewood one.

The body is imitation rosewood, as explained. **The back** has a strip of inlaid colored wood down the middle and around the outside edges, which are bound with white celluloid. **The top** is made of Eastern spruce, inlaid around the soundhole and edge with colored wood and bound with white celluloid. The inlaying we use on this guitar is very striking, yet fully harmonizing with the whole of the instrument. **The neck** is finished in imitation mahogany, with the head veneered with genuine rosewood and ornamented with a mother of pearl figure. The heel of the neck is veneered with rosewood. **Patent heads** are brass, screw pattern. **Fingerboard** is of boxwood in imitation ebony and fitted with German silver frets, bound with white celluloid and inlaid with mother of pearl position dots. **Tailpiece,** nickel plated. **Bridge,** ebonized. **End pins,** ebonized. **Strings,** silver steel. **The guitar is coated with transparent varnish and highly polished.** It has a powerful and clear tone.

No. 12H610¼ Standard size. Price.. **$5.65**
Shipping weight, 12 pounds.

ER BIRTHDAY. Solid Gold Birthday Ring Worth $2.50, but Costs YOU $1.44.

THE NORTHWESTERN, $7.95

Never before has such a high grade genuine rosewood guitar been offered at such a low price. Its beauty of ornament and tone can only be appreciated after an examination and trial. **Back and sides** are made of genuine rosewood. **The top** is of fine Eastern spruce, especially selected and finished in the natural color. The back edge is bound with white celluloid. The top edge and soundhole are celluloid bound and are inlaid with various colored woods, set in a very attractive design. A strip of the same wood inlay is set in the back of the instrument. **The neck** is made of genuine mahogany, the heelpiece of which is veneered with rosewood. The head of the neck is veneered on the top with genuine rosewood and inlaid with a mother of pearl star. **The fingerboard** is of genuine ebony with German silver frets, and inlaid with mother of pearl position dots. **The patent heads** are nickel plated, with white celluloid buttons. **The bridge** is made of ebony with German silver fret. Bridge pins and end pin also made of ebony and inlaid with mother of pearl. **Strings** best quality steel.

For tone quality, accuracy of intonation and ease of playing, this guitar cannot be surpassed by instruments which usually retail at from $15.00 to $18.00. Shipping weight, 17 pounds.

No. 12H634¼ Standard size. Price...$7.95

THE NEW ILLINOIS, $9.85

Compare this guitar with any offered at $18.00 to $20.00, give it a ten days' trial, and if you don't find it at least equal, if not superior, return it at our expense and we will return your money. **Back and sides** made of finely figured mahogany. **The top** is selected with great care from Eastern spruce and is finished in the natural color. The edges of the top and back are bound with white celluloid and ornamented with inlaying of multicolored woods. Around the soundhole are three circles of wood inlaying and the edge is also bound with celluloid. **The neck** is of graceful model and made of mahogany, with heel and head veneered with rosewood and inlaid with a star and a diamond in mother of pearl. The patent heads or machines are of the best screw pattern, nickel plated and polished, and fitted with ebonite buttons. **The fingerboard** is made of Madagascar ebony bound with celluloid, fretted with great accuracy with genuine German silver frets, round, smooth and agreeable to the touch. All position marks are in the shape of fine mother of pearl ornaments of different sizes and designs. **The bridge** is ebony, with German silver fret. Bridge and end pins inlaid with mother of pearl. **The finish** — This guitar is covered with three coats of fine varnish carefully rubbed by hand and brought to a fine luster as on all high grade pianos. The transparency of our varnish permits the colors of the woods to show in their full brilliancy. **The tone is of large volume** and carrying power, yet smooth and sweet. Shipping wt., 18 pounds.

No. 12H632¼ Grand concert size. Price.$11.50

THE CORNELL, $10.95

The illustration gives but an idea of the general outline of this guitar. The beautiful effects of the combination colored woods cannot be appreciated unless seen, and its charming and robust tone, unless heard. **The body** of handsomely figured genuine rosewood. The back is inlaid down the center and around the edge with a neat strip of different colored woods set in very artistic manner and bound with white celluloid. **The top** is made of even grained spruce, finished in natural color, bound with white celluloid and inlaid around the edge with the same ornamentation of colored woods. Our inlays are all very elaborate, representing the setting of wood in many different patterns and must not be confused with the plain strips of colored wood used by other manufacturers. **The neck** is made of solid mahogany. The head of the neck is veneered on the front and back with genuine rosewood and ornamented on the front with inlaid designs of mother of pearl. The heel of the neck is capped with celluloid. **The fingerboard** is convex in shape and is made of solid ebony, full bound with white celluloid, accurately fitted with German silver frets and ornamented with fifteen figures in mother of pearl. The nut is made of bone to correspond with the binding of fingerboard. **The bridge** — Ebony with bone saddle with ebony pearl inlaid bridge pins. **The patent heads are** engraved and highly nickel plated and burnished and are fitted with white celluloid buttons. **The strings** are imported gut. The guitar is given a very fine finish by using the same process that is used on pianos. Shipping weight, 18 pounds.

THE YALE, $12.75

We are offering here an instrument which is elegant in finish, correct in model, durably built and mellow and powerful in tone. **The body** is made of the finest quality birds-eye maple. The illustration will give only a faint idea of the elaborate and expensive inlay used on the back of this guitar. The back edge is bound with black celluloid and in the center of back is set a strip of block work in black and white, bound by two narrow strips of green and black. On each side of this strip on both the lower and upper part of the instrument, it is exquisitely ornamented with designs of inlaid woods, representing leaves, flowers, buds and vines. **The top** is made of thoroughly seasoned Eastern spruce bound with black celluloid and inlaid around the edge with a wide strip of black, white, red and green purfling of very small figures, artistically set. The soundhole is bound with white celluloid and surrounded by three circles of inlay to match the edge. **The neck** is finished in imitation of ebony and very highly polished. **The patent heads** are made of best quality brass. **The fingerboard** is of solid ebony and bound with white celluloid, fitted with German silver frets and ornamented with genuine mother of pearl position dots. **The bridge** is made of ebony with bone saddle and ebony bridge pins with pearl dot. By purchasing this guitar from us you can save fully 50 per cent. and you will be sure of obtaining an article which is first class in every respect. Shipping weight, 18 pounds.

THE VASSAR, $19.

You may pay a higher price but you cannot get any higher quality from a construction, finish or tonal standpoint than this guitar. This we would like to prove to you at our risk. Read this description very carefully. **Back and sides** are made of genuine rosewood. The back is bound with white celluloid and inlaid down the middle with a broad strip of mother of pearl between two narrow strips of colored woods. The sides are inlaid with two bands of colored variegated woods, which harmonize nicely with the beautiful rosewood. **The top** is made of Eastern spruce, especially selected for its resonant qualities. The edges of top and soundhole are bound with white celluloid and inlaid with mother of pearl between strips of colored woods. **The neck** is made of genuine mahogany. **The head** is veneered in front with ebony and back with rosewood; front inlaid with three designs in mother of pearl. **The patent heads** are the best American made, nickeled and engraved, having celluloid buttons in imitation of ivory. **The fingerboard** is made of solid ebony bound with white celluloid and inlaid with seven beautiful mother of pearl designs for the positions. **The bridge** is of solid ebony with bone fret and pearl inlaid ivory bridge pins. The tone of this guitar is sweet and powerful and harplike in quality. We advise the purchase of a case now, thus saving transportation charges. Shipping weight, 18 pounds.

MANDOLINS OF TONE AND BEAUTY

ANDOLINS we are offering are made according to scientific principles by expert mandolin he highest paid mechanics in the country, and should not red with the cheap, flimsy noise boxes shaped like a which are generally offered as musical instruments. We r mandolins as low as 95 cents each, but they would service or satisfaction and therefore we do not handle

FREE WITH EACH MANDOLIN, A COURSE OF FIFTY LESSONS WITH THE BEST CORRESPONDENCE SCHOOL OF MUSIC IN THE WORLD

OUR LIBERAL TERMS. We allow any mandolin purchased from us to be tried and tested for ten days, and will receive it back and cheerfully return the price paid, together with transportation charges, if it does not prove satisfactory.

ALL OUR MANDOLINS are regular standard eight-string instruments. We can furnish any of the styles from No. 12H706¼ and No. 12H723¼ with twelve strings for $1.50 extra, and from No. 12H726¼ to No. 12H766¼ for $2.00 extra. These are, however, made to order and we require from two to three weeks' to ship.

T BE INFLUENCED by price alone; consider the quality, and only then will you appreciate how far superior our mandolins how much actual value they represent.

WITH EACH ONE OF THESE MANDOLINS we give an extra set of strings, pick, complete instruction book and a fingerboard chart. Shipping weight of mandolins, 7 to 11 pounds.

THE DEFIANCE.

This mandolin is only to be compared with instruments usually sold at from $3.00 to $4.00. Nine ribs of alternate maple and walnut, with strips of red inlaying between. Imitation rosewood cap, spruce top, black fiber guard plate. Soundhole inlaid with four strips of colored woods. Imitation mahogany neck fitted with solid brass patent heads. Ebony finished fingerboard, inlaid with four mother of pearl position dots and fretted. The shell pattern tailpiece is nickel plated.

No. 12H701¼ Price..(Shipping wt., 7 lbs.). **$1.95**

THE COMPETITION.

Has nine ribs of alternate maple and mahogany, with thin strips of black wood between; imitation rosewood cap and top of silver spruce, inlaid around the edge with a strip of colored wood and bound with white celluloid. Inlaid around the soundhole to match edge. Guard plate inlaid with a very pretty floral design in colored woods. The neck is imitation mahogany; the patent heads of good quality brass, the fingerboard is ebonized with German silver frets and inlaid mother of pearl position dots, nickel plated tailpiece. Very highly finished. Easily worth $5.00 to $6.00. Shipping weight, 7 pounds.

No. 12H703¼ Price..... **$2.85**

THE SOVEREIGN.

Has thirteen ribs of solid rosewood with fine strips of white holly between. Solid rosewood cap and apron. Top of fine silver spruce, inlaid around the edge with a strip of different colored wood and bound with white celluloid. Soundhole inlaid around with a ring of different colored wood to match the edges and bound with white celluloid. Guard plate is beautifully inlaid with a striking and classic design of various colored woods. Neck is of solid mahogany. Head is veneered on the front with rosewood. Patent heads are made of brass, screw pattern; fingerboard is solid ebony; has German silver frets and inlaid mother of pearl position dots. Nickel plated solid ebony bridge.

Eleven Mahogany and Rosewood Ribs.

HERE IT IS

THE CONQUEROR

This is the greatest mandolin bargain ever offered by any concern in the world, and we would like to have you compare it in every way with what is offered by other dealers, as we know it cannot be duplicated for any less than $8.00 to $10.00. Compare the number of ribs, the materials they are made of, the grain of the wood of the top, the beautiful and elaborate inlay around the edge of the top and around the soundhole, the rich and artistic guard plate, the neck, fingerboard, patent heads, in fact every part entering into its construction, the careful way it is built and braced, the splendid finish, and above all its powerful, sweet tone, due to thoroughly seasoned, carefully selected materials, perfect model, measurements and expert workmanship, and you will find it so far superior to anything you ever saw before that there will be no comparison whatever. **Read the description. Eleven ribs of alternate rosewood and mahogany,** with a strip of white holly between. **Solid rosewood cap and apron. Top of resonant spruce,** inlaid around the edge with a broad strip of different colored woods set in a very ornamental and elaborate design, and bound with white celluloid. **Soundhole has a ring around** of the same ornamentation as the edge. **Guard plate is very handsome and unique in design.** Its body is black, surrounded by a Florentine ornament of a rich brick red and at the extreme left it is inlaid with flowers in woods. **Neck is well cut and graceful,** with the front of the head ebonized and polished. It is fitted with best quality brass American screw patent heads. **Fingerboard is ebonized** with raised genuine German silver frets and mother of pearl position dots. Nickel plated tailpiece. **Solid ebony bridge. It is coated with fine transparent varnish, which brings out the splendid and effective grain of the wood; very highly hand rubbed and polished.**

No. 12H706¼ Price.....(Shipping weight, 7 pounds)..... **$3.95**

THE PRESIDENT.

A very charming instrument from the standpoint of materials, workmanship, ornamentation and the purity, volume and sweetness of its tone. **DESCRIPTION**—Genuine rosewood body made of nineteen ribs with holly strip between each rib. Rosewood cap bound with white celluloid. Top is of white spruce with edges inlaid with a wide set of colored wood ornaments and celluloid bound. Soundhole is inlaid and bound to match edge. Guard plate has mother of pearl flowers and vines inlaid into the celluloid body in imitation of genuine tortoise shell. A very beautiful combination. Neck is of genuine mahogany with top of head veneered with rosewood and inlaid with pearl ornament. Fingerboard ebony, fretted and celluloid bound with pearl position dots. Nickel plated and combination tailpiece and arm rest. This mandolin is only to compare with what others are offering at $12.00 to $15.00.

H723¼ Price.....(Shipping weight, 7 pounds)..... **$7.45**

THE IMPERIAL.

Elaborate guard plate.

This mandolin has twenty-eight ribs of extremely finely flamed rosewood, with thin strips of white holly between. Cap and apron also of rosewood and bound with celluloid. Top is a fine specimen of Eastern spruce. Edges and soundhole are bound with white celluloid and a very rich inlaying made of woods of different colors in a variety of shapes and sizes. Guard plate is most striking. It is made of celluloid in perfect imitation of tortoise shell, into which are inlaid leaves, acorns and two birds made of woods of bright colors and beautifully assembled. Neck is solid mahogany, the front of its head veneered with rosewood and inlaid with fine mother of pearl ornaments. Patent heads are sunken and covered with one-piece plate, nickel plated. White celluloid buttons. Fingerboard is of solid ebony, bound with celluloid and ornamented with position marks of pearl. Combination tailpiece and arm rest, nickel plated and burnished.

No. 12H726¼ Price.....(Shipping weight, 7 pounds)..... **$9.95**

THE PALOMA. PEARL ORNAMENTS.

If you could see this instrument and play on it you would undoubtedly believe us when we say we are selling it one-third cheaper than those of similar grades sold by other dealers. DESCRIPTION—Thirty-five ribs of first quality rosewood with strips of white holly between the ribs. Rosewood cap bound with white celluloid. Top is of Eastern spruce and is inlaid with mother of pearl dots and diamonds on black background bound with strips of colored wood. The outer edge is bound with white celluloid. The guard plate is made of imitation tortoise shell inlaid with a pretty design in mother of pearl. of solid mahogany hand carved at the heel. The head is veneered on the front th rosewood and is ornamented on the front with stars, crescents and flower mother of pearl. The fingerboard is made of ebony bound with celluloid and nine mother of pearl position ornaments. The machine heads are enclosed, one-piece plate, hand engraved and nickel plated. White celluloid and engraved nickel plated sleeve protector. The tone is mellow.

756¼ Price.....(Shipping weight, 7 pounds)..... **$12.75**

THE ANGELO.

Words or illustrations cannot do justice to the graceful outlines, the beautiful figures and designs and the perfect inlaying. As a matter of justice to yourself before purchasing a mandolin you must order this instrument under our most liberal terms. **DESCRIPTION**—Body of forty-four ribs of genuine rosewood with strips of white holly inlaid between. Rosewood scroll cap bound with white celluloid and inlaid with a strip of variegated woods in combination of black, green, red and natural colors. Top of Eastern spruce in natural color. Edges of top and soundhole bound with white celluloid and inlaid with mother of pearl to match edge. Guard plate is a most beautiful design. The background is of fine tortoise shell celluloid inlaid with the figure of a maiden playing a harp. This figure is made of mother of pearl in changeable green colors and is effectively surrounded by a ribbon design of gold fish pearl and engraved to bring out small details. Mahogany neck fitted with a solid ebony extension pattern fingerboard (which allows performer two extra notes) bound with celluloid and inlaid with seven exquisite pearl position designs. Head veneered on the front with ebony and on the back with rosewood. Front of head inlaid with a pretty figure in mother of pearl. It is fitted with sunken patent heads covered with one-piece plate engraved, nickel plated and burnished. White celluloid finger buttons. Tailpiece to match heads. The tone is pure and mellow and of great volume and carrying power.

MANDOLINETTOS.

The mandolinetto is a very neat little instrument of exactly the same shape as a guitar, only of smaller proportions, the body being 10 inches long and 8 inches wide. It is played exactly like the mandolin, and can be used by any mandolin player. With each instrument we include a genuine tortoise shell pick, one complete instruction book and a course of fifty lessons with the foremost correspondence school of music in America. Cases for these instruments, quoted below. Shipping weight of these instruments, 7 pounds.

No. 12H780¼ This instrument is very fine, being made of genuine rosewood. The top is made of Eastern spruce, bound with white celluloid and inlaid with a broad strip of purfling in alternate colors and set in a very artistic design. The soundhole is also bound with white celluloid and inlaid around with a broad ring of the same inlay as the top. The guard plate is inlaid with a very beautiful design of different colored woods. The back edge of this instrument is also bound with celluloid, and down the center of the back is inlaid a fine strip of purfling of the same variety as the top. The neck is made of genuine mahogany. The front of the head is veneered with rosewood. Patent heads are of the finest quality brass, screw pattern, with black celluloid buttons. The fingerboard is made of ebony and very carefully fretted with German silver frets. It has genuine mother of pearl position dots. Tailpiece is highly nickel plated and polished. The finish of this instrument is magnificent.
Price..... (Shipping weight, 7 pounds)..... **$5.75**

No. 12H782¼ The body of this instrument is made of maple, finished by a patent process in a perfect imitation of quarter sawed oak. The top is made of spruce, bound with white celluloid and inlaid around the edge and soundhole with strips of varicolored wood purfling. It has a black celluloid guard plate. The neck is finished in imitation mahogany, with brass patent heads and black celluloid buttons. Fingerboard is made of hardwood in imitation of ebony, and is very carefully fretted. It has four pearl position dots. Nickel plated tailpiece.
Price.....(Shipping weight, 7 pounds)..... **$2.85**

No. 12H822¼ Price.....(Shipping weight, about 12 pounds)..... **$5.15**

THE GEM.

This banjo has an 11-inch heavy nickel shell with carefully wired spun edges and cherry wood lining. It has thirty-one nickel plated special pattern brackets with protection nuts and center grooved straining hoop which prevents the hooks of the brackets from cutting through the head. The head of the neck is veneered with ebony and inlaid with star, crescent, and flower shaped designs in mother of pearl. It has white celluloid keys and genuine ebony fingerboard with square and diamond aid mother of pearl position dots. Best calfskin head. **WE RECOMMEND THIS being first class in every respect and an instrument which will give the best of under all conditions.** Other dealers charge $18.00 to $20.00 for the

2H858¼ Price.....(Shipping weight, 17 pounds.)..... **$9.65**

THE RUBY.

Without any doubt the best value ever offered in a banjo. Beautiful in appearance, harmonizing in decorations and ideal in tone, purity and power. Send for it and if it does not surpass your highest expectations return it to us at our expense. It has 11-inch double wired shell made of brass, nickel plated and burnished, lined on the inside with cherry wood, finely varnished. Center grooved straining hoop, preventing hooks from cutting head. Flat flesh hoop. Twenty-five professional pattern brackets with flat hook and closed ball nuts. Brackets held to shell by special nickel plated bolts (not screws as in cheap banjos). **Walnut** neck of slender pattern. Top of head, heel of neck and under fingerboard are veneered with one layer of white holly and one of ebony, making a strikingly pretty contrast. Ebony fingerboard bound with celluloid to prevent ends of frets interfering with quick movements and inlaid with eight large pearl ornaments on the position spaces. Head also inlaid with fine pearl figures. Celluloid pegs of special design. "Elite" nickel tailpiece and snow white calfskin head. Good gut strings and maple bridge.

No. 12H863¼ Price.....(Shipping weight, 16 pounds.)..... **$12.25**

THE PEARL.

This is the first time a pearl fingerboard banjo of this grade has been offered for less than $25.00. It has an 11-inch heavily nickel plated shell, with both edges spun on heavy steel wire, and is lined with cherry, finished in mahogany. Fitted with thirty-one nickel plated special pattern brackets with closed ball end nuts. The straining hoop is of the improved center grooved pattern, ⅝ inch wide, artistically chased, giving it a rich appearance. The brackets fit into this center groove, which prevents them from cutting the head. The neck is of the extension pattern, made of cherry, and finished in San Domingo mahogany, it being fitted veneered heel and head, the latter inlaid with a beautiful design in mother of real beauty of this instrument lies in the mother of pearl fingerboard, which is 19 and fitted with seventeen raised German silver frets. The space between each fret th a block of white mother of pearl, bound with a ⅛-inch strip of ebony, making ing and beautiful contrast. The positions are marked by eight dark green pearl of various designs. This banjo is fitted with the best quality calfskin head. Not is a beautiful instrument, but it has a tone which is sweet, d responsive.

2H864¼ Price.....(Shipping weight, about 16 pounds.)..... **$15.75**

THE DIAMOND.

We could fill a page in describing and illustrating this banjo and yet not do it full justice. No illustration, no matter how large, can duplicate the costly materials, perfect carving, exquisite mother of pearl inlaying and its beautiful tone. It must be seen and heard to be fully appreciated. The shell is 11 inches in diameter, made of brass, heavily nickel plated, with both edges spun on wire. The inside of the shell is lined with a heavy nickel plated metal which gives the banjo a powerful ringing and penetrating tone. It is fitted with thirty-one nickel plated standard pattern brackets with protection nuts, and a center grooved nickel plated straining hoop which prevents the brackets from cutting the head. The neck and head are made of genuine mahogany veneered with three layers of rich colored woods capped with a heavy layer of ebony. The head is inlaid with three mother of pearl designs and is fitted with fancy celluloid pegs. The heel of the neck is elaborately hand carved and veneered with different colored woods. The fingerboard is of genuine ebony, 19 inches long, inlaid with seven striking mother of pearl positions and is bound with strips of white celluloid. Highest grade calfskin head. The tone is silvery, sweet and penetrating. All we ask is that you give the banjo a fair trial and we feel confident that you will never want to part with it. **By ordering a case now you'll save transportation charges.** A case will protect your instrument against injury. See our cases below.

AUTOHARPS.

The Autoharp is one of the most popular of small musical instruments. They require no lessons, but a little patience and practice to learn to play upon them. The music is simply and plainly figured, and anybody can understand it and follow it and in a short time play the sweetest and prettiest melodies. They are an infinite source of recreation and education.

OUR TRADE IS ENORMOUSLY LARGE and is due to our low prices, about one-half what others charge. The question of quality cannot be disputed. There is only one Autoharp made, "The Zimmerman," and that is the one we handle. Each one of these Autoharps is carefully and durably constructed and finished in a beautiful manner and is shipped complete with pick and instruction book. If your time will not allow you to learn to play a violin, piano or other instrument of this class, we would by all means advise you to purchase an Autoharp.

Note—If a case or other small trimmings are ordered with the instrument it won't cost you any more for transportation charges.

$2.95 23 Strings. 5 Bars.

Size, 9¾x17¾ inches.

Our $2.95 Autoharp has 23 strings, 5 bars, and produces 5 chords. The possibilities of this beautiful instrument are unbounded, and while but little practice is needed for the beginner to play nicely, constant practice will enable the performer to produce very difficult music. Weight, packed for shipment, 6 pounds.

No. 12H902 Price.....**$2.95**

$4.95 32 Strings. 8 Bars.

Size, 10½x21 inches.

For $4.95 we offer an autoharp that is strictly first class in workmanship and susceptible of wonderful manipulation. This special autoharp is complete with 32 strings and is fitted with 8 bars, as it has 8 chords, as follows: C major, G seventh, F major, C seventh, B flat major, B minor, A seventh and G minor. The range of different music is very great and the possibilities of the instrument are beyond that of any other of similar construction and much higher price. You cannot purchase this autoharp from any other dealer for less than from $8.00 to $10.00. Weight, packed for shipment 10 pounds.

No. 12H904 Price.**$4.95**

Cases to fit all these Autoharps quoted at upper part of page.

$6.45 37 Strings, 12 Bars.

Size, 11¾x21 inches.

This Autoharp is the very latest product of the manufacturers, and is destined to become the most popular style of their entire list. It has 37 strings and 12 chord bars; these bars are placed close together, making the manipulation of them exceedingly easy. They produce 12 chords, as follows: G major, E seventh, C major, A minor, G seventh, E seventh, F major, D minor, C seventh, A seventh, B flat major and G minor. It is strung and tuned in a perfect chromatic scale. The finish is beautiful; highly polished ebony finish; altogether a handsome useful musical instrument. Weight, packed for shipment, 11 pounds.

No. 12H906 Price...**$6.45**

THE FAMOUS MARX PIANO HARP.

Anyone, within a short time, can produce beautiful music on this instrument without the aid of a teacher.

$2.95

23 Strings, 7 Hammers.

36 PIECES OF MUSIC WITH THIS HARP.

Size, 11x20 inches.

A fine canvas case to fit for **98c**

This instrument is picked with the right hand, same as an ordinary autoharp, while the hammers are manipulated with the left hand. These hammers are so arranged as to produce the chords of C major, G seventh, F major, C seventh, and their relative minors. The figured music which is used on this piano harp is the simplest ever offered in any instrument of this kind. It has 23 strings and 7 hammers. It differs from the ordinary autoharp in the important particular that there are no dead strings over which the performer has to play. It is 11 inches long and 20 inches wide, and weighs, boxed for shipment, 9 pounds. With this instrument we furnish one tuning key, one pick, one music holder and 36 pieces of figured music.

GUITAR ZITHERS.

The Guitar Zither is an improved and simplified German zither upon which may be rendered the most difficult music without the aid of a teacher. Our method of instruction is so easy that anyone can learn to play the instrument in a very short time. The bass notes are tuned in groups of chords. This is a very attractive feature because the various chords of the key are ready to be picked without effort. As an accompaniment of the voice these chords are invaluable. In connection with the violin, piano or other musical instrument, the guitar zither is especially delightful. It rewards individual skill more than any other harp in existence. These are musical instruments which charm alike the home circle and the concert audience.

$1.95 31 Strings, 4 Chords.

Size, 12¾x19 inches.

This Guitar Zither is made of maple, ebonized and beautifully finished with a pretty ornament around the soundhole. Has 31 strings, 4 chords, namely, C, G, F major and G minor. Complete with instruction book, key and finger ring. This instrument possesses a deep tone which never fails to delight the listener. Shipping weight, about 9 lbs.

No. 12H923 Price.....**$1.95**

$2.95 41 Strings, 5 Chords.

Size, 13⅝x19⅝ inches.

This Guitar Zither is made of maple, ebonized and handsomely finished. It is ornamented around the edge and soundhole with pretty decalcomania design. Has 41 strings, 5 chords, namely, C, G, F, D and A major and is an instrument of which one may well be proud. With a little time and patience it is easily learned and a source of pleasure afterwards. It comes complete with instruction book, key and finger ring. Shipping weight, about 9½ pounds.

No. 12H925 Price..**$2.95**

A case ordered with instrument will cost nothing extra for transportation charges.

$3.95 51 Strings, 6 Chords.

Size, 16x21⅝ inches.

This is a particularly fine instrument of great musical capacity. It is made of maple, ebonized, highly polished and beautifully ornamented around the soundhole and the edge of the sounding board. Has nickel plated tuning pins, full chromatic scale with 51 strings, 6 chords, namely, C, G, F, D major and A and E minor. It has a deep, full, rich tone and by the aid of the instruction book which we send, it can be easily learned. Complete with book, key and finger ring. Shipping weight, about 11½ pounds.

$4.95 51 Strings, 8 Chords.

Size, 15x23 inches.

The newest "Lyre Zither." Don't make the mistake of comparing this with the small instruments of the same appearance that are flooding the market. This is a large instrument, has 51 strings chromatically arranged, six groups of basses producing 8 chords, C, G, F, D, A, E major and D and A minor. It is beautifully finished in imitation mahogany; has indicator under strings and is handsome in appearance. Complete with tuning key and instruction book. Weight, 12 pounds.

No. 12H930 Price.....**$4.95**

CHROMATIC SCALE. **$3.95**

MARX CHROMATIC HARP

31 Strings.
15 Melody.
16 Bass.
4 Chords.

Size, 21½ inches long, 12 inches wide.

The only instrument of the kind in the world with a scale tuned diatonically and a bridge so located as to make each string produce its own semitone. No difficult manipulations, no fingering, no hard positions. When a flat or sharp is wanted, just pick the strings on the other side of the bridge and you have it. Thus you can produce sharps and flats just as easily as natural tones. A complete and perfect scale with the simplicity of the natural. In tuning the instrument, just tune the naturals, the semitones (sharps and flats) are tuned automatically. The chord section is also fitted with a bridge, which makes it possible to play complete chord modulations by simply switching from one side of the bridge to the other. **This instrument is undoubtedly one of the greatest inventions in the musical world.** The system of playing is very simple and anyone of ordinary intelligence can learn it in a brief period of time. The instrument is 21½ inches long, 12 inches wide, has 31 strings, 15 strings on the melody side and 16 strings or 4 chords for accompaniments. Strongly constructed, finely varnished and finished. We have arranged with the manufacturers of the Marx Chromatic Harp to handle large quantities, therefore we can sell the harp, instruction book containing several pieces of music, pick, key and music rack for $3.95. Shipping weight, 9 pounds.

ROLLER ORGANS

SIZE, 14¼X7¾X12 INCHES.

ROLLER ORGANS are excellent instruments in every respect. They are durably made, beautifully finished, handsome in appearance and wonderful in tone. They are so simply arranged that a child can operate them and no previous knowledge of the music is necessary in order to play the most delightful pieces on these beautiful organs. The music is produced by the turning of the crank, shown in illustration, which sets in motion a roller which has teeth or pins like the cylinder of a regular Swiss music box. These pins operate upon valve keys, allowing the air to pass through thus producing the different tones.

ALL WORKING PARTS of the instruments are easily accessible, and are made of solid metal, the rollers and keys being mounted on castings. Nothing has been omitted to give these instruments their crowning qualities of extreme simplicity and durability. They are beautifully finished, making a handsome parlor ornament, and are genuine musical instruments which are recommended by good musicians. Full size organ reeds are used, and the volume of sound will fill any ordinary size hall.

THEY WILL PLAY hymns and popular airs, with clearness and accuracy, and furnish acceptable music for any occasion. For dances, lodges, etc., they are most admirable. Perfect execution of music is obtained without the services of a skilled musician. There is no limit to either kind or quality of music they will play and they are the most perfect mechanical musical instruments in design, operation and effect that have been produced.

OUR LIBERAL TERMS. We are so confident that either our "Gem" or "Concert" organ will please you that we are willing to ship it to you with the understanding that after ten days' trial, if for any reason whatsoever you don't want to keep it you can return it to us at our expense and we will cheerfully return your money and pay all transportation charges.

THE GEM

THE GEM ROLLER ORGAN is 14¼ inches long, 12 inches wide and 7¾ inches high. The case or frame is made of wood finished in imitation walnut with name and other ornaments picked in gilt leaf. It is nicely varnished and striking in appearance. Shipping weight, 14 pounds.

No. 12H985¼ Gem Roller Organ, including three rollers. Price..... **$3.45**

THE CONCERT

CASE MADE OF GOLDEN OAK.

SIZE, 17 INCHES LONG, 13¾ INCHES WIDE, 12 INCHES HIGH.

PRICE INCLUDES FIVE ROLLERS.

$7.60

THE CONCERT ROLLER ORGAN is larger and of higher grade than the Gem Roller Organ. It has greater musical capacity, is much better constructed, and is a finer instrument in every way. The case of this instrument, which is made of genuine oak in golden finish, is 17 inches long, 13¾ inches wide and 12 inches high. It has the name and other decorations in gilt and is very carefully varnished and highly polished. The cylinder and all of the mechanism are enclosed and covered with a glass door, which effectually excludes dust and dirt.

THIS IS A VERY DESIRABLE INSTRUMENT. Produces delightful music and, as the cylinders are removable, a great many different pieces can be played. The tone is similar to that of a parlor organ. Weight, packed for shipment, 30 pounds.

No. 12H988¼ Concert Organ, including five tunes. Price..... **$7.60**

LETE LIST OF THE BEST ROLLERS FOR EM AND CONCERT ROLLER ORGANS.

e second choice, so if out of first we can substitute without delay.

THE WONDER-TONE "BEAVER" ACCORDIONS

We desire to call the special attention of all accordion players to this splendid assortment of low priced instruments. They are made specially for us by the most reliable and best known manufacturer of medium priced accordions in Germany under our own special brand, so as not to interfere with the accordions which are sold under his own name at much higher prices. If you want an accordion of strong construction and satisfactory tone qualities you must not fail to consider these instruments. We invite comparison. In fact, that is the only way you can actually do justice to yourself and to us. We ship any instrument with the understanding that you can give it a trial of ten days, compare the number of keys, the number of stops, the sets of reeds, the folds in the bellows, the size, the material and everything else entering into its construction and the robust and pleasing and if you are not satisfied that we have given you a better accordion than you can chase elsewhere and saved you at least one-half in price, you are at liberty to return us and we will gladly return your money and pay the transportation charges both that the trial will have cost you absolutely nothing. We have thoroughly investigated accordion market. We are familiar with every brand imported into this country satisfied that our low price, factory cost with only our small profit added, cannot any other concern if the high standard of quality and sterling merits of our instrument to be maintained. **The sizes given below do not include the keyboards.** With each we give a complete instruction book.

Size, 5⅝x6¼x10¼ inches.

Undoubtedly as fine an Accordion as is usually offered by other dealers at $3.00 to $3.50. Frame, ebonized with fluted moldings. Bellows, double style of eight folds with metal corner protectors. Two sets of reeds, ten keys with nickel buttons, two basses, nickel plated ornaments. Shipping wt., about 5½ lbs. **$1.80**

No. 12H1050 Price.

Compare this Accordion with those sold elsewhere at $4.00 to $4.50. Frame, imitation ebony. Panels, bright colored. Bellows, triple pattern, nine folds with corner protectors. Two sets of reeds, two stops, ten keys with metal buttons, two basses. Nickel plated polished trimmings. This instrument is very durably made, reliable and a good looker. Shipping weight, about 7 pounds. **$2.15**

Size, 5¾x6¾x10¼ inches.

No. 12H1052 Price.....

No. 12H1054 Same as above, but larger in size and with three full sets of reeds and three stops. Shipping weight, about 8 pounds. Price..... **$2.55**

Large Size. Three Sets of Reeds.

This is a large Accordion and therefore very powerful in tone. Frame, ebonized, fluted. Panels, finished in very bright colors with embossed gold ornaments. Bellows, triple style with nine folds fully protected by metal corners. Three full sets of reeds. Three stops, ten nickel keys with metal buttons, nickel clasps and trimmings. An accordion of this same high grade is usually sold at $5.00 to $6.00. Shipping weight, 9 pounds. **$2.95**

Size, 6x7x12 inches.

No. 12H1056 Price.....

A better double row Accordion than usually sold at twice our price. Beautiful in construction, ornamentation, and above all, tone. Frame, imitation ebony. Panels, bright colored, stamped with gold ornaments. Bellows, double style of ten folds, with corner protectors. Four sets of reeds, nineteen keys, four stops, four basses. Nickel plated polished trimmings. This instrument is extremely attractive. Shipping weight, about 9 pounds. **$4**

Size, 6x7x1[illegible] inches.

No. 12H1060 Same as above, but [illegible] inches in size and with twenty-one keys. Shipping weight, about 9 pounds. Price

TWO SPECIAL "BEAVER" CREATIONS.

Extra high grade Accordions, special in design, quality of materials and decoration, and being of large size, of exceptional tone, of large volume and purity. The description given below can convey to you but a faint idea of their real beauty. They must be seen to be appreciated. **Instruction book free.**

Size, 6½x7¾x13 inches.

This is a very fine Accordion and represents an extremely fine value. Moldings, fluted and finished in imitation mahogany. Bass panel, maple, finished in natural color. Part of the treble panel is in mahogany, the sunken part being in maple surrounded by silver moldings. Bellows, double, with ten folds, with nickel protectors. Keys and other metal parts are nickel plated and polished. Two sets of steel bronzed reeds, very powerful and sweet, two stops of ornamental metal, ten beautifully decorated keys with brass rods. Mother of pearl buttons screwed to the lever. The treble panel is ornamented with four gilt and enameled corners of a neat and pleasing design. Shipping weight, 9 pounds. **$3.65**

No. 12H1062 Price.....

This Accordion is one of the very latest ideas in design and decoration. Frame, ebonized with treble panel of the sunken type. The sunken part is finished in silver and the balance in imitation ebony with embossed silver ornaments. Bellows, made of ten wooden ribs, each rib covered by nickel plated band of metal, surmounted by a gilt ornament and held in place by fancy brass studs. Three sets of reeds, three fancy metal stops, ten ebonized and silver ornamented keys with brass rods. Mother of pearl buttons. Nickel plated and polished trimmings. Beautifully varnished and highly finished. The combination of the colors used harmonizes most exquisitely. Would regularly cost $9.00 to $10.00. Shipping weight, 11 pounds. **$5.75**

No. 12H1064 Price.....

Size, 7x9x13 inches.

THE MILANO ORGANETTO ACCORDIONS

are the product of one of the best manufacturers in Germany. In past years the Italians were the only ones capable of producing these instruments with that peculiar organlike tone, clear melody and deep bass which is sought by all accordion players. However, their methods of manufacturing, being slow and expensive, would not permit the instrument to be sold at a price within the reach of the average accordion player. The maker of the instrument we are offering, after spending several years in Italy studying their methods of tuning and voicing, has succeeded in producing an instrument equal in tone to the instrument produced by the Italians, with brilliant melodious notes and deep sonorous basses, and resembling an organ in tone to such an extent that the name "Milano Organetto," or "Little Organ" has been adopted by the manufacturer as his trade mark. By employing modern and machinery the cost of production has been reduced to a minimum, and by contract we are able to offer to our customers these superb accordions at prices what is ordinarily charged by dealers for accordions of inferior grade with whatever. We recommend these accordions very highly, as they are made accordingly best principles of construction and we will take back any instrument that is unsatisfactory for any reason whatsoever. **Complete with instruction book.**

Size, 5¾x10¾x8 inches. (Keyboard excluded.)

Body, imitation rosewood highly polished. Panels cut in fancy fretwork, cloth lined. Bellows, leatherette cloth of ten folds with metal corner protectors. Ten keys, four basses, mother of pearl buttons. Fitted with new patent lyre shape thumbscrew clasps, permitting the instant removal of the frame from the bellows for repairs or cleaning purposes. Nickel plated trimmings. Leather straps, flannel lined. A very neat instrument and powerful in tone. Weight, boxed for shipment, 10 pounds. **$3.35**

No. 12H1091 Price..

Size, 6x11x9½ inches. (Keyboard excluded.)

HOHNER ITALIAN BEAUTY

GENUINE ROSEWOOD—ARTISTICALLY INLAID.

We don't claim this to be an Italian accordion, because it is a Hohner instrument and is therefore made in Trossingen, Germany, but we claim it is a perfect Italian model and can prove it is superior in construction, workmanship, finish and above all, tone, to any Italian instrument sold at double our price. Modern machinery and up to date methods against handwork and antiquated ways, an immense output at a small margin against a small quantity at a large profit, and our method of sale from factory to you, make our low price possible.

If you could only see this instrument you would become an enthusiastic admirer. Words cannot justly describe its elegance and exceptional beauty.

Twenty-One Keys.

Four Sets of Reeds.

Mother of Pearl Buttons.

Twelve Basses.

Size, 6x 10x 12 inches.

DESCRIPTION:

Frame—Heavy rosewood, beautifully inlaid around edges with ebony and white holly. Keyboard inlaid to match. Face of frame ornamented with decalcomania in imitation of mother of pearl, and corners bound with German silver. **Bellows**—Splendid quality leatherette of sixteen folds, with metal corner protectors. **Reeds**—Four sets of bronze metal reeds, each reed mounted on leather and held in place by screws and staples. **Twenty-one keys, twelve basses,** all of mother of pearl. Leather straps, flannel lined. **Finish**—The highest class, as good as a piano. **Tone**—Very powerful and sweet with deep basses. A small orchestra in itself. Shipping weight, 18 pounds.

$14.75

A FEW FEATURES

of the Hohner Italian-Bohemian styles. All these instruments have reinforced frame corners. Panels are made of triple veneers glued across grain, rendering warping impossible. Metal stems are glued and screwed to keys and not nailed as they are on cheap accordions. The pearl buttons are also screwed to lever, and should one ever break it can be easily removed and replaced. All reed blocks, except on No. 12H1220, are leather lined, held in place by clamps and can be instantly removed by the turning of a thumbscrew. Not a particle of beeswax is used to hold the reed plates in place, but every two reeds are fitted to a separate plate which is mounted on leather and firmly held in place by screws and staples. This method completely does away with reeds becoming detached and renders the reed cells perfectly airtight, so that the air current must necessarily strike the reeds with more force, producing a clearer and stronger sound. **Each accordion complete with instruction book.**

Four Stops.

Four Sets of Reeds.

Ten Keys.

Mother of Pearl Buttons.

Price, complete with case and instruction book..(Shipping weight, 16 pounds)...

SIX SETS OF STEEL REEDS—BRASS PLATES—SIX BA

Size, 8x8¾x12½ inches.

To the lovers of the German Accordion no better instrument can be offered than this genuine Hohner Concert instrument. It is an instrument which is so well constructed that it will have a long life and will give satisfaction under all conditions. The following special features cannot be had on any other instrument. Brass plates. Genuine steel reeds, six sets of reeds, every two reeds mounted on a separate plate and each plate held in place by special staples. Six stops and six basses. The volume and quality of tone, owing to the brass plates, to the steel reeds and to the size and general construction surpass anything ever heard before. The frame is finished in ebony, ornamented with gold floral designs. The bellows are of black leatherette, triple pattern with twelve folds with genuine brass corner protectors. It has twenty-one keys gilded and burnished, with brass buttons, six basses. Trimmings made of brass to harmonize with the ornamentation of the frame and the bellows, genuine leather straps. Shipping weight, about 32 pounds.

THE ONLY PERFECT CHROMATIC HARMONICA.

Mr. Hohner after many years of study and experimenting has succeeded in producing a harmonica supplying all the half tones not found on the regular styles. With this wonderful instrument you can play any piece of music, popular or classic, without skipping the half tones. Hardwood frame, flaring nickel plated covers, forty extra fine reeds, heavy brass plates, twenty holes. Each reed space is covered with a leather tongue which prevents the air current from escaping and makes the harmonica not only very easy blowing but of a much stronger and purer tone. Nickel plated mouthpiece with ten holes. Back of the

5½ inches long.

mouthpiece a space is provided for a perforated brass slide operated with the button shown in illustration, which shuts off the upper rows of reeds, at the same time opening the lower or half note set. The change is instantaneous. This harmonica comes packed in a wooden box covered with fine morocco grained paper resembling leather. A marvelous harmonica in a suitable case.

The Wonder-Tone "Beaver" Harmonicas

We are proud of this assortment of Harmonicas. Proud of the models, proud of the quality of materials and skillful workmanship entering into their construction, and, above all, proud of their wonderful tone, smooth, full of large volume and carrying power. You would be proud to possess one of these harmonicas and we want opportunity to send one of them for your inspection and trial and have your acknowledgment of their merits. This is the only cheap thing about any of these styles. They are made expressly for us by one of the best manufacturers of Europe and sold under our own name so as not to interfere with his own line which sells at much higher prices. They all have genuine brass plates, heavy nickel plated covers, bronze metal reeds and are especially tuned and tested.

4 inches long.
A favorite little instrument with ten holes, twenty reeds, covers flaring at back with extension ends. Brass reeds. Comes in substantial case. A regular 35-cent value.

96 REDS. 2 BELLS.

9¼ inches long.
To those looking for a harmonica to play concert and dance playing, we unhesitatingly recommend this instrument. As it has two sided or double harmonica, tuned in two harmonizing keys and with the assistance of the bells, a varied and catchy class of music can be produced. A hardwood frame with forty-eight reeds on each side, four brass plates with twenty-four reeds on each or forty-eight reeds on each harmonica or side, ninety-six reeds in all. Four separate nickel plated covers. The bells are mounted on a special bridgelike frame and are very easily operated. The finish of this harmonica is superb. In heavy cardboard box.
No. 12H1716 Price 98c
If mail shipment, postage extra, 18c.

Drum Harmonica—Very Effective

The Drum Harmonica is one of the latest novelties in harmonicas and consists of oval metal shell with a genuine calfskin head stretched over it exactly like on drums. An attachment on the right side consisting of three springs with little balls at the ends can be made to rattle in quick succession, imitating to perfection the snare drum. Harmonica is detachable from frame and the combination of the two instruments is very pleasing and effective. It requires but little practice to thoroughly master the drum. The entire instrument is very nicely finished and durably made. We furnish one harmonica with this instrument with ten double holes and twenty finely tuned reeds riveted to heavy reed plates. This instrument never fails to make a hit wherever exhibited. It is 6⅝ inches long and oval in shape. 48c
No. 12H1850 Price 48c
If mail shipment, postage extra, 9 cents.

95c The Pipeolion

This wonderful little instrument is not only easy to blow but the easiest of all reed instruments to learn to play. Any child who can count can learn to play the Pipeolion. The body of the instrument consists of wood finished in a rich dark color, embossed with gold designs. The mouthpiece is made of nickel plated metal devoid of all sharp edges, permitting the performer to run from the bass to the melody part of the instrument with great rapidity. It has ten holes and ten corresponding trumpets, tempered the same as brass band instruments. These trumpets are fitted with two reeds, enabling the performer to produce twenty different notes. The reeds are built right into the trumpets, and in producing the sound it has to come out through the bell of the pipe, thus giving it a peculiar trumpet and organlike tone. With each instrument we give a complete set of instructions on how to play, including four popular airs, written in a special copyrighted system, so easy that anybody, even a child, can in a short time and with little practice learn to play the instrument and produce beautiful music with it. 95c
No. 12H1450 Price for this wonderful little instrument complete, in neat and substantial case 95c
If sent by mail, we pack this instrument very carefully, insuring delivery in perfect condition. Postage extra, 12 cents.

Do You Know "Little Joe"?

95c

"Little Joe" is the boys' best friend. It will delight them with the music it will produce. It will teach them to become interested in musical matters. It will train their ears for the harmony of musical compositions and above all, it will help them spend many hours in up to date elevating recreation. "Little Joe" is a complete musical instrument. Both melody and accompaniments can be played upon it. The harmonica takes care of the air or melody, the strings of the chords or accompaniments. The body of this instrument is made of well seasoned wood finished in mahogany and nicely varnished, of the same construction as guitars and mandolins. Soundhole is ornamented with decalcomania. Has guard plate with fancy design. Nickel tailpiece. It is fitted with four strings which are tuned C, E, G, C, making a chord when they are struck with fingers or pick. By the aid of the fingerboard three additional chords can be produced, thus furnishing the bass to any melody you may play. "Little Joe" comes to you complete with a ten-hole, twenty-reed harmonica of good grade; packed in a nice cardboard box which contains complete instructions on "how to play," tuning wrench and pick. If you want to learn to play an instrument which will not only amuse you, but prepare you for the better grade of instruments and relative music, buy "Little Joe." For dances, picnics, masquerades, parties, etc., it cannot be excelled. One boy can furnish music for the crowd. 95c

The "Hohnerette," A Musical Novelty and Hit.

FIVE BRASS TRUMPETS.

NICKEL MOUTHPIECE.

10 inches long, including mouthpiece.

The Hohnerette is the only article of its kind that can be classified with musical instruments instead of toys. It is as perfect in tone and construction as any of the Hohner Accordions. The same materials, the same high quality bronze reeds and the same workmanship are used throughout. The only difference is in the fact that the Hohnerette is played by blowing with the mouth, whereas the accordion is played by drawing out and pushing the bellows.

This instrument has mountings made of imitation mahogany with panels in imitation of ebony, highly polished. It has ten keys and two basses, a very powerful set of reeds, which are rendered more powerful by the five trumpets shown in the illustration. These are made of brass of the same quality and tempered same as any band instrument, and their tendency is to amplify the tone, which has no other exit from the reeds except through these trumpets, as the reed plate is carefully enclosed and protected by a metal plate. The mouthpiece is the same as it would be on a band instrument. The entire metal trimmings are made of brass, heavily plated and burnished. $2.10
Shipping weight, 30 ounces.
No. 12H2224 Price .....

FREE with each purchase of valve instruments, fifty lessons with the best Correspondence School of Music in America.

BAND INSTRUMENTS

FIFTY LESSONS under the direction of a former director of the Chicago Second Regiment Band, with each valve instrument.

We are the largest band instrument dealers in the country. We sell our instruments direct to the user, adding but one profit to the maker's price and are thus able to sell a cornet for $25.00 which is ordinarily sold for $50.00, with a proportionate saving on other instruments.

We have no salesmen. We do not accept second hand instruments as part payment on new goods. **We give no discount, commission or presents to** teachers, bandmasters or others for drumming up trade for us. **We never give our instruments** away in exchange for testimonials, nor hire professional musicians to advertise them. Such methods are expensive and were we to adopt them we could not sell our goods any cheaper than the ordinary dealer or we would have to cheapen the quality. **Through our method of** sale all of these unnecessary expenses are eliminated. **This explains** why high grade instruments can now be sold by us at one-half the price charged by others. **We ask you to compare** quality and price and you will find the truthfulness of the above statement.

The illustrations we give show the model and general outline of our instruments, but they do not convey to you their skillful workmanship, fine finish and splendid tone; and to give you opportunity to try them and be convinced, we will ship the instrument you desire, with the understanding that you can take it home, give it ten days' trial, and if you don't like it send it back at our expense and we will immediately return your money, together with all transportation charges. **We don't want you to take our word,** we want you to be the sole judge of their merits and decide for yourself whether or not they are all we claim for them. **Our responsibility,** however, does not end **after ten days. We guarantee every instrument for one year against defect of material or workmanship** and issue a certificate to that effect which plainly states that we will make good or exchange any instrument showing such defects. This is the best proof of the confidence we have in our instruments.

THE SPLENDID LOW PRICED MARCEAU INSTRUMENTS

The Marceau Band Instruments are certainly the very finest line of low priced band instruments ever offered to American bandmen. They are especially suitable for beginners or amateurs who are playing a medium grade of music and desire a set of instruments which will give satisfactory service at a low price. We have sold hundreds of sets of these instruments and they have proven universally satisfactory. **They are of the very best models** with good tapering bells and German silver piston valves. **All upright instruments** have brass shield and protector at bottom. **Basses, Alto and Tenor Trombones** have second valve slides in a vertical position, adding to the instrument and preventing injury.

Music Holder, German silver mouthpiece, instruction book and school certificate, as mentioned above, **free with each instrument.**

Marceau F Circular Alto.

This style of Alto Horn has been very popular and is used almost exclusively in large bands. Its circular model makes it very easy blowing and sensitive instrument. It not only does it add to the appearance of the band, but it gives the music a quality that can be obtained in no other way. It is the same celebrated makers who manufacture the balance of this line which we have been successfully for years. If your band does not possess altos of this model you should by all means procure them without delay. You will find that the beautiful effect which you will obtain will much more than compensate for the small expense incurred. It is furnished with three additional crooks, E flat, D, C, thus enabling the performer to play in different keys. **All crooks are fitted with a key, enabling the performer to quickly remove accumulation of saliva, a feature to be found on our instruments.** Music holder free.

BEAUTIFULLY ENGRAVED MARCEAU CORNET

This cornet is handsomely engraved, and is sure to please you in every way. The illustration gives but a very poor idea of the appearance of this splendid instrument and nothing but an examination and trial will bring out all of its good qualities. Compare this instrument with any of the same grade offered by other dealers and you will find at once that we are offering it to you at one-half the price. Complete with A set piece, music holder, instruction book and a course of fifty lessons. Shipping weight, 7 pounds.

HE WORLD RENOWNED DUPONT INSTRUMENTS

LINE OF MEDIUM PRICED BAND INSTRUMENTS

d be compared with band instruments offered by other s and sold at more than double our prices. These in- ents are especially suitable for the better grade of ur bands and thousands of testimonials which ceive every year sufficiently prove that they satisfaction in every case. We have handled for the last nine years, and during that time have hed them to hundreds of bands. They are instru- which will meet every demand made upon them. They are of the very del, graceful and imposing and are fitted with German silver piston valves. are reinforced joints, shield and protector on all upright instruments.

FREE
50 LESSONS,
to every purchaser of our Dupont Valve Instruments. These lessons are given through the best Correspondence School of Music in America, under the direction of a former director of the Chicago Second Regiment Band.

Tenors, baritones and basses have vertical second valve slides. High and low pitch suited for band and orchestra work. If you are figuring on purchasing a new set of instruments for your band and desire a set of instruments at a low price, which will give satisfaction under all conditions, we especially recommend them for your consideration. Sold only by us.

THE ACCOMPANYING ILLUSTRATIONS

show our entire Dupont line fitted with low pitch slides and attachments, a feature found on no other line of medium and only very few high priced instruments. By light pressure of the thumb or finger these instruments can be thrown from high to low pitch instantly. Adding this feature to our Dupont line has not affected the price, which still remains lower than any other line of similar grade.
Every instrument complete with silver plated mouthpiece, music holder and instruction book.

nt B Flat Cornet, Single Water Key.

Shipping weight, 7 pounds.

and and orchestra work where steady, conscientious re required this cornet is particularly desirable. Com- h A shank and music holder.

2H8047¼	Brass, polished	$8.95

2H8045¼	Silver palted, polished	14.90

The Dupont B Flat Trumpet.

19 inches long.

A Case to Fit for Only $1.25.

Shipping weight, 6 pounds.

The B Flat Trumpet is becoming more popular every day, and is rapidly replacing the E flat and in many cases the B flat cornets. It has a peculiar tone, blending between the tone of the E flat and B flat cornets, and is very useful in certain compositions where the trumpet quality of tone is desired. These trumpets are used very extensively by large band organizations throughout the country. To play in the key of A extend tuning slide about 1¾ inches.

No. 12H8051¼	Brass, highly polished	$10.45
No. 12H8053¼	Nickel plated	11.35
No. 12H8057¼	Silver plated, satin finish	14.20
No. 12H8059¼	Silver plated, burnished	16.45

SAVE YOUR MONEY!

If you order a case at the same time you order an instrument it will not cost you any extra for transportation charges. A case protects the instrument against injury, dust and dirt and will also enable you to make a fine appearance when carrying the instrument. Cases of all kinds at prices to suit anybody's pocketbook quoted on page 705.

Dupont F Concert Alto.

(Symphony Horn)

HIGH AND LOW PITCH.

10¼-Inch Bell.

This instrument adds a dash of color to the harmony in band music which can be obtained in no other way, and is fast supplanting the regular upright alto as an accompaniment horn. In orchestra it is considered valuable because it does not require the constant practice which is required on the French horn, and its tone is every bit as mellow and sweet. Anyone who has learned to play a cornet or alto can play this instrument, because it fingers and blows exactly the same as the upright alto. It is furnished in the key of F with C, E flat and D crook. Every crook is furnished with water key, permitting the removal of saliva without the trouble and inconvenience of removing the crooks. This improvement is not to be found on any other make. When used in a band it is always played in E flat, and when used in the orchestra the F and D crooks are used. The C crook is very useful, as it throws the instrument into a key which enables the performer to play right along with the piano or organ without transposing the music. Besides the three above mentioned crooks we give one extra low pitch crook and three additional low pitch valve slides. It is the beautiful French horn model and is furnished complete, with music holder, mouthpiece and instruction book. We especially recommend this instrument and we know it will prove acceptable to all band and orchestra men who use it.

DUPONT UPRIGHT HORNS.

TO FIT ED ON 705.

These instruments are made of the highest quality spun brass, and the tubing is rolled until it is absolutely seamless. From the altos to the contra-basses the models are extremely handsome, no abrupt turns or sharp angles, tapering gradually from mouthpiece to bell, thus giving these horns their beautiful tone and making them easy to blow. For medium priced instruments no other line can compare with them.

Music holder and instruction book free with each instrument.

SLIDE TROMBONE CASES ARE QUOTED ON PAGE 705

WE HAVE PLEASED THEM. WE WILL PLEASE YOU AS WELL.

Clintonville, Ala.

Sears, Roebuck and Co., Chicago.

Gentlemen:—I received the Dupont B Flat Cornet some few weeks ago, and am well pleased with it. I could not have purchased it for less than $20.00 anywhere else. Thanking you for your prompt shipment and kindness, I remain,

Yours respectfully,
L. H. FOLSOM.

Lumberville, Penn.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—Some time ago I purchased one of your Dupont C Cornets. I have given it a thorough trial and can truly say that it has filled my highest expectations, being the easiest blowing cornet that I have ever played, as well as having the lightest action. During the last year I have purchased nearly $100.00 worth of your goods, and all have given satisfaction.

Yours respectfully,
W. H. SALTER.

THE HENRI GAUTIER "VIRTUOSO" INSTRUMENTS

WHEN YOU PAY more than we are charging for the most perfect and most magnificent genuine Henri Gautier "Virtuoso" Band Instruments, you are simply paying the difference in price between our method of sale, "From factory to you with but our one profit added," and the old method price embracing three or four profits. **WE DO NOT CARE** whose instruments may have been offered to you, foreign or American make. **WE DO NOT CARE** what claims others may make about their instruments. **WE CHALLENGE THEM ALL** to produce a better constructed, finished, more perfect in tune, easier blowing and more brilliant toned instrument than the genuine Henri Gautier "Virtuoso." **WE DO NOT WANT** you to take our word for the above statement, but want an opportunity of demonstrating the truthfulness of our claims. **WE WANT YOU** to send us your order for one of our instruments, which we are ready to ship with the distinct understanding that it can be returned to us if after comparison with other makes and careful trial you are not absolutely convinced that it is equal if not superior to them and at least one-third lower in price, and your money and transportation charges will be immediately returned. Ask other dealers to make to you the same proposition and see what they will say. **WE DO NOT CARE** whether you [illegible] soloist, a professional player, an amateur [illegible] thinking of learning the instrument, we have [illegible] one quality, the best that can be produced [illegible] price. **A band instrument should only be [illegible] once in a lifetime and ours are made to give [illegible] faction to all, for all time and under all con[illegible]**

FREE with each Henri Gautier Cornet, one of these beautiful cases. Covered with very neatly embossed seal grain keratol. Lined with green plush and white silk with satin ribbons across the cover. Nickel plated trimmings.

A feature of this case is the spring grasping device (as shown in the illustration), which holds the cornet the same as a human hand, there being no danger of it falling out even if the case is turned upside down. This case usually retails at $6.00 to $7.00.

HENRI GAUTIER'S NAME is as [illegible] to Eng[illegible] musicians as Lincoln's is to American children. Whenever and wherever band [illegible] ments are the topic of conversation the [illegible] Gautier reigns supreme. He is the King of [illegible] instrument makers. His models are copied [illegible] the world and we all know that "imitation [illegible] sincerest of flattery." No man wants to [illegible] unworthy work of another. But, regardless [illegible] fact that they have copied his models and [illegible] his improvements, they have failed to obtain [illegible] blowing qualities, the marvelous flowing [illegible] rapid action and all other vital points [illegible] brass instrument quality. **Band instrument[illegible] men, must have character back of them or [illegible] worthless.** They cannot be judged by their [illegible] ance. They must be tried and come up to [illegible]

NEW LONG MODEL B FLAT CORNET WITH INSTANTANEOUS CHANGE TO

HIGH AND LOW PITCH. MOTHER OF PEARL BUTTONS. ENGRAVED BELL.

Case, as shown in illustration, given free with this cornet. Shipping weight, 11 pounds.

$25.00

HAVE YOU EVER SEEN a prettier model cornet than the one illustrated? Have [illegible] noticed more graceful lines, gentler curves on all the tubing [illegible] you ever observed a more tapering and well proportioned bell? Don't forget that all of these [illegible] determine the ease of blowing and the quality of the tone. Abrupt angles, sudden turns [illegible] tubing, will obstruct the air current and make an instrument hard blowing, out of tune in the [illegible] and the tone having to be forced through the instrument, will be harsh on the low notes [illegible] papery on the high; it will not flow, will lack brilliancy and duration. The greatest of [illegible] could not perform on such an instrument, and a beginner would soon give up in utter discou[illegible] as, regardless of his ambitions, application and efforts, no good results could be obtained. [illegible] reaches perfection by chance. The Gautier Cornet is the result of many years of study and [illegible] ment, and we can say and prove that no better cornet can be had, regardless of price. [illegible] is proportioned to give the performer a B flat cornet with perfect and instant change to A [illegible] high to low pitch. Simply push out the screw device shown in the illustration and the [illegible] made. It is absolutely perfect in tune, each interval in perfect accord; the tone is even, [illegible] surprising clearness, brilliancy and carrying power. All joints are reinforced, finely [illegible] absolutely airtight. The valves are of pure German silver, with boxed spring, are carefully [illegible] into the casing; they fit snugly and the opening in them corresponds to the opening of the [illegible] with marvelous accuracy. They are quick and responsive to the touch and a real delight [illegible] performer. The valve buttons are made of mother of pearl and the bell of the instrument is [illegible] engraved. Free with each cornet a splendid carrying case, as illustrated and described; [illegible] book, music holder and a course of fifty lessons, as explained on page 702. Shipping weight, [illegible]

THE ONLY PRACTICAL TRIPLE TONED CORNET MADE

Case, as illustrated and described above, given free with this cornet.

WHEN YOU BUY the Gautier "Virtuoso" Triple Toned Cornet you may proceed to play in a band by using it in the key of B flat; join the orchestra and play in A; become a member of your church choir or play right along with the piano or organ in your home by changing the instrument to the key of C and, therefore, without having to transpose the music. Not only that, it does not make any difference whether any of the organizations above mentioned are using, or your piano be tuned to high or low pitch, the cornet can be changed to adjust itself to either. A cornet as perfect in B flat, in A or in C, in high or low pitch, is actually what we are offering you in our Gautier Triple Toned Cornet. A good many cornets have been introduced on the market at different times claiming to be perfect combination instruments, but they were only experiments and never proved practical. It remained for Henri Gautier to successfully carry these experiments to perfection or an assured success. A glance at the illustration will reveal the graceful lines of this cornet, the fine tapering bell and handsome engraving. Nothing but a trial will disclose to you the silvery and brilliant tone, the quick and responsive valve action and the skillful workmanship. Take advantage of our liberal free trial offer, as explained above, and convince yourself of the meritorious features of this instrument. Shipped complete in a case, as illustrated, with instruction book, music holder, directions for adjusting to different keys and a certificate entitling the holder to a course of fifty lessons under a well known cornet teacher. Shipping weight, 11 pounds.

THE GAUTIER "VIRTUOSO" B FLAT TROMBONE IS THE REALIZATION OF THE PLAYER'S DRE[illegible]

WERE YOU TO HAVE THIS INSTRUMENT in your possession you could tell at first glance that it is the work of an artist, as the skill of its construction reveals itself at every point. You would admire first of all the graceful proportions, the delicate and gradual increase in the size of the tubing up to the flaring bell. You would be surprised at the exactness of every part, the accuracy and cleanliness of every joint. You would be amazed at the easy slide action, absolutely non-binding and noiseless. But were you to try the instrument you would be positively astonished at its beautiful round and sympathetic tone. You would be charmed by its clearness and brilliancy.

The Finest Case for $7.85

THE SLIDE TROMBONE has been termed the king of ban[illegible] ments. The Gautier Trombone is [illegible] of them all. It combines the deep sympathetic tones of the valve tro[illegible] the silvery one of the slide and eliminates the faults of both. It is the [illegible] of many a trombone player's dream. The Gautier trombone is stand[illegible] and low pitch attachment, is beautifully engraved at the bell, has [illegible] mouthpiece and we ship it complete with music holder and instruc[illegible] Shipping weight, 12 pounds.

GAUTIER UPRIGHT INSTRUMENTS

DEL OF B FLAT BARITONE.

Space will not permit us to illustrate and describe each one of the upright instruments of this unrivaled line, but to give an idea, at its best a poor one, of the symmetry, compactness and gracefulness of design and ensemble, we illustrate at the left the Baritone. We wish we could talk of the individual merits of each instrument and could but convey to you in words their powerful and beautiful tone, their careful workmanship, the exact and most careful details of their construction, the lightness and responsiveness of their valve action, but as such is impossible, we may say to you, "Convince yourself by giving us a trial order entirely at our risk and expense." We know our Gautier instruments upon comparison will excel all others, regardless of make or price. **They are instruments of real character and will bear investigation.**

All Gautier Upright Instruments are made with extra low pitch slide, are fitted with **mother of pearl** buttons, pistons or valves are of the finest quality **German silver,** and we ship them complete with silver plated mouthpiece, music holder, instruction book and a course of fifty lessons, as explained on page 685.

GAUTIER "F" CONCERT HORN

Instantly Changed to E Flat, D or C By Rotary Valve.

HIGH and LOW PITCH.

The Orchestra Horn of Many Dreams.

Engraved Bell.

In the Gautier "Virtuoso" F Horn we offer an instrument of superior and unequaled merits, an instrument representing years of study and experimenting, crowned by success; an instrument that can instantly be changed to E flat, D or C, by the simple turning of a valve; an instrument of extreme grace in design and of a tone so mellow and sweet as to closely resemble the famous French horn and devoid of its difficulties of playing. **For orchestra or band use** it will prove one of the most valuable additions. The materials and workmanship are the Gautiers', which means the highest quality. Complete with low pitch slide, music holder, instruction book and course of fifty lessons.

CONCERT HORN.

Diameter of bell, 10¼ inches. Shipping weight, 20 pounds

No. 12H7944¼	Brass, polished	$35.45
No. 12H7945¼	Nickel plated, polished	37.85
No. 12H7946¼	Silver plated, satin finish, gold bell	46.35
No. 12H7947¼	Silver plated, burnished, gold bell	51.60

Cornet Cases.

No. 12H5713 Gray Canvas, satchel form, leather bound edges, flannel lined, with shoulder strap. Shipping weight, 30 ounces. Price **70c**

No. 12H5715 Made of black pebble leather, very fine, satchel illustrated; flannel lined, nickel plated trimmings with shoulder straps. Shipping weight, 6 lbs. Price **98c**

12H5716 Trumpet Case. Same description as No. 12H5715, but 21 inches long, made to fit trumpet cornet. Shipping weight, 54 lbs. Price **$1.25**

The illustration does not do justice to the beauty of the case. We want you to judge of its qualities. Covered with very neatly embossed seal grain keratol. Lined with green plush and white silk with satin ribbon across the cover. All trimmings and protectors are nickel plated and highly burnished. A feature of this case is the spring grasping device (as shown in the illustration), which holds the cornet same as the human hand, there being no danger of its falling out even if the case is turned upside down. Shipping weight, 6 pounds.

No. 12H3719 Price **$4.95**

Frame covered with roof material in perfection of embossed leather. Lock, clasp, and corner protectors nickel and burnished. Lined and divided for 3 minor parts. Very strong. Weight, 6 lbs. **12H5717 $2.95**

CASES FOR BAND INSTRUMENTS.

We can furnish two qualities of cases, one made with heavy and strong fiber body covered with canvas with bound edges and the other covered with genuine black leather stitched and embossed according to price. All cases are flannel lined and are fitted with leather handle and straps. Nickel buckles. We guarantee our cases will retain their shape and protect your instrument. **Be sure to state quality wanted and allow price accordingly.**

12H5729 For valves. Makes them perfectly. **15c**

"Antum" Silver and Metal Polish.

(Unmailable.)

Is by the best in the world. Hard rubbing necessary, not scratch. Contains furious acids. Best results on all metals. We indorse for band use. Money back if not satisfied. 4-ounce can, full price 25 cents. **12H5730** Our price **14c**

Save cans with other goods.

Cornet Mutes.

No. 12H5721 Regular model, polished brass, cork holders. Price **65c**

No. 12H5723 Same, nickel plated. Price **75c**

If mail shipment, postage extra 6 cents.

Newman Professional Mutes.

Has the advantage over the old style that it allows the air to escape freely through the mute and softens the tone of the instrument to a much greater extent. It is invaluable for practice purposes as well as for the mute effect in cornet solo.

No. 12H5720 For Cornet, brass polish. Price, **$1.30**

No. 12H5722 For Cornet, nickel plated. Price, **1.45**

If mail shipment, postage extra, 6 cents.

No. 12H5724 For Trombone, brass polished. Price **$2.40**

No. 12H5726 For Trombone, nickel plated. Price .... (If mail shipment, postage extra, 7 cents.) ... **2.75**

BAND LAMPS.

This Lamp is pronounced by all who have ever examined it to be the only practical band lamp on the market. It is perfectly ventilated and cannot catch fire.

No. 12H10082 Nickel plated, with socket for fastening on band cap. Price **20c**

If mail shipment, postage extra, 4 cents.

How to Measure Instruments and Insure a Perfect Fit.

For cases Nos. 12H10144½ to 12H10152½ measure in the following order: A to B, A to C, A to D, B to B, F to F and C to E. Also state thickness of valves and, if possible, mention make of instrument.

For cases Nos. 12H10134½ and 12H10136½, intended for alto and tenor valve trombones, give measurements in this order: G to H, G to I, H to M, L to K, K to I, N to O, P to Q, R to S and H to X. Also give thickness of valves and, if possible, state make of instrument.

For cases Nos. 12H10110½ and 12H10111½, intended for slide trombones, use same measurements, omitting R to S.

For circular instruments or case No. 12H10160½ follow the diagram in this order: A to B, B to E, B to C, E to C, A to C and D to F. Give thickness of valves and make of horn, if known.

WE GUARANTEE a perfect fit if you give us correct measurements, but we cannot be held responsible if through wrong measurements cases should not fit.

C RACKS FOR BAND INSTRUMENTS.

best quality brass, of a strong and durable construction. Springs made of tempered steel and will hold music in place.

Postage extra, on racks is 5 cents.

WE DO BAND INSTRUMENT PLATING.

The prices given below include the cost of properly preparing the instruments for the plating solution, but do not include repairs of any kind. Our plating department is in charge of an expert and we guarantee that any instrument sent us will be plated with high grade materials and finished in a first class manner.

REPAIRS—Prices for repairing can only be quoted after receipt of instrument. Our prices are very reasonable considering the expert methods we employ. Many instruments repaired by us looked exactly like new ones.

Instrument	Nickel Plating	Silver Satin	Silver Burnished	Gold Bells
Cornet	$0.90	$3.75	$6.00	$1.15
E Flat Alto	1.50	5.40	9.75	1.50
B Flat Tenor	1.90	6.75	11.25	1.75
B Flat Baritone	2.40	8.25	13.50	2.50
B Flat Bass	2.70	10.15	16.50	2.75
E Flat Bass Small	3.40	13.50	21.00	3.40
Slide Trombone	1.35	4.60	6.50	1.50

If you want your instrument plated send it to us by express or freight prepaid, addressing the box as shown below, and it will come to the direct attention of our Plating and Repairing Department.

THREE SPLENDID LINES OF CLARINETS

The illustrations below do not represent any particular make of instrument. They are only given to show the different models. Read very carefully what we say of each make and [illegible] according to your judgment and means. We guarantee all of our clarinets to be the best values on the market in their respective classes.

MODEL OF A 13 KEYS—2 RINGS.

MODEL OF A 15 KEYS—2 RINGS.

We furnish our clarinets in four keys, either high or low pitch. In ordering be sure to state key and pitch desired or we cannot fill your order.

INSTRUCTION BOOK WITH EACH CLARINET.

MODEL OF A 15 KEYS—4 RINGS AND 4 ROLLERS ON KEYS.

We furnish our clarinets in [illegible] keys, either high or low pitch. [illegible] ordering be sure to state key [illegible] pitch desired or we cannot fill [illegible] order.

THE UNEXCELLED CLARINETS OF CARL SCHUBERT.

You who read this must be interested in clarinets and may be undecided as to what to buy owing to the many claims made by dealers in general regarding the instruments they handle, but we state positively that there are no instruments, however costly, that excel the product of Carl Schubert. "THE PROOF OF THE PUDDING IS IN THE EATING," and we certainly like to have you eat your share and satisfy yourself. It will cost you nothing. **Send for one of our instruments, try it for ten days, compare it with instruments sold at double our price and if it does not suit you, just send it back and get your money and transportation charges.** Easy, isn't it? We know what we are doing. We have been in the music business a long time, have made a study of it and are proud to say we know it well. **Carl Schubert** is one of those independent spirits, a true artist who loves his profession and whose ambition is to make instruments of superior merits. We discovered him, tried and compared his instruments and were so favorably impressed with the superiority of his quality that we made a contract with him to take all he makes. We sell his instruments direct to you with but our small profit added, and thus you save all the profits each unnecessary handling represents. Sensible way of doing business, isn't it? **Our method of sale** explains how a high grade instrument can be sold at a low price.

Carl Schubert wood wind instruments are made of the choicest grenadilla wood, thoroughly garret seasoned and oil treated. The smoothness of the bore is amazing, just like a gun barrel, and the key holes are delicately reamed. They are fitted with pure German silver keys, elegant in shape and finely polished. The mechanism is perfect, every key working quickly and easily, the intervals absolutely correct and tone most beautiful and of great power. Instruments are oil or dull finish. **If interested don't fail to consider our liberal offer.**

No. 12H8863¼ 15 keys, 2 rings, grenadilla wood, in the key of A, B flat, C or E flat, high or low pitch. **Be sure to state key and pitch wanted.** Shipping weight, 5 pounds. Price..... **$16.50**

No. 12H8865¼ 15 keys, 4 rings and 4 roller keys, in the key of A, B flat, C or E flat, high or low pitch. **Be sure to state key and pitch wanted.** Shipping weight, 5 pounds. Price..... **$19.85**

LA FAYETTE & CO.'S CLARINETS.

This is certainly the finest line of low priced clarinets ever offered to the American bandmen. They are substantially made and well finished. They are made of grenadilla wood and all of the trimmings are of pure German silver, highly polished. Our low prices save the purchaser from $5.00 to $7.00 upon each one of these clarinets, and to prove this we ask our friends to compare them and the prices we ask with the instruments and prices offered by other dealers. La Fayette & Co. have been manufacturing these clarinets for years. They have always given the greatest satisfaction. Shipping weight, 5 pounds.

No. 12H8850¼ 13 keys, 2 rings, grenadilla wood, in the key of A, B flat, C or E flat, high or low pitch. **Be sure to state key and pitch wanted.** Price.... $9.[illegible]

No. 12H8852¼ 15 keys, 2 rings, grenadilla wood, in the key of A, B flat, C or E flat, high or low pitch. **Be sure to state key and pitch wanted.** Price.... 11.[illegible]

J. B. MARTIN CLARINETS.

This is the line of favorite clarinets which we have handled for years, and which have given such universal satisfaction. We do not believe that there is a line of moderate priced clarinets on the American market today which in any way equals it in tone or finish. They are all made of genuine grenadilla wood, with trimmings of pure German silver, highly polished. They are bored through cleanly and evenly and are accurately made throughout. We guarantee them as to tune and tone and are prepared to take back any instrument which does not give satisfaction in every way. Many expert clarinet players have been surprised at the wonderful degree of superiority demonstrated by these clarinets. Bandmen who have to furnish their reed section with clarinets and who are not prepared to pay a large amount for such instruments cannot do better than purchase a set of these [illegible] clarinets. Shipping weight, 5 pounds.

No. 12H8854¼ 13 keys, 2 rings, grenadilla wood, in the key of A, B flat, C or E flat, high or low pitch. **Be sure to state key and pitch wanted.** Price... $11.[illegible]

TOURVILLE SAXOPHONES

Latest Improved System.

The Best Saxophones made regardless of price.

We make you the sole judge of their splendid merits; it is your duty to give them a fair trial. We know your verdict will be in their favor.

Saxophones are not sold in quantities and like any other luxury they are ordinarily sold at big profits. With us it is different. We handle groceries, shoes, dry goods, furniture and every other useful line of merchandise and sell everything at the same small profit. **Every dealer has** been singing the praise of his own line, which is quite natural. **We know our saxophones so well,** we know their superior merits, we know the large saving their low price represents, that we say to you, **"decide for yourself."** Send for one of our instruments, compare it with instruments sold at from 30 to 50 per cent higher in price. Play it, try the tone, test it, manipulate the marvelous mechanism and we know you will keep it. Thus you will have taken nobody's word, but fully satisfied yourself by actual test of its true merits. **Should the instrument** we send you prove contrary to your ideas or expectation, we will cheerfully take it back and return to you the amount paid and all the transportation charges besides. **It costs you absolutely nothing** to give our instruments a trial.

The genuine Tourville & Co. Saxophones are of the latest approved system of fingering, with addition of one F sharp shake key, also a plate for the first finger of the left hand for a new B flat and a new patent system at the G sharp key for shake G sharp with all the other notes, and the extra patent key for going down to low B flat, with new E flat key and with double C sharp, B natural and B flat keys for the middle finger of the right hand. The alto and tenor, with new E and F natural keys.

Our Saxophones are shipped complete with leather strap, mouthpiece cap and a splendid instruction book with charts showing correct fingering.

No. 12H5655 For flute. Price.... 9c
If mail shipment, postage extra, 3 cents.

ORCHESTRA BELLS OF THE HIGHEST GRADE.

Don't make the mistake of comparing these bells with the ordinary kind handled by dealers generally. Ours are not toys, but perfect musical instruments for orchestra or concert band work. The bars or notes are made of best quality highly polished steel nearly ¾-inch in thickness and ⅞-inch in width, and are therefore very powerful and vibrating. They are reversible and can be arranged to be played in high or low pitch.

The cases are made of genuine oak, strong in construction and beautifully varnished and finished, with nickel plated catches, and very comfortable handle. Bars rest on very soft felt cushions and are held in place by rubber covered pin through hole at upper end and two pins at lower end. Complete with two sets of hammers (one soft rubber for practice and one brass for regular playing) and instruction book.

No. 12H990¼ Twenty-six bars, 2 octaves C to C, chromatic. Price..... **$ 9.95**
No. 12H992¼ Thirty-eight bars, 3 octaves F to F, chromatic. Extra fine set of bells for professional use. Price..... **14.45**
Weight, ready for shipment: No. 12H990¼ 15 pounds. No. 12H992¼ 21 pounds.

ACME PROFESSIONAL DRUMS

FITTED WITH OUR NEW PATENT RODS AND CORD HOOKS.

REGULATION PATTERN.

OUR LINE OF DRUMS is so far superior in general construction to most others in the market, embodying so many special patent features not found in drums generally offered, that we cannot ask you to compare them with drums handled by most other dealers. Their drums are made today exactly the way drums were made thirty years ago, while our drums are up to the minute in every detail and stand in a class by themselves.

THE SHELLS of our drums are made of seasoned materials, well braced, and we guarantee they will retain their shape. Have you ever seen an oval or distorted drum? If so it was not ours.

OUR HEADS are carefully selected for their clearness, evenness, and are graded in their thickness to meet the requirements of the different size and style drums. Nobody can guarantee heads against breaking, but we guarantee that our heads are free from cuts, flaws and other defects which would tend to make their life of short duration. Don't forget that the head is a very vital part of the drum and represents a large portion of its cost. Cheap drums with poor heads are dear at any price.

DRUM RODS used by us in all our Prussian pattern Snare and Bass Drums are made of pressed steel with brass buckle or thumb piece, according to the style; are nickel plated, while the old fashioned rods are made of cast iron and tinned. Our rods are much lighter. As an illustration: Our 6-inch center buckle rod weighs 1½ ounces, the thumbscrew rod 2 ounces and the clumsy old cast iron rod 3 ounces. Figure the lightness of any drum fitted with our rods as compared to the others and think of the increase of responsiveness owing to the elimination of all the useless weight. On account of more flat surface our rods are three times as strong as the ordinary one and add to the appearance of the drum, not only on account of their graceful design, but because they lie flat on the hoop.

DRUM HOOKS. All cord or regulation bass or snare drums are now equipped with open back patent hook, which permits the replacing of a broken hook without removing the cord, and cuts in half the time necessary to replace a new cord.

OUR PRICES, consistent with the excellent workmanship and the valuable improvements, are much lower than you would pay for the common drums and our drum will outwear two of the other kind.

OUR OFFER. We are so sure that we can sell you a better drum for less money than anybody else that we would like to send you one with the understanding that if it does not suit you for any reason whatsoever you can return it to us and we will cheerfully return your money and all transportation charges.

PRUSSIAN PATTERN.

REMEMBER, Prussian pattern drums are furnished with either center buckle or thumbscrew rod. The price is different. In ordering be sure to state which style you want and allow price accordingly.

SNARE OR TENOR DRUMS.

REGULATION PATTERN. (See illustration at top of page.)

No. 12H8500¼ Regulation pattern with a shell 14 inches in diameter, made of birdseye maple, varnished, 8 inches high, nickel plated patent cord hooks, with seven braces. The hoops are of maple, finished in imitation ebony; best of calfskin heads, six snares, new pattern snare strainer. Weight, packed, about 15 pounds.
Price, including one pair of rosewood sticks and web sling **$6.35**

No. 12H8504¼ Has a shell made of rosewood, 16 inches in diameter, 9½ inches high; finely varnished, ebony hoops, nickel plated patent hooks, eight braces and calfskin heads. Price, including rosewood sticks and web sling **$6.95**

PRUSSIAN PATTERN.

(See illustration at top of page.)

The shells on these drums are 6 inches in height and 16 inches in diameter, except No. 12H8506¼, which is 14 inches in diameter. They are fitted with ebonized hoops, and with the exception of No. 12H8506¼, which has seven rods, they all have eight of our special pattern nickel plated rods, nickel plated snare strainer and a set of eight snares, special belt hook and knee rest. We furnish with each a sling of good webbing and a pair of rosewood sticks. Weight, packed, about 15 pounds.

	Be Sure to State Style Rod Wanted. Fitted With Center Buckle Rod	Fitted With Thumbscrew Rod
No. 12H8506¼ 14-inch maple shell, seven rods, one calf and one sheepskin head. Price	$5.60	$6.10
No. 12H8508¼ 16-inch maple shell, one calf and one sheepskin head.	6.35	6.90
No. 12H8514¼ 16-inch brass shell with two calfskin heads.	6.95	7.50
No. 12H8516¼ Rosewood shell, two calfskin heads. On this drum the hoops are very nicely decorated with fancy decalcomania ornamentations. Price	7.25	7.80
No. 12H8518¼ Of exactly the same description as No. 12H8516¼, with the exception of the shell, which is made of brass and heavily nickel plated and polished. Price	7.65	8.20

ORCHESTRA DRUMS.

These drums have shells only 4 inches high, and are very sharp and responsive. Ebonized hoops, eight snares, patent nickel strainer, belt hook and knee rest. Complete with sticks and sling. Weight, packed for shipment, 17 pounds.

No. 12H8520¼ 16-inch brass shell, 10 nickel plated rods, two calfskin heads. Price **$6.95**

No. 12H8522¼ 16-inch birdseye maple shell, varnished, 10 nickel plated rods, two calfskin heads. Price **7.25**

No. 12H8524¼ This is our best orchestra drum. 16-inch nickel plated shell with 10 nickel burnished rods. The hoops are inlaid with a fine metal band ½ inch wide, giving the drum a very handsome and striking appearance. With this drum we give ebony sticks instead of rosewood. Price **7.95**

DRUMMERS' DELIGHT—SINGLE HEADED DRUM.

A very sharp drum quick in responding to the lightest touch of the sticks. The real thing for trap drummers. Easily carried. Occupies little space. Birdseye maple shell, highly polished, 14½ inches diameter, 3¾ inches high, including hoop; twelve nickel plated burnished rods, silk snare, with patent adjuster. Best quality transparent head. Weight, packed for shipment, 5 pounds.

No. 12H8521¼ Price, with rods illustrated, including a pair of genuine ebony sticks **$7.25**

No. 12H8523¼ Price, with thumbscrew rods, including ebony sticks **7.80**

QUADRUPLEX BAND AND ORCHESTRA DRUM.

For band or orchestra, in a concert room or on the street, this drum has no equal. Its advantages, when used as a street drum, lie in the lightness of construction and the penetrating, yet brilliant tone. For orchestra playing it is far superior to any drum made, regardless of price as it responds quickly so that from the softest to the loudest roll can be played with remarkable ease and rapidity. The main feature of this drum is the quadruplex rod, so constructed that each head can be tightened separately (see illustration). This has a highly polished birdseye maple shell, 4 inches high, 16 inches in diameter, fitted with twelve latest improved quadruplex rods, nickel plated and burnished. The hoops are finished in rosewood color. Has two of the best quality transparent calfskin heads, waterproof snares and nickel plated strainer. Complete with ebony sticks and webbed sling. Weight, packed for shipment, 17 pounds.

Quadruplex Drum Rod.

No. 12H8525¼ Price **$8.15**

BASS DRUMS.

We furnish bass drums in either imitation mahogany or birdseye maple at the same price. In ordering please use the number in the column stating at its head the kind of material desired. For instance, if a 30-inch, two calfskin head, imitation mahogany drum is wanted, the number will be 12H8538¼. If the same is wanted in birdseye maple, the number will be 12H8537¼. We also furnish our bass drums in regulation or cord style and Prussian or rod style. We have two styles of rods. Allow price of style desired. Drum sling and buckskin stick with each drum. Weight, packed for shipment, 50 pounds.

OUR REGULATION PATTERN DRUMS have a shell 12 inches high, with the exception of Nos. 12H8527¼, 12H8528¼, 12H8529¼ and 12H8530¼, which are 10 inches, made of fine birdseye maple or imitation mahogany. Maple hoops finished in imitation ebony or rosewood. They are fitted with the special drum hooks described above and best quality drum cord, leather braces, and fitted with either one calfskin and one sheepskin head or with two calfskin heads. This is stated in each description.

OUR PRUSSIAN PATTERN DRUMS answer the same description as our Regulation, except that the shell is 9½ inches high, and they are fitted with our special patent drum rods. The maple hoops are finished in imitation ebony and are decorated with fancy decalcomania ornamentations. The number of rods for the different size drums is as follows: 24-inch drums, 9 rods; 28-inch drums, 11 rods; 30-inch drums, 12 rods; 36-inch drums, 15 rods.

IMPORTANT. Bass drums are made in Regulation and Prussian patterns with two styles rods (see above). We cannot fill your order unless you state which pattern you desire. Allow price according.

Birdseye Maple Shell No.	Imitation Mahogany Shell No.	BASS DRUMS. Head our description at left of page.	Regulation or Cord Pattern	Prussian Center Buckle Rod

Drum and Cymbal Beater.

Double Action.

Made entirely of metal. With this beater one is able to strike the drum or cymbal alone or both together, also with greater rapidity and accuracy than with any other make on account of its quick action and simple construction. Easy to carry, as it is easily taken apart and packed. Shipping weight, 5 pounds.

No. 12H3668 Price, with cymbal holder, but without cymbal and drum **$1.95**

DRUM SPURS.

No. 12H3669 Made of nickel-plated metal with thumbscrews to fasten to hoop of drum.
Price, per pair **24c**
Postage extra, 6 cents.

Folding Drum Stands.

No. 12H3600 Seroco Patent Folding Drum Stand. Made of the best quality of steel, highly nickel plated. A neat and most compact drum stand, very solid in construction yet very light. Will fit any size drum. Shipping weight, 3 pounds. Price **$1.85**

No. 12H3602 Adjustable Drum Stand. Made of polished nickeled steel. Will fit any drum from 14 to 16 inches in size. A good, substantial stand at a very low price. Shipping wt., 2 lbs. Price **95c**

DRUM CARRYING CASES.

Suit case style, strong and durable, with steel reinforced frame, yet quite light and easily carried. Reinforced corners, leather handle, brass catches and lock. Divided in three sections to hold snare drum and other drummers' traps. Crinoline cloth lining. In genuine russet leather or in keratol to fit size snare drums as shown below. Shipping weight, about 25 pounds.

Cat. No.	Size of Drums Diameter, Inches	Height, Inches	Russet Leather, Price	Keratol, Price
12H3600	15¾	4¼	$7.50	$4.50
12H8602	18	7½	9.00	5.75

BASS DRUM BAGS.

Made of strong and closely woven brown canvas with edges bound with leatherette. Fitted with carrying strap, drum stick holder and patent clasps to close it. Will help preserve your drum, especially the heads, as the moisture will not so easily affect them. Also practically prevents tearing a head should you accidentally knock the drum against a sharp corner. Made to fit following size regulation pattern drums:

Diameter	Height	Diameter	Height
24 inches	10 inches	30 inches	12 inches
28 inches	12 inches	36 inches	12 inches

and in ordering you must be sure to give diameter and height of your drum. Shipping weight, 33 ounces.

BANJOISTS, TAKE NOTICE!

At last, here is a head already stretched, dried and hooped ready for immediate use. No fussing, ruining of heads or delay. Just slip it over your rim, put straining hoop on and apply the brackets. These heads are of fine calfskin and we put them up to fit five sizes of rims or shells. When measuring your instrument take diameter of rim alone, without straining hoop or brackets.

Metronomes

Used by students of music, especially of the piano, to indicate the tempo or time. The upright rod moves backward and forward like an inverted pendulum, the movement being actuated by a spring which is wound up with a key. The time is indicated both to eye and ear, the movement being in sight and ticking similar to a clock. Instructions with each.

We are proud to state without fear of contradiction that we have the largest metronome business in the United States. We are supplying them in large quantities to colleges, academies and other institutions where taught, as well as to individual students. First quality and our extremely low prices are the factors of success. We handle only French instruments. Our system, as our knowledge and experience proves them the best.

12H3807 Genuine mahogany case, visible movement. Price..... **$1.75**

12H3808 Same as No. 12H3807 but with attachment. Price..... **2.75**

Fine Quality, Genuine Paquet.

Judged the world over as the best. For fifty years standard by which all other makes are judged.

12H3809 Best mahogany case, highly polished, mechanism. Absolutely accurate. **$2.45**

12H3810 As above, with bell attachment. Price..... **3.35**

Weight of metronomes, about 2½ pounds.

Ocarinas, Very Best Grade.

Our Ocarinas are made of fine quality clay, beautifully enameled and finished. We guarantee them to be in perfect tune, easy to blow and of rich and birdlike tone. We are offering them to you at a ridiculously low price. A sheet of instructions with each instrument.

WE ESPECIALLY RECOMMEND THESE BOOKS.

No. 12H01800 The violin, the king of instruments, is the most difficult to learn. Heretofore it has required expensive lessons, many tedious hours of study and much patience to become proficient. These great difficulties have now been overcome and we do not hesitate to say that with this new method of illustrated diagrams anybody can learn to play without the aid of a teacher. All the scales, chords and exercises in every major and minor key are fully illustrated in this book by diagrams of the fingerboard, showing the positions of the fingers of the left hand to be used in holding down the strings. It shows correct fingering and bowing and many other features never before published. Try this method and learn to play. Retail price, $2.00. Our price.....(Postage extra, 12 cents).....**75c**

No. 12H01620 Chord Book for Piano. This book was especially compiled for us by the celebrated instructor and composer, E. N. Guckert. It contains a complete method of regular instructions besides a very elaborate study of all the chords easily explained by illustrations of the piano keyboard, showing the fingers to be used in each chord, besides many other valuable illustrations and instructions for the beginner or advanced pupil. This book will teach anyone how to play chords and accompaniments without the aid of a teacher. Our own edition price.....(Postage extra, 20 cents).....**$1.00**

No. 12H01702 The same instructor in every way, only arranged for the parlor organ. Price.....**$1.00**
If mail shipment, postage extra, 20 cents.

No. 12H02020 Otto Langey's Celebrated Instructors. OMPLETE YOUR MUSIC LIBRARY. 78c FOR (Postage, 20 cents) → 25 COPIES FOR (Postage, 20 cents) → 78c THE BEST MUSIC IN THE BEST FORM.

the first time in the history of the music business we ing within the reach of everybody the most complete d arranged edition of the standard, classical and oper- ade by all the eminent artists of the world. Music has been played for the last fifty years; music which will be played for the next five hundred years; music which is refining, entertaining and represents the very best in each particular class. It is printed from stone engravings with magnificent colored covers emblematic of the subject represented. Owing to the ridiculously low prices at which we sell these compositions we cannot accept any order for less than twenty-five copies. In making up your order you are at liberty to choose either vocal or instrumental compositions. We furthermore recommend that you give us a list of about forty selections from which to pick the twenty-five you desire.

HOW TO ORDER.

In Ordering Select a Few Extra Titles and Permit Us to Substitute Them if Necessary.

SEARS, ROEBUCK AND CO., CHICAGO, ILL. 713

The name BECKWITH on a piano or organ is an absolute guarantee of quality. That name, backed by our entire resources, is your protection.

PIANO AND ORGAN DEPARTMENT

THIRTY DAYS' FREE TRIAL

We will ship any piano or organ of the celebrated Beckwith make for a full thirty days' free trial in your own parlor. You need not send a single dollar with your order or deposit anything in advance. If you decide to order a Beckwith on trial under this offer, you must read our liberal thirty days' free trial offer, explained below, for a complete understanding as to how to send your order.

SEND NO MONEY

IF YOU DO NOT CARE to send cash with the order, as practically all of our customers do, then we will gladly ship an instrument to you without any money being sent with the order or deposited in the bank. Read this carefully to understand how to send your order for an instrument under our send no money offer. Select the one you wish to try, mail the order without any money, but we must have the name of the

CERTIFICATE OF DEPOSIT.

Town ——— State ——— Date ———

Received from Mr. ——— Dollars, in payment of Sears, Roebuck and Co.'s ———

We agree to hold this money until the instrument has been received by Mr. ———, residing in ———, and has had thirty days' trial, when we shall forward the amount to Sears, Roebuck and Co. If Mr. ——— is not perfectly satisfied we will return the money on surrender of the bill of lading, showing the instrument has been reconsigned.

———
Name of bank.

———
Your banker will sign here.

bank where you will deposit the full price after it reaches your station, and if you wish us to advance the freight, we will do so upon request, this also to be included with your deposit. Read the Certificate of Deposit above, and you will understand that the banker will hold the money while you try the instrument thirty days. If you are not satisfied, send it back and the banker will give you the money. If at the end of thirty days you have the money sent to us, you still have the right to return the instrument at any time during one year. **Everybody understands our one-year trial offer** so well that in almost every case they send cash with the order, instead of waiting thirty days. Our send no money offer is not made for our customers or those who know us, but for those who have not done business with us and are not familiar with our policy of **always** returning the money on **all** goods that are not satisfactory. We urge you to rely on us and send cash in full with the order and if you are already our customer you will, of course, prefer to send the money right with the order, the way you are ordering groceries and other common articles, because you **know** we are as strong as any bank in the world, and **stronger** than many, and that we will return every penny if you are not pleased. Not only will this simplify the transaction for both of us, but when you send cash with the order we can ship the instrument addressed in your name and not to the order of SEARS, ROEBUCK AND CO. It also becomes a confidential matter between us and neither the banker nor anyone else will know what you have paid.

HAVE YOU A FREIGHT AGENT?

If not, then the railroad will not accept shipments sent under our Send No Money Offer. If you have no agent send the money with the order with a sufficient amount to prepay the freight and we will ship promptly.

THE FREIGHT CHARGE is not included in our price. No matter what instrument you buy you pay every cent that it cost to make it and all the profit and expenses of the numerous people through whose hands it passes on its journey to you, and every penny of the freight charge as well. Our way is for you to pay only the amount of freight on the instrument to your station, which you must pay anyway, and it is better for you to pay this amount, rather than pay a flat sum added to the cost to cover the **largest freight charge** on an instrument to the **farthest point from the factory.** Remember, the agent or dealer can secure no better rates than you can. **The Interstate Commerce Law prevents it.**

OUR ONE-YEAR TRIAL OFFER. This is absolutely the biggest kind of protection. It positively insures you against a mistake in your selection. Read the Agreement of Sale on this page and you will see that you

AGREEMENT OF SALE

Between Sears, Roebuck and Co., of Chicago, and

Paul B. Armstrong Chicago Ills

It is hereby agreed that this instrument will be shipped to you for a complete thirty days' trial. If after a thirty days' trial you find it is entirely satisfactory in every way and decide to keep it, even then you are to have a perfect right to return it at any time within one year if for any reason it is not entirely satisfactory to you or not as represented by us, in which event we hereby bind ourselves to return all the money you have paid for the instrument and the freight charges.

Your order is accepted subject to this binding agreement which is voluntarily made by us. Yours truly,

SEARS, ROEBUCK AND CO.
Piano and Organ Dept.

have a **right** to return any instrument at any minute during one full year. This so completely protects our customers that practically **every one** sends **cash with the order,** relying not only upon our well earned reputation for **square dealing** for returning the money, but also on this **Agreement of Sale,** which any lawyer will tell you is binding on us. If you are not pleased you can return the shipment and we will return your money in full.

THE GOLD MEDAL ORGAN. Wherever the Beckwith Organ has been shown it has received the highest honors. The last great triumph was at the Jamestown Exposition where it was awarded the Highest Honors and the Gold Medal. There is only one meaning to this great compliment paid the Beckwith, and that is that it represents the standard of organ quality for the world today.

FACTORY SHIPMENTS. All pianos and organs are shipped from the factory direct under the personal supervision of our representative. This does away with all middle profits. This means a bigger saving you can realize or expect.

OUR BIG PROTECTION GUARANTEE or Bond of Indemnity is full protection you during twenty-five years. This stands between you and any possible loss through any defect of any nature material or workmanship. Read it could not be more liberal. You can

BOND OF INDEMNITY.

The Beckwith Pianos and Organs

This certifies that this instrument is guaranteed for twenty-five years against defect in material or workmanship. Should any piece or part prove defective in material or workmanship, or should any defect manifest itself during twenty-five years that does not arise from misuse, accident, moisture or extremes of temperature we agree to replace it or repair the instrument at our expense during this entire period.

SEARS, ROEBUCK AND CO.

for better protection, and as to the of our promises and guarantees, we fully refer you to **any** bank in the United States, **any** Express Company, any mercial Agency, or to **five million** satisfied **customers.** We don't want money if you are not pleased. remember that.

FREE PIANO AND ORGAN CATALOG. While these pages contain all of our all of our best prices, all of our guarantees and agreements, yet if you desire information, write for our Piano Organ Catalog, either one, and it sent to you by return mail. While special catalogs are full and complete they contain no better offers, no prices, no different instruments than shown here. If you need any other mation not contained in these pages to the manager of our Piano and Dept., who will consider it a pri answer your letter personally.

FREE MUSIC LESSONS. If you buy a Beckwith Piano or Organ, we want you to be play it in a masterly manner. By arrangement with the school we each purchaser a **free certificate** greatest Correspondence School in the world, which will entitle you **free lessons.** There is not one cent for the lessons. The only expense nature to you will be a cost of 12 a week, payable eight weeks, or advance, to help cover the cost of on music, the examination paper The lessons, which ordinarily each, are **entirely free.** If you advancement after you have complete course, you will be entitled to a Certificate of Proficiency, a distinction worth ing for.

BECKWITH

Gold Medal and Highest Award Jamestown Exposition.

THIS IS THE FAMOUS PIANO-ORGAN

that leads all others in quality, finish, design and tone. It looks exactly like a piano, having the same beautiful glossy finish, and deceives everyone who sees it. No one would suspect that it was a beautiful organ with a magnificent tone. It can not produce the piano sound. The case is double veneered inside and outside. The duet music desk is finished with a handsome design that looks just like inlaid work. It is beautiful in every way.

SEND NO MONEY WITH YOUR ORDER

If you are already one of our customers this offer is not made for you. It is made for those who do not know us and our well earned reputation for square dealing. If you don't care to send money with your order, send the order at once under our send no money offer, **but you must read the full explanation of our send no money offer on page 714 for a full understanding.**

68.00 Home Queen Piano-Organ

THIS IS AN EXACT REPRODUCTION OF STYLE No. 46H218 HOME QUEEN PIANO-ORGAN WITH THREE STOPS.

Your money returned at any time during one year after purchase if it proves unsatisfactory.

UTOMATIC OCTAVE COUPLER. Pressure on the middle pedal couples th sides of the organ instantly. Another pressure of the ot releases it.

E ACTION. 7⅓ **octaves of keys,** just like a piano, controlled by stops that are hardly noticeable the organ. The reeds are all Grand Orchestral reeds, oducing a beautiful quality of organ tone.

RAND PNEUMATIC SWELLS. There are no knee swells to detract from the piano pearance. To throw on the swells pump a little faster, to se the swells stop pumping for a second.

E TONE QUALIFYING CHAMBER modifies the tone and produces a se imitation of the pipe organ.

E BELLOWS fills the entire bottom of the instrument, therefore the organ has wonderful power l ease of pumping.

talog No.	Reeds	Stops	Octaves	Price
6H217	176	2	7½	$68.00
6H218	244	3	7⅓	73.00

THE VENEER is all of fine grade, either San Domingo mahogany or French burled walnut, hand rubbed. **What veneer do you prefer?**

GUARANTEED to be the equal of organs selling for as high as double our price. Covered by our binding guarantee for twenty-five years, as shown on page 714.

FREE. The price includes a handsome stool, as illustrated, with adjustable seat, brass claws with glass ball feet, a complete instruction book, a velour scarf with genuine silk fringe, and fifty free lessons in the greatest Correspondence School of Music in America, as fully described on page 714.

SIZE 4 feet 8½ inches high, 5 feet long, 2 feet 2½ inches wide. Weight, boxed for shipment, about 570 pounds.

AN EXPERT ORGANIST SAYS THAT THIS IS A BETTER ORGAN THAN SHE GOT FOR TWICE THE MONEY.

Sears, Roebuck and Co., Chicago, Ill. Owensville, Ind.

I must say that the organ is all right in every respect, and in perfect order. We had an expert organist to try it and she said that it was a better organ than she got for twice what I paid. I must say that I was surprised to see such a nice organ for so little money. J. FRANK WILLIAMS.

A BIG VALUE

Sweet Toned Organ of Massive Size and Magnificent Design.

THIS IS A GOLD MEDAL ORGAN. It received the Gold Medal and Highest Award at the Great Jamestown Exposition. This stamps it at once as the standard of organ quality for the world. While we are proud of the honors that have been heaped upon this organ, we take more pride in the recommendations received from every corner of this country, some of which we show on this page.

$49.85 AND UP

THIS ORGAN is all that the most critical musician could ask for and its imposing appearance lends dignity to its surroundings. Place one in your home and you will have something to be proud of.

READ ALL ABOUT THIS ORGAN on the next page. It is well named. It is not only majestic in name, but majestic in character and majestic in tone.

FREE. Our price includes this fine stool, a complete instruction book, together with fifty free lessons in the greatest Correspondence School of Music in America, as fully explained on page 714.

SEE WHAT OTHERS SAY

Of the beautiful Beckwith Organs, as shown in the unsolicited testimonials printed below.

EVERYONE THINKS IT COST TWICE AS MUCH AS THIS CUSTOMER PAID.

Sodaville, Ore.

Sears, Roebuck and Co., Chicago, Ill.

Dear Sirs:—I received the Beckwith Organ in fine shape and we are delighted with it. We think it is a perfect gem in looks and tone, and everyone thinks the same. We sometimes hesitate to tell our friends the small sum that we paid for this organ, for they think we paid twice as much as it really cost us. The organ is perfect in every way and we thank you very much, not only for your promptness in filling the order, but for selecting such a beautiful instrument, true to your catalog description, if not better.

Yours truly, MRS. A. D. PRICE.

BETTER THAN WE CLAIMED IT TO BE AND EXACTLY AS REPRESENTED.

R. F. D. No. 1, Wartrace, Tenn.

Sears, Roebuck and Co., Chicago, Ill.

Dear Sirs:—I received my Beckwith Organ and would have written you long since, but I really wanted to give it a fair and severe test. I must now say that it is just as you recommended it to be, if not better. All my friends who have tried it say that I have a fine sweet toned organ of the highest grade. I am highly pleased with it in every way. Thanking you for your kindness, I remain,

Yours very truly, J. N. BLACK.

BETTER THAN THE AGENT'S ORGAN WHICH COST TWICE AS MUCH.

R. F. D. No. 1, Franklin, Va.

Sears, Roebuck and Co., Chicago, Ill.

Dear Sirs:—We have had our Beckwith Organ for over ten months and are more than pleased with it in every way. My sister bought an organ about a month ago from an agent and paid twice what mine cost, and I really would not give mine for two like hers. When she told the agent about mine and what I had paid for it, and that I bought it from you, the agent told her that the Beckwith Organ was made out of the scraps of material that his organ was made of. Any sensible person knows better than this. Your guarantee is all the protection that I want. I can return my organ at any time within a year and get my money back. My sister can't. The agent told her that the Beckwith Organ was not a standard organ and wouldn't last six months. I have had mine almost a year and it is better today than when I got it. I am satisfied. The organ is a beauty compared to my sister's and I wouldn't trade twice over. Your friend and customer. JEFF D. BURGESS.

BECKWITH

Gold Medal and Highest Award Jamestown Exposition.

Majestic Grand Organ

The illustration shows the organ fitted with Grand Orchestral Action E. 6 octaves, 292 reeds. Price, 168.85

A FINE INSTRUMENT IN EVERY RESPECT. ALL THAT WE CLAIMED IT TO BE.

Lemont Furnace, Penn.

Sears, Roebuck and Co., Chicago, Ill.

Dear Sirs:—The Beckwith Organ ordered by me arrived a few days ago and I can't tell you how much we are pleased with it. It is a fine instrument in every respect. It arrived in splendid condition; not a scratch on it. The case is fine in workmanship and finish and could not be nicer. The musical part is grand, and everyone that sees it thinks it is a beauty. I am much obliged to you for this beautiful instrument.

Yours truly, SAMUEL S. LEWIS.

The Artistic and Beautiful MAJESTIC GRAND ORGAN

Illustrated on the Opposite Page. Fully Guaranteed for Twenty-Five Years by the Strongest, Most Binding Guarantee Ever Given. See a Copy of This Guarantee on Page 714.

THE GOLD MEDAL AWARD. By unanimous vote the great Jury of Awards at the late **Jamestown Exposition** conferred upon this organ the **Gold Medal** and **Highest Award** in competition with other instruments of well known makes. Wherever the Beckwith has been shown it has invariably carried off the highest honors.

EST ORGAN MADE by the big Beckwith Organ organization, an instrument that will grace any home or mansion in the land, sold for less money than others ask many times for organs of inferior grade, at a price ns more money saved to you than you really expect or can realize until you try one in your home.

Figure 1

THE CASE is exceedingly well designed and attractive from every standpoint and is furnished in either genuine highly figured oak with quarter sawed front, or genuine American black walnut. It is substantially built, handsomely finished and will prove an ornament to any home. The mirror in the top is a door for a very roomy bric-a-brac closet. The music rack is a lid to a very large sheet music pocket. The trusses with the hand carved griffin head are very handsome, in full keeping with the balance of the case. All the panels on this organ are double veneered, which not only makes them particularly strong, but handsome as well. The panel above the pedals can be instantly removed if it is necessary at any time to reach the bellows. Fitted with paneled fall board and casters. The pedals are covered with high grade carpet, protected by metallic pedal guards silver nickeled and highly burnished.

Figs. 2 3 4

2—A Diapason reed.
3—A Flute reed.
4—A Piccolo reed.

THE MECHANICAL FEATURES. The mechanical part of this organ is most perfectly constructed, durably built and skillfully adjusted. The illustration, Figure 1, shows the full view of this action. AA shows the feeder valves, BB the pedal straps, C the various stop connections, DD the swell rods, E the coupler rods, F the tracker pins, G the guide pins, HH the foundation board, I the excess pressure valve, J the strong solid brace used to make the bellows rigid. All the valves are covered with genuine sheepskin and there is nothing but guaranteed 100 per cent pure wool felt on. All moving parts are bushed so that they work in absolute silence.

Figure 5
A—Straight grained, cork pine foundation.
B—All wool pad.
C—Genuine sheepskin facing.

ND ORCHESTRAL BELLOWS are extremely large and built along scientific lines. The relationship between the bellows and the feeders adjusted that a child can pump the organ with perfect ease. Being extra large there constant stream of air directed through the reeds. All Beckwith Organs have large bellows capacity, therefore there hat jerky, spasmodic tone so often found in some organs. The wood part of the bellows is built up of three-ply stock not warp, crack or split under any natural conditions.

ND ORCHESTRAL REEDS are the largest that can consistently be used in an organ. The vibrating tongues are made of bell metal, double riveted to the strong and solid brass reed block. The reeds , voiced and tuned by hand. Figures 2, 3 and 4 show the reeds greatly reduced in size. The wonderful singing quality, the one has made the Grand Orchestral Action, with which this organ is fitted, famous the world over.

VALVES. This organ is fitted with very large valves, covered with a cushion of pure all wool felt, glued down the center of the felt only, and covered on top with genuine selected sheepskin. These valves are so large that the re on the key permits the full volume of the reed to speak at once, a most desirable qualification. The n of this valve with its heavy all wool felt cushion and sheepskin leather top, is a guarantee that it will it" properly, instantly shutting off the tone when a key is released. The different parts of the valves ted in Figure 5.

½ inches high, 46 inches long, and 24½ inches deep, in five octaves; and 53 inches long, in six octaves. weighs, boxed for shipment, in five octaves, about 500 pounds, and in six octaves, about 575 pounds.

ED IN OAK OR WALNUT. It is furnished either in beautifully figured oak or genuine American black walnut. While the case receives the requisite number of coats of varnish, yet each coat is carefully vn with rotten stone to a very handsome oil rubbed finish. Thus all the distasteful gloss is removed.

AND ORCHESTRAL ACTION is the finest combination of and octaves. Action A consists of 24 Principal, 37 Melodia, and 37 Celeste reeds, 122 Grand Orchestral reeds in five trolled by the following eleven stops: Principal, Dulciana, apason, Celeste, Cremona, Diapason Forte, Principal Forte, ler, Bass Coupler and Vox Humana.

B is the same as Action A, with the addition of two full sets and 24 Bourdon reeds, 183 Grand Orchestral reeds in five h four additional stops added to those given in Action A, as urdon, Viola, Flute and Dulcet, 15 stops in all.

C is the same as Action B, with the addition of two full sets et and 37 Cornet reeds, a total of 244 reeds in five octaves, with ops as Action B, excepting that the Dulcet stop is omitted and Cornet and Cornet Echo added, making 17 stops in all.

D is the same as Action A, excepting that there is an additional octave of reeds in the Melodia and Celeste sets, a total of 146 reeds in six octaves, controlled by the same stops as shown in Action A.

ACTION E. This is the same as Action C, excepting that there is an added octave of reeds in the Flute, Celeste, Melodia and Cornet Echo reeds, making 292 Grand Orchestral reeds in six octaves, controlled by the same octaves as shown in the description of Action C.

A GRAND ORGAN. Next to the Majestic Grand, illustrated on page 716, the Empire Grand is the finest organ we offer. Always a favorite, deservedly popular, it still retains its hold upon the affections of lovers of organ music. We offer this as being the equal of organs sold for as high as $100.00 and up.

$42.45 AND UP

THE CASE is extremely pretty and at the same time very dignified. The trimmings on this and the Majestic Organ are all hand carved, and it is finished in the highest type of the organ maker's art, with all the gloss removed. The finish on this organ is known as the satin finish, a dull, handsome, rich appearance and is unusually attractive. It is furnished in either highly figured oak or fine American black walnut. It is a beautiful organ in every way. There is a shelf for vases below the beveled edge French plate glass mirror and bric-a-brac shelves on either side of it. The music desk is a cover for a large music pocket and the organ is fitted with lamp stands on either side of the organ just above the keys. The panels are also veneered, which not only makes it more beautiful than ever, but is a guarantee that they will never crack, split or warp under any natural conditions. The large panel immediately above the pedals may be removed instantly, if for any reason it is necessary to reach the bellows. The pedals are covered with handsome carpet with metal pedal guards, silver nickeled and highly burnished, and the organ is fitted with paneled fall board and casters.

THE TONE is full, round and sweet, the same lovely tone that is found in the Majestic Grand. All reeds are specially voiced for the Grand Orchestral Action. The materials are the finest it is possible to secure.

THE GRAND ORCHESTRAL ACTION This organ is fitted with this noble action, in five different combinations as shown in the prices given below. These actions are all equipped with the Grand Orchestral reeds, the finest reeds possible to make. Every part of the action is of very finest quality. For further information we refer you to the detailed explanation of it, as shown in the description of the Majestic Grand Organ on page 717.

GUARANTEED FOR TWENTY-FIVE YEARS by the strongest bond ever issued. This guarantee and our Agreement of Sale is your complete protection. Read all about this liberal guarantee and agreement on page 714.

SEND NO MONEY but refer to page 714 and learn how to order an organ without sending any money with the order or depositing anything in advance if you prefer it.

SIZE. Height, 81 inches; depth, 24 inches; width, 46 inches in five octaves, and 53 inches in six octaves. Weight, boxed for shipment, about 475 pounds in five octaves, and about 550 pounds in six octaves.

FREE. A beautiful stool, as illustrated, with glass balls and brass claw feet, fine instruction book and fifty free lessons, as fully explained on page 714.

THE ACTION OF THE BECKWITH IS PERFECTION.

Sears, Roebuck and Co., Chicago, Ill. Bar Harbor, Me.

I take this opportunity of expressing some of the pleasure that your organ gives. The material and workmanship are the best, and your skilled arrangement of the action seems to be the perfection of musical art. A pipe organ is expected to be capable of expressing music of an almost unlimited range, and the Beckwith possesses this feature in a wonderful degree, and calls for a more than common expression of satisfaction. BYRON CARTER.

ORGAN FOR $23.95

How We Can Offer an Organ for $23.95 Is Fully Explained Below

OFFER YOU an organ for as little as $23.95, but remember that each price quoted in this book is a bar- lower than any other dealer has ever attempted to offer, lower other dealer can offer. It is best at all times to invest all you In a musical instrument, for it is just as true of organs as it is ry other line, that you will get greater satisfaction in buying the de as compared with the satisfaction you will secure in buying grade. Nothing was ever truer than this, and it applies to every is book.

ITION COMPELS US to offer an organ for as low as $23.95. We can offer better value at this price ver before been attempted. To meet competition on a low priced have succeeded in securing an instrument with 8 stops and 5 ich we guarantee for five years and which we offer at this price. Beckwith. It is a $23.95 organ. Please bear in mind that it is the e of organ that others would offer you for double our small the fact that we offer such an organ for so little proves con- hat no one can offer you so much value in an organ as we do.

VICE TO YOU is no doubt the same advice that you would give to anyone else on the same subject. In organ you are securing a lifelong friend and it is not economy lowest priced instrument that can possibly be offered. It is to st to consider the greater values shown in the Beckwith Organs. welcome your order for this organ just as we would for any ument in our line. Our margin of profit, though small, is satis- ng and is practically the same on each organ. In urging you to he Beckwith Organs, each one of which represents Gold Medal are urging you to take advantage of our ability to save you a unt of money on this important purchase than you can secure elsewhere. Please remember that only $5.00 more will secure the better value organ illustrated on this page, the beautiful Golden Chimes, guaranteed for twenty-five years, a lovely instrument with 11 stops, 122 fine reeds, beautifully finished. Remember, also, if you will, that the freight on this cheap organ will be just about the same as it would be on the Golden Chimes, and as the freight charge must be paid by the customer in every case, it is to your interest to consider the better instrument, as it will cost you no more freight, and the slight additional expense on your part will all go into quality and better satisfaction in the years to come.

EVERY ONE OF OUR CUSTOMERS who sends us an order is taking advantage of our low prices, and as we can sell an organ of high quality for less than what others charge for organs of inferior quality, you will no doubt agree that it is to your interest to consider the purchase of a Beckwith, and we hope in the end that you will decide upon one of our better grades of organs, the organs that received the Gold Medal at the Jamestown Exposition.

THIS IS NOT A BECKWITH, therefore it is not a Gold Medal organ, but it is a serviceable organ, exactly as we represent it to be, one that we guarantee you will find is the equal of those selling for double our price. Before writing your order read all about the other organs in this catalog, and you undoubtedly will be impressed with the higher quality, the better satisfaction that you are bound to receive through the purchase of one, the protection that our twenty-five year guarantee gives you and the greater satisfaction that must be yours in the years to come.

Nothing was ever truer than this, and it applies to every his book.

TITION COMPELS US to offer an organ for as low as $23.95. ever before been attempted. To meet competition on a low priced have succeeded in securing an instrument with 8 stops and 5 which we guarantee for five years and which we offer at this price. a Beckwith. It is a $23.95 organ. Please bear in mind that it is the ide of organ that others would offer you for double our small the fact that we offer such an organ for so little proves con- that no one can offer you so much value in an organ as we do.

DVICE TO YOU is no doubt the same advice that you would give to anyone else on the same subject. In n organ you are securing a lifelong friend and it is not economy he lowest priced instrument that can possibly be offered. It is to erest to consider the greater values shown in the Beckwith Organs. d welcome your order for this organ just as we would for any strument in our line. Our margin of profit, though small, is satis- to us and is practically the same on each organ. In urging you to the Beckwith Organs, each one of which represents Gold Medal we are urging you to take advantage of our ability to save you a mount of money on this important purchase than you can secure elsewhere. Please remember that only $5.00 more will secure the better value organ illustrated on this page, the beautiful Golden Chimes, guaran- teed for twenty-five years, a lovely instrument with 11 stops, 122 fine reeds, beautifully finished. Remember, also, if you will, that the freight on this cheap organ will be just about the same as it would be on the Golden Chimes, and as the freight charge must be paid by the customer in every case, it is to your interest to consider the better instrument, as it will cost you no more freight, and the slight additional expense on your part will all go into quality and better satisfaction in the years to come.

EVERY ONE OF OUR CUSTOMERS who sends us an order is taking advantage of our low prices, and as we can sell an organ of high quality for less than what others charge for organs of inferior quality, you will no doubt agree that it is to your interest to consider the purchase of a Beckwith, and we hope in the end that you will decide upon one of our better grades of organs, the organs that received the Gold Medal at the Jamestown Exposition.

THIS IS NOT A BECKWITH, therefore it is not a Gold Medal organ, but it is a serviceable organ, exactly as we represent it to be, one that we guarantee you will find is the equal of those selling for double our price. Before writing your order read all about the other organs in this catalog, and you undoubtedly will be impressed with the higher quality, the better satisfaction that you are bound to receive through the purchase of one, the protection that our twenty-five year guarantee gives you and the greater satisfaction that must be yours in the years to come.

No. 46H20 Princess Parlor Organ, guaranteed for five years only, in oak case, 5 octaves, 8 stops, with stool and instruction book. Weight, boxed for shipment, about 380 pounds. Price..... **$23.95**

Church and Chapel Organs

The Finest Line of Reed Organs Ever Offered for Use in Churches, Chapels, Sunday Schools, Lodge Rooms and Other Public Places

at competition defying prices. Every price means a saving to you, a greater saving than can be secured by the purchase of any other organ through any other source.

BECKWITH

Gold Medal and Highest Award Jamestown Exposition.

THE CATHEDRAL PIPE-TONE ORGAN

is specially recommended for large churches where power and volume is desirable. This organ is superior to any other church organ sold at anywhere near our low price. The case is magnificent in design and finish, and furnished in choice oak or walnut. It is unnecessary to more than call your attention to its noble proportions as shown in the illustration on this page, and to the church effect of the design. Like all Beckwith Organs, **the case of this instrument is finely designed, and we furnish it in highly figured oak or walnut wood as desired.** The back is as carefully finished as the front, so that it is an ornament no matter where it may be placed. The music desk is low and does not interfere with the view of the organist. It is fitted with paneled fall board and casters, and the pedals are covered with fine carpet, protected by metal pedal guards, silver nickeled and highly burnished. The large panel above the pedal can be instantly removed if it is necessary.

CHOOSING A CHURCH ORGAN

is not a difficult matter if the size of the church is borne in mind. For a church with small seating capacity, the Queen Chapel Organ would answer the purpose. A church with a medium size auditorium can be successfully filled with the Choir Gem Organ, furnished in two different octaves, while for a large church with high ceiling we recommend this Cathedral Pipe-Tone Organ, which can easily support 400 or 500 voices in congregational singing.

THE GRAND ORCHESTRAL EOLIAN ACTION.

In five octaves it is furnished with 244 reeds as follows: 24 Diapason reeds, 24 Principal reeds, 24 Bourdon reeds, 48 Eolian Harp reeds, 13 Sub-Bass reeds, 37 Melodia reeds, 37 Celeste reeds and 37 Flute reeds. **In six octaves** it is furnished with one additional octave of Melodia, Celeste and Flute reeds, making a total of 280 reeds in all. Both five and six-octave actions are controlled by the same number of stops, namely, Diapason, Dulciana, Principal, Bourdon, Eolian Harp, Sub-Bass, Melodia, Cremona, Celeste, Flute, Principal Forte, Diapason Forte, Bass Coupler, Treble Coupler and Vox Humana, 15 stops in all. It is also fitted with Swell Organ and Grand Organ Knee Swells. **The Eolian Harp reeds** are specially suited for church work and produce a quality in this organ unsurpassed by any other make.

$59.85 Cathedral Pipe-Tone Organ

THE TONE

is faultless and of matchless purity. Whether the organ is being used for offertory work or whether used as a full accompaniment to the congregation, you will find that it is entirely satisfactory in every way.

SEND NO MONEY

unless you prefer to, but read all about our trial offer on page 714.

Catalog No.	Action	Reeds	Stops	Octaves	Price, Oak	Price, Black Walnut
46H190	F	244	15	5	$59.85	
46H192	G	280	15	6	67.85	

The above prices are for oak only. If you desire this organ in genuine Black Walnut, you must add $2.00 to the prices given.

GUARANTEED FOR TWENTY-FIVE YEARS

THE UNIVERSAL FOLDING ORGAN AT $27.40 IS THE FINEST FOUR-OCTAVE FOLDING ORGAN EVER OFFERED. IF YOU ARE INTERESTED, WRITE FOR PARTICULARS.

28.45 Queen Chapel Organ

THE QUEEN CHAPEL ORGAN is offered in response to a demand for a church organ of good quality at a low price, suitable for use in small churches. We can recommend the Queen Chapel Organ as the one that will fulfill these requirements.

THE CASE is very pretty and is furnished in beautifully figured oak, tastefully hand carved, decorated and ornamented. The back is full finished so that it is ornamental no matter where it may be placed.

THE TONE is better than you could reasonably expect in a church organ at $28.45. It is the same kind and quality of tone that you would expect to find in a church organ bought through ordinary channels for as high as $60.00.

THE ACTION. This organ is fitted with the 5-octave Queen Chapel Organ Action, containing one set of Melodia reeds, 37 notes; one set of Celeste reeds, 37 notes; one set of Diapason reeds, 24 notes; one set of Principal reeds, 24 notes; 122 reeds in all. The reeds are controlled by 11 stops, as follows: Diapason, Dulciana, Principal, Bass Coupler, Diapason Forte, Vox Humana, Melodia, Cremona, Celeste, Treble Coupler and Principal. It is fitted with two knee swells, the Grand Organ and the Swell Organ.

GUARANTEED FOR TWENTY-FIVE YEARS with a strong binding guarantee, as shown on page 714.

PRONOUNCED FIRST CLASS BY GOOD PLAYERS.

Moore, Okla.

Sears, Roebuck and Co., Chicago, Ill.

Dear Sirs:—The Choir Gem Organ received, was put in the church and tested by three good players and a number of hearers and pronounced by all to be a fine instrument. We thank you for such a good organ. Will do all I can in the future for you.

Ever yours, MRS. MARY J. APPLEGATE.

Guaranteed Mouse Proof Pedals.

$225 Beckwith Empire Concert Grand Piano

Fitted With Muffler or Practice Pedal Only. Read the Full Description of This Piano on Page 725.

OUR FINEST PIANO and it must be seen and heard to be fully appreciated. Don't pay the exorbitant prices charged by others for a piano of the highest quality, but order a Beckwith on trial and cut out the middlemen's profit and expenses. Try it thirty days and if you are not satisfied **then** we don't ask you to pay us a cent.

HERE IS THE QUESTION **and it's an important one.** Is the difference between $225.00 and the price that others ask for a piano of equal grade worth saving? We say **it is,** If you could see, hear and try a Beckwith, you would most certainly agree that every claim we make is true. **Don't be misled** by piano agents or tuners and music teachers who sell pianos on commission without your knowing it. If they tell you that the Beckwith is not all we claim it to be, match up our reputation for truth with theirs. Remember that this business was not built up by misrepresentation, that we have never misrepresented our goods and **we don't propose to begin now.** If the Beckwith is not all we claim, why do these people use every argument in their power to prevent you from seeing and hearing one? **Simply because they know that if you did you would be convinced that our statements are true. THAT'S WHY.** Why don't they help you order one on trial and prove whether they are right or not?

SEEING IS BELIEVING. If you are in the market for a piano of any make at any price take a Beckwith into your home, and you will prove our claim that we save you fully one-half.

OUR ONE-YEAR TRIAL OFFER is most liberal and protects you. Read this offer on page 714.

SEND NO MONEY. This liberal offer is fully explained page 714. Read it carefully if you order in this way.

FREE. A handsome four-legged piano stool with adjustable seat, with brass claw and glass ball feet, a fine velour scarf with genuine silk fringe, complete instruction book and fifty free lessons on the instrument, as fully described on page 714.

Return Your Piano at Any Time During One Year, If Not Satisfactory

Digitized by Google

225 DETAILED DESCRIPTION AND FULL ILLUSTRATIONS OF THE BECKWITH EMPIRE CONCERT GRAND PIANO

GUARANTEED TWENTY-FIVE YEARS by the strongest guarantee ever written, which protects you against any defect in materials or workmanship during all this time. Read full explanation of the provisions of our guarantee and Agreement of Sale and how they protect you, as explained in detail on page 714. If the piano is not satisfactory at any time within a year, send it back and get all your money.

OD PIANO IS NOT MADE IN A DAY. It takes months to make a Beck- Each piece is carefully inspected before it is used. **For** nd **for all,** let it be understood that there is no cast off als or "seconds" in the Beckwith Piano, **nothing** but the of **everything** enters into its construction. All wood is ely and **absolutely** air seasoned for years and then **thor-** kiln **dried** before being used. Any statement to the con- is not only entirely misleading but **wholly false.** Just ber that our guarantee, **a binding document,** covers this point.

Figure 1.

THE SCALE is full 7⅓ octaves, overstrung, three strings to a tone in the treble and two in the bass. It is wonderfully even from one end of the keyboard to the other. A smooth scale means a well balanced, pure tone. The scale of a piano determines the length of the strings, just how they should lie across the sounding board, and where the strings must be struck to produce the best quality of tone, the sweet mellow tone, for which the Beckwith is famous. All of these points have been mathe- lly determined, and the consequence is a singing tone in ckwith that instantly attracts all who hear it.

ACK. This is particularly strong, and is constructed with seven heavy upright stanchions, solidly mortised e upper and lower stringers, making a foundation of un- strength, that will stand double the strain that is put when this piano is tuned to pitch. A glance at Figure 1 the strength of this part, hen you consider the h of metal plate used, as ed in Figure 2, you nderstand the immense h of this instrument and e with which it is made.

SOUNDING BOARD ne **very best quality of selected mountain** spruce. It is as resonant op of an old violin. It is none but the most care- r seasoned and thor- kiln dried wood and is rly strong, as a glance re 1 will show you, ou can plainly see the sounding board back of the posts. ok at the ribs on it. These are all glued to the sounding der strong pressure and the ends are dovetailed into the the piano and the sounding board braces as well. the most permanent method of construction. The board is crowned in a scientific manner and can never d produce a dead tone.

Figure 2.

THE METAL PLATE is a particularly strong feature of this instrument. Figure 2 illustrates the plate as it appears when bolted, with the sounding board, to the back, and strung with the piano strings. This plate extends from top to bottom of the piano in **one solid piece.** Please note the extension on the right hand side of the plate. This is an additional brace which adds further strength and is strictly a Beckwith feature. The plate is furnished in beautiful gold enamel.

re 3.
n block.
plate.
ushing in
plate.

THE PIN BLOCK in all Beckwith Pianos is built up of successive layers of rock maple, the grain of each layer running in a different direc- 1 **binds the pins** firmly and reduces the need of tuning imum. **In this** piano the pin block is entirely covered iece **full metal** plate. Where the pins go through the into **the pin** block they are bushed with a bushing of , **the toughest** possible wood. This is only one of the refinements found in the Beckwith. A reference to Figure 3 will explain, not only the construction of the Beckwith pin block, but will show you the metal plate where the tuning pins go through the metal plate and the maple bushing referred to.

THE CASE is up to date in every way, one of the most popular styles of pianos at the present time. The design is dignified, and while the piano is massive in appearance, there is no appearance of heaviness. Every part of the instrument bears its proper relation to the balance of the case and the consequence is a design that is most pleasing, one of the most popular styles ever offered. Others may successfully copy the Beckwith cases, but to copy the fine Beckwith tone is another matter. All round posts, pilasters and corners are veneered, the only correct method of construction. The entire case is veneered, inside and outside. We can furnish this piano, not only as illustrated on the opposite page but also as shown in Figure 5, with a perfectly plain case, without any sunken panels, without any carving whatever, without any ornamentation of any nature, at the same price. The top is one solid piece and the guarantee is emblazoned in gold and silver underneath it.

Figure 4.

THE ACTION AND KEYS. The Beckwith is famed for its responsive action. Every piece of felt is pure, guaranteed 100 per cent wool. The hammers are covered with genuine **imported** German felt of high grade. All parts are so perfectly adjusted that there is absolutely no lost motion. It requires the least possible effort to play. Every Beckwith Piano is regulated with a professional 3-ounce touch, and responds instantly. It is particularly fast in repetition and is all the artist and musician can desire. The keys are covered with genuine guaranteed elephant tusk ivory and ebony.

THE VENEERS are all carefully selected for a very beautiful figure. All Beckwith cases are veneered inside and outside. The first veneer is glued across the grain of the foundation wood and when it is dry, then the outer or fancy veneer is glued across the grain of the first veneer, and as this operation is followed on each side, you can see that there are five pieces of wood glued together. It is a guarantee that pianos so veneered will neither warp, crack nor split **under any natural conditions.** We guarantee this point in the Beckwith.

SIZE. 4 feet 10 inches high, 2 feet 4 inches wide, 5 feet 7 inches long. Shipping weight, about 1,070 pounds.

SPECIAL PIANO BENCH OFFER. We will give you a handsome bench to match this instrument with round legs, top veneered in genuine oak, walnut or mahogany, with a piano finish, a large music compartment under the seat for holding sheet music, for $6.00 extra, **omitting the stool.**

SAMPLES OF VENEERS. We are prepared to mail you samples showing the oak, mahogany and walnut veneers used, if desired by you. Mail us $1.00 and we will send them to you postpaid. Upon the return of the veneers we will immediately return your money and any postage you may have paid.

THIS PIANO IS MOUSE PROOF. No mice can enter the piano around the pedals. No mice can enter unless the instrument is left open at night, in which case they may get on the keyboard and from there it is an easy matter for them to enter the piano.

Figure 5.

OUR SEND NO MONEY OFFER fully protects you. If you are one of our customers, you will probably prefer to send cash with the order. If you prefer not to send the money, then turn to page 714 and read all about our Send No Money Offer and how to order a piano without sending any money in advance.

Fitted with Muffler or Practice Pedal Only. See Full Description on Page 727.

WE CHALLENGE THE WORLD on instruments of equal grade. Our one small margin of profit over the factory cost is the same that we accept on the sale of groceries or any other common article. We don't depend on the sale of pianos for a living. This is only one of the departments that make up this big institution. Our piano business is of such enormous size that the smallest kind of a margin makes it profitable to us, for **we sell more pianos in a day than most dealers sell in a month.**

DON'T BE MISLED by fine promises and high sounding arguments. Just remember our well earned reputation for square dealing. Remember that you can send any piano back in a year if it is not as represented. Remember that we don't ask you to buy a piano, we only ask permission to place one in your home on trial. If anybody tells you not to take advantage of our money saving prices, it is certain that such a person is in the piano business for **profit,** either as an agent, a dealer, or as a supposed friend, who receives a commission in case you buy the piano they recommend. Do you want to pay this commission? Do you want to pay the high prices the middleman is **compelled** to charge? Don't you want to cut out all the middleman's profits and expenses, all commission going to others? Don't you want to be your agent and save one-half or more?

SEND NO MONEY unless you prefer to. This liberal is fully explained on page 714. Re

Altogether, the ac- t the most critical musician will enjoy.

EAR TRIAL OFFER **is most liberal and fully protects you.** Read about on page 714.

MONEY. **This liberal offer is fully explained on page 714.** Read it carefully if you would order y.

AN'T PAY CASH **for a piano, write us for our special Time Payment Piano** n.

BLOCK **is built up of six layers of rock maple,** the grain iece running in a different direc- s binds the tuning pin firmly and ntee that the piano will stay in he longest possible time. Please 2 and note that the built-up pin covered with a part of the metal ich extends from the top to the f the piano. Where the tuning pin goes through the te into the pin block a bushing of rock maple is used, vents the tuning pin and the metal plate from touching.

Figure 2.

UNDING BOARD **is extremely sensitive and is of the same high grade as is used in the Concert Grand,** crowned in the same way, braced with number of sounding board ribs which are dovetailed ack and the sounding board braces, just as it is in our rised piano. The sounding board is as resonant as the old violin, and like the sounding board in our best will improve with use and age.

Figure 3.

THE KEYS. These are all covered with **genuine elephant tusk ivory and ebony,** all highly polished. The key shanks are made of thoroughly kiln dried straight grain wood, free from any imperfection, therefore they cannot warp or twist. Figure 3 illustrates five keys such as are used in the Beckwith.

THE HAMMERS. **We take justifiable pride in the hammers used in this piano, the Empire Concert Grand and the Colonial Art Pianos.** These are what are called 14-pound hammers, constructed of genuine imported German felt of high grade. The hammer head is made of two layers of felt, one the inner felt and the other the outside or striking felt, and as this felt is of the highest grade imported 100 per cent pure wool, it permits the most delicate voicing of the hammers, therefore the most perfect quality of tone. Further advantage in using the German imported all wool felt is that, although it does cost more, the results are better, for the hammer lasts longer and produces a better quality of tone. No heavier hammer is found in an upright piano. Fourteen pounds is the limit of safety. A heavier hammer would produce a coarse, heavy tone and a lighter hammer would produce a thinner tone A 14-pound hammer will give a tone of great beauty, rich, round, mellow and sweet. Please note Figure 4, which will give you an idea of the appearance of the hammer and special attention is called to the brass flange at the end of the hammer butt, which is used in our three best pianos. This is a guarantee that the hammer will never become loose and wabble from side to side, an undesirable feature of the ordinary cheap piano.

Figure 4.

Figure 5.

THE METAL PLATE. **In this instrument we use the same grade of metal plate** and of the same strong construction as is used in the Empire Concert Grand. It is one solid piece from top to bottom and has the same extension on the right hand side, thoroughly bracing it. This plate, together with the strong back shown in Figure 1, makes a particularly strong foundation. No piano is built that can show a more solid construction. Every Beckwith plate is tested before its being used in a piano and no plate with any flaw whatever will be accepted. In thickness, weight and design the Beckwith plate is perfect, which is simply further evidence of the high quality of the Beckwith throughout.

THIS PIANO IS MOUSE PROOF **around the pedals. We guarantee that no mice can enter the instrument at this point.** This is a guarantee that if ordinary care is used in closing the fall board at night the instrument will never be damaged by the ravages of mice or rats.

THE VENEERS **are all selected and are of high grade.** None but genuine quarter sawed oak, burled walnut and richly figured mahogany veneers are used. The veneers are crossbanded inside and outside, which is an absolute guarantee that the case cannot warp, crack or split under any natural conditions.

SAMPLES OF VENEERS. **We are prepared to send you samples showing the oak, mahogany and walnut veneers used, if desired by you.** Mail us $1.00 and we will send them to you postpaid. Upon the return of the veneers we will immediately return your money and postage.

The Western Union Telegraph Company, Manager's Office, Greensboro, Ala.

Messrs. Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—The Beckwith arrived and was sent up to my house yesterday. When I went home last night I was really amazed to find such a handsome, fine toned instrument. My son was playing when I arrived and I must admit the tone is simply perfect. It far exceeded my expectations. I expected to get full value for my money, but did not expect so fine an instrument. Some of my friends say it is a better piano than has been sold here for $400.00 and $500.00.

I wish to extend to the manager of your Piano Department my sincere thanks for selecting me such a nice piano. I put it up to him as he asked me to and he most certainly fixed me right.

With best wishes, I am,

Truly,

Guaranteed Mouse Proof Pedals

$189 Beckwith Colonial Art Piano

Fitted With Muffler or Practice Pedal Only. Read Full Description on Page 729.

A HIGH GRADE PIANO in a dainty case. In offering this Colonial style, our up to date Special Concert Grand and Empire Concert Grand styles, we offer three high grade pianos in three distinct styles, and among these will be found one to suit every taste. Especially is this true in view of the fact that we also furnish these Colonial Art and Empire Concert Grand Pianos in a perfectly plain case, without any ornamentation whatever, without any inlaid work, a plain piano of exquisite design and superb finish, with a tone that practically defies description.

WHY SHOULD YOU PAY $500.00 for a piano, when we can furnish you this one for $189.00? In buying a Beckwith you cut out all the middleman's profits and expenses and it is well worth saving. It is more than you realize.

WHAT DOES THE AGENT OFFER YOU in his piano that is not found in the Beckwith? Nothing. What does the extra money buy? Nothing. What does all this extra money represent, that the agent must ask, that is not found in the Beckwith? It simply represents the middleman's profits and expenses, the cost of doing business in the old way. The difference between our price and the price asked by others for an instrument of like grade (one-half at LEAST) is the amount you save. We are willing that you should compare this piano, the Special Concert Grand, or the Empire Concert Grand, with **any** instrument sold by **anyone** for **as high as $500.00**, regardless of name, make or **REPUTATION.**

OUR ONE-YEAR TRIAL OFFER is most liberal and protects you. Read this offer on page 714.

FREE. A handsome solid wood, four-legged piano stool with adjustable seat, with brass claws and glass balls for feet, a fine velour scarf with genuine silk fringe, complete instruction book and fifty free lessons on the instrument, as fully described on page 714.

COLONIAL ART PIANO

FER THIS INSTRUMENT AS A MOST BEAUTIFUL ART PIANO IN AN ARTISTIC AND ATTRACTIVE ART CASE IN THE COLONIAL STYLE, SOLD UNDER OUR MODERN PRICE REDUCING METHODS OF MERCHANDISING DIRECT FROM Y TO CUSTOMER AT ACTUAL FACTORY COST, WITH BUT OUR ONE SMALL MARGIN OF PROFIT ADDED.

GUARANTEED TWENTY-FIVE YEARS by the strongest guarantee ever written, which protects you against any defect in material or workmanship during all this time. If the piano is not satisfactory at any time within a year, send it back and get all your money. See page 714.

UARANTEE THIS PIANO to be the equal of instruments sold for as high as $400.00 to 0 and we can prove it. The best proof we can offer is the itself. We will ship you one on trial and if you are not utely satisfied, after a test, that it is all we claim and more, it back and your experiment will not cost you a dollar.

Figure 1.

THE CASE is extremely dainty in appearance, dignified and rich. A glance at the illustration will give you a clear idea of its beauty. The inlaid design is very handsome and is made up of a line of white maple, then a strip of light mahogany, then diamond shaped pieces made of white maple, black walnut and light mahogany, then another strip of light mahogany, and last a strip of white maple. Inside the entire design a narrow strip of rich ebony is inlaid as shown in Figure 1. The effect is beautiful, and as only high grade, transparent var- s used on the Beckwith cases, all the natural colors of the show through the varnish. Please understand that this is inlaid. We guarantee it. It is not imitation. The top solid piece and under it our guarantee in gold and silver e found.

ER. It is furnished in beautiful figured San Domingo mahogany only. Art pianos with inlaid designs are only hed in mahogany and in no other wood. We are prepared d you a sample of the veneer in this piano with the inlaid n, so that you can actually see how rich and beautiful it is. n desire to see a sample, send us $1.00 as a matter of record, hen you send back the r to us we will return mount and postage.

ART FINISH. We can furnish piano in a dull rubbed nish or highly polished, as you wish. Please which finish you desire. price is the same one or the other.

PIN BLOCK. The high- tainment in pin block uction was reached in pecial Concert Grand Empire Concert Grand s and we use the same cal pin block in this ment.

SCALE is full 7⅓ octaves, over- three strings to a tone treble and two in the It is as clear as running from one end of the rd to the other. It has me pure tone that has the Beckwith famous ntry over. The tone is of marvelous beauty and instantly s to the artist and musician.

OUNDING BOARD is built of the same materials, in the same manner, as the one fitted in o best pianos. It is ribbed the same and crowned the same, e ribs are dovetailed into the back of the sounding board in the approved manner. It is a sounding board of great ice.

METAL PLATE is very strong and perfectly cast of the same general construction as that used Special Concert Grand and Empire Concert Grand. This fitted with the extension on the right hand side which acts ther brace. This is the strongest metal plate made.

EYS are of clear straight grain wood, thoroughly seasoned and kiln dried. As the wood is free from im- ons or wild grain, it is impossible for them to warp or twist. These are covered with genuine elephant tusk ivory and ebony of high grade highly polished.

THE HAMMERS are the same as are used in the pianos listed at $195.00 and $225.00, a 14-pound hammer, covered with genuine imported German felt of high quality.

The Colonial Art Piano fitted with a perfectly plain case. No extra charge.

BRASS HARDWARE. It is equipped with brass pedals and brass continuous hinges. No matter whether the piano is open or closed, this burnished brass gives a mahogany and gold effect which is very attractive.

THE ACTION is of high grade and repeats with wonderful rapidity, and is so delicately adjusted that it is no effort whatever to play upon it. It is constructed of the finest materials, genuine all wool felt, oil tempered springs, etc. Every moving part is bushed with felt, so that there is no possibility of any rattle and the hammers are fitted with a brass flange.

SPECIAL OFFER

THIS HANDSOME COLONIAL BENCH, with box under the seat for holding the music, is furnished for $6.00 extra, omitting the stool, thus making a total for the piano, the bench, scarf and instruction book of only $195.00.

Size: 21 inches high. Seat, 14x37 inches.

SPECIAL OFFER. For $6.00 extra, a total of $195.00, we will omit the stool and furnish a Colonial piano bench with this piano, finished exactly as the piano is finished, either highly polished or with the art or dull finish. This bench is of the most approved pattern. It is of the standard height of piano benches. The ordinary piano stool is out of place in connection with the general design of an art piano. This bench is exceedingly well made and very strong. The top is veneered in genuine mahogany and it is all finished in the same color as the piano. It is a perfect match. The seat lifts up and discloses a large receptacle for holding sheet music. By using this bench the ordinary music cabinet is not necessary. Unless you have an exceptionally large library this piano bench will hold all of your music. It is a very handsome addition to any parlor and this art piano, together with the bench, makes one of the most attractive combinations ever offered.

OUR ONE-YEAR TRIAL OFFER is most liberal and fully protects you. Read about this offer on page 714.

BY SPECIAL ARRANGEMENT with the factory we offer you this instrument either with a beautiful inlaid design or absolutely plain, as shown in the above illustration. There will be no extra cost for the instrument in plain panels, as we offer it with or without any inlay at the same price, $189.00.

THE MUFFLER ATTACHMENT. We do not furnish the mandolin attachment in this piano. It is furnished with a muffler attachment or practice pedal only.

THE SIZE. 4 feet 10 inches high, 2 feet 3½ inches wide, 5 feet 4 inches long. It weighs, boxed for shipment, about 900 pounds.

SEND NO MONEY. This liberal offer is fully explained on page 714. Read it carefully if you would order in this way.

MOUSE PROOF. Fitted with an all metal pedal action, this instrument is mouse proof and mice cannot enter unless the piano is left open at night.

IF YOU CAN'T PAY CASH for a piano, write us for our special Time Payment Piano Proposition.

READ WHAT A PRACTICAL PIANO TUNER SAYS.

Sears, Roebuck and Co., Chicago, Ill. Hickory, N. C.

Gentlemen:—In my travels I have tuned a number of Beckwith Pianos and find that they are easily tuned and stay in tune well. I am surprised that you can furnish such an excellent piano at such a remarkably low price. I feel competent to judge a piano from my past experience as a practical piano tuner of fifty-three years. I shall take pleasure in advising people on my travels who want a good fine piano, as good as they can possibly desire, and at greater saving than anyone else can offer, to order a Beckwith. This testimonial is entirely unsolicited on your part, but is a sincere expression of my honest opinion as to the Beckwith.

Very truly yours, THEO. A. SALVO,
Practical Piano and Organ Tuner and Repairer, formerly of Chickerings.

In case you should write to Mr. Salvo, please enclose a 2-cent stamp for reply.

Guaranteed Mouse Proof Pedals.

$165 Beckwith Palace Grand Piano

Fitted With Either the Mandolin Attachment or Practice Pedal

A FINE PIANO, the equal of those sold by others for as high as $325.00 to $350.00, and we can prove it.

THE PIN BLOCK is built up of five layers of rock maple, making it exceedingly substantial, and guaranteeing that it will hold its tone and reduce the need of tuning to the minimum.

THE ACTION is very sensitively adjusted and repeats beautifully. It is made of the finest materials, guaranteed extra quality felt; all bearings bushed to prevent rattling. The keys are covered with genuine elephant tusk ivory and ebony.

THE SCALE is full 7⅓ octaves, overstrung, three-string unison in treble and two-string unison in the bass. All strings are of the finest quality imported Poehlmann wire. The bass strings are overwound on a steel core.

THE TONE is full, rich and sweet, equal in character and quality to the tone found in instruments sold at double our price.

THE CASE is particularly well balanced in all its proportions. The carvings are hand executed. The music desk automatically swings forward when the fall board is opened. The case is double veneered inside and outside, which is a positive guarantee that it cannot warp, crack or split under any natural conditions.

THE VENEERS. Furnished in beautifully figured mahogany, burled walnut or quarter sawed oak veneer. Be sure to mention veneer desired.

SIZE. 4 feet 9 inches high, 2 feet 3 inches wide, 5 feet inches long. Weight, boxed for shipment, about pounds.

FREE. This handsome stool, a velour scarf, instruction b and fifty free lessons, as explained on page 714.

GUARANTEED FOR TWENTY-FIVE YEARS by the strongest Bond of Indemnity ever given on any piano, as shown on page 714.

OUR ONE-YEAR TRIAL OFFER is most liberal and fully protects you. Read about this offer on page 714.

A PIANO FOR $87.00

L EXPLANATION OF HOW A PIANO CAN BE OFFERED AT THIS LOW PRICE

AN OFFER a piano for as low as $87.00 and guarantee that such an instrument is the equal of those sold by dealers for as high as We have succeeded in securing a piano that we can sell at this price, which is less ever been attempted on a piano by anyone else, and thus again we have outdistanced m. This piano is offered as a matter of competition to meet low prices charged by ut we do not guarantee it as we do our Beckwith line. It is not a Beckwith, but succeeded in securing a piano that we can offer at $87.00 and guarantee for five distinct understanding that if it is not all we claim it to be, if not equal to pianos sold for as high as $400.00 to $500.00 and over, you can send it back and get your money at any time within one year after purchase. Here is an offer you cannot afford to overlook.

WE OFFER YOU BETTER VALUES than you can possibly secure through any other source. We offer you for about what others would charge for a piano like this $87.00 instrument one of the highest quality, and in justice to yourself, if you are thinking of buying a musical instrument, you ought to read all about the beautiful Colonial Art, the Special Concert Grand and the Empire Concert Grand Pianos which we are perfectly willing to send out with the full understanding that if you don't find any one of them the equal of other pianos selling for as high as $400.00 to $500.00 and even over, you are to send it back and your experiment won't cost you a cent.

PLEASE BEAR IN MIND that every price on every piano on every page in this department represents better value than you can possibly secure from any other source at anywhere near our price. Remember, if you will, that when we ask you to consider the purchase of either one of our best pianos, we are not asking for more profit. It is true we are asking you to invest more money, but our margin of profit is practically the same on all pianos. We are asking you to secure for yourself all the benefits to the customer from our immense purchasing power, all the benefits from our knowledge of the business, to secure to yourself the greater value, the greater satisfaction in the years to come, the greater pride you will be sure to feel in our better pianos. We can offer you a piano with a Dowel Action, 7⅓ octaves, with a stained case that is a very acceptable appearing instrument, one that we are willing to guarantee for five years, but which under no circumstances could we guarantee for twenty-five years, and we will give you this instrument for the remarkably low price of $87.00. Please bear in mind that it is not a Beckwith Piano. But we can, nevertheless, offer you a piano at $87.00, a price heretofore unapproached by any other dealer, for the same kind of piano ordinarily sold for $200.00 to $225.00. This is proof that we undersell the world. Weight, boxed for shipment, about 750 pounds.

YOU BUY A PIANO, or when you agree to buy a piano, you are selecting what must, by the very nature of the purchase, be a friend. When you select your friends you use great care and discrimination. When a piano you are selecting a lifelong friend, and, therefore, why should it not be just ary and just as essential to use care and discrimination in selecting it? We outthe world on low prices. We challenge any music dealer or agent, or anyone else pianos, to give you as much for your money as we can. $87.00 is but a small and if that is all you care to pay, we can supply you with a piano at $87.00. But ar in mind that positively it is not a Beckwith. It is an $87.00 piano. We are guarantee it for five years, but it is not made according to the Beckwith plans, ons or methods, and it does not bear the Beckwith name. It is a competition ured solely for the purpose of meeting competition, but it is wonderful value at But why should you consider the purchase of a piano for $87.00, the kind others as high as $200.00 to $225.00, when we can offer you in our Colonial Art, Special Grand or Empire Concert Grand an instrument at a big money saving price, that we you will find is the equal in every essential point and feature of pianos sold in your ar as high as $400.00 to $500.00 and over? We are prepared to give you a piano of uality and lovely tone, that will be a pleasure, a source of joy and pride to you; one can unqualifiedly guarantee for twenty-five years by the strongest, most binding ever written, as shown on page 714, which we are willing to send to you with the

46H1 **Home Favorite Parlor Piano,** guaranteed for five years, with stool and instruction book, but without a scarf or roof pedals. Price..... **$87.00**

OXFORD TAPERING ARM DISC TALKING MACHIN

Not Mere "Talking Machines" But Musical Instruments of the Highest O

An Oxford Talking Machine is a musical instrument, and better than any other musical instrument because it combines the a whole band or orchestra, if you choose, besides rendering vocal selections, solos or choruses with such remarkable fidelity only by an effort do we realize that the singers are not actually present. It brings to your own home the same musicians, the great singers, the same entertainers, the same bands and orchestras that delight great audiences in our most famous theater

Oxford Tapering Arm Disc Talking Machine

$9.45

Type L. E.

This Tapering Arm Disc Talking Machine will surprise you with its wonderful naturalness of tone. The unusual mellowness and real musical quality, the marvelous volume, the full rich tones, and the absolute fidelity to the original music is the combined result of the tapering arm, the acoustically correct horn, the perfect reproducer, and the uniform motor speed. It is a machine that is made right in every detail of workmanship, the best materials throughout; perfect in action, strong, durable and simple. A machine that will give no trouble and will afford a never failing source of pleasure for many years. This machine is made with genuine oak cabinet, 10⅜ inches square at the base, ornamental flower shaped metal horn, 14 inches in diameter; 8-inch turntable, and single spring noiseless Oxford motor.

No. 20H5071 Type L. E. Oxford Disc Talking Machine. Shipping weight, 31 pounds. Price..... **$9.45**

Oxford Tapering Arm Disc Talking Machine

$11.60

Type O. D.

The Type O. D. Oxford Tapering Arm Disc Talking Machine is an ideal musical instrument for home use, a perpetual entertainer and ever ready source of pleasure and amusement. Machines of this style, quality and size have heretofore been sold at $20.00 to $25.00 by dealers everywhere. Think of the unusual value we give you in pricing this machine, this new up to date Type O. D. Oxford tapering arm machine, exactly as illustrated, at only $11.60, less than half the ordinary price for machines of this quality. It is a little better than our Type L. E., not quite so large and fine as the Type J. F., and a wonderful bargain at our special price. If $11.60 fits your pocketbook, you will make no mistake in ordering this machine. This machine is made with solid oak cabinet 11⅛ inches square at the base, equipped with large ornamental flower shape horn 14 inches in di 8-inch turntable, and single spring noiseless Oxford motor.

No. 20H5073 Type O. D. Oxford Disc Talking Machine. Shipping weight, 35 pounds. Price.....

Oxford Tapering Arm Disc Talking Machine

$14.95

Type J. F.

The Type J. F. Oxford Tapering Arm Disc Talking Machine is almost as good as the Type R. W. which we sell at $18.85, but the horn is a little shorter and it requires winding a little oftener than the Type R. W., but so far as the reproduction is concerned, it is hard to see any difference. Of course, it is not quite so large and not quite so handsome in appearance, but it reproduces the record just as perfectly as the larger machine, just as good as any machine on the market, regardless of price, and it is exactly the same style, grade and quality of talking machine that retail dealers ordinarily sell at $30.00. This machine is put up with solid quarter sawed oak cabinet, measuring 13 inches square at the base, large ornamental flower shape metal horn 18 inches in diameter, 10-inch turntable, and single spring noiseless Oxford motor.

No. 20H5075 Type J. F. Oxford Disc Talking Machine. Shipping weight, 38 pounds. Price..... **$14.95**

Oxford Tapering Arm Disc Ta ing Machine

Oxford Hornless Talking Machine, Reduced to $10.95

This new talking machine marks the culmination of inventive genius in the nce of sound reproduction. It is indeed the one ideal and perfect musical rument, the last word in talking machines, the final result of costly experimental k extending over years, the crowning triumph of mechanical in the reproduction of musical sound.

The sound amplifying compartment, which replaces the well known rnal horn of other machines, is contained wholly within the cabinet, the sound waves are conducted from the reproducer to this concealed lifying compartment or sound chamber by the tapering tone arm, h affords a perfectly smooth and unobstructed passage for the sound es. The wonderfully sensitive sound analyzing reproducer, in combina- with the scientifically calculated taper of the tone arm, and the stically perfect sound amplifying compartment, results in the most velously true to life reproduction of the human voice and the most per- reproduction of all musical instruments.

f you have objected to the talking machine because of the large horn h makes it so conspicuous and takes up so much room, you will like neat appearance and small size of this superb hornless instrument. The tifully finished oak cabinet measures only 13 inches square at the base, stands only 6¾ inches high, taking up so little room that it is almost ticeable in the ordinary home. You will be pleased with its appear- , but you will be even more pleased when you hear it, as the volume und which pours from the grilled opening in the front of the cabinet mply wonderful, and it is not alone in volume that it excels, for in musical quality, mellowness, richness of tone and absolute fidelity to original music, this new hornless talking machine is not surpassed he most expensive instruments yet constructed.

The Oxford Hornless Talking Machine is made with finely finished ter sawed oak cabinet, measuring 13 inches square at the base and inches high. The tapering tone arm is nickel plated, other metal s finished in black enamel, and the turntable is 10 inches in diam- It is fitted with the highest grade Oxford double spring noiseless motor, running three records with one winding, and can be wound while running, the latest start, stop and speed regulating devices and highest grade Oxford mica diaphragm reproducer.

No. 20H5090 Oxford Hornless Talking Machine, complete as illustrated. Shipping weight, 30 pounds.
Reduced price..... **$10.95**

e A. W. With ic Master Oak n, Reduced to $26.75

Oxford Tapering Arm Disc Talking Machine $26.75
Type A. W. With Music Master Oak Horn, Reduced to

This new Oxford machine is manufactured especially for us under the original Berliner patent by one of the largest, best known and most successful talking machine manufacturers in the world. It is made from our own design, and is sold with the positive guarantee that it is in every way equal to machines sold by the regular retail dealers at $50.00 to $60.00. We absolutely guarantee this machine to equal talking machines sold by others at double our price, not only in mechanical perfection, beauty of design and finish, but in the most important quality of all, the ability to reproduce both vocal and instrumental music with absolute fidelity to the original.

The beautifully proportioned and scientifically designed Music Master wood horn contributes in no small measure to the unusually perfect musical reproduction of this machine. It is a well known fact that wood surpasses all other materials for the construction of musical instruments, and it is universally conceded among experts that the Music Master horn is of better design and better construction; in fact, is in a class by itself and superior to all other wood horns on the market.

This machine is made with dark golden oak cabinet, measuring 14¼ inches square at the base, beautiful Music Master horn in dark golden oak to match the cabinet, 10-inch turntable, and double spring noiseless Oxford motor. Shipping weight, 63 pounds.

No. 20H5080 Type A. W. Oxford Disc Talking Machine, complete with Music Master Oak Horn. Price..... **$26.75**

THE MUSIC MASTER HORN stands for all that is best in tone and reproduction. The supremacy of these horns, like the violins of old makers, defies explanation and cannot be imitated. They are built on scientific principles from the finest selected wood, giving a resonant tone to the reproduction and rendering all the tones in any scale with perfect fidelity to the original.

Type B. W. With Music Master Mahogany Horn, Reduced to $34.60

ford Tapering Arm Disc Talking Machine $34.60
e B. W. With Music Master Mahogany Horn, Reduced to

he type B. W. Oxford Tapering Arm Disc Talking Machine is one of the most tifully finished machines on the market, and is an ornament to any home. It is ed throughout in mahogany, the cabinet itself being constructed of birch and ed in exact imitation of the very finest mahogany. The magnificent Music Master is constructed throughout from genuine mahogany, specially selected for fine effects and beautifully finished. There is no talking machine on the market at price that surpasses this machine, either in appearance or in musical quality. It solute perfection in talking machine construction, and if it is compared carefully, t for point, and item for item, with other machines, it will be found equal in ty and style, in mechanical perfection and design, to machines ordinarily sold at $60.00 to $75.00. Our special price of $34.60 is made possible only by the fact that handle this machine exclusively; there is only our one small profit between the ufacturer and the customer, and the enormous quantities in which we are able to hase enables the manufacturer to reduce the cost to us to a figure impossible r the usual system of marketing talking machines through the jobber and the dealer.

he cabinet of this machine measures 16½ inches square at the base and the solid gany Music Master horn is 21½ inches in diameter. The turntable is 11½ inches ameter and the machine is equipped with an extra powerful triple spring noise- Oxford motor. Shipping weight, 88 pounds.

10 INCH OXFORD DISC RECORDS

30 CENTS EACH — $3.50 PER DOZEN

WE DO NOT SUBSTITUTE

We have so perfected our system of stock keeping that we now have an absolute rule against substitution in our Talking Machine Department. You can send your record orders to us with perfect confidence that you will receive the exact selections you order. No other dealer, to our knowledge, is able to fill all orders for talking machine records without substitution, but our immense stock and our perfect methods of stock keeping enable us to fill every order, regardless of size, without the substitution of one single record. We send you exactly what you order.

ONE SELECTION ON EACH DISC

The Oxford Disc Records are all "single face" one selection only on each disc, so when you order Oxford records, you make your own selection of all titles. When you buy a dozen "double" records where at two and one-half times our price per dozen have the privilege of selecting only one-half of the titles the manufacturer decides for you what the other six will be.

Oxford Disc Records are made for us by one of the oldest and best known manufacturers of records in the world. They are absolutely guaranteed to be equal in material, durability and appearance to any record on the market, regardless of price. You will be surprised at their marvelous freedom from scratch, and their wearing quality.

THEY FIT ANY MACHINE OF STANDARD MAKE

Oxford Disc Records fit any Oxford Disc Talking Machine, any Harvard Disc Talking Machine, any **Victor** Talking Machine, any **Columbia** Disc Graphophone, or any other style or make of disc talking machine using records with a hole ¼ inch in diameter.

They do not fit special machines like the Aretino, Harmony, Standard, Bur and any other machine made with center post of large size or unusual shape, these machines require a large or peculiar shaped hole in the record. Look at the illustration of the Oxford Records on this page and you can easily decide whether they will fit your machine.

VOCALISTS WHO MAKE OXFORD RECORDS

The following list of famous artists, every one of them well known to music lovers, is in itself a guarantee of the quality that is maintained in the Oxford Records. To assist you in selecting records, we print, after each vocal selection, initials as shown below, indicating the singer.

George Alexander,	Baritone.	A.

No. 20H5.120 Ten-Inch Oxford Disc Records.
Price, each.....$0.30
Price, per dozen.....3.50
Shipping weight, one record, 23 ounces; one dozen records, 11½ pounds. We do not ship Disc Records by mail, as they are almost certain to be broken. Small lots should go by express, large lots by express or freight.

OXFORD INDESTRUCTIBLE CYLINDER RECOR

They Do Not Break.
They Do Not Wear Out.
The Tone Is Full, Pure, Clear and Brilliant.

The Oxford Indestructible Records are standard size cylinder records, representing the very latest achievement in the art of record making. In volume of sound, clearness, accuracy of reproduction, and musical quality, they are unsurpassed by any cylinder record made, and, moreover, they are unbreakable. These remarkable records may be dropped on the floor, thrown across the room, or handled as roughly as you please, without suffering the slightest injury. They do not wear out in use, and even after they have been played thousands of times the reproduction is just as full, clear and perfect as it was the first time they were put on the machine.

Two-Minute Records		*Four-Minute Rec*	
23c	**$2.75**	**30c**	**$3**
EACH	A DOZEN	EACH	A DO

THE TWO-MINUTE RECORDS PLAY FROM 2 TO 2½ MINUTES
THE FOUR-MINUTE RECORDS PLAY FROM 4 TO 5 MINUTES

The Two-Minute and Four-Minute Records are exactly the same size, but the Records play twice as long as the Two-Minute. On the Four-Minute Records one is given entire, from four to five minutes of solid entertainment.

The Four-Minute Records are made with 200 recording lines to the inch instead of 100, thus doubling the playing length, without changing the size of the record itself.

VOCALISTS WHO MAKE OUR INDESTRUCTIBLE RE

After each vocal selection we print initials, as shown in this list, to indicate the name of the singer.

Alexander, Geo.	Baritone.	A.
Anderson, Archie	Baritone.	A. A.

ORDER BY NUMBER. Always state selection numbers when ordering records. You do not need to write out the titles unless you wish to, but be sure to give the number as it appears before each title in our list.

LIST OF FOUR-MINUTE RECORDS — No. 20H5106 — 30c each, $3.50 per

Shipping weight, one record by mail, 4 ounces; one dozen by freight or express, 4 pounds. Do not order Two-Minute Records from this list, if you do we cannot fill your order. These Four-Minute Records fit any Columbia Cylinder Graphophone, any Edison Phonograph or any cylinder talking machine that Sears, Roebuck and Co. have ever sold, provided the machine is equipped with a special Four-Minute Attachment. Most of the Edison machines sold in recent years are equipped with the Four-Minute Attachment. If your machine is not provided with this attachment we can supply one for Columbia machines, see No. 20H5380, page 738.

OXFORD INDESTRUCTIBLE CYLINDER RECO

They Do Not Break. They Do Not Wear Out. The Tone Is Full, Pure, Clear and Brilliant.

The Oxford Indestructible Records are standard size cylinder records, representing the very latest achievement in the art of record making. In volume of sound, clearness, accuracy of reproduction, and musical quality, they are unsurpassed by any cylinder record made, and, moreover, they are unbreakable. These remarkable records may be dropped on the floor, thrown across the room, or handled as roughly as you please, without suffering the slightest injury. They do not wear out in use, and even after they have been played thousands of times the reproduction is just as full, clear and perfect as it was the first time they were put on the machine.

Two-Minute Records		*Four-Minute Re*	
23c	**$2.75**	**30c**	**$3**
EACH	A DOZEN	EACH	A D

THE TWO-MINUTE RECORDS PLAY FROM 2 TO 2½ MINUTES
THE FOUR-MINUTE RECORDS PLAY FROM 4 TO 5 MINUTES

The Two-Minute and Four-Minute Records are exactly the same size, but the Records play twice as long as the Two-Minute. On the Four-Minute Records is given entire, from four to five minutes of solid entertainment.

The Four-Minute Records are made with 200 recording lines to the inch ins thus doubling the playing length, without changing the size of the record itself.

VOCALISTS WHO MAKE OUR INDESTRUCTIBLE R

After each vocal selection we print initials, as shown in this list, to indicate the name of the singer.

25 Wax Cylinder Records, $2.95

Our list of Indestructible Records is now so complete that we have decided to discontinue listing the Oxford Wax Cylinder Records entirely, but we still have on hand several thousand of these records, which we will close out regardless of cost. Understand, these records are all brand new and in perfect condition. They are the exact same records which we have been selling during the past year, but we have only a few thousand left, not enough to justify us in again printing the complete list of titles in our catalog, and hence we offer them in special collections of twenty-five at only $2.95 (less than 12 cents per record). We would gladly print a list of these records, but there are so many titles, and the quantities vary so greatly (of some titles there are hundreds, of others only two or three) that if we were to allow each purchaser to make his own selection of titles it would be only a few days until our assortment would be so broken that we could not fill orders complete. We must, therefore, ask you to take these records just as they come, our selection of subjects, relying upon us to give you a good assortment, and you will not be disappointed. These records cannot be played on Type F. M. machine, but can be played on any other cylinder machine we have ever sold, or any Edison machine.

No. 20H5129 Twenty-five Oxford Wax Cylinder Records, all different. Shipping weight, 18 pounds. Price.....$2.95

Oxford Tone Arm Cylinder Talking Machine.

PLAYS TWO-MINUTE RECORDS ONLY.

No. 20H5002 This is an excellently made, finely finished machine with flexible tone arm, spring contact reproducer and large flower horn. It plays either "wax" records or Indestructible records, but as it cannot be fitted with the Four-Minute attachment, it is limited to Two-Minute Records.

It is made with solid oak cabinet, measuring 7¼x10¼ inches at the base, handsome bent oak cover to protect the mechanism from dust or injury, handsome flower horn, 16½ inches in diameter, powerful noiseless smooth running motor which can be wound while running, and flexible tone arm. Shipping wt., 37 pounds.

Oxford Tone Arm Cylinder Talking Machine.

For Indestructible Records Only.
Plays Either Two-Minute or Four-Minute Records.

No. 20H5008 This high class cylinder talking machine is made with special equipment so that it plays either Two-Minute or Four-Minute Indestructible Records. The special extra tension, sapphire point reproducer results in a volume of sound, accuracy of reproduction and musical quality that will surprise anyone accustomed to cylinder machines of the older styles.

This machine is made with solid quarter sawed oak cabinet, measuring 7½x12¾ inches at the base, and furnished with handsome bent oak cover, which affords protection to the machine and forms a convenient carrying case. The flower shape horn is 19 inches in diameter and the extra powerful motor runs five two-minute or three four-minute records with one winding; may be rewound while playing, perfectly noiseless in operation, smooth running and uniform in speed. Shipping wt. 40 lbs. Price **$18.75**

Haile's Modulator.

For Disc Talking Machines. Softens and Purifies the Tone. Eliminates the Scratch.

No. 20H5376 Haile's Modulator is an attachment for the disc talking machines, by means of which soft tones are produced with any ordinary standard or loud tone needle. The delightfully soft effect produced by this Modulator makes it especially suited to use in the home where the ordinary full loud tone is often objectionable. Moreover, it eliminates all scratching and rasping sounds, and every note is clear, pure and wonderfully natural. **Besides softening and improving the reproduction,** the use of this Modulator also **adds greatly to the life of the record,** as the needle is supported between elastic surfaces which permit it to "give" slightly with every curve in the record groove, thus lessening the shock to the delicate walls of the groove, and greatly decreasing wear. **Haile's Modulator may be attached to any disc talking machine** and is put on or taken off just as easily as a needle is inserted or removed. By slightly turning the screw in the side of the Modulator, it may be regulated or adjusted to give any **volume of tone desired,** from the normal loud tone of the machine to the very softest tone so pleasant and agreeable in small rooms. Shipping weight, 2 ounces. Price.....38c

Haile's Modulator, Exact Size.

1,000 CLEARTONE NEEDLES.

Special Collection, 48 Cents.

No. 20H5362 This special collection consists of 1,000 Cleartone needles of five different kinds, suitable for use with any Disc Talking Machine. Each kind is packed in a separate tin box, as illustrated, and the complete collection consists of:

200 **Soft Cleartone Needles,** noted for their soft, sweet, natural tone and absence of scratch; particularly suitable for use in the home.

200 **Medium Cleartone Needles,** distinguished for their full, rich, mellow tone of medium volume.

200 **Opera Cleartone Needles,** similar to the Medium Tone, but longer and somewhat louder; especially suited to operatic selections.

200 **Loud Cleartone Needles,** shorter and thicker than the Opera Needles, and therefore louder.

200 **Extra Loud Cleartone Needles,** short and thick, especially suitable for open air concerts, large rooms and for dance music.

Complete collection, five boxes, as illustrated. Shipping weight, 9 ounces. Price.....48c

EXTRA TENSION REPRO

For Indestructible Reco

No. 20H5385 This reproducer is from the ordinary reproducer made with special extra tension sapphire point, by virtue of which it results than the ordinary reproducer used with Indestructible Records.

It must not be inferred that reproducer is absolutely necessary Indestructible Records, because splendid results with the ordinary just as good and usually better records, but with this special becomes possible to bring out that is in the record.

This reproducer fits any Columbia (except the old style types G, H and any cylinder machine that ever sold (except the Harvard Jr., and type G, H.) It does Edison machines. Price.....

5 MODEL I CONLEY CAMERA $1.78

8 FOR THE CAMERA ALONE, $3.23 FOR THE CAMERA AND COMPLETE OUTFIT.

SPECIFICATIONS.

Size of Picture—4x5 inches.
Lens—Genuine meniscus achromatic, universal focus, speed F:16.
Shutter—Conley time and instantaneous.
View Finders—Two, ground glass type.
Tripod Sockets—Two, adapting camera to either horizontal or vertical use.
Covering—Seal grain keratol.
Metal Parts—Steel, oxidized finish.
Plate Holder—Conley flexible valve.
Capacity—Three double plate holders (six plates).
Dimensions—5½ inches wide, 7⅛ inches high, 8⅛ inches long.
Weight—35 ounces.

YOU WILL BE SURPRISED to see how easy it is to take pictures with the Model I Conley Camera, and you will be equally surprised to see what good pictures it will take. Cameras of this size and style of construction are by far the most popular cameras made for amateur use, and the enormous number of these cameras that we sell every year has enabled us to reduce the manufacturing cost so that we can sell this camera at less than one-half the price ordinarily charged for cameras of this style and quality.

EASY TO OPERATE. The Model I Conley Camera is one of the simplest and easiest cameras in the world to use; no previous experience is necessary; everything is simple and easy to understand, and the big book of instructions which comes free with every one of these cameras tells you in plain and simple language all that you need know in order to make good pictures. The shutter is entirely automatic in action, being operated for either time or instantaneous exposures simply by pressing the lever at the side of the camera. It is always set and always ready for immediate action. Its construction is exceedingly simple and there are no complicated parts to get out of order, making it a most effective and reliable instrument. Two view finders are provided, one for use when making pictures the long way of the plate, and the other when making pictures the short way of the plate, so that the shape and style of the picture may be adapted to the subject. This camera is also provided with two tripod sockets, so that in case a tripod is used, the pictures may still be made either way of the plate. The Conley Improved Flexible Valve Plate Holder which is furnished with these cameras is exactly the same style and quality of holder that we furnish with our very finest cameras.

COMPLETE INSTRUCTIONS IN PHOTOGRAPHY. With every Model I Conley Camera we include, without extra charge, our big manual, "Complete Instructions in Photography," the largest, the most complete guide to photography ever published. This book makes plain, clear, simple and easy to understand, and not only insures success to r in picture making, but contains a fund of valuable information for the photographer. See page 752 for description of this book.

Developing, Finishing and Material Outfit, which we furnish with the Model amera at the price quoted below, contains everything necessary for develop-g, toning and mounting the pictures complete. Every item that goes into this d. The plates and paper are guaranteed to be fresh and perfect, the chemicals and of the highest degree of purity, and all the other items strictly high made and serviceable.

STAND, we furnish the camera alone (with one double plate holder and "Complete Instructions in Photography") for $1.78, but we espe-that you order the camera and outfit all complete, at our special price of hat you can commence making pictures as soon as you receive it.

MODEL II CONLEY CAMERA $2.65

the Camera Alone. $4.10 for the Camera and Complete Outfit.

SPECIFICATIONS.

Size of Picture—4x5 inches.
Lens—High grade, universal focus, achromatic, speed F:16.
Shutter—Conley special time and instantaneous (with bulb release if desired).
View Finders—Two, of ground glass and mirror type.
Tripod Sockets—Two, so that pictures may be taken either the long or short way of the plate.
Covering — Genuine walrus grain leather.
Metal Parts—Brass, fully nickel plated.
Plate Holder—Conley flexible valve.
Capacity — Three double plate holders (six plates).
Dimensions—5½ inches wide; 7⅛ inches high; 8⅛ inches long.
Weight—36 ounces.

EW MODEL II CONLEY CAMERA was designed and built by Camera Company to meet the requirements of those who are willing ents more for the sake of a camera made a little better, finished a finely and a little more convenient to handle than the Model I era. This camera is covered with genuine walrus grain leather; all are of brass, nickel plated and highly polished, and it is equipped nley bulb release shutter, built on exactly the same principles as the we put on the Conley Magazine Camera. This shutter is so con-t it can be operated by either bulb release or finger release, and y be instantly detached when it is not required. As the bulb and s absolutely essential, we quote our price on the camera without be, furnishing this as an extra part to those who desire it. While not an actual necessity, it is a very great convenience and insures a ge quality in the pictures, as there is no danger of jarring the the shutter is operated by the bulb, and it is an especially desir-when making time exposures.

COMPLETE DEVELOPING, FINISHING AND MATERIAL OUT- with the Model I Conley Camera described above, we furnish this er with or without complete outfit, our price for the camera alone, ne Conley Plate Holder and "Complete Instructions in Photog-ng $2.65, and for the camera with complete developing, finishing l outfit $4.10. The outfit which we furnish with this camera is same as the one furnished with the Model I Conley Camera, which strated and described above, and we recommend by all means that e the complete outfit at $4.10, so that you will be able to commence with the camera as soon as it reaches you.

f bulb and tube are not ordered, the shutter may be operated by
20H561 Extra Plate Holders. (See page 748.).....38c

4x5 MODEL III CONLEY MAGAZINE CAMERA $3.95

TWELVE PICTURES WITH ONE LOADING.

SPECIFICATIONS.

Size of Picture—4x5 inches.
Lens—High grade achromatic, of universal focus, speed F:16.
Shutter—Conley special, metal base, time and instantaneous with bulb release.
View Finders—Two, of brilliant type.
Tripod Sockets—Two.
Covering—Genuine leather, seal grain.
Metal Parts—Brass, fully nickel plated.
Plate Changing Device—Conley patent, absolutely positive in action.
Register—Automatic, indicating number of plates exposed.
Capacity—One dozen plates (twelve pictures with one loading).
Dimensions—6⅜ inches wide; 7⅛ inches high; 8 inches long.
Weight—64 ounces.

THE SPECIAL ADVANTAGE of a magazine camera lies in the fact that it dispenses entirely with the use of extra plate holders, the construction being such that twelve plates can be placed directly in the camera and it is then ready for the making of twelve exposures without the necessity of returning to the darkroom to reload and without carrying any separate or extra plate holders.

THE SHUTTER.

THE GENERAL CONSTRUCTION of this camera is strong and substantial in every way. It is covered with the best quality of genuine seal grain leather; the wood is carefully selected, air seasoned and kiln dried; the doors are of selected cherry, paneled to prevent shrinking or swelling, and all exposed metal parts are heavily nickel plated. We equip this camera with an entirely new shutter which is entirely automatic in action, always set, and is operated either by pressing a button, or by bulb and tube.

THE PLATE DROPPING DEVICE is the result of years of experience in building cameras of this type. It is absolutely positive in action and so constructed that difference in the thickness of plates does not interfere with its operation. It is impossible to drop more than one plate at a time, a fault which is quite common to other magazine cameras, and at the same time it is absolutely certain to drop one plate every time the operating lever is moved. The plates are inserted at the back of the camera, and as each one is exposed it is dropped forward and to the bottom of the camera and the next one brought into position, simply by a turn of the small lever on the side of the camera. The plates are inserted through a hinged door at the back of the camera and after exposure are removed through another hinged door in the bottom of the camera. Any number of exposed plates may be removed at any time without disturbing the unexposed ones still remaining. An automatic tally shows at all times the number of plates that have been exposed.

No. 20H285 Model III Conley Magazine Camera, with "Complete Instructions in Photography." Shipping weight, 5½ pounds. Price.....$3.95

MODEL IV 4X5 CONLEY FOLDING CAMERA, $3.

SEE PAGE 752.

Camera Open.

SPECIFICATIONS.

Size of Picture—4x5 inches.
Lens—High grade achromatic meniscus, speed F:16.
Shutter—Conley time and instantaneous with three diaphragms.
Ground Glass—Spring actuated for fine focusing.
Focus Scale—Accurately set, for quick focusing.
Finder—Brass bound and reversible.
Front—All metal with screw clamp.
Woodwork—Thoroughly air seasoned and kiln dried.
Metal Parts—Brass, oxidized finish.
Covering—Black keratol, morocco grain.
Bellows—Best quality keratol.
Plate Holder—Conley flexible valve.
Tripod Sockets—Two.
Dimensions—Camera closed, 2⅛x5¼x6¼ inches. Bellows capacity, 7½ inches.
Weight (including plate holder)—23 ounces.

$3.25 IS A REMARKABLY LOW PRICE for a folding camera with ground glass focusing screen. With this camera you can see the picture on the ground glass just the same as with the most expensive professional outfits, and the pictures which it makes are astonishingly good. On the ground glass at the back of the camera the picture is seen just exactly as it will appear when finished, and it is a very simple and easy operation to focus the camera, which insures every picture being perfectly clear and sharp. On the ground glass you see every detail of the picture, and everything can be carefully arranged so that each object in the picture will appear just as you want it and just as required in order to secure the best possible effect. There are, of course, times—for example, in photographing rapidly moving objects, when it is not convenient to focus the camera carefully by means of the ground glass, and to provide for such cases this camera is also equipped with a carefully adjusted finder and accurate focus scale. By means of the focus scale the camera may be focused for any desired distance, and the object to be photographed may be located by means of the view finder.

ON THE GROUND GLASS. The illustration to the right shows how the picture is seen on the ground glass when focusing the camera, and it also illustrates the manner in which a camera made without reversible back may be turned on its side so that the picture may be made either the long way or the short way of the plate. In illustration the camera is turned on its side, in which position it just as well as when upright. The picture is, of course, seen on the ground glass, as it always is with all cameras.

SOME OF THE BEST PICTURES that have been sent to us by our customers have been made with the Model VII Conley Folding Camera every day in the year we receive samples of work which our customers have done with the various in this catalog, samples of pictures which they have made with various folding cameras, including our Long Focus and Double Exte and some of the very best pictures that have come to us in this way have been taken with the Model VII Conley Folding Camera. We mention particularly because we know that many people feel that good pictures can only be made with expensive cameras, while, as an actual matter the advantages of the higher priced cameras are chiefly convenience of operation, due to their more complete adjustments and also to the with the more elaborate cameras certain kinds of work can be accomplished which cannot be successfully done with the lower priced one Model VII Conley Folding Camera we offer an instrument embodying the most essential features of all high grade folding cameras, but with adjustments which would only increase the cost of the camera without adding to its real value as a picture taking machine.

We put into the Model VII Conley Folding Camera the very best materials, the exact same materials that we use in the construction of priced cameras, and we put into it our very best workmanship. It is made throughout from mahogany, thoroughly air seasoned and kiln dried. The covering and the bellows are genuine leather, and all metal parts are of brass, heavily nickel plated and highly polished.

THE LENS AND SHUTTER. We equip this camera with a strictly high class lens, a double rapid rectilinear lens of the exact same style and quality that is used by other camera manufacturers for cameras selling at from $15.00 to $20.00. It is a double rapid rectilinear lens working at F:11, guaranteed to cover the plate fully to the extreme corners and to produce negatives that are sharp, clear and full of detail. The shutter is the Wollensak Junior, an automatic shutter making time, bulb and instantaneous exposures.

nder Automatic Cannon Photo Button Machine

This Remarkable Cannon Camera Takes, Develops and Finishes a Button Photograph in Less Than One Minute and if Sold at 5 Cents Each the Net Profit on Each Button is 400 Per Cent.

$15.00

THE NOVEL AND STRIKING APPEARANCE of this machine quickly attracts attention, and at picnics, fairs, celebrations, frequented street corners, or any place where crowds of people gather, it is a quick and easy money maker.

EASY TO OPERATE. This machine is exceedingly simple and easy to operate and may be successfully used by anyone of average intelligence, even though without the slightest knowledge of photography. The exposure is made simply by pressing the bulb, after which a lever is pressed which drops the button into the lower part of the machine where it is automatically developed and fixed and in just a few seconds it can be delivered to your customer ready to wear. Most operators charge 5 cents for the buttons, at which price they yield a profit of 400 per cent on the investment, but nearly everyone will also want one of the handsome gilt frames shown below, which readily bring 10 cents each, thus greatly increasing the profit.

THIS MACHINE is manufactured of metal throughout, and is the simplest and most attractive machine on the market. It is entirely free from complications and can be taken apart and put together in a few minutes. The developing cup, which contains the developing jar, is made of fine polished aluminum. The lens is specially ground and polished and is peculiarly adapted for this kind of work on account of its speed and sharp brilliant definition. The plates are packed in lightproof tin tubes and can be loaded into the machine in broad daylight in a few seconds. No darkroom is required.

A Complete Outfit, $23.30

While we quote prices on this machine and each of the various supplies separately we advise the purchase of this complete outfit at $23.30, because it contains everything necessary for immediate results and enables the purchaser to start work at once. Additional supplies may be ordered with the outfit if desired, and if you live some distance from Chicago it might be well to include some extra plates, frames and developing powders with your order to avoid delay after getting to work. The complete outfit contains the following items: 1 Cannon Photo Button Machine, as shown in illustration; 1 tripod, 300 plates, 288 No. 20H507 gilt frames, 2 packages of developing powders, 1 ammonia tester. Shipping weight, 23 pounds.

No. 20H499 Complete Photo Button Outfit. Price.....$23.30

SUPPOSE YOU PURCHASE THE COMPLETE OUTFIT AT $23.30.

gure the possible profit. There are plates enough in the outfit to make 300 buttons, which, at 5 cents for $15.00. There are two gross of frames, which, at 10 cents each, will sell for $28.80, making the $43.80, leaving a profit of $20.50 in actual money, besides the outfit itself. Now, on future business, es will cost you $10.00, and the necessary developer for same about $1.50; the finished buttons sell for Five gross (720) of frames, at $1.75 per gross, will cost you $8.75 and sell for $72.00. Total cost, $20.25; s, $122.00; net profit, $101.75. This is figuring on the basis that less than three-fourths of the people r frames, but the percentage is usually higher. It looks good, doesn't it?

Plate Holder—Conley improved flexible valve.
Carrying Case—Solid sole leather, with space for camera and extra holders.

THE MODEL VIII CONLEY CAMERA is cheap in price only. It is made just as good as the manufacturers know how. They put good materials into it all the way through, good mahogany, good leather and good workmanship. The parts of the Model VIII Conley Folding Camera are made by the same mechanics who make the parts for our highest priced cameras. They are assembled, put together and finished by exactly the same workmen that are employed on our highest grade long focus and double extension cameras, and throughout the factory these cameras receive exactly the same painstaking care, the same rigid inspection and the same strict attention to the smallest details of construction.

LENS AND SHUTTER. This camera is equipped with a double rapid rectilinear lens working at F:11, which is ample speed for making instantaneous exposures except under very unfavorable conditions. This lens covers the plate sharply to the extreme corners, even with full aperture, and yields a sharp, clear cut and snappy negative. The shutter is the new Conley Junior Automatic with pump and valve completely enclosed within the case.

ADJUSTMENTS. This camera is made with rising and falling front, Conley automatic front clamp, spring actuated ground glass focusing screen protected by leather covered, hinged, mahogany back panel, reversible view finder, an accurately adjusted focus scale and two tripod sockets.

5x7 size, focal capacity, 12⅞ inches; camera 3¾x8½x8½ inches; carrying case, 4¼x capacity of carrying case, camera and

THE SPECIAL FEATURES OF THIS CAMERA, the features that especially commend it to the careful and discriminating buyer, are the reversible back, the vertical swing, the rack and pinion focus movement, the Conley Safety Shutter and the fine rapid rectilinear lens. Besides these more important features, it should also be remembered that this Model IX Camera is made with the handsome Conley all metal rising and falling front, brilliant hooded finder, Conley automatic front clamp and accurately adjusted focus scale. The ground glass at the back of the camera is protected by a hinged mahogany panel, covered with leather, and the bed of the camera is joined to the box by a strong and rigid piano hinge.

CAMERA CLOSED.

READ THE SPECIFICATIONS CAREFULLY and compare this camera with cameras offered by other dealers at about the same price. You will find that no other dealer can furnish anywhere near so good a camera for the same money and you will find that for a camera of equal value you must pay the dealer in trust goods from 50 to 75 per cent more money than we ask for the Model IX.

THE REVERSIBLE BACK with vertical swing enables the user of this camera to take either upright or horizontal pictures without changing the position of the camera, the back being detachable by pressing a concealed button and easily and quickly replaced in either position desired. The vertical swing is operated by simply loosening the two set screws at the base of the side arms. Focusing is accomplished by a fine rack and pinion movement, using, when the nature of the work permits, the ground glass at the rear of the camera, or when this is not convenient, it may be used as a hand camera by means of the view finder and focus scale, which are conveniently located on the bed of the camera.

SHOWING REVERSIBLE DETACHED.

CARRYING CASE

LENS AND SHUTTER. We equip the Model IX Conley Folding Camera with a Double Rapid Rectilinear Lens of the symmetrical type working at F:11, or with the Conley Rapid Orthographic Lens working at F:8. Both of these lenses are high grade lenses, guaranteed to cover the plate to the extreme corners with full aperture, but the greater speed of the Orthographic lens makes it particularly desirable. This is the same lens with which we regularly equip the Model XV Conley Camera. With either lens equipment we furnish the Conley Safety Shutter, one of the most complete, easily operated and practicable shutters on the market.

PRICES.

Prices quoted for the Model IX Camera include one plate holder, leather carrying case and "Complete Instructions in Photography."

MODEL X CONLEY CAMERA $6.65

For Pictures 3¼x5½. Post Card Size.

SPECIFICATIONS.

SEE PAGE 752.

Woodwork—Solid African mahogany, with hand rubbed piano finish, corners rounded.
Metal Parts—Brass, nickel plated and highly polished.
Covering—Seal grain keratol.
Bellows—Red Russia leather, gossamer lined; capacity, 8½ inches.
Back—Non-reversible, with spring actuated ground glass focusing screen.
Focus Movement—Sliding.
Front—All metal, nickel plated, with rising and falling adjustment.
Front Clamp—Conley automatic.
Finder—Ground glass and mirror type, reversible.
Shutter—Wollensak Junior, with bulb and finger release.
Lens—Double rectilinear, speed F:11 (U. S. 8).
Plate Holder—Conley flexible valve.
Dimensions—Closed, 2⅝x4¾x6⅞ inches.
Carrying Case—Keratol covered, with space for camera and four plate holders.

THE ARTISTIC SIZE AND SHAPE of the pictures made with this camera make it very desirable, and this size is rapidly superseding in popularity the 4x5, which has heretofore been the favorite size. It is especially adapted to wide landscape views when used horizontally, and when used in a vertical position is equally well adapted to full length portraits or other subjects requiring more height than width.

POST CARD SIZE. 3¼x5½ inches is often called the post card size, and pictures made with this camera may be printed on the sensitized post cards described on page 758, because the negatives are almost exactly the same size as the post cards and if used instead of the ordinary sensitized papers mounting cards may be dispensed with.

This camera is made of mahogany throughout, beautifully finished, with metal parts all nickel plated; the lens and shutter are high class, and it is in every way equal to the cameras ordinarily sold at $15.00.

No. 20H320 Model X Conley Folding Camera, complete with lens and shutter, as described, one plate holder and "Complete Instructions in Photography." (Without carrying case.)

Lens—Conley Rapid Orthographic, working at F:8 (U. S. 4).

Plate Holder—Conley flexible valve.

Carrying Case—Extra quality leather, with space for camera and six plate holders.

THE ILLUSTRATIONS shown on this page, engraved direct from original photographs of the camera, will give you some idea of the general construction and adjustments of the Model XV Conley Long Focus Revolving Back Camera, but these illustrations cannot convey to you any adequate idea of the handsome appearance, beautiful finish and fine workmanship. The beautifully polished mahogany woodwork and the highly finished nickel plated brass trimmings contrasted with the fine black bear grain leather covering and the rich red leather of the bellows give to this camera a strikingly handsome appearance.

DIMENSIONS.

Bellows Capacity	Equivalent Focus of Lens	Focus Rear Combination	Size of Camera, Closed	Size of Carrying Case
12½ inches	6¼ inches	10½ inches	3⅝x 6⅝x 6⅝ inches	4¼x 7 x12 inches

20 inches	10½ inches	17½ inches	4½x10¼x10¼ inches	4⅞x10⅞x19 inches

ions are given in inches. Bellows capacity is measured from ground glass to front board, with camera fully extended.

EW MODEL XV CAMERA, as illustrated and described on this page, does not look very much like the original Long Focus Cameras with which we started nearly fourteen years ago. Every year has seen improvements made, adjustments ak points strengthened, changes of various sorts that would add to the efficiency or the attractiveness of the camera, pect to continue this policy of improvement in the future; but when we look at this Model XV of the Long Focus Reversible Back Camera it seems impossible to suggest further improvement.

THE REVOLVING BACK

THE LENS AND SHUTTER. The Rapid Orthographic Lens with which the Model XV Conley Long Focus Cameras are regularly equipped is an extra high grade lens, very rapid, working at F:8, and suitable for any kind of general photography, including portraits and groups as well as landscapes, architectural subjects, street scenes, etc. It is composed of two combinations, each one consisting of a crown glass and a flint glass, accurately ground, polished and cemented together. Both front and rear combinations are perfectly corrected and the bellows length of the camera is sufficient to permit the use of the rear combination alone, a very desirable feature in landscape and architectural work. The shutter is the new Conley Safety, an unusually efficient, convenient and satisfactory shutter, that meets the requirements fully for all ordinary work.

THE NEW CONLEY REVOLVING REVERSIBLE BACK is one of the features of the new models, the most easily operated, most convenient and most effective form of reversible back ever invented. It is a distinctive Conley feature, one of the features that put the Conley cameras in a class by themselves. By simply pressing a small nickel plated button on top of the camera this back is unlocked so that it may be instantly revolved from a horizontal to a vertical position, or may even be turned clear around, if desired, so that the plate holder may be inserted from the left side.

THE VERTICAL SWING BACK

THE SWING BACK is of the most approved form, this important adjustment being operated and controlled entirely by two set screws, one at the base of each side arm. By simply loosening these set screws, the back of the camera can be swung either forward or backward to any desired angle, thus maintaining its vertical position regardless of the position of the bed, which may be tilted up or down as required.

AUXILIARY BED. The Model XV cameras take our all metal rack and pinion auxiliary bed (see No. 20H399 below), which is so designed that it may be instantly attached to the camera when using a short focus or a wide angle lens. When using the auxiliary bed, the main bed of the camera is dropped down out of the way (see illustration) by simply loosening a screw at the base of each side arm. Other makers accomplish this by detaching the side arms at the top, allowing them to hang down over the bed of the camera in a makeshift manner, but our construction makes it unnecessary to detach the side arms, a marked improvement over the methods adopted by other manufacturers for lowering the camera bed.

AUXILIARY BED IN USE

5x7	21¼ in.	8 in.	14 in.	18 in.	4½x8¾x8¾ in.	[illegible]

IMPROVED DESIGN AND LOWER PRICES. **A year ago we instructed our designer at the camera factory to redesign our Model XVI Camera,** with a view to improving it in every possible way, and the design which he submitted to us, and which we herewith illustrate and describe, we decided to call our Model XVIA, to distinguish it from the older model which it now displaces. This Model XVIA Camera is the best double extension camera we have ever sold. It is a much better camera than the Model XVI which preceded it, and we were therefore very much surprised to find, upon starting to make these new cameras, that the cost of manufacturing had actually been lowered, in spite of the improvements, and we are able to sell this new and improved camera at prices even lower than formerly named for the Model XVI.

EXTRA LONG BELLOWS EXTENSION. **The chief advantage of the Model XVIA Camera is the extreme focal capacity,** the bellows length being sufficient to permit the use of either the front or rear combinations of the lens alone, by which very desirable effects may be obtained in landscape work, architectual subjects and portraiture. This extra bellows length also permits the camera to be focused very close to the subject, so that small objects may be photographed full size, or even larger, and copies of other pictures may be made in the full size of the original.

THE DOUBLE EXTENSION TRACK **is made entirely of metal,** much better construction than the combination wood and metal tracks of other makers, as it is entirely unaffected by any possible shrinking or swelling of the wood which may be caused by extremes of temperature or moisture. The first section is operated by rack and pinion, and the second section, which is only used for extremely long focus work, is pulled out by hand. We have eliminated the extra mechanism by which the first and second sections of the bed were both actuated by rack and pinion, as this additional mechanism results in less rigid and accurate construction and serves no useful purpose, as the operation of the first section by rack and pinion is all that is ever necessary in focusing. The design of this double extension track is entirely new and it is the lightest, most rigid and most satisfactory track made.

This illustration shows the solid mahogany bed panel and double extension all metal track.

ADJUSTMENTS. **Our Model XVIA Camera is provided with every adjustment,** convenience and improvement that can in any way add to its effectiveness and ease of operation. The revolving reversible back, vertical swing, automatic front clamp, rack and pinion movement, large detachable lens board, rising and falling front, side shift, brilliant finder, spirit level, and improved double extension track, together with the very best of materials and workmanship throughout, make this camera the biggest value we have ever been able to offer.

ORTHOGRAPHIC THREE-FOCUS LENS AND AUTOMATIC SHUTTER. **The Orthographic Lens with which we equip this camera is a high grade double lens, working at F:8. Both front and rear combinations are perfectly corrected and may be used alone for subjects requiring greater focal length. The Conley Automatic Shutter is made with all completely enclosed and does not require to be set.** **See page 751 for illustration of this shutter.**

To use auxiliary bed, be lowered out of the way ing side arms.

Model "A" Conley Panoramic Camera $17

FOR PANORAMIC PICTURES, 3½x12 INCHES.

THE CONLEY PANORAMIC CAMERA **makes pictures embracing an angle of view.** An ordinary camera linear lens makes pictures which include an angle of about 60 to 65 degrees, with a wide 80 to 90 degrees, or with an "extreme" wide angle lens it is possible to include slightly but this marks the limit for ordinary cameras, and a lens capable of including an angle of very slow and yields an exaggerated perspective which gives a very unnatural appearance photographed.

ANGLE OF 140 DEGREES. **The Rapid Rectilinear Lens with which this camera** is pivoted upon a revolving vertical shaft, actuated work mechanism. When the button is pressed to make an exposure the shaft revolves, lens from one side to the other, instantaneously recording everything within its sweep of making a picture 12 inches long by 3½ inches wide.

FOR LANDSCAPE PHOTOGRAPHY, **this Panoramic Camera** is unrivaled everything that can be seen with the of just the small section of view to which the ordinary camera is limited. Pictures where streets cross at right angles will include both streets fully. For scenery of any in the mountains, this camera has no equal, and for large estates, parks, or any subjects an angle beyond the capacity of ordinary cameras, it is indispensable. Remarkable mountains, waterfalls, and other subjects of great height, may be made by holding the

FOR GROUP PHOTOGRAPHS, **the Conley Panoramic Camera is remarkably** the members of the group may be arranged circle, each one at practically the same distance from the camera, thus making them all relative size, and all in sharp focus, even with the lens used at full aperture.

EXPOSURES OF VARYING LENGTH. **This camera is equipped with two** may be instantly attached for the varying the length of exposure. Without a fan, the exposure is 1-50th of a second, enough for all ordinary street scenes with moving objects, such as pedestrians and the of a city street. By attaching the smaller fan, the exposure is increased to 1-25th of a with the larger fan, it is still further increased to 1-12th of a second, these longer necessary when the light conditions are not favorable, or when it is desirable to diaphragm. Exposures may be still further regulated by the iris diaphragm, thus giving complete control of the amount of exposure, a feature not provided in any other panoramic camera on the market.

DAYLIGHT LOADING. **The Conley Panoramic Camera uses daylight loading film cartridges of regular stock size, sold everywhere by dealers in photographic** rolls of film as wanted may be carried, and exposed rolls removed from the camera or new ones inserted in broad daylight.

CONSTRUCTION AND EQUIPMENT. **This camera is equipped with a very fine rapid rectilinear F:8 lens,** with iris diaphragm, made especially for panoramic is fitted with brilliant finder, round spirit level, two tripod sockets, and improved film winding device, which keeps the a slight tension and always exactly in the focal plane. A safety lock is provided to prevent accidental exposure and to guard against meddlers. Exposure numbers on the film through a small ruby window in the back of the camera. This camera measures 4⅞x10½x6½ inches and weighs 68 ounces. It is covered with genuine leather, all metal parts plated and both materials and workmanship are high class throughout.

No. 20H1001 **Model "A" Conley Panoramic Camera,** complete as illustrated and described above. Shipping weight, 6 pounds. Price **$17.50**

V MODEL B. W. VIEW CAMERA is made upon the same general plan B. S. which we have sold for several years, but in this new Model B. W. lled a large number of improvements, both in design and construction; nents are the result of several years of practical experience, both in and using this camera, and we believe this Model B. W., as now made, ew camera on the market. All of the metal parts of this camera are nger than have been used in previous models, giving increased strength All of the actuating pinion knobs are on the right hand side of the camera, ts are on the left hand side of the camera; a convenience which will be sed and appreciated by any practical photographer. The fixed or stationary sed in previous models, has been replaced with a sliding block, so that the accurately balanced on the tripod, regardless of the length of bellows in use. struction of this camera is stronger, more rigid, and more accurate than any It is built for the hardest kind of practical service; designed especially to rements of the professional photographer, and for this very reason equally he amateur.

S NO CAMERA MADE that so fully meets all requirements for general photography as this new Model mera. It is perfectly adapted for landscape work or outdoor photography It is very desirable for both interior views and architectural subjects. It is for copying, and the convenience of its adjustments and the ample bellows it very desirable for portrait work. It permits the use of extremely short ely long focus lenses with equal facility, and d construction and perfect alignment make it ble for any special work requiring precision

WE HAVE EQUIPPED THIS CAMERA with all the adjustments and all the improvements that make a camera easy to use, and that make it possible to accomplish work that cannot be successfully performed with cameras less fully equipped. The back is instantly reversible, the lens board is detachable, both side and vertical swings are centrally pivoted, and both are operated by rack and pinion movements, the rising and falling adjustment of the front is operated by self locking rack and pinion and one tripod socket is contained in the sliding block, so that the camera is always perfectly balanced.

The back may be racked forward until there is only 3¼ inches between the ground glass and the lens board, permitting the use of extremely short focus lenses if desired.

ISH WITH THESE CAMERAS a fine combination tripod, ash, and folding so compactly that it goes into the same carrying case with This case is made extra strong, covered with canvas, lined with cloth, re- wooden partitions, provided with leather handles, and the corners are brass ds a complete outfit, consisting of camera, lenses, extra plate holders and is only one package to carry. very strong and rigid, made

Size	Shipping Weight	Price
5 x7	27 pounds	$16.80
6½x8½	29 pounds	18.40
8 x10	33 pounds	22.00

No. 20H458 Model B. W. Conley View Cameras, complete with regular equipment, consisting of Conley Rectilinear Three-Focus Lens and Conley Safety Shutter.

Size, 5 x7.	Price	$25.75
Size, 6½x8½.	Price	34.40
Size, 8 x10.	Price	40.80

SPECIAL EQUIPMENTS.

BESIDES EQUIPPING THESE CAMERAS with the Conley Three-Focus Rapid Rectilinear Lens and Conley Safety Shutter as listed complete under No. 20H458, we also equip them with any of the various rectilinear, anastigmat or wide angle lenses shown on pages 750 and 751. When equipped with our **Series V Anastigmat Lens,** it makes a wonderfully effective outfit for all around work, or, if very much portrait work is anticipated, we strongly urge the use of our new **Series VI Anastigmat Lens,** because of its high speed and marvelous definition. For a combination portrait and viewing outfit at a very low price, we highly recommend our **Conley F:6 Symmetrical Lens.**

This illustration shows how the camera may be accurately balanced on the tripod by means of the sliding tripod block, and also shows the side swing.

Read pages 750 and 751 carefully before placing your order for the camera, and remember that you can have it fitted with any shutter or any lens (except the portrait lenses) there described. A wide angle lens should be added to the outfit if possible, as occasions frequently arise, especially in making interiors, where a wide angle lens is absolutely necessary, and we offer you a choice of two—our **Monarch Wide Angle Lens,** or our new **Series VII Anastigmat Wide Angle Lens,** the latter an instrument of remarkable efficiency.

CARRYING CASE.

Just order the camera only as listed above (No. 20H457) and then add the lens and shutter you prefer. We will mount the lens on the camera and ship the outfit complete, ready for use.

IN COMPARING OUR PRICES with the prices asked by others for View cameras, bear in mind that our prices always include **leather bellows, "long" carrying case and tripod,** which other manufacturers furnish only as "extras", and for which an additional charge is made.

MODEL B CLOSED

IGN of the Model B Conley View Camera is the result of an effort to produce the most practical and efficient camera possible at a very low price. the fact that with many purchasers every dollar in the cost of a camera building this camera we have eliminated everything that added to the cost except those essential details which are necessary to make the camera a lass instrument so far as actual results are concerned.

HE WOODWORK except the bed is Spanish cedar, a wood so closely resembling genuine mahogany that it is often sold as camera dealers. The bed itself is of cherry, not for the sake of economy but because of its greater strength. The workmanship throughout is first class in every detail and the entire construction is extra strong, substantial and rigid, adapting the camera to the hard requirements of the professional photographer, to whom it will particularly appeal, and at the same time making it an ideal camera at a very low price for the amateur photographer. The bellows is made of the best grade of black keratol, lined with lightproof gossamer cloth, and all metal parts are of brass, nickel plated. This camera is made with diagonal rack and pinion focus movement, reversible back, centrally pivoted vertical swing operated by rack and pinion, rising and falling front and removable lens board.

PRICES.

ted for the Model B Conley View Cameras include one plate holder, canvas covered carrying case and "Complete Instructions in Photography." (Tripod is not included.) backs quoted under No. 20H259, may be used with these cameras.

The Famous Thornton-Pickard Reflex Camer

BRITISH MADE CAMERAS

For High Speed Instantaneous Work, for Portrait Work, for Landscape W

FOR HIGH SPEED INSTANTANEOUS WORK **the Thornton-Pickard Reflex Cameras are the finest cameras made.** They stand without an equal for photographing very rapidly moving subjects, such as running horses, athletic events, racing automobiles, aeroplanes, flying birds, football games, etc.

FOR PORTRAIT WORK **the Thornton-Pickard Reflex Cameras are far superior to cameras of other styles,** because the picture is seen on the ground glass, right side up and full size, until the exact moment of exposure, permitting the operator to take advantage of the most favorable position and expression. Moreover, the wonderful efficiency of the Unit Focal Plane Shutter results in fully timed negatives with shorter exposures than are possible with any between the lens shutter. Quick instantaneous exposures may be made in the shade or on dark cloudy days, and **indoor portraits may be made instantaneously with the camera held in the hands.**

FOR LANDSCAPE WORK **the Thornton-Pickard Reflex Cameras are wonderfully convenient and effective,** because the picture is seen right side up and full size on the ground glass, permitting an attention to composition and detail that is impossible with the little finder of the ordinary hand camera.

NEARLY ALL NEWSPAPER PHOTOGRAPHERS use Reflex cameras because **must make pictures when and where they are wanted,** without regard to light and [illegible] They must be able to make pictures under the most difficult conditions, with [illegible] with rapidly moving subjects, hampered often by crowds of people, and the Reflex is the only camera that meets these exacting conditions.

THE GREAT DIFFERENCE **between the Reflex Camera and the [illegible] camera** lies in the fact that a very [illegible] perfect mirror is placed between the lens and the plate at such an angle that [illegible] is reflected to the ground glass in the top of the camera. **This arrangement permits operator to see the image on the ground glass, right side up and full size, until [illegible] instant of exposure.** Focusing is accomplished by a milled screw conveniently [illegible] the side of the camera, and the picture can be focused right up to the very [illegible] exposure. The operator may follow a moving subject, watching it closely all the [illegible] the ground glass, keeping it always in sharp focus, until, when everything is [illegible] and the subject is in just the position wanted, the button is pressed and the [illegible] made just exactly as it was seen on the ground glass at the instant of exposure.

THE UNIT SELF CAPPING TIME AND INSTANTANEOUS FOCAL PLANE SHUTTER.

Latest 1912 Model. Furnished With All Thornton-Pickard Reflex Cameras.

The Unit Focal Plane Shutter, made by the Thornton-Pickard Manufacturing Company of England, is the greatest advance in focal plane shutter construction since the introduction of the adjustable slit by these same manufacturers over twenty-two years ago. This shutter makes instantaneous exposures ranging from one-tenth of a second to one-thousandth of a second, or time exposures of any desired length. It is made with adjustable slit, which may be set for six different widths, and the width is adjusted by the same key which sets the shutter. One turn of the key both sets the shutter and adjusts it for any desired speed, making it the simplest shutter in the world to [illegible] The Unit Focal Plane Shutter has no complicated mechanism whatever. There are [illegible] levers, knobs or catches to move for slit adjustment, no lever to move when changing [illegible] time to instantaneous or vice versa. One turn of one simple key does it all. It [illegible] smoothly and noiselessly. The blind is always perfectly taut, setting and [illegible] straight as a metal plate. It is practically self adjusting and automatic throughout. [illegible] turn of the key sets it, one pressure of the lever releases it—a remarkable combination [illegible] simplicity and efficiency.

Thornton-Pickard Ruby Reflex Cameras.

The Ruby Reflex Cameras are finely made and beautifully finished instruments, designed in the simplest possible manner. They meet the demand for cameras capable of doing any class of work, from ordinary landscapes, portraits or groups up to racing automobiles, running horses or swiftly flying aeroplanes.

The Ruby Reflex Cameras are made of solid mahogany, with the back, front and focusing hood frames of specially treated ebonized wood, finished in black throughout. The covering is fine black morocco leather, all external metal fittings are black oxidized, and mechanisms are covered with black ebonite plates. This black finish throughout gives these cameras a particularly rich and pleasing appearance.

The focusing hood is reversible so that pictures may be taken at right angles to the subject, thus photographing groups or individuals without their knowledge, as the operator is apparently intent upon something in an entirely different direction. This hood is made of stiffened leather, rigid when erected, folding flat when not in use, and detachable for cleaning the ground glass.

The reflecting mirror, which is everset, is silvered on the surface, thus preventing double reflections. The closing of the focusing hood cover automatically locks the mirror at the top of the camera, preventing the danger of breakage to which a free swinging mirror is always liable.

3¼x4¼ Ruby Reflex Camera, $42.90.

No. 20H527 This model makes 3¼x4¼ negatives. Horizontal back (non-reversing). Minimum focal capacity, 6 inches; maximum, 10 inches. Unit Focal Plane Shutter.

Prices include one Thornton-Pickard Double Plate Holder.

In design, finish, appearance, workmanship, convenience of operation and results, the Thornton-Pickard Reflex Cameras are unsurpassed by any reflex camera on either the American or the European market.

The salient feature of any reflex camera is the shutter and the Thornton-Pickard Company are the pioneer makers of Focal Plane Shutters. Their Unit Shutter is the final achievement of more than twenty-five years of continuous research, study and experience in the manufacture of focal plane shutters.

Thornton-Pickard Duplex Ruby Long Fo[illegible] Reflex Cameras.

The Duplex Ruby Cameras represent the [illegible] of perfection in reflex cameras, complete [illegible] detail, beautifully finished and equipped [illegible] widest possible range of work. For the [illegible] photographer they are unexcelled, for [illegible] traiture they are not equalled and for [illegible] amateur or professional use they meet the [illegible] exacting requirements.

ICA FILM CAMERAS

ry High Class Cameras
Made by Ica-Aktiengesellschaft
Largest and Best Manufacturers of Cameras in Europe

LL ICA FILM CAMERAS USE EITHER ROLL FILMS OR GLASS PLATES.

a special arrangement with the European manufacturers, Ica-Aktiengesellschaft, in position to supply the American market with their justly famous cameras. The eras are by far the finest film cameras made today, excelling in both design and nship the best products of other manufacturers either in America or Europe.

Ica Lenses and Shutters.

ICA F:8 APLANAT is a highly corrected double lens of the type known as an Aplanatic rapid rectilinear. It is a remarkably s, second only to an anastigmat and far superior to the rapid rectilinear lenses furnished with either film or plate cameras.

ICA F:6.8 HEKLA is a perfectly corrected double anastigmat lens of the very highest type. It is absolutely free from fism, insuring perfect definition with full detail and the relatively large aperture, ives it sufficient speed to insure successful pictures where the ordinary rectilinear uld fail entirely.

MODEL X ICA AUTOMATIC SHUTTER makes time exposures of any length with two , one pressure opening the shutter, a second pressure closing it. It makes the "bulb" exposures in which it remains open as long as the pressure is held, upon the pressure being released. It makes automatically controlled instantaneous s of 1-25, 1-50 and 1-100 of a second with a single pressure.

MODEL XI ICA AUTOMATIC SHUTTER makes time and bulb exposures in the same as the Model X. It makes automatically controlled exposures of one full second 1-5, 1-25, 1-50 and 1-100 of a second with one pressure. The automatically d exposures are governed by an air retarding device which results in unusual

COMPOUND is a very high grade shutter, making automatically controlled exposures of from one full second to 1-200 of a second, one highest speed between-the-lens shutters made. It also makes time or bulb s of any length. The blades form a star shaped opening, giving very even tion over the entire plate with a high coefficiency of light. It is perfectly dust-ttle liable to derangement and handsomely finished in black.

odels Three and Four Ica Cameras

del Three, 3¼x4¼ — $25.40 | **Model Four, 3¼x5½ — $28.10**

Black Leather Bellows.
Combination Back for Plates or Films.

The Models Three and Four Ica Cameras are beautifully made instruments, much finer in every way than any film cameras now made by American manufacturers. In Europe the demand is for fine goods, and while the American makers of film cameras are encouraging the sale of cheaper instruments, we believe that our customers will appreciate the advantages of these high class cameras. These models are made with extra large collapsible brilliant finders, rack and pinion focusing movement, and are fitted with either Aplanat or Anastigmat Lenses as desired. They are covered with a fine grade of genuine leather, and the metal parts are finished in nickel plate and black enamel, giving them an exceedingly handsome appearance.

Aluminum Body.
Genuine Leather Covering.
Black Leather Bellows.
Combination Back for Plates or Films.

There are no film cameras on the American market which represent as much real value for the money as these Models One and Two of the famous Ica line. Compare these cameras carefully, detail for detail, and see how far superior they are to film cameras offered by other dealers at higher prices. Bear in mind that they use either plates or film, they are made with rising, falling and shifting fronts, they are fitted with the wonderfully effective Ica Aplanat or Ica Hekla Anastigmat Lenses and the Model X Ica Automatic Shutter, which makes either time or bulb exposures of any length and automatic instantaneous exposures of 1-25, 1-50 or 1-100 of a second. In material and workmanship these cameras are high class all the way through, handsome in appearance and effective in operation.

No. 20H470 Model One Ica Film Camera, for 3¼x4¼ pictures. Size, closed, 1⅜x4x7¾ inches; focal capacity, 6¼ inches.

Models Five and Six Ica Cameras

Long Focus Double Extension Models.

Model Five, 3¼x4¼, $29.70 | **Model Six, 3¼x5½, $35.10**

For Roll Films or Plates.

DETAILS.

Ica Aplanat F:8 or Hekla Anastigmat F:6.8 Lens.
Ica Model XI or Compound Shutter.
Double Extension, affording sufficient focal capacity to use rear lens alone.
Automatic Bellows Support to prevent sagging when only partly extended.
Large Collapsible Brilliant Finder with round spirit level.
Rack and Pinion Focus Movement.
Automatic Focus Stop at Infinity.
Special U Shaped Metal Standard, very rigid.
Rising and Falling Front with Side Shift.
Automatic Front Lock.
Two Tripod Sockets.
Aluminum Body.
Genuine Leather Covering.
Black Leather Bellows.
Combination Back for Plates or Films.

The Ica Models Five and Six are the most complete and highly developed film cameras in the world. They are particularly graceful and ornamental in appearance, yet so perfectly designed and of such faultless construction that they are unusually strong, rigid and substantial. The double extension bed, operated by rack and pinion, and the extra long bellows, affords greater focal capacity than any other film camera manufactured, permitting the use of the rear lens alone, or other lenses of greater length if desired. They are furnished with either Aplanat or Anastigmat Lenses and are equipped with the Model XI Ica Automatic Shutter or the Compound Shutter.

No. 20H478 Model Five Ica Film Camera, for 3¼x4¼ pictures. Size, closed, 1⅜x4½x8¾ inches; focal capacity, 11½ inches.
Price, with Ica F:8 Extra Rapid Aplanat Lens and Model XI Shutter.....**$29.70**
Price, with Ica F:6.8 Double Anastigmat Hekla Lens and Model XI Shutter.**$35.65**
Price, with Ica F:6.8 Double Anastigmat Hekla Lens and Compound Shutter.**$39.15**

No. 20H479 Model Six Ica Film Camera, for 3¼x5½ pictures (post card size). Size, closed, 1⅝x4¾x9½ inches; focal capacity, 13¼ inches.
Price, with Ica F:8 Extra Rapid Aplanat Lens and Model XI Shutter.....**$35.10**
Price, with Ica F:6.8 Double Anastigmat Hekla Lens and Model XI Shutter.**$44.00**
Price, with Ica F:6.8 Double Anastigmat Hekla Lens and Compound Shutter.**$47.50**

SPECIAL ATTENTION is directed to the marvelously low prices we quote for the Ica Cameras with Anastigmat Lenses. The Hekla Anastigmat is a wonderfully good lens, positively equal in every way to certain widely advertised lenses which alone sell for about twice the price we ask for the camera, shutter and lens complete.

CONLEY PLATE HOLDER

Showing Construction of Drake Valve.

Fit All Seroco, Conley, Century, Premo, Black Beauty and Seneca Cameras

4 x 5 40c

Other Sizes in Proportion.

Showing Advantage of Spring Bar Loading or Unloading

DRAKE'S PATENT LIGHTPROOF FLEXIBLE VALVE IS POSITIVE INSURANCE AGAINST LIGHT STRUCK PLATES.

THE IMPROVED SPRING BAR PLATE LOCKING DEVICE MAKES THEM EASY TO HANDLE IN THE DARKROOM.

THE DRAKE LIGHTPROOF FLEXIBLE VALVE AND THE SPRING BAR PLATE LOCKING DEVICE, combined with high class construction in every detail, make the Conley plate holders the best holders in the world. The Flexible Valve makes it impossible for one of these holders to leak light even if the slide is inserted cornerwise, as this valve will automatically close up all around the edge of the slide, making light struck plates an impossibility.

THE SPRING BAR PLATE LOCKING DEVICE makes these holders exceedingly convenient and satisfactory to handle, as they are loaded or unloaded, even in total darkness, with the greatest ease and without the slightest danger of touching the surface of the plate. We put into these holders the very best thoroughly seasoned, kiln dried lumber, and the workmanship is exactly the same high standard that we maintain in our highest grade cameras. Every joint is dovetailed, and they are made with fine hand rubbed mahogany finish.

We make these holders with either pressed board or hard rubber slides, but we particularly recommend the pressed board slides, as they are less liable to break. The pressed board slides have the word "Exposed" printed on one side, and after making an exposure, by replacing the slide with the word "Exposed" out, the operator is always able to tell with certainty which plates have been used. As we cannot print the word "Exposed" in a satisfactory manner on the hard rubber slides, we make the wooden handle black on one side and mahogany colored on the other, which answers the same purpose in showing which plates have been exposed.

PRICE LIST OF CONLEY PLATE HOLDERS

STYLE 1, FOR BOX CAMERAS.

No. 20H560 Conley Plate Holder, 3½x3½, shellac finish with pressed board slides; fits the Perfection Jr., Seroco Jr. and the Conley Jr. Box Cameras. Shipping wt., 5 oz.

EXPO WATCH CAMERA, $2.25

THE EXPO WATCH CAMERA

looks exactly like a watch in size and style, and pictures may be taken with it without anyone suspecting that a camera is being used. It makes pictures ⅞ inch long by ⅝ inch wide, the exact size shown in the illustration to the right. It uses a daylight loading film, twenty-five exposures to the roll. It makes either time or instantaneous exposures, and is suitable for landscapes, street scenes, groups, portraits, etc. It is carefully made from metal throughout, and fitted with achromatic fixed focus lens. Negatives are so perfect that the pictures may be enlarged to about 2x3 inches with perfectly satisfactory results.

No. 20H375 Expo Watch Camera. Shipping weight, 10 ounces.
Price, without film.....**$2.25**

No. 20H376 View Finder, for Expo Watch Camera. This view finder is not absolutely necessary, but helps in getting the best possible results with the Expo Watch Camera. Shipping weight, 5 ounces. Price.....**45c**

No. 20H377 Film, for Expo Watch Camera, put up in rolls of twenty-five exposures, daylight loading. Shipping weight, 1 ounce. Price, per roll.....**18c**

No. 20H378 The Expo Enlarger. This is a special enlarging camera made for enlarging Expo camera pictures. It enlarges pictures made with the Expo camera to a size of 2x3 inches, the enlargements being made on bromide paper. Shipping weight, 15 ounces. Price.....**$1.35**

No. 20H379 Bromide Paper, for use with the Expo Enlarger, size 2¼x3½. Shipping weight, 1 ounce. Price, per dozen.....**10c**

NOTE—Any of the various sensitized papers shown in this catalog may be used for printing pictures made with the Expo camera, and sixteen negatives may be printed at one time by using 4x5 paper in a 4x5 printing frame with glass. Smaller frames or larger frames may be used if preferred.

IMPROVED CONLEY INSIDE KITS

FOR USING SMALLER SIZE PLATES.

KITS are thin wooden frames which fit in the plate holder, the same as an ordinary plate, and the opening in the center holds a plate of smaller size than the holder is made for. They are to be used when it is desired to use **smaller plates than the regular size for the camera, and thus save the expense of a plate.**

OUR IMPROVED CONLEY INSIDE KITS are made with special inside corner supports and a spring across one end by which the plate is held firmly in position, a great improvement over any previous style of kit.

EXPO POLICE CAMERA, $4.50

THE EXPO POLICE CAMERA

is the product of the factory that makes the famous Expo Watch Camera. We have sold the little watch camera for several years and it is giving universal satisfaction. This new Police Camera takes a larger picture and combines to an unusual degree the features of compactness and efficiency. It is always ready for use, requires no focusing, makes pictures 1¾ inches long, and the negatives are so perfect that they can be enlarged to post card size.

This camera is made entirely from metal, handsomely finished, and measures only 1¾ inches long by 2½ inches wide by 3⅜ inches long, so it is easily carried in the pocket. It is equipped with a high grade achromatic lens of fixed focus, with two diaphragms, F:16 and F:22; a miniature focal plane shutter, for either time or instantaneous exposures, and a brilliant finder. It uses a daylight loading roll film, twelve exposures to the roll, and can be quickly loaded anywhere in daylight.

No. 20H366 Expo Police Camera, with leather case. Shipping weight, 2 ounces. Price.....

No. 20H367 Film for Expo Police Camera, twelve exposures to a roll, daylight loading. Shipping weight, 1 ounce. Price, per roll.....

SERIES "T" DEVELOPING AND PRINTING OUTFITS

$4.15 TO $9.95

According to Size.

THESE OUTFITS are arranged for developing plates by the tank method, and finishing prints on developing paper. In these respects they differ from the other outfits shown on this page, which are arranged for developing plates in flat trays and finishing the prints on printing-out paper. Every item contained in these outfits is strictly high class and perfectly suited to the purpose for which it is designed. The tank system of developing plates and the use of developing papers constitute the latest and most approved methods, and we recommend these outfits highly.

Each Series "T" Outfit contains the following items:

- 1 Nickel Plated Brass Developing Tank.
- 1 Package Tank Developing Powders.
- 1 Package Pea Crystal Hypo.
- 1 Oil Ruby Lamp.
- 1 Graduate.
- 1 Glass Stirring Rod.
- 1 Photographic Thermometer.
- 1 Negative Rack.
- 1 Dozen Roebuck Blue Label Plates.
- 1 Dozen Brilliant Darko Paper.
- 1 Package Darko Developing Powders.
- 1 Package Acid Hypo.
- 1 Professional Printing Frame.
- 1 Bottle Acetic Acid.
- 3 Enameled Steel Ware Trays for Prints.
- 1 Copy "Complete Instructions in Photography."

No. 20H840 Series "T" Outfit for 4x5 camera. Shipping weight, 21 pounds. Price.....$4.15

No. 20H841 Series "T" Outfit for 3¼x5½ camera. Shipping weight, 21 pounds. Price.....4.45

No. 20H843 Series "T" Outfit for 5x7 camera. Shipping weight, 24 pounds. Price.....5.00

No. 20H844 Series "T" Outfit for 6½x8½ camera. Shipping weight, 30 pounds. Price.....7.65

No. 20H845 Series "T" Outfit for 8x10 cameras. Shipping weight, 35 pounds. Price.....9.95

There is no camera included with any of these outfits. For description of the tank method of developing see page 755.

PHOTOGRAPHIC LENSE

THE CONLEY F:8 THREE-FOCUS RAPID RECTILINEAR LENS

THE CONLEY RAPID RECTILINEAR LENS is as good a rectilinear lens as can be manufactured and is fully in every way to rapid rectilinear lenses sold by many photographic supply houses under high sounding names at two and three times the price we ask. This is a good lens for the professional photographer who wants an instrument suitable for around work, both indoors and outdoors. It is a good lens for the amateur photographer who wants an instrument suitable for work, buildings, groups, etc., and at the same time a lens that is capable of making a good portrait. The Conley Rapid Rectilinear will do all these things, and do them well. It is a good lens.

THIS LENS IS PERFECTLY RECTILINEAR, rendering the straight lines of buildings or other subjects absolutely without curvature. It possesses unusual flatness of field and great definition and fine detail. For landscape work, views of buildings and other architectural subjects, flashlights, groups and instantaneous work, this lens is absolutely unsurpassed except by the genuine anastigmat lenses.

THREE-FOCUS CONVERTIBLE TYPE. The Conley Rapid Rectilinear Lens is of the convertible type, both front and rear combinations being fully corrected so that they may be used alone, the front combination having a focal length about 40 per cent greater than the rear combination, thus affording the user a choice of three different lengths, which is equivalent to owning three separate lenses of the older styles. These lenses are made especially for us in our well equipped lens grinding establishments in the United States, and the greatest possible care is exercised in the grinding, polishing, centering and mounting. Every one is carefully inspected and tested before it leaves the factory and goes out under our positive guarantee to be perfect in every respect.

No. 20H1102 The Conley F:8 Three-Focus Rectilinear Lens. Prices as follows, including bulb and tube:

Lens No.	Plate Covered at F:8	Equivalent Focus	Focus Rear Combination	Focus Front Combination	Diameter Across Hood	Price With Conley Safety Shutter	Price Without Shutter

*With Wollensak Regular Shutter.

No. 20H1103 Conley F:8 Three-Focus Rapid Rectilinear Lenses in matched pairs for stereoscopic work, 5 inches focus. Price, with Wollensak Regular Stereoscopic Shutter.....$14.50

CONLEY F:6 SYMMETRICAL LENS

A Combination Portrait and Viewing Lens of Extreme Rapidity

THE CONLEY F:6 SYMMETRICAL LENS is designed to meet the demand for a lens equally suitable for either portrait work or general viewing. Its extreme rapidity makes it especially desirable for portrait work, and it is equally well suited to high speed instantaneous work and general viewing and commercial work. On dark cloudy days the speed of this lens insures successful negatives in many cases where the ordinary lens would fail.

THE GENERAL APPEARANCE of this lens is practically the same as the F:8 Conley Lens illustrated above, but it is of course larger in diameter. It is of symmetrical construction, the front and rear combinations being of the same focal length, and either combination may be used alone, as they are both perfectly corrected. These lenses are ground from the highest grade of imported optical glass, polished, cemented, centered and mounted with the utmost care, and every one goes out under our positive guarantee to be absolutely perfect both mechanically and optically.

THERE IS NO MODERATE PRICED LENS ON THE MARKET which so perfectly meets the requirements for both general view work and portrait work as this new Series II F:6 Conley Symmetrical Lens. We recommend it unreservedly to anyone requiring a universal lens at the lowest possible cost.

No. 20H1105 The Conley F:6 Symmetrical Lens.

No. Lens	Plate Covered at F:6	Equivalent Focus	Diameter Across Hood	Price With Conley Safety Shutter	Price With Conley Automatic Shutter	Price With Optimo Shutter	Price With Wollensak Studio Shutter

*With Wollensak Regular Shutter.

Monarch Symmetrical Wide Angle Lens.

The Monarch Wide Angle Lens covers an angle of 90 degrees, and works at F:16. Wide angle lenses are especially adapted to the photographing of interiors and for outdoor pictures in confined situations. They are necessary in all cases where it is difficult or impossible to get far enough away from the subject to include it all on the plate with an ordinary lens. They are not suitable for general all around photography, but are an important addition to any outfit, as they are absolutely necessary in those particular cases where their use is indicated.

The Monarch Wide Angle Lens is handsomely mounted in lacquered brass, and supplied either in barrel with iris diaphragm or in Conley Safety Shutter.

No. 20H1120 Monarch Symmetrical Wide Angle Lens. Prices as follows:

Lens No.	Size Plate Covered, Inches	Equivalent Focus, Inches	Diameter Across Hood, Inches	Price in Barrel with Iris Diaphragm	Price, with Conley Safety Shutter
1	4 x 5	3½	1¼	$ 5.70	$ 7.75
2	5 x 7	5¼	1¼	6.80	8.85
3	6½x 8½	6½	1⅝	9.90	12.95
4	8 x10	8	2 13-32	12.80	15.85

Wide Angle Lenses to Fit Shutters.

This wide angle lens is furnished without barrel or shutter, the front and rear combination being mounted in cells to fit the shutters ordinarily used with folding hand cameras. To use these lenses the front and rear combinations of your regular lens are simply unscrewed from the shutter, and these wide angle lens combinations screwed into their place.

No. 20H1121 Wide Angle Lenses in cells to fit the Wollensak Regular or the Wollensak Automatic Shutters.

Size, 4 x 5. Price	$2.90
Size, 5 x 7. Price	3.70
Size, 6½x 8½. Price	5.95
Size, 8 x10. Price	7.80

No. 20H1122 Wide Angle Lenses in cells to fit the Conley Safety or the Conley Automatic Shutters.

Size, 4 x 5. Price	$2.90
Size, 5 x 7. Price	3.70
Size, 6½x 8½. Price	5.95
Size, 8 x10. Price	7.80

If you have a camera fitted with Wollensak Regular or Automatic Shutter, the Wide Angle Lens No. 20H1121 will fit your shutter.

If you already have or if you are just ordering one of the latest model Conley Cameras with Conley Safety or Conley Automatic Shutter, then the wide angle lens that is listed under No. 20H1122 will fit your shutter.

Conley Series II F:5 Portrait Lens.

The Series II Conley Portrait Lenses are true portrait lenses of the Petzval type of construction. They are ground from the best imported optical glass, composed of two systems of two glasses each, the front system cemented and the rear system with an air space between the two glasses. The special formula by which these lenses are ground, combined with their large diameter, gives them the high working speed of F:5, producing brilliant negatives with plenty of detail.

We recommend the Series II Portrait Lens as the very best moderate priced portrait lens on the market, and for general all around work in the studio these lenses are unsurpassed. They are beautifully finished in lacquered brass with black trimmings and mounted with the same care and accuracy that is given to our highest priced portrait lenses. We furnish these lenses in sizes Nos. 3, 4 and 5, either with or without the Wollensak Studio Shutter. When sold without the shutter the lens is equipped with a fine iris diaphragm.

The Wollensak Studio Shutter is such a good shutter, so convenient, so compact and so satisfactory in every way that we strongly urge the purchase of the lens complete with shutter. This shutter is made with rubber cushions at all points of contact, making it practically noiseless, is constructed on the iris-diaphragm principle, and is so compact that it does not appreciably increase the size of the outfit, as will be seen by reference to the illustration of our Conley Series III Portrait Lens, which is shown complete with shutter. See illustration and further description of this shutter at foot of next page.

No. 20H1126 Conley Series II Portrait Lens.

Conley Series III F:3.8 Extra Rapid Portrait Lens.

The Series III Conley Portrait Lens It Appears With Studio Shutter

At the remarkably low prices shown below, we offer the Series III Conley Extra Rapid Portrait Lens as the equal in every way of portrait lenses heretofore sold at from $75.00 to $150.00 each, according to size. It is as good a portrait lens as money will buy and combines the very finest optical qualities with a perfection of mechanical detail that places it in the front rank of high grade portrait lenses.

High Speed. This lens works at the extremely high speed and may be used at full aperture for heads and busts; with a smaller diaphragm it is a splendid instrument for softness, delicacy and depth, in speed, flatness of field and of illumination the Series III Conley Portrait Lens is ahead of by any other portrait lens on the market, regardless of price. It represents the very latest advances in scientific lens construction, possessing all of those peculiar optical qualities and the brilliancy of definition so much sought after by the photographers. Even when stopped down this lens possesses sharpness and roundness so essential in portrait making, a quality in lenses, as nearly all lenses become distinctly slow with a small diaphragm.

This lens is composed of two systems of two glasses, the glasses of the front system cemented together and the rear system mounted without cementing and in such a way that separation may be varied, constituting a diffusion adjuster; the front lens of the rear combination is movable and the separation is controlled by a large pinion knob on the lens. This knob is engraved with a scale so that the degree of separation which governs the extent of diffusion may be known.

No expense is spared in mounting these lenses and in the highest degree of mechanical perfection, beautifully lacquered brass with engraved diaphragm scale and knob.

No. 20H1130 The Conley F:3.8 Series III Portrait Lens.

HOTOGRAPHIC LENSES

CONLEY SERIES V F:6.8 ANASTIGMAT LENS

A UNIVERSAL LENS The Conley Series V Anastigmat Lens is in every sense of the word a universal lens, being suitable for any kind of photographic work, landscapes, architectural subjects, portraits, groups, studio use and high speed instantaneous work. It is a double anastigmat of the most perfect type, symmetrical in construction, absolutely free from astigmatism and perfectly corrected for both chromatic and spherical aberration. Both the front combination and the rear combination are fully corrected and may be used alone, each having a focal length of about twice that of the complete lens. With all extremely high grade lenses absolute accuracy of adjustment is necessary, and the final mounting and adjustment of these lenses is entrusted only to the most expert workmen of long experience. Each lens is treated individually and carefully studied and tested before it is shipped.

SPEED The Conley Series V Anastigmat Lens works at a speed of F:6.8, which is amply sufficient for instantaneous work, even under adverse conditions of light and which, under favorable conditions, permits exposures with the focal plane shutter as short as the 1-1000 part of a second. As compared with even the best rapid rectilinear lenses, this lens possesses greater speed, better definition, a flatter field and greater covering power.

FOR HOME PORTRAIT WORK this lens is a perfect instrument that will enable you to make good portraits in your own home. For successful portrait work under the ordinary conditions existing in the home, a fast lens is necessary, and the Conley Series V Anastigmat Lens has speed. Portrait work is the most interesting branch of photography and requires some skill and a knowledge of lighting. This skill and knowledge of lighting, however, is of no avail unless backed up with a good lens, and the Conley Series V Anastigmat Lens is a good lens, not only for portrait work, but for all kinds of photography.

ARE OUR PRICES on Anastigmat Lenses with the prices quoted by others for lenses ality. We save you 50 per cent.

THE CONLEY SERIES VI F:4.5 ANASTIGMAT LENS

OUR NEW HIGH SPEED ANASTIGMAT LENS, the Conley Series VI, is a lens of wonderful power. It is particularly adapted to any work requiring extreme rapidity and fine definition, and for cameras of the reflex type. It is an ideal lens for portraits, either in the home or the studio. Used with full aperture, its extreme rapidity permits instantaneous exposures under conditions which would be absolutely impossible with lenses of ordinary speed. Instantaneous exposures may be successfully made in any ordinarily well lighted living room, making this lens a remarkably efficient instrument for home portrait work, and, in the larger sizes, lenses of this type are rapidly displacing portrait lenses of the Petzval type for professional use in the studio. While the average portrait lens is made with an aperture of F:4, or even larger, it is very seldom used at full aperture, because its greater focal length and lack of full correction makes a smaller aperture necessary to secure the desired definition and depth of focus. This Series VI lens, by reason of its absolutely perfect correction, and shorter focus, may be used wide open for portrait work, making it actually faster in practice than the portrait lens of equal or greater aperture, and for large groups it is infinitely superior to any portrait lens.

EXTREME RAPIDITY in lenses is secured by making them of very large aperture, apparently a simple matter, but in actual practice, presenting great technical difficulties, so the successful designing and manufacturing of lenses working effectively at the extraordinary aperture of F:4.5 is a scientific triumph. Many makers in attempting to design a lens of this aperture, find it necessary to disregard other important corrections, in fact, some of the best known large aperture lenses are not corrected for spherical aberration, so they render straight lines as curves, and are not rectilinear. We guarantee the Conley Series VI lenses to be absolutely rectilinear, to be fully corrected for spherical and chromatic aberration and entirely free from all defects frequently found in lenses of extreme rapidity.

Remember that the speed of any lens depends entirely upon its effective aperture; in other words, the size of the opening in relation to its focal length, and is not appreciably affected by any other factor. Speeds of different lenses vary exactly in ratio to the squares of their effective apertures. For example, this lens, at full aperture (F:4.5), is just six times as fast as a lens working at F:11. It is more than three times as fast as a lens working at F:8, about two and a third times as fast as an F:6.8 lens, and practically twice as fast as an F:6.3 lens.

DIFFUSING ADJUSTMENT. The larger sizes of this lens, the Nos. 4, 5 and 6, are made with a diffusing adjustment, by means of which wonderfully soft and pleasing effects in portraiture are secured. This is accomplished by mounting the front combination in such a manner that the extent of its separation from the rear combination may be varied, thus producing any desired effect, from the very soft effect so desirable in portrait work, to the absolutely sharp, perfect definition required for other classes of work. These large sizes work at the same extreme speed as the smaller sizes, F:4.5, and while we mention with particular emphasis their remarkable advantages for portrait work, and especially for large groups, it must not be inferred that they are suited to this class of work only. The absolutely complete and perfect correction of these lenses makes them ideal for general all around photography. Extreme speed, of course, is not always wanted, and when stopped down to smaller apertures, these lenses possess the same speed and depth of focus as our Series V Anastigmat lenses at corresponding apertures. Our Series VI lens is a splendid instrument for landscapes, architectural subjects and commercial work of any kind.

THE MECHANICAL CONSTRUCTION of these lenses is in keeping with their optical perfection, as they are beautifully mounted in heavy brass with black enameled finish, the utmost attention being given to every mechanical detail. Every step in their manufacture from the first grinding and polishing of the glass to the final centering, cementing and mounting, is performed with scientific precision, after which each lens is individually studied and tested before it is allowed to pass from the laboratory.

No. 20H1114 Series VI F:4.5 Conley Anastigmat Lenses.

Lens No.	Plate Covered at Full Aperture	Equivalent Focus	Diameter of Lens	Price, in Barrel, With Iris Diaphragm	Price, With Conley Automatic Shutter	Price, With Optimo Shutter	Price, With Wollensak Studio Shutter
1	3¼x 4¼	5 in.	1 3-16 in.	$ 28.00	$32.00	$39.60	Not furnished

6	11 x14	15½ in.	3 9-16 in.	160.00	Not furnished	Not furnished	165.00

*This price includes Wollensak "Regular" Shutter as Conley Automatic is not made in size large enough for the 8x10 lens. Nos. 4, 5 and 6 are made with diffusing adjustment.

Because of their large aperture, these lenses are correspondingly large and cannot be fitted to small compact cameras. They can be used with any Reflex camera, any Graflex camera, any studio camera, any View camera, either of our make or other makes, and in Conley Automatic shutters they can be used with our Models XV, XVI or XVIA Cameras. In the Optimo shutter they can be fitted to Models XV, XVI or XVIA in 5x7 size only.

SHUTTERS FURNISHED WITH OUR LENSES

ONLEY SAFETY

R is a double pump shutter with all working parts enclosed within the case. It makes time or bulb exposures of any desired length and automatically controlled exposures of 1-100, 1-50, 1-25, 1-5, ½ and 1 second. It is one of the tory shutters for all around n be secured and is made us by the Wollensak Op-

THE CONLEY AUTOMATIC SHUTTER

is similar in general design to the Conley Safety Shutter, having all working parts entirely enclosed, but it does not require to be set, as it is self setting or automatic, resetting itself after each exposure. It makes time, bulb and automatically controlled exposures same as the Conley Safety.

THE OPTIMO

is a new high speed shutter made by the Wollensak Optical Co., and in our opinion possesses advantages over any between the lens shutter now on the market. There are five shutter leaves which revolve in making the exposure, the end of each leaf passing from the opening and the other end taking its place, which makes high speed possible in opening and closing. The aperture is star shaped, the points of the star reaching to the edges of the opening, thus giving the greatest possible illumination to the plate. The Optimo makes time and bulb exposures in the ordinary manner, and automatically controlled exposures of 1-300, 1-200, 1-100, 1-50, 1-25, 1-5, ½ and 1 second. Even when working at the unusual speed of 1-300 of a second it sets and releases very easily and operates without the slightest jar or recoil. All working parts are entirely enclosed within the case, making it perfectly dustproof.

THE WOLLENSAK STUDIO SHUTTER

furnished with our Conley F:6 Symmetrical Lens, Series VI Anastigmat Lens, and the Portrait Lenses, is designed especially for studio use. An idea of its appearance may be gained from the illustration of our Series III F:3.8 Portrait Lens, which is shown mounted in this shutter. It is an iris diaphragm shutter, opening with a single pressure of the bulb and closing when the pressure is released. When opened by the small lever at the side it remains open for focusing.

Our Special Catalog of Cameras and Photo Supplies

ON PAGES 739 to 761 of this catalog we illustrate and describe only the more important items in our line of cameras and photographic supplies. The space available in this big General Catalog compels us to shorten descriptions, reduce or in many cases omit illustrations; still we give you, in the following pages, sufficient information regarding the most important items in our photographic line so that you can conveniently make up your order direct from these pages. We guarantee to satisfy you with anything you order or return your money. But if you want to see our entire line of cameras and photographic goods with more complete descriptions, large illustrations showing all the details, and wish to take advantage of the instructions and valuable information contained in our Special Camera Catalog, by all means write for it at once. We will be glad to send it to you.

This Special Catalog Quotes the Lowest Prices ever known for high grade cameras, lenses and photographic accessories of all kinds, including sensitized papers, dry plates, card mounts and chemicals. Even if you do not buy from us, you ought to have this catalog so that you can check up the prices which you pay to other dealers, and for the information which it gives you regarding actual values in photographic merchandise. If you own a camera or if you ever expect to purchase a camera and take up the fascinating work of photography, you should by all means have a copy of our Special Camera Catalog. If you are already using a camera, it will give you new ideas regarding the things you can do. It will double your pleasure and in this way actually increase the value of your own camera. If you have not yet purchased a camera this Special Camera Catalog will give you valuable and practical information regarding the selection of an outfit. **MAILED FREE AND POSTPAID ON REQUEST.**

The Ica Atom Cameras, $13.50 to $21.60.

For Plates or Film Packs.

VERY HIGH GRADE VEST POCKET CAMERAS FOR PRACTICAL WORK. SIZE, CLOSED, ONLY 1½x2⅝x3⅜ INCHES.

The Atom cameras make negatives 1¾x2⅜ inches so perfect in every detail that they may be enlarged to 3½x4¾, 4x6 or 5x7 with the Atom enlarging boxes. It is as easy to make enlargements of this size with the Atom enlarging box as it is to make small prints in the ordinary manner. American photographers are just beginning to appreciate the wonderful advantages possessed by small cameras, although cameras of this type have, for some time, been very popular in Europe. The Atom camera is so small that it can be easily carried in the pocket, yet it is as perfect in construction and as complete in details as many much larger and more expensive cameras. While a picture 1¾x2⅜ inches may seem small, it must be remembered that these negatives are so perfect that they will stand enlargement to a wonderful extent, and by the use of the Atom enlarging boxes, prints of any desired size from 3½x4¾ up to 5x7 may be made just as easily and just as quickly as contact prints made with an ordinary printing frame. One great advantage of the small camera lies in the fact that lenses of such short focal length possess a wonderful depth of focus, resulting in pictures which are sharp both in the foreground and in the extreme distance. The Atom camera is constructed entirely of metal, covered with fine morocco leather, and as there are no projecting parts it can be conveniently carried in the pocket. It is equipped with the Ica automatic shutter with finger release, making instantaneous, bulb or time exposures, and is provided with an extra large brilliant finder.

The camera is opened by pressing a concealed button and the front automatically springs out into position and in universal focus. The fact that the camera is opened and the front extended for use, all in one movement, makes it possible to bring it into action very quickly. No time is lost in drawing out the front or in focusing. Two tripod sockets are provided so the camera may be used either as a hand camera or on a tripod. This little camera measures when closed, 1½x2⅝x3⅜ inches. Three single metal plate holders in imitation leather case are included at the prices quoted below.

No. 20H550 Atom Camera with special Ica Achromatic Lens. Price **$13.50**
No. 20H551 Atom Camera with Ica Extra Rapid Aplanat F:8 Lens. Price **$16.80**

No. 20H555 Film Pack, 12 exposures. Price. **.22**
No. 20H556 Extra Plate Holders, single, all metal, for Atom Camera. Price, each **33c**

Ica Enlarging Boxes for Atom Cameras.

These enlarging boxes are constructed, made of wood covered with imitation leather, and fitted with good achromatic lens. Their use is simple, the negative being placed in the small end of the box and a sheet of bromide or gaslight paper in the other end. The exposure is made by sliding the box toward the light and the print is developed in the usual manner. The making of large prints in this way is practically as simple and easy as the making of contact prints with an ordinary printing frame. These boxes may be used only with 1¾x2⅜ negatives.

No. 20H557 Enlarging Box No. 1. For making enlargements 3½x4¾ inches. Price ..... [illegible]
No. 20H558 Enlarging Box No. 2. For making enlargements 4½x6 inches. Price ..... [illegible]
No. 20H559 Enlarging Box No. 3. For making enlargements 5x7 inches. Price ..... [illegible]
No. 20H1775 Roebuck Blue Label Dry Plates for Atom Camera, 1¾x2⅜ inches, coated on special [illegible] stal glass. Price, per dozen ..... [illegible]

For making contact prints from Atom Camera negatives we advise the use of a 3¼x4¼-inch printing frame [illegible] glass. 2¼x3¼ paper may be used and prints [illegible] size or left with a white border. If 4x5 paper [illegible] two prints may be made from each piece. Film [illegible] size may be used, the larger sizes permitting [illegible] of negatives to be developed at once.

Ray Filters Reduced to 38 Cents.

No. 20H1140 A Ray Filter absorbs the violet and ultra-violet rays of light and produces a picture in which the color values are correct. Clouds in a photograph improve the artistic value of the picture wonderfully, and you can get them with a ray filter. Landscapes photographed with the ray filter possess a brilliancy and contrast which it is impossible to obtain otherwise; and in the photographing of flowers, paintings or any brightly colored subjects, the ray filter is practically indispensable.

No. 1. Adjustable for any ordinary 4x5 or 5x7 lens, provided the outside diameter does not exceed 1¼ inches. Mounted in brass, with black enamel finish. Price **38c**

Auxiliary Enlarging and Copying Lenses.

No. 20H1155 These lenses are used in connection with the regular lens of any folding camera, greatly increasing its power. By the use of these lenses copying and enlarging may be done with short focus folding cameras, enabling one to copy other pictures or photograph small articles to their full size or even larger. Shipping weight, 3 ounces.

No. 1. Adjustable for any ordinary 4x5 or 5x7 lens, provided the outside diameter of same does not exceed 1¼ inches. Mounted in brass, with black enamel finish. Price **38c**
For larger sizes see Special Camera Catalog.

Auxiliary Portrait Lenses.

No. 20H1158 In making portraits with the ordinary short focus folding hand camera, the great difficulty heretofore has been the small size of the faces. This portrait lens, however, entirely overcomes this difficulty and enables anyone with any kind of a folding camera to make portraits in which the faces are large and distinct. Constructed in the same style and used in same manner as the Enlarging Lens No. 20H1155. Shipping weight, 3 ounces.

No. 1. Suitable for any ordinary 4x5 or 5x7 lens, provided the outside diameter of same does not exceed 1¼ inches. Mounted in brass, with black enamel finish. Price **38c**
For larger sizes see Special Camera Catalog.

Auxiliary Wide Angle Lenses, 38 Cents.

No. 20H1159 These lenses used in connection with the regular lens of any folding camera, increase in the angle of view and are useful for interior work, etc. Made in one size only, adjustable to fit any ordinary 4x5 or 5x7 lens, the outside diameter of which does not exceed 1¼ inches. Same style as the Auxiliary Portrait lenses and Copying lenses. Shipping weight, 3 ounces. Price **38c**

Auxiliary Telephoto Lenses, 38 Cents.

No. 20H1160 These lenses are useful in photographing distant objects where the size of image is not large enough with the regular lens alone. They are made of the same style as the other auxiliary lenses described above, mounted in brass, with black enamel finish. They are adjustable to fit any ordinary 4x5 or 5x7 camera, the lens of which does not exceed 1¼ inches in diameter. Shipping weight, 3 ounces.
Price **38c**

Auxiliary Lens Sets (four pieces), Reduced to $1.95.

No. 20H1162 These sets contain one copying and enlarging lens, one portrait lens, one ray filter and one duplicator, all contained in a beautiful plush lined leather case. The lenses in these sets are made in one size only and are adjustable to fit any ordinary 4x5 or 5x7 camera, the lens of which does not exceed 1¼ inches in diameter. Shipping weight, 12 ounces.

pic Metal Tripods, $1.55 to $4.60.

These new Telescopic Metal Tripods are the lightest and most compact tripods on the market. They are very convenient under all conditions, but are especially desirable when traveling, owing to their exceedingly compact form when folded and their comparatively light weight. They are very carefully made and finely finished throughout, and while not possessing the extreme rigidity of the larger and heavier wooden tripods, they are at the same time entirely satisfactory for use with cameras of moderate weight, and in all cases where a light, compact outfit is desirable we recommend them in preference to any other tripod.

No. 20H726 Telescopic Metal Tripod, three sections. Length, when extended, 44 inches; when closed, 17 inches. Adapted to light weight 4x5 or smaller cameras. Shipping weight, 22 ounces. Price **$1.55**

Large Oil Ruby Lamp, 54 Cents.

54c

No. 20H1210 This is an extra large high class oil burning darkroom lamp, made on improved and scientific plans. It is provided with a new patent burner, giving a volume of light never before secured with lamps of this style, and the general construction is such as to insure perfect combustion without smoke or odor. It is made with hinged metal front, which can be placed at any angle to regulate the volume of light and is fitted with both orange and deep ruby glass, insuring a perfectly safe or non-actinic light. The light can be turned up or down without opening the lamp. The height of this lamp is 10⅝ inches; size of glasses, 4⅝x5½ inches. (Not mailable.) Price..... **54c**

Medium Size Oil Ruby Lamp, 33 Cents.

No. 20H1211 This lamp is made exactly the same as the large lamp No. 20H1210, but is smaller, measuring 8⅛ inches high, with ruby and orange glasses 3⅝x4⅝ inches. (Not mailable.) Price..... **33c**

Electric Darkroom Lamp, 90 Cents.

No. 20H1212 This Darkroom Lamp is designed for the use of those who have connection with a regular electric lighting current. It is constructed of metal, cylindrical in shape, and has an opening at the top so that it may be fitted over an ordinary incandescent lamp. If hung directly over the developing table it affords a very clean and convenient method of darkroom illumination. The bottom is provided with a deep ruby glass, and the body of the lamp is provided with openings so arranged that by revolving the outer portion of the lamp, either a white light or a yellow light may be obtained. Shipping weight, 20 ounces. Price..... **90c**
This price does not include the electric bulb.

Ruby and Orange Glass.

"Complete Instructions in Photography"

FREE WITH EVERY CONLEY CAMERA.

"Complete Instructions in Photography" is an instruction book that is different from all other instruction books. It was written expressly for the beginner in photography. It explains everything fully, clearly and in detail, and it does not assume any previous knowledge on the part of the reader. It explains all those little points which the writers of other instruction books assume the beginner to know in advance and which he is thereby forced to find out for himself, often at the expense of much valuable time and costly materials. "Complete Instructions in Photography" starts at the very beginning. It tells you everything that you need to know about cameras, all about the various apparatus and accessories used in photography. It tells you all about the various materials, including plates, sensitized papers, chemicals, etc. It tells you everything that you need to know, and tells it in a clear, simple and easily understood manner, which enables you to make good pictures right from the start.

With every camera that we sell we include without any extra charge whatever a copy of "Complete Instructions in Photography." Or, if you will send us an order, amounting to $3.00 or more, for photographic materials of any kind, we will include free of charge a copy of "Complete Instructions in Photography," provided you state in your order that you desire it.

Glass Stoppered Bottles.

These well made clear glass bottles are very desirable for all photographic chemicals. The narrow mouth style is most suitable for liquids such as developers or any other photographic solutions. The wide mouth style may also be used for liquids, and in addition is very fine for dry chemicals. Chemicals purchased in cartons, tins or common bottles may be transferred to these bottles, the stoppers of which fit perfectly airtight, and their keeping qualities thus prolonged. Each bottle has its own individual stopper ground into its neck, thus insuring a perfect fit. (Not mailable.)

matic Daylight Development Plates by the Tank Method.

ern process of developing plates is rapidly taking f the old method of development in flat trays and any advantages. The plates to be developed are the tank, which is filled with a weak developer, **left in for a certain specified time**, which may be the extent to which the developer is diluted. ess **is extremely simple and easy.** The exposed number from one to twelve, are placed in the tank room, and the tank may then be carried out into At the end of a certain specified time, ten minutes, utes or an hour, according to the strength of the ed, development is complete. It is not necessary to nk nor examine the plates during development, as is entirely automatic. When the right length of lapsed, the plates are **correctly** developed.

reible Brass Developing Tanks.

the tanks may be turned over or reversed during of development. This reversing insures negatives of form density throughout. While excellent results in non-reversible tanks, we strongly urge the use hat can be reversed, to avoid any chance of un-r in the negatives.

ize of these tanks, in comparison with other re-s, makes them very economical, as they require ne-half as much developer as reversible tanks of **the 4x5 tank,** for example, when filled with one **requiring** only about 18 ounces of developer.

n our illustration, these tanks are provided with **adjustable** rack so designed that plates of various **developed** in the same tank. For example, Tank may be used for either 4x5, 3¼x5½ or 3¼x4¼ by changing the position of or removing the ion in the rack. Their capacity is twelve plates, plates in a groove, back to back.

ible tanks are very carefully made throughout of **avily nickel plated both inside and out,** so they ion of hypo, as well as the various developers, ble for both fixing and developing.

For Plates	Price
4x5, 3¼x5½ or 3¼x4¼	$2.75
5x7, 3¼x5½, 4x5 or 4¼x6½	3.60
6½x8½, 5x8, 5x7 or 4¼x6½	5.85

Thermometer, 18 Cents.

399 Thermometer for photographic use. Very using developing tank. Price.....18c

Changing Bags.

ging bags are exceedingly well made, perfectly d easily handled. They are made from a fine ck sateen, lined with the best grade of black making them absolutely light tight.

For Plates	Price
4x5 or smaller	$1.10
5x7 or smaller	1.40
6½x8½ or smaller	1.50
8x10 or smaller	2.10

Non-Reversible Brass Developing Tanks.

These tanks are constructed throughout of brass and heavily nickel plated both inside and out, so that they may be used for fixing as well as developing. They are fitted with removable plate rack with six wide grooves to hold the plates, the total capacity of each tank being twelve plates if they are placed two in a groove, back to back.

These tanks are provided with a light tight tube on the inside, extending to the bottom of the tank and connecting with a funnel at the top, through which the tank is filled with developer, which thus enters the tank at the bottom, insuring thorough circulation.

After developing and fixing the plates in this tank it may be used very conveniently as a wash box, the water passing to the bottom of the tank through the tube and running off at the top, thus insuring the perfect elimination of all hypo, both from the plates and from the tank itself, so that by the time the plates are thoroughly washed, the tank is also perfectly clean and ready to be used again for developing.

Catalog No.	For Plates	Price

20H1334	6½x 8½	3.00
20H1335	8 x10	4.50

Non-Reversible Zinc Developing Tanks.

These tanks are of the same style as our nickel plated brass tanks, but are made of zinc instead of brass, and are therefore suitable for developing only, and cannot be used for fixing. Well made throughout, and so arranged that when the developer is poured in, it passes through a light tight tube and enters the tank from the bottom. They are provided with lifting bottom, and the capacity of each tank is twelve plates, if placed two in a groove, back to back. **For developing only, they are just as satisfactory as the higher priced non-reversible brass tanks.**

The New Conley Pivot Bearing Silent Shutter.

No. 20H851 The Conley Pivot Bearing Silent Shutter is a shutter for studio cameras that is absolutely noiseless in opening. The photographer who has experienced repeated failures by reason of a child or a member of a group looking at the lens at the critical moment because he heard the click of the shutter will appreciate this new instrument, which opens with absolute silence. The wings as they open come to rest against the air cushions in the cups at the sides, thus avoiding all sound. A large rubber bulb and 6 feet of rubber tubing are furnished with each shutter.

This new Pivot Bearing Shutter is made with steel frame and conical brass pivot bearings with adjustable set screws for taking up any play that may arise. It will last a lifetime. A cheaper style of the Conley Silent Shutter is made without the conical pivot bearings and the steel frame, but the pivot bearing shutter is so much superior to the older and cheaper style that we no longer carry the older style in stock, although we can furnish same, if specially desired, and prices will be quoted upon application.

The Conley Silent Shutter is placed back of the lens on the inside of the front board. In ordering this shutter, both the diameter of your lens and the size of your front board must be taken into consideration.

Diameter of Opening	Outside Dimensions of Shutter	Price
1 inch	2¼x3¼ inches	$4.50
1½ inches	2¾x4 inches	4.50

Glass in printing frame is necessary when printing from film negatives, also when using glass negatives that are smaller than the frame. Our frames are fitted with the finest imported glass, guaranteed absolutely free from blemishes of any kind.

Conley Post Card Printing Frame.

This New Printing Frame is designed especially for printing post cards on developing papers. It is not suitable for printing-out papers. It is so constructed that it will take any negative from 4x5 or 3¼x5½ up to 6½x8½ inches. It is particularly desirable with 5x7 negatives, as any part of the 5x7 negative may be printed from. This frame is constructed in two parts which are hinged together, and when opened up the negative is placed in position so that just that portion which is desired on the post card is opposite the opening. Closing the frame clamps the negative so that it need not be disturbed as successive prints are made, as only the small door in the back is opened to put in the post card. Our illustrations will undoubtedly show clearly the manner in which this frame operates. It is exceedingly convenient to use, as it is very much more rapid and much handier than the old style frame. The outside measurements are 8x10 inches and the size of the opening is 3½x5½ inches.

NOTE—If 3¼x5½ negatives are used it is necessary to add a piece of 6½x8½ plain glass and a 3¼x5½ mask, as the opening is larger than this size negative.

No. 20H1420 Conley Post Card Printing Frame, as illustrated. Shipping weight, 30 ounces. Price.....95c

No. 20H1421 Conley Post Card Printing Frame, same as No. 20H1420, but with 6½x8½ plain glass and mask for using 3¼x5½ negatives. Shipping weight, 40 ounces.

Price $1.00

Manning's Masks, 19 Cents.

Every package contains a large assortment of fancy and novel designs.

Made from tough opaque paper, and designed to be placed between negative and sensitized paper while printing, thus producing oval, circular or various fancy shaped prints from any negative. The illustration shows only one of the many sizes of styles. Made in the following sizes:

For Pictures		Outside Measurement

PLAIN, CLOUDED AND SCENIC BACKGROUNDS.

Clouded Design No. 21.

THE BACKGROUNDS which we illustrate herewith and the many additional designs which we illustrate in our **Special Camera Catalog are all new and up to date.** They have been very carefully selected from a large number of designs submitted to us by the best background painters, and they include only the most popular designs used by the best amateurs and the most well known professional photographers. It is not alone the design that makes a good background, but the painting of that design in a way that will give the proper quality when photographed, and our backgrounds are unexcelled in their photographic qualities.

Clouded Headgrounds.

No. 20H1650 Clouded Headgrounds furnished in designs Nos. 21 and 24, illustrated herewith. These clouded grounds can be used in different positions and are suitable for either right or left light. Different effects can be produced by changing the position of the ground.

Size, 4x4 feet. Price.....$0.75
Size, 5x6 feet. Price..... 1.00
Size, 5x7 feet. Price..... 1.35
Size, 6x8 feet. Price..... 1.98
Size, 6x15 feet (6x8 design with 7-foot floor extension). Price.....$3.60

Other designs are shown in our Special Camera Catalog.

Clouded Design No. 24.

Flexible Backgrounds.

No. 20H1651 THESE GROUNDS are just the thing for home portrait work. The design is stained instead of being painted in the ordinary manner, so they may be folded or rolled up without the slightest damage. The absence of paint makes them very light, and the stained design photographs just as effectively as a painted design. Their convenience will appeal to everyone who is interested in home portrait work.

We furnish these special flexible backgrounds in designs Nos. 21 and 24 illustrated herewith.

Size, Feet	Shipping Wt., Ounces	Price	Size, Feet	Shipping Wt., Ounces
4x4	13	$0.98	6x8	29
5x6	19	1.30	8x8	37
5x7	22	1.60	8x10	45

For portraits showing just the head and shoulders or 5x7 size is suitable. For full figure portraits 6x8 is best, and for small groups the 8x8 size will do. 8x10 is better.

Scenic Design No. 42.

Scenic Design No. 44.

Scenic Design No. 45.

Plain Grounds in Black or Blue-White.

No. 20H1660 These are perfectly plain, flat tinted backgrounds, made in two colors, blue-white and black. The black grounds are a perfect dead black and are very desirable when making portraits with Rembrandt lighting. The blue-white grounds are a very light blue, almost white, having just enough color to afford a little contrast with white draperies. They are very fine for portrait work.

Size, 5x 6 feet. Price.....$1.00
Size, 6x 8 feet. Price..... 1.90
Size, 8x10 feet. Price..... 3.20
Size, 6x15 feet, with floor extension. Price..... 3.60

OTHER BACKGROUND DESIGNS are shown in our **Special Camera Catalog, mailed free upon request.** If shown here are not just what you want, send for the Special Camera Catalog.

Scenic Backgrounds.

No. 20H1665 These new scenic backgrounds are furnished in designs Nos. 42, 44 and 45, illustrated herewith, in many other designs which are shown in our Special Catalog.

Size, 6x 8 feet. Price.....
Size, 8x 8 feet. Price.....
Size, 8x10 feet. Price.....
Size, 6x15 ft. (6x 8 design with 7-ft. floor extension)
Size, 8x15 ft. (8x 8 design with 7-ft. floor extension)
Size, 10x15 ft. (8x10 design with 7-ft. floor extension)

When ordering scenic backgrounds, state size. Also state whether you want "right light" or "left light." "Right light" falls on the left side of sitter when facing the sitter.

If mail shipment, SEND POSTAGE EXTRA, 1 CENT AN OUNCE, according to shipping

DEVELOPING PAPERS

A GRADE FOR ANY NEGATIVE

To meet the requirements brought about by the constantly increasing use of developing papers, we have greatly increased our line of Darko papers, and to make it very easy to select the proper grade and style for any kind of negative and for any desired effect, we have entirely rearranged our system of designating and labeling the different grades and surfaces.

RED LABEL.
GREEN LABEL.
BLUE LABEL.

THREE GRADES OF DARKO PAPERS

general way, Darko papers are divided into three distinct grades or classes, according to the character of on, these three grades being known as "Red Label" or Contrast emulsion, "Green Label" or Medium and "Blue Label" or Soft emulsion.

Label" Darko Papers (Contrast emulsion), are suited to soft or flat negatives. They will make good negatives which are flat on account of overexposure or underdevelopment. They are suited to negatives there is a gradual and easy blending of lights and shadows, technically known as soft negatives. They extra strong and contrasty prints from normal or hard negatives.

Label" Darko Papers (Medium emulsion), are suited to negatives of medium or average strength in which st the proper or normal degree of contrast between the lights and shadows. Negatives which have been xposed and correctly developed, usually yield the best prints when this grade is used.

Label" Darko Papers (Soft emulsion), are suited to very hard or contrasty negatives. Underexposed plates been forced in development to bring out as much detail as possible are usually harsh and contrasty, and est results with this grade of paper. Cloud effects and landscape negatives made with ray filters usually grade, and it is especially suited to portraits.

the Red Label Papers are designed primarily for soft negatives, the Green Label Papers for normal negatives, lue Label Papers for contrasty negatives, it must not be inferred that each of these various grades must se, be used with the kind of negative specified. If a print of very pronounced strength is desired from a ative, the Red Label paper may be used, and if a very soft print is desired from the same negative, the paper should be used. In a general way, a lack of contrast in the negative is offset by using a paper of trast, and a great degree of contrast in the negative is offset by a paper of special softness.

as contrast and softness are concerned, developing papers (whether of our brand or of other makes), y little flexibility in any one grade. Modifications of the developer make some slight variations possible, the exact effect wanted from any given negative, it is essential that the proper grade of paper be selected. f little experience in the use of developing papers are advised to experiment with different grades until in judging the negative is acquired, after which it is very easy to decide, merely from an inspection of the hich grade of paper will produce the best print.

its are made on each grade of Darko Paper from a hard contrasty negative, the Red Label paper will give sh print with chalky high lights, very black shadows and very little or no detail. The Green Label paper better print, but not a perfect one, and the Blue Label paper will give as good the negative is capable of yielding.

its are made from an average negative with well balanced lights and shadows, negative of neither pronounced contrast nor softness, the print on Red Label paper ing and contrasty, with perhaps a slight loss of detail in the halftones, the Green r will give a perfect print, as good as the negative is capable of yielding, and the ue Label paper will be a little flat but with full detail.

ts are made from a very soft or flat negative, the print on Red Label paper will od well balanced, as good a print as the negative is capable of yielding, the Green will be a little flat but with full detail and the print on Blue Label paper will l lifeless, a poor print.

EASY TO HANDLE.

rko papers are very easy to work, as only a few moments are required for printing, ping takes but a few seconds, after which the prints are fixed and washed in the ner, and the pictures are complete. In simplicity, ease of operation, beautiful l as a time saver, Darko papers are unrivaled.

may be made at any time—on dark cloudy days or at night, and any kind of be used, a kerosene lamp, gas jet, electric light, or diffused sunlight.

pared with developing papers of other makes, Darko possesses great latitude in t, and slight errors in underexposure or overexposure are readily corrected in the Underexposed prints may be brought out fully by simply leaving them in the little longer, and overexposed prints may be saved by removal from the developer oper. The picture does not flash up almost instantaneously in the developer as developing papers, but comes up slowly and evenly, the period of development from five to ten seconds, thus permitting the operator to watch the progress of t and avoid mistakes.

THE VARIOUS SURFACES—Glossy, Velvet, Matte, Rough.

Each grade of Darko paper, the Red Label, the Green Label, and the Blue Label, is furnished in a variety of surfaces, and while the character of the surface has a slight influence upon the amount of contrast in the finished print (for example, with the same negative a glossy paper will give slightly more contrast than a matte surface paper of the same emulsion), still, the difference in contrast, due to surface, is very slight and may, as a rule, be ignored. The question of surface is almost entirely one of personal taste, and we furnish the Darko papers with Glossy, Velvet, Matte and Rough surfaces.

The Glossy surface, as the name implies, is very smooth and has a high polish, the same as gelatin printing-out papers. Prints should be burnished or squeegeed to bring out the full degree of glossiness.

The Velvet surface may be described as semi-glossy or as a very fine grained matte. It is of a velvety texture, midway between the Glossy and the Matte surfaces, having just a slight gloss.

The Matte surface is just slightly rough—a perfectly dead surface without any gloss, and the picture, to a slight extent, seems to sink into the paper.

The Rough surface is similar to the Matte surface but of much coarser grain, and produces very artistic effects, both for portraits and landscapes.

When it is essential to bring out the greatest possible amount of fine detail in a print, the Glossy papers are best, the Velvet papers ranking second and very nearly as good in this respect, the Matte papers third and the Rough papers fourth.

D LABEL PAPERS.

INDIA-TINT DARKO—Green Label.

No. 20H1617 India-Tint Darko is coated upon a special extra heavy rough surface stock, of soft India tint color, so the high lights in the picture are a delicate sepia or cream color. This paper is handled just the same as the other grades of Darko, and the India tint of the paper in contrast with the rich blacks of the picture gives an effect that is unique and exceedingly artistic. Unusually pleasing effects are obtained by using the Darko Sepia Toner with this paper, as the delicate cream tint of the paper harmonizes beautifully with the warm sepia tones, imparting to the picture the soft delicacy of an old etching.

Each package contains twenty-four sheets.

DARKO POST CARDS

WE HAVE ALWAYS MAINTAINED THE VERY HIGHEST STANDARD OF QUALITY in our Darko Post Cards. They are coated upon the best imported stock, the highest priced stock that the European market affords. They are rich in silver, the most important ingredient of the emulsion, and every other chemical used in compounding the emulsions is of the highest standard of purity. Only the very highest grade of imported gelatin is used. The finished cards undergo the closest inspection before they are packed, each individual card being subjected to the closest scrutiny for blemishes or imperfections, and every one that shows the slightest defect of any kind is thrown out.

We intend to continue this high standard of excellence in our Darko Post Cards regardless of cost, because we believe that the majority of our customers appreciate the quality of these cards and are willing to pay the price which this standard of quality necessitates. Darko Post Cards should not be compared in any way with cards sold by other dealers at less than $2.00 per gross. They are not cheap cards. They are in the $2.00 class and our price, $1.35 per gross, 69 cents per one-half gross, represents a saving to the purchaser of 65 cents per gross, or 32½ per cent.

A saving of 32½ per cent is worth making, and our price for the Darko Post Cards, $1.35 per gross, is just 32½ per cent less than the price asked by other dealers for cards of **equal merit.** Darko Post Cards are not an experiment. We have been selling them now for more than eight years. They are in daily use in many of the very best card studios of this country, and they have stood the test of time.

Sensitized Post Cards enable you to make delightful souvenir postals from your own negatives. For the amateur they offer a means of making post cards that will be far more interesting than cards which might be purchased ready made. For the professional they are big money makers, as cards made with local views meet with ready sale everywhere at prices which allow a handsome profit. All of our Sensitized Post Cards are of the same size and style as the regular U. S. Government postals, 3¼x5½ inches, sensitized on one side and divided into spaces for correspondence and address on the other side.

To print post cards from negatives 4x5 or smaller use a 4¼x6½, or a 5x7 printing frame with glass. To print from negatives 3¼x5½ use a frame with glass. For negatives 5x7 or larger use a frame of the same size as the negative, without glass. **For Special Post Card Frame,** see page

Make post card prints from your favorite negatives and keep them in a Post Card Album. We show a fine line of new and attractive Post Albums on page 763, albums of unusually high quality and all quoted at astonishingly low prices. These albums are handsome in appearance, convenient to use, as the cards are put in without pasting and can be easily removed and rearranged to make room for new ones.

Darko Post Cards, 69 Cents per Half Gross.

We furnish Darko Post Cards in three grades, Red Label for soft negatives, Green Label for normal negatives and Blue Label for hard negatives and each grade is furnished in three surfaces, Glossy, Velvet and Matte. The characteristics of these various grades and surfaces in the Post Cards are just the same as in the regular Darko Papers described on the preceding page. We particularly recommend the Blue Label Cards for portraits, as the average portrait negative is rather contrasty and requires a soft working paper for the best results.

Argenteus Post Cards, 55 Cents per Half Gr

To meet the competition of other makers who are now putting out post cards of qualities at less than $2.00 per gross, we furnish our new Argenteus Post Cards. We recommend these cards as equal in every way to any cards sold by others at less than gross. We recommend them as very much superior to most of the low priced cards in the market. Owners of post card studios will find these Argenteus cards at the prices, very attractive. They are good cards, coated on full weight imported stock, go out under our guarantee to replace every card found defective in any way or refund money in full, if you do not find them entirely satisfactory.

The Argenteus Post Cards are furnished in one grade only, Green Label emulsion), suitable for the average negative, and particularly adapted to the style usually made in post card studios. The amateur will find them very satisfactory for work, including landscape and other similar subjects, as well as portraits.

PRINTING-OUT PAPER, BROMIDE PAPER AND BLUE PRINT PA

10 CENTS PER DOZEN FOR THE 4X5 SIZE

DU VOLL'S GELATIN PRINTING-OUT PAPER

OTHER SIZES IN PROPORTION.

DU VOLL'S PAPER IS VERY EASY TO WORK. It is printed by sunlight and may be toned in an ordinary gold toning solution that anyone can make up without the slightest trouble. After toning the prints are fixed in a plain hypo bath, a simple solution made by dissolving hypo in water, and after fixing they are washed in clear water. It may also be worked by the combined toning and fixing process in which the prints are toned and fixed in one solution, this being a still simpler and easier method of working. The entire process of printing, toning, fixing and washing is very simple and very easy. No darkroom is required, and good results, even in the hands of a beginner, are practically certain.

PRINTS BY SUNLIGHT.

ANY DESIRED TONE. Prints made on Du Voll's Gelatin Printing-Out Paper may be toned to any desired shade from a very warm sepia to a deep purple, or by using a platinum toning bath they may be toned to a rich black. The surface is glossy, and if the prints are squeegeed they have an exceptionally brilliant luster. Gelatin printing-out papers are especially desirable where it is necessary to preserve absolutely all the detail that exists in the negative. No other paper preserves detail so perfectly as a gelatin printing-out paper.

IMPORTED STOCK. Du Voll's paper is coated on the very best grade of imported stock. Only the very finest quality of imported gelatin, together with chemicals of the highest degree of purity, are employed in preparing the emulsion for it. The emulsion is very rich in silver, the most important ingredient of sensitized papers, as the brilliancy, richness and detail of the finished prints depend largely upon the purity and quantity of silver in the emulsion.

INSPECTED AND SORTED. Du Voll's paper is very carefully sorted and thoroughly examined before it is packed. Every sheet is subjected to the most rigid scrutiny for blemishes or imperfections of any kind, and we absolutely guarantee every sheet of this paper to be perfect. Every gross will yield 144 perfect prints.

No. 20H1702 Du Voll's Printing-Out Paper.

Size		Price, per Dozen	Price, per Gross
2½x 2½		7c	$0.68

To those who prefer to purchase "ready to use" tions we recommend our Darko Developing powder Developing powder see page 760) dissolving ounces of water, instead of 4 ounces as directed papers.

Azuro Blue Print Paper.

Blue Print Paper affords the simplest process known for producing a photographic print, as it requires no chemicals of any kind. It is simply printed by sunlight in the ordinary manner and then washed in clear water which completes the process of making a finished blue print photograph. The prints are a brilliant blue and white color, and the extreme simplicity, low cost and beautiful results make this paper well worthy of the popularity it has always possessed. Azuro Blue Print Paper is an unusually high grade paper, coated on the very best quality of imported stock, and the prints possess a brilliancy, depth and clearness that is unequaled by other blue print papers.

This paper is put up in hermetically sealed tin cans, twenty-four sheets to a can.

DRY PLATES AND FILMS

BLUE LABEL ROEBUCK DRY PLATES.

The Blue Label Roebuck Dry Plates are coated on the finest grade of imported glass, carefully sorted, and guaranteed to be free from bubbles, scratches or other imperfections. The emulsion is rich in silver, yielding strong, vigorous negatives, with a wealth of detail and no tendency whatever toward fog. Negatives made with Roebuck Plates are of perfect printing quality, equally suited to either developing papers or printing-out papers, clear, clean, brilliant negatives that will please the most exacting operator.

Roebuck Dry Plates are designed especially to meet the requirements for general all around photography and we recommend them for landscapes, architectural subjects, general instantaneous work, portraits in the studio or in the home, groups and general commercial work. They are absolutely reliable, uniform in speed and quality, and adapted to the widest possible range of work.

EXTREME RAPIDITY. The Blue Label Roebuck Plates are extremely rapid, ranking in speed with such well known brands as Seed's No. 27, Hammer's Special Extra Fast, Stanley, Standard Extra, Standard Orthonon, Cramer's Crown or Cramer's Instantaneous Isochromatic. The high speed of these Blue Label Plates makes them especially desirable for subjects where the use of small diaphragms is necessary, and for instantaneous work under poor conditions. Moreover, these plates are easy to work because they permit unusual latitude in exposure, thus greatly reducing the possibility of failure by over or under timing, and they produce strong, vigorous negatives of the finest possible quality.

We are plates sold at lower prices than we quote, but we challenge any dealer to furnish a plate equal to our Blue Label quality at the price we ask.

No. 20H1775 Blue Label Roebuck Dry Plates.

Roebuck Orthochromatic Plates.

Roebuck Orthochromatic Plates are of the same speed as our regular Blue Label Plates, but are especially sensitive to orange, yellow, green and certain shades of red. With ordinary plates, the reds in a picture take almost black, the blues come out nearly white and shades of yellow and orange take just the same as red, black or green, but with the Roebuck Orthochromatic Plates the true relative values of all these colors are properly brought out.

The sensitiveness of the Roebuck Orthochromatic Plates makes them especially suitable for landscape views, portraits of all subjects in which color values are particularly important such as flowers and paintings. Landscapes made with these plates possess a brilliancy and a contrast that cannot be obtained with ordinary plates. Flowers, paintings of highly colored subjects can be successfully photographed only with Orthochromatic Plates and the value of these plates in the studio for portrait work has always been recognized by the most successful photographers.

Roebuck Orthochromatic Plates do not actually produce colored photographs but they show the various colors in their true relative values.

No. 20H1776 Roebuck Orthochromatic Plates.

Roebuck Double Coated Orthochromatic Plates

Roebuck Double Coated Orthochromatic Plates combine the advantages of both non-halation plates and color sensitive plates. They possess the same sensitiveness to orange, yellow, green and red which distinguishes our Orthochromatic Plate, resulting in negatives with correct color values and, by virtue of the double coating, perfectly free from halation.

With these plates interior views may be made directly against bright windows or open doors without the slightest trace of halation. They preserve perfect detail in tree tops outlined against a bright sky; they add wonderfully to the detail and brilliancy of white draperies, and they are indispensable in photographing clouds, snow scenes and marine subjects.

Roebuck Double Coated Orthochromatic Plates are coated first with a slow orthochromatic emulsion which is allowed to dry as usual, after which they are again coated with an extra fast orthochromatic emulsion, resulting in a plate of the same speed as the Roebuck Blue Label or Orthochromatic Plates.

We recommend the use of these plates exclusively for any and all photographic work, indoors or outdoors, time exposures or instantaneous exposures.

No. 20H1777 Roebuck Double Coated Orthochromatic Plates.

Hammer's Lantern Slide Plates.

No. 20H1794 Hammer's Lantern Slide Plates. Extra high grade plates for lantern slide making. Standard size, 3¼x4 inches.

Price, per case (30 doz.), $12.37; per dozen.....44c

ANSCO FILM.

For use in any Kodak, Buckeye, Ansco, Hawkeye or Seroco Film Camera.

Ansco film is put up in regular daylight loading cartridges of either six or twelve exposures and is adapted to any modern make of the daylight loading film camera, including the Eastman Kodaks and the Seroco Film Cameras. This film is made by one of the largest and best known film makers in the world and is guaranteed by them to be equal to any film on the market regardless of price. We will replace with new film or return the purchase price of any Ansco film found defective to the slightest extent.

No. 20H1825 Ansco Film for pictures 1½x2. Fits the OLD STYLE $5.00 POCKET KODAK.
Price, per 12-exposure roll.....21c

No. 20H1826 Ansco Film for Pictures 2¼x2¼. Fits the following cameras:

No. 20H1837 Ansco Film for pictures 7x5. Fits the following cameras:
No. 5 CARTRIDGE KODAK.
Nos. 7D, 7E and 7F AL VISTA.
Price, per 6-exposure roll.....$0.67
Price, per 12-exposure roll.....1.34

No. 20H1838 Ansco Film for pictures 4¼x6½. Fits the following cameras:
No. 4A FOLDING KODAK. No. 4A SPEED KODAK.
Price, per 6-exposure roll.....55

Osaka Transparent Water Colors, 18c.

No. 20H1905 This outfit consists of a box of twelve dry colors in pans. It contains one pan each of blue, yellow, brown, pink, violet, magenta, orange, green, red, new rose, white and black. Shipping weight, 3 ounces. Price.....18c

Litmus Paper, 8 Cents.

No. 20H1913 Red Litmus Paper, turns blue if the solution is alkaline. Shipping weight, 3 ounces.
Price, per bottle.....8c

No. 20H1914 Blue Litmus Paper, turns red if the solution is acid. Shipping weight, 3 ounces. Price, per bottle.8c

Opaque, 20 Cents.

No. 20H1916 This is a preparation for blocking out or rendering opaque certain portions of negatives, also for spotting out imperfections and covering skies or backgrounds. It is very easily applied to the negative with a moistened camel's hair brush. Shipping weight, 3 ounces. Price, per box.....20c

Polish for Squeegee Plates, 10 Cents.

No. 20H1920 This is a dry preparation for polishing ferrotype or squeegee plates to prevent the prints from sticking. Shipping weight, 2 ounces. Price, per box.....10c

Soline, 30 Cents.

No. 20H1925 A solution for sensitizing cloth, paper or other materials. It is very easily applied and the material sensitized with it is printed just like an ordinary printing-out paper. Shipping weight, 10 ounces.
Price, per 2-ounce bottle.....30c

Blue Print Powder, 13 Cents.

No. 20H1933 A preparation for sensitizing paper, cloth, cards or other materials for making blue prints. The powder is merely dissolved in water and the solution applied to the paper or cloth with a camel's hair brush. With this preparation you can make blue prints on any kind of paper, including your letter paper, or on cloth of any kind, making pretty blue pictures for sofa pillows, tidies, banners, etc. Shipping weight, 3 ounces.
Price, per 1-ounce bottle, sufficient for 8 ounces solution..13c

Darko Soda, 33 Cents a Pound.

No. 20H1941 A combination of sodium carbonate and sodium sulphite with certain secret ingredients. Used instead of the ordinary sulphites and carbonates in preparing developers for prints, it prevents friction marks. Developers made with this soda produce good, clear, clean prints from paper too old to produce good prints with ordinary developers. Shipping weight, 20 ounces. Price, per pound.....33c
Full instructions for preparing developers with this soda are enclosed with each package.

Hydro-Metol Developer, Liquid, 18 Cents.

For plates.

No. 20H1945 We consider this our best liquid developer as it is a very effective combination of the well known hydrochinon and metol. This developer works very rapidly, never fogs the plate and gives a very brilliant, snappy negative. (Unmailable.)
Price, per 8-ounce bottle.....18c
Not shipped during winter months on account of danger of breakage through freezing.
NOTE—We especially recommend the purchase of developers in powder form rather than in liquid form, as they ship better, there is no chance of breakage, the transportation charges are less and the cost is smaller, as the expense of bottling, compounding, etc., is saved.

Tank Developing Powders, 17 Cents.

For plates.

No. 20H1959 Put up especially for use with automatic developing tanks, and we can recommend it very highly to those who do not wish to prepare their own developers. Each package contains six powders, each sufficient to make 28 ounces of twenty-minute developer. Shipping weight, 6 ounces.
Price, per package.....17c

Hydro-Metol Darko Developing Powders, 18 Cents.

For papers. Give warm black tones.

No. 20H1936 A combination of hydrochinon and metol, together with other ingredients, put up in hermetically sealed paraffin lined tubes, each tube containing a sufficient quantity to make 5 ounces of liquid developer. The chemicals used in preparing these powders are absolutely pure, are correctly compounded and will keep indefinitely. There are six tubes in each package. Suitable for any kind of Darko paper or Darko post cards. Shipping weight, 5 ounces.
Price, per package.....18c
Metol sometimes has an irritating or poisonous effect on the skin of certain individuals, and those who are susceptible to it should select a developer which does not contain metol.

Anti-Friction Hydro-Metol Darko Developing Powders, 19 Cents.

For papers. Give olive black tones.

No. 20H1937 Put up in the same form as our No. 20H1936, six tubes in a package, each tube making 5 ounces of developer, and it is especially adapted to the glossy and velvet surface papers, including post cards. Prints made on glossy or double weight paper are sometimes disfigured by dark lines or markings, known as friction marks, and the use of this special anti-friction developer prevents the appearance of these marks. Shipping weight, 5 ounces.
Price, per package.....19c

Darko Amidol Developing Powders, 18c.

For papers. Give blue black tones.

No. 20H1938 Put up in the same form as No. 20H1936, and will yield splendid results with any of the Darko papers or post cards. There are six tubes in a package, each tube making 5 ounces of developer. The fine blue black tones which Amidol yields with Darko papers make this a very popular developer. Shipping weight, 5 ounces. Price, per package.....18c

Edinol Anti-Friction Darko Developing Powders, 19 Cents.

For papers. Give olive black tones.

No. 20H1939 Put up in the same form as the other Darko developing powders, six tubes in a package, each tube making 5 ounces of developer, and not only prevents friction marks, but makes clean whites possible on old papers which would show more or less chemical fog with other developers. Shipping weight, 5 ounces. Price, per package.....19c

Darko Sepia Toner, 32 Cents.

No. 20H1948 This is a special toner, adapted for use with any of the various styles of Darko paper. With this preparation prints on Darko paper may be toned to a beautiful light brown or sepia color. Its use is very simple, the results are pleasing and artistic and it may be used with any kind of Darko paper. Prints to be toned with this preparation must first be developed in the regular way, the toning being an additional operation. Darko Sepia Toner is put up in the same form as Darko Developer, six hermetically sealed tubes in a package, each tube making 4 ounces of liquid toner. Shipping weight, 5 ounces.
Price per package (6 tubes).....32c

Hydro-Metol Developing Powders, 17c.

Contrast Formula, for plates or films.

No. 20H1951 Put up in hermetically sealed tubes, six tubes to the package, each tube making 5 ounces of developer. They are compounded from a special formula which yields negatives of great brilliancy and a marked degree of contrast. Shipping weight, 5 ounces.
Price, per package.....17c
See note in first column regarding Metol.

Hydro-Metol Developing Powder, 18c.

Soft Formula, for plates or films.

No. 20H1953 Put up in the same style as No. 20H1951, but are compounded from a modified formula that yields soft negatives with abundant detail. We particularly recommend these powders for plates which are to be printed on developing papers, as soft negatives yield better results as a rule with developing papers than negatives of great contrast. They are put up six tubes to a package, each tube making 5 ounces of developer. Shipping weight, 5 ounces. Price, per package.....18c

Elko-Hydro Developing Powders, 17c.

For plates or films.

No. 20H1955 A combination of eikonogen and hydrochinon, put up in the same manner as the other developing powders, six hermetically sealed tubes to the package, each making 5 ounces of developer. They produce bright, snappy negatives and are recommended for general all around work. Shipping weight, 5 ounces. Price, per package.....17c

Eikonogen Developing Powders, 17 Cents.

For plates or films.

No. 20H1957 Put up in the same style as the developing powders listed above, six hermetically sealed tubes in a package, each tube making 5 ounces of developer. Eikonogen is noted for its soft and delicate effects and excellence of detail. We recommend this developer highly, especially for portrait work. Shipping weight, 5 ounces.
Price, per package.....17c

Ortol Developing Powders, 17 Cents.

For plates or films.

No. 20H1958 A comparatively new developing agent which may be described as a happy medium between metol and pyro, giving negatives of perfect printing quality, with delicate halftones and details. It keeps indefinitely in solution and may be used repeatedly. These powders are put up in the same manner as our other developers, six hermetically sealed tubes in package, each tube making 5 ounces of developer. Shipping weight, 5 ounces. Price, per package.....17c

Toning and Fixing Solution, 16 Cents.

No. 20H1960 This is a simple solution for the combined toning and fixing of Du Voll's paper or any other gelatin printing-out paper. Prints may be toned in this solution to any color, from a warm sepia to a rich purple, and as it is very rich in gold it may be used repeatedly before becoming exhausted. (Unmailable.)
Price, per 8-ounce bottle.....16c
Price, per 16-ounce bottle.....29c

Gold Toning Solution, 27 Cents.

No. 20H1962 This is a plain gold toning bath for use when prints are toned and fixed in separate solutions instead of by the combined toning and fixing process. It is used for toning Du Voll's paper or any other printing-out paper, the prints being immersed in this solution until they reach the desired color and then transferred to a plain hypo bath for fixing. Prints finished by the separate toning and fixing process are more certain to be permanent than prints finished by the combined toning and fixing process. (Unmailable).
Price, per 8-ounce bottle.....27c

Toning and Fixing Powder, 15c

No. 20H1964 When dissolved in water this powder forms a complete toning and fixing solution for Du Voll's or any other printing-out paper. It gives a variety of beautiful tones varying from a warm sepia to a dark brown. It also forms a very simple and easy means of toning and fixing prints, as no skill whatever is required in its use. This is by far the best preparation of its kind in dry form that we have ever seen. Put up in packages which make 36 ounces of solution. Shipping weight, 7 ounces.
Price, per package.....15c

Platinum Toning Solution, 29 Cents.

No. 20H1966 Gives pure platinum tones on any kind of gelatin printing-out paper in a single operation. Platinum tones are ordinarily obtained by toning first with gold and then with platinum, but with this simple solution pure platinum tones are obtained in one operation. (Unmailable.)
Price, per 8-ounce bottle.....29c

Intensifying Powders, 16 Cents.

No. 20H1970 A weak thin negative, lacking in contrast, may be greatly improved by intensification, and this powder is a very convenient means of preparing a good intensifier. It requires only to be dissolved in water to be made ready for use, forming a simple and easy method of intensification with satisfactory and permanent results. Each package makes 24 ounces of solution. (Unmailable).
Price, per package.....16c

Reducing Powders, 16 Cents.

No. 20H1972 Negatives which from overdevelopment or other causes are too dense can be quickly reduced to proper density for printing by the use of this preparation. These powders are put up in packages containing six powders and each powder makes 10 ounces of reducing solution. For use they are simply dissolved in water and a little hypo added just before the solution is used. Shipping weight, 3 ounces.
Price, per box.....

Neg-Dry, 17 Cents.

No. 20H1980 A hardening solution for either plates or papers, making the gelatin absolutely insoluble. Negatives treated with Neg-Dry may be dried in less than five minutes after they have been washed by placing them in this preparation and drying them by artificial heat. Neg-Dry also eliminates all traces of hypo that may not have been washed out of the negative. This preparation may be used over and over again. (Unmailable.) Price, per 4-ounce bottle.....

Hypo.

We furnish hypo in two forms, pea crystals and granular. The pea crystals, as the name implies, are simply small crystals. The granular is made by crushing or grinding the crystal hypo until it is about like coarse granulated sugar. This form dissolves very readily and is convenient to use. We put up both styles of hypo in airtight friction top cans so it is sure to reach the purchaser in perfect condition, clean and pure.

No. 20H2156 Pea Crystal Hypo in 1-pound friction top cans. Shipping weight, 2 pounds. Price, per pound.....4c
No. 20H2157 Pea Crystal Hypo in 5-pound cans. Shipping weight, 7½ pounds. Price, per can.....

Acid Hypo, 15c

No. 20H1985 This is a combination of very pure powdered hypo and ingredients, which, when dissolved in water, forms a very clear, clear fixing solution for plates, films or papers. It dissolves readily and quickly, making it a very convenient way for preparing the acid fixing bath, and gives unusually good results as it not only fixes but also acts as a clearing solution and hardener. Put up only in 1-pound packages, sufficient to make 64 ounces acid solution. Shipping weight, 24 ounces.
Price, per pound.....

EVERY CARD THAT WE SHOW IN THIS CATALOG and all the additional styles shown in our Special Camera Catalog is manufactured by the A. M. Collins Manufacturing Co. of Philadelphia, a con-
hose product is universally recognized
standard of excellence. They make
ade cards only; they do not manufac-
eap nor second quality cards of any

INAL SEALED PACKAGES. Our
re all put up in sealed packages, each
containing twenty-five cards of the
nd and color and are guaranteed to
he purchaser unsoiled, as clean and
the day they leave the factory. In
guarantee clean, perfect cards we
ecline to break packages and we do
less than twenty-five cards of a kind
r. We do not break packages in or-
furnish assorted colors. We cannot
cards of more than one color in the
ckage.

Collins' Amco Post Card Holders.

The Amco Post Card Holders are made of extra strong heavy cardboard, overlaid with ripple board in rich, dark chestnut brown. They are handsomely embossed and furnished with silk cord. The post card is inserted through a slit at the back and easily guided into position by means of the oval opening. These post card holders are of unusually rich, expensive appearance and afford an ideal way to display your favorite post card pictures. By attaching one of the neat calendar pads listed below, they make very appropriate gifts.

Sold only in original sealed packages.

1912 Calendar Pads.

No. 20H2222 1912 Calendar Pads suitable for attaching to Amco Post Card Holder, or for any other similar purpose. Attached by applying paste to the backs. After September 1st we send calendars for 1913.

Price, per package of six.....**12c**

Sold only in original packages.

Collins' "No. 424" Cards.

No. 20H2234 This is an original design for those who like fancy effects. Made from extra heavy stock with square corners and plain beveled edges. The wide border is heavily embossed in a strikingly handsome and novel design, in effect like a frame for the picture. The darker tint of the design around the center and also around the outer edge adds much to the attractiveness of this card, the contrast of the light and dark tints giving snap and vigor to the mount.

Colors: White, gray or Amco brown. The Amco brown is particularly pleasing.

Collins' "Lexington" Cards.

No. 20H2235 This new Collins' card is made with a decorative art design, heavily embossed in a dark tint on the plain gray or brown surface of the card. It is made of extra heavy stock, with square corners and plain beveled edges. We recommend this card as one of the handsomest of this season's new designs. **Colors: Ash gray or Burmese brown.**

Collins "Leicester" Portrait Cards.

No. 20H2273
This is an excellent mount for oval, square and horizontal photographs. It is a mount of refinement adapted to the best class of work. Made of extra heavy stock, with square corners and **colored** beveled edges. A dark rim line around the opening, repeated by a thinner line around the edges, gives it snap and brings in value the high lights of the photograph. The entire effect is delicate and subdued.

Colors: Gray, kromite or umber. Kromite is a new and pleasing shade of dark yellow. Umber is a new shade of reddish brown, excellently suited to sea prints.

Flexible Leaf Albums for Photographs.

These new and up to date Flexible Leaf Albums are made in various handsome and attractive styles of binding, and the leaves are an extra quality of chemically pure paper in the new Egyptian black tint, harmonizing with almost any kind of print, and making the albums suitable either for mat surface prints on developing paper or for glossy squeegeed prints on printing-out papers. In mounting on these thin flexible leaves it is only necessary to put a little paste on each corner or along one edge of the print.

Five different styles of binding. We furnish these albums in five styles of binding, which, for convenience in ordering, we designate as Style 1, Style 2, etc.

Style No. 1 is a fine quality of black English book cloth.

Style No. 2 is an imitation leather in a beautiful pearl gray color with heavy alligator grain. It is so perfect an imitation of leather as to deceive almost anyone, and the color and grain are remarkably handsome.

Style No. 3 is genuine leather, black, with heavy seal grain.

Style No. 4 is genuine leather, black, with horn back alligator grain.

Style No. 5 is extra quality genuine leather, brown in color, beautifully shaded with handsome horn back alligator grain.

Each album contains 50 leaves.

POST CARD PROJECTORS $1.87 TO $12.3

THE MODERN MAGIC LANTERN

Very simple and easily operated instruments which project a brilliantly illuminated and greatly enlarged image of any post card, photograph, clipping or small object of any kind on a white screen or wall.

No Glass Slides Necessary. Uses Any Kind of Picture. Pleases the Whole Family.

THE PICTURES ON THE SCREEN are from 3 to 5 feet across and look just like stereopticon or magic lantern views, but the expensive glass slides which are necessary with the old style magic lantern are not required. These new projectors use any photograph, post card, any picture cut from a magazine or newspaper, your own drawings, or any small flat object, such as a butterfly, a leaf, a pressed flower or a watch, and the object or picture is accurately projected onto the screen greatly enlarged, sharp and clear in all its details and in all its own natural colors.

THE LENSES. The most important part of a projection machine is the lens, and every one of our projectors, except the Junior at $1.87, is equipped with a newly designed, specially ground double lens system which results in sharper pictures and greater luminosity than is possible with any other projector made. To this superior double lens system, aided by the improved curved picture holder, which enables our projectors to show the entire picture, sharp and clear, even to the extreme edges.

THERE ARE CHEAPER POST CARD PROJECTORS but in beauty of design and finish, durability, simplicity of operation, and brilliancy and clearness of the projected picture, there is no other make of post card projector sold at any price which compares with the machines described on this page. Even our lowest priced projector at $1.87 is carefully and accurately made, beautifully finished and guaranteed to be both mechanically and optically perfect.

Do not judge these new and scientifically designed machines by any other post card projectors you may have seen. The market has been flooded with cheap and worthless projectors which we could not consider to offer for sale, but these new projectors, as illustrated and described on this page, are made right in every way, the optical features are scientifically correct, the mechanical construction is perfect, the finish throughout is beyond criticism, and every detail of design and construction has had the painstaking attention of experts in projection apparatus.

IMPROVED MODELS FOR 1912

THE POST CARD PROJECTORS which we sold last season were mighty good machines, the best projectors ever placed on the market, but even these very satisfactory machines of last year have been greatly improved. In outward appearance they remain practically the same, but various refinements of detail, little improvements which experience has suggested to the manufacturers, make them very much easier and more convenient to operate. The big advantage, however, which these 1912 models possess as compared with last year's projectors, is due to an improved and very powerful parabolic reflector which takes the place of the multiplane reflectors used last year.

THESE NEW PARABOLIC REFLECTORS, together with a more scientific adjustment of reflector and light, enable us to guarantee that these new models will give double the illumination of last year's machines. This greatly increased illumination results in larger, brighter and sharper pictures than ever before; absolutely the best post card projectors that have ever been made.

About the Light—Electricity, Acetylene or City Gas

We furnish each of the various styles of these projectors equipped for using either electricity, acetylene or city gas.

All electric models are equipped with two high candle power incandescent electric lamps, 6 feet of double conductor electric cord, and socket for attaching to any electric light fixture. Unless otherwise requested we always send lamps suitable for 104 to 115-volt circuit.

All acetylene models are equipped with two high candle power acetylene burners, specially designed, large size acetylene generator, and all necessary connections. Carbide is not included, owing to certain insurance regulations which prevent us from carrying it in stock. This article, however, is very easily obtained at any place where bicycle or automobile supplies are sold, or at any country hardware or drug store.

All city gas models are equipped with two high candle power gas burners with 6 feet of special gas tubing, and all necessary connections for attaching to any gas fixture.

We recommend electric light or city gas where it can be used, because it is a handier than acetylene, but so far as results are concerned, acetylene gives just as good and just as bright a picture as the electric light or city gas. While it is a little trouble to use acetylene, still, there is nothing complicated or difficult about it. In our improved generator, which is guaranteed to be absolutely safe, it is only necessary to put in a little carbide, pour in a little water, and the projector is ready to use immediately.

Junior Post Card Projector, $1.87

This most remarkable little machine is designed especially for the children, yet is made good enough in every detail to give perfect satisfaction. It is equipped with a long focus single lens, permitting it to be operated at a greater distance from the screen than is possible with other similar machines, thus making a larger and sharper picture. This machine is absolutely light tight, equipped with two ventilators which keep it cool in operation, and double tops lined with cellular asbestos over the burners. It is beautifully finished, the body in red, with white, gold and black decorations. In every respect it is absolutely the best juvenile post card projector ever produced. It measures 9 inches long by 8 inches wide, and stands 10½ inches high.

Size of picture, from 3 to 5 feet across, according to distance from screen.

No. 20H2884 Junior Post Card Projector for electric light. Price.....$1.87

No. 20H2886 Junior Post Card Projector for city gas. Price.....$1.87

Read paragraph "About the Light."

Shipping weight, Junior machine, 5 pounds.

Style "A" Post Card Projectors, $3.95

Our Style "A" Projectors are remarkably effective machines at a wonderfully low price. They are equipped with the new double lens system, new parabolic reflectors and hinged backs with the new curved reversible picture holders. The tops are double and lined with cellular asbestos to prevent overheating, which is further provided against by the specially designed chimneys which afford perfect ventilation and yet confine all light within the instrument. Our Style "A" Projectors are beautifully finished in highly polished oxidized copper plate and measure 9¾ inches long, 9¼ inches wide and 7¼ inches high. **The double lenses are 2½ inches in diameter.**

Size of picture, 3 to 5 feet across, according to distance from screen.

No. 20H2889 Style "A" Post Card Projector for city gas. Price.....$3.95

Read paragraph "About the Light."

Shipping weight, style "A" machine, 6½ pounds.

Style "B" Post Card Projectors, $6.

When you see one of our Style "B" machines you wonder how they can be so finely made for so low a price. They are equipped with the new specially ground double lens, highly polished parabolic reflectors, and hinged back with new curved reversible picture holder, which loads and accommodates pictures either vertically or horizontally and not limited to pictures of exactly post card size. The tops are made double and lined with cellular asbestos to prevent overheating. Perfect ventilation, without permitting any light to escape from the machine, is secured by the large specially designed ventilating chimney. Our Style "B" Projector is very finely finished in highly polished oxidized copper and measure 11¾ inches long, 11¾ inches wide and [illegible] inches high. **The double lenses are 3¼ inches in diameter.**

Size of picture, from 4 to 7 feet across, according to distance from screen.

Shipping weight, style "C" machines, 12 pounds.

Style "E" Post Card Projectors, $12.30

This Style "E" Projector takes the place of the Style "D" which we handled last season, and as compared with last year's model, **it is guaranteed to give more than double the illumination.** Any horizontal picture up to 9½ inches long by 5½ inches high, or any vertical picture up to 7 inches high by 5½ inches wide may be inserted and held in position by the curved holder of this instrument. It represents the very highest degree of perfection in projectors, giving larger, clearer and more brilliant pictures than any other machine on the market. The new double lens system with which they are equipped consists of two extra large long focus lenses with center diaphragm, yielding pictures that are beautifully sharp and clear even to the extreme edges, and the brilliancy of the picture is still further enhanced by the new extra large highly polished parabolic reflectors. The double walls are lined with cellular asbestos fireboard which, in connection with the extra large light-tight ventilators, prevent any possibility of overheating. These instruments are provided with two sliding backs (each with curved reversible picture holders) which are entirely detached in filling to avoid jarring the picture on the screen. While one back is in position the other is being loaded and slides smoothly into position as the previous one is removed, so that one picture follows another on the screen without the undesirable interval with a blank and brilliantly lighted screen between pictures. These projectors are finished in highly polished oxidized copper plate, **hand curled,** a finish of remarkable beauty and richness to which no illustration can do justice. It must be seen to be appreciated. Size of machine, 13 inches long, 13¼ inches wide and 12¼ inches high. **Diameter of double projecting lenses, 3⅝ inches.**

Size of picture, from 5 to 9 feet across, according to distance from screen.

Each protector comes packed in a neat box with full instructions for use. Shipping weight, 5 ounces. Price **75c**

DRAWING INSTRUMENTS $1.95 TO $10

OUR GRADE A INSTRUMENTS.

Furnished in Large, Medium or Small Assortments.

OUR GRADE A INSTRUMENTS are made from the finest wrought German silver, of great elasticity, density and hardness. The tongues of the joints, needle points, and all other steel parts are made from the best English steel, finely tempered and hardened. The finish throughout is remarkably fine and so bright that the least flaw or fault in the workmanship, form or quality of material may be instantly detected.

The Compasses and Dividers in our sets of Grade A instruments are made with pivot joint, the most desirable form of head, as it permits of adjustment for taking up lost motion due to wear, and both compasses and dividers are provided with straightening device which holds the handle perpendicular to the drawing surface at all times, irrespective of the spread of the legs. The dividers in all of our sets of Grade A instruments are made with hairspring adjustment.

The Bow Instruments are of the latest type of construction with center screw adjustment and circular spring, the most satisfactory style of bow instruments yet designed. The circular spring is a particularly desirable feature, owing to the absolutely even tension at any adjustment, and the central screw affords an exceedingly convenient form of adjustment.

The Pens in all of our Grade A sets are made with unusual care, the steel being tempered to a degree of hardness which causes them to hold their points for a long time, and perfect alignment of the nibs is absolutely assured. All of our Grade A pens (except the Swedish pen in the large assortments) are made with patent release, so that the pen may be cleaned or sharpened without changing the adjustment for width of line. This release attachment is also furnished with the pen points for the Grade A compasses.

Engineers and Professional Draftsmen who make extensive use of drawing instruments will find that in every respect our Grade A instruments meet the most severe requirements. In perfection of detail; in materials, in durability, in short, in all those qualities which the experienced draftsman demands in his tools, they are equal to any instruments on the market, regardless of price.

OUR GRADE B INSTRUMENTS.

Furnished in Large, Medium or Small Assortments.

OUR GRADE B INSTRUMENTS are most carefully constructed of fine German silver and English steel, beautifully finished. They are surpassed in quality only by our Grade A instruments, and are fully equal to the instruments sold by many dealers as their finest quality.

The Compasses and Dividers in our Grade B instruments are all made with pivot joint heads, permitting adjustment to compensate for wear, and with straightening device which keeps the handle always in perpendicular position. The dividers in all our Grade B sets are made with hairspring adjustment.

The Bow Instruments are carefully made from one continuous piece of steel finely tempered, highly finished, and made with side screw adjustment.

The Pens in all our sets of Grade B instruments are very finely made, highly tempered, and (with the exception of the Swedish pen in the large assortments) are all furnished with patent release, so that the pen may be cleaned or sharpened without changing the adjustment for width of line. This release attachment is also furnished with the pen points for the compasses. In all of our sets of Grade B instruments the divider is made with hairspring adjustment.

Our Grade B Instruments are designed especially to meet the requirements of advanced students in college and mechanical courses. The good materials, fine finish and high class workmanship throughout will meet with the approval of the most exacting professors and instructors in any of our leading technical institutions. They are in use by thousands of architects and mechanical engineers throughout the country and are thoroughly practical, high class, durable instruments.

OUR GRADE C INSTRUMENTS.

Furnished in Large, Medium or Small Assortments.

OUR GRADE C INSTRUMENTS are of fine German silver and English steel construction throughout.

The Compasses and Dividers are made with pivot joint, permitting adjustment for wear, but are without straightening device.

The Bow Instruments are made with side screw adjustment and constructed from one continuous piece of steel, finely tempered and carefully finished.

The Pens are in every respect first quality instruments, spring blades, finely tempered, with points accurately ground, but are without the patent release.

While Our Grade C Instruments are not so highly finished and in many details not so perfectly constructed as our Grade B and Grade A instruments, still they are of most excellent quality, and will meet with the entire approval of students and draftsmen who wish to equip themselves at the smallest possible expense. They fulfill all requirements for school use and ordinary college work, or for the carpenter and mechanic who finds use for drawing instruments in his work.

LARGE ASSORTMENTS.

OUR LARGE ASSORTMENTS of drawing instruments which we furnish in Grades A, B and C, as listed on this page, contain fifteen pieces, as follows:

- 6-inch Compass with Needle and Pencil Points.
- Lengthening Bar for 6-inch Compass.
- Pen Point for 6-inch Compass.
- 4¼-inch Compass with Divider Point.
- Pen Point for 4¼-inch Compass.

Imperial (22x30 inches).	Price, per quire (24 sheets)..	2.03

"Saxon" Cream Drawing Paper.

No. 20H4435 Saxon Cream Drawing Paper is of a light cream color with a smooth and hard drawing surface. It is extremely tough and suitable for detail drawings, both pencil and ink. Stands rough handling well.

Width, inches	30	36	42
Price, per yard	9c	11c	13c

"Lion" Tracing Cloth.

No. 20H4440 Lion Brand Vellum Tracing Cloth is a fine imported cloth made under the Dowse patent, one side glazed and the other side dull.

Width, inches	30	36	42
Price, per yard	$0.25	$0.29	$0.39
Per roll of 24 yards	5.44	6.29	8.50

"Bond" Tracing Paper.

No. 20H4445 Bond Tracing Paper is pure white, very thin, tough and transparent with dull finish. It takes either pencil or ink well and stands erasing. Put up only in 20-yard rolls, 42 inches wide. Shipping weight, 45 ounces.
Price, per roll.....98c

"Triumph" Tracing Paper.

No. 20H4450 Triumph Tracing Paper is of medium thickness and oil finished, making it very transparent, and is a fine paper for making blue prints from or for making tracings from blue prints. Takes either ink or pencil and stands erasing well. Comes only in 20-yard rolls, 39 inches wide. Shipping weight, 48 ounces. Price, per roll.....80c

"Union Satin" Blue Print Paper.

No. 20H4455 Union Satin Blue Print Paper is of medium thickness and especially suited to architects' use. It gives a rich deep blue color and clear whites. Furnished in 10-yard and 50-yard rolls only.

Width, inches	30	36	42
Price, per 10-yard roll	$0.50	$0.57	$0.63
Per 50-yard roll	1.88	2.12	2.38

READING GLASSES

Reading glasses make it easy to read the smallest type and are very desirable in looking at pictures. They add greatly to the beauty of photographs, bringing out the details in a wonderful manner. They are also very convenient for examining any small objects for which a magnifying glass is ordinarily used. The smaller sizes have the highest magnifying power, but with the large sizes a greater area can be seen at one time.

As burning glasses these instruments are very powerful, readily setting fire to light materials like paper, shavings and dry leaves. The larger the glass the more powerful it is as a burning glass.

Pearl and Gold Reading Glass, $2.60.

No. 20H3330 Best Grade French Reading Glass with extra quality lens, gold plated rim, Oriental pearl handle, beautifully finished throughout. A powerful and very ornamental instrument. Diameter of lens, 3½ inches. Shipping weight, 15 ounces. Price.....$2.60

French Reading Glasses, 44 Cents to $2.10.

Best Grade French Reading Glasses, with extra quality lenses, nickel plated rims and black ebonized handles. These instruments are finely finished throughout and are the highest grade and most powerful reading glasses made.

Catalog No.	Diameter	Shipping Weight	Price
20H3340	2 inches	5 ounces	$0.44
20H3341	2½ inches	7 ounces	.56
20H3342	3 inches	10 ounces	.72
20H3343	4 inches	16 ounces	1.25
20H3344	5 inches	22 ounces	2.10

German Reading Glasses, 25 Cents to $1.18.

German Reading Glasses, made in the same style as the higher grade French glasses described above, but not quite so powerful and not so finely finished.

Catalog No.	Diameter	Shipping Weight	Price
20H3345	2¼ inches	6 ounces	$0.25
20H3346	2¾ inches	7 ounces	.38
20H3347	3½ inches	12 ounces	.58
20H3348	4 inches	17 ounces	.69
20H3349	5 inches	22 ounces	1.18

Fioroscope, 30 Cents.

No. 20H3600 This special microscope is fitted in one end with a very powerful Stanhope lens, by means of which the animalculae in stagnant water and other objects entirely invisible to the naked eye may be distinctly seen. In the other end is an ordinary magnifying glass of lower power for the examination of insects, flowers, etc. Finished in lacquered brass. Shipping weight, 3 ounces. Price...30c

Tripod Microscope, 29 Cents.

No. 20H3605 This Tripod Microscope is a very convenient form of magnifying glass, with adjustable focus and high grade lens. Finished throughout in lacquered brass. Shipping weight, 5 ounces. Price...29c

Miners' Magnifying Glass, $1.35.

No. 20H3615 This powerful magnifying glass is made especially for miners and prospectors, being mounted in an extra strong and substantial folding metal case, nickel plated. The lens is 1¼ inches in diameter. Shipping weight, 4 ounces. Price.....$1.35

Coddington Magnifiers, 75 Cents to $1.40.

These Coddington Magnifiers are made with fine double achromatic lenses of high power, mounted in folding nickel plated cases, making them very convenient for carrying in the pocket.

Catalog No.	Diameter	Shpg. Wt.	Price
20H3630	¾ in.	3 oz.	$0.75
20H3632	1 in.	4 oz.	1.00
20H3636	1⅜ in.	6 oz.	1.40

Linen Testers, 19 Cents to 78 Cents.

Linen Testers are designed especially for counting threads in linen and other fabrics, but are also very desirable for general use as magnifying glasses. Folds very compactly.

Catalog No.	Opening	Shpg. Wt.	Price
20H3637	¼ in. sq.	2 oz.	19c
20H3638	½ in. sq.	3 oz.	60c
20H3639	1 in. sq.	4 oz.	78c

Folding Magnifiers, 46 Cents to 95 Cents.

No. 20H3625 Triple Lens Magnifier, made with strong folding brass case, nickel plated and polished. Very substantial and suited to rough usage. This instrument is made with three lenses which may be used either separately or together, thus giving three different degrees of magnifying power. Lenses 1 inch in diameter. Shipping weight, 3 ounces. Price.....95c

No. 20H3626 Double Lens Magnifier, same as No. 20H3625, but with two lenses instead of three. Shipping weight, 3 ounces. Price.....72c

No. 20H3627 Single Lens Magnifier, same as No. 20H3625, but with one lens instead of three. Shipping weight, 2 ounces. Price.....46c

Prospectors' Compass Magnifiers, $1.50 and $2.10.

No. 20H3648 Double Lens Magnifier. Very finely made magnifying glass with two lenses, beautifully mounted in folding aluminum case, with compass. Lenses may be used separately or together, the two together giving double the power of the single lens. Diameter of lens, 1¼ inches. Shipping weight, 3 ounces. Price.....$2.10

No. 20H3649 Single Lens Magnifier, same as No. 20H3648, but with one lens, instead of two. Shipping weight, 2 ounces. Price.....$1.50

Compound Microscope, $1.90.

No. 20H3650 This is an imported instrument, made in Paris and substantially constructed of brass throughout. It stands 6 inches high, has one eyepiece and one objective, yielding a magnifying power of 20 diameters. A swinging mirror is provided for illumination of transparent objects and the magnifying power is sufficient to show minute objects which are invisible to the naked eye. Shipping weight, 16 ounces.

Price, complete in polished wood case.....$1.90

Chevalier Opera Glass, $2.25.

No. 20H3402 This opera glass has achromatic lenses, 1⅛ inches in diameter. The center bar and draw tubes are gold plated; the cross bars and top are finished in black enamel. The covering is black pebbled morocco leather. Shipping weight, 12 ounces.

Price, with case.....$2.25

CONVERSATION TUBES, 95c to $1

While many new and unusual forms of hearing instruments have been introduced within recent years, the well known conversation tube still remains the most popular and the most widely used instrument for the aid of hearing. The following conversation tubes are extra high grade instruments, made with metallic spiral spring lining, which insures a free opening throughout the tube in any position, and gives perfect flexibility. The mouthpiece and the earpiece are made of hard rubber and the covering is the best grade of black mohair or silk, as is the hard rubber earpiece or tip at the smaller end of the tube just fits the ear, so that the person with whom you are talking speaks directly into the large end of the tube as when using a telephone.

All of our conversation tubes are 40 inches in length over all, and with the exception of the Midget tube, are tapered from one end to the other, gradually decreasing in diameter from the mouthpiece to the earpiece.

Midget Conversation Tubes.

The small size of these tubes makes them very convenient to carry, and for this reason they are popular even with those who may prefer a larger tube for home use. 40 inches. Diameter of mouthpiece, 2 inches. Diameter of tube throughout, [illegible]. Weight, only 3¼ ounces.

No. 20H3240 Midget Conversation Tube, black mohair covered. Shipping weight, 9 ounces. Price.....

No. 20H3241 Midget Conversation Tube, black silk covered. Shipping weight, 9 ounces. Price.....

Medium Size Conversation Tubes.

Length, 40 inches. Diameter of mouthpiece, 2½ inches. Diameter of tube at the larger end, tapered to ½ inch at the smaller end. Weight, 8 ounces.

No. 20H3242 Medium Size Conversation Tube, black mohair covered. Shipping weight, 16 ounces. Price.....

No. 20H3243 Medium Size Conversation Tube, black silk covered. Shipping weight, 16 ounces. Price.....

Large Conversation Tubes.

Length, 40 inches. Diameter of mouthpiece, 2⅝ inches. Diameter of tube at the larger end, 1 inch, tapering to ½ inch at the smaller end. Weight, 10½ ounces.

No. 20H3244 Large Conversation Tube, black mohair covered. Shipping weight, 20 ounces. Price.....

No. 20H3245 Large Conversation Tube, black silk covered. Shipping weight, [illegible] ounces. Price.....

NOTE—Our No. 20H3245 is the most popular size and style that we carry, [illegible] diameter making it very effective and the silk covering giving it a handsome [illegible]

London Hearing Horns, $1.20 and $1.30.

The London Horn is constructed upon old and well tried principles. It is made throughout of metal and finished black. The peculiar shape and special design [illegible] sound is intensified to the greatest possible extent, so that sounds coming from a distance may be heard and understood. Instruments are small and while in use may be concealed in the hand, making them particularly desirable for use in public places. It is one of the few hearing instruments with which one may public speaking, and is used a great deal in churches, meetings, concerts and theaters. The London Hearing Horn is particularly adapted to those who are only moderately deaf, and those who are very deaf we recommend the conversation tube. Some houses often sell London Hearing Horns at from $3.00 to $5.00 each, but the instruments which we offer at $1.20 and $1.30 are exactly the same instruments which are sold at such prices by many dealers. Our prices are possible simply because we are satisfied to make the same small margin of profit on this kind as we do on the most staple merchandise.

No. 20H3265 London Hearing Horn, small size, black finish, 2½ inches long, shipping weight, 6 ounces. Price.....

No. 20H3267 London Hearing Horn, large size, black finish, 4 inches long, shipping weight, 8 ounces. Price.....

In case. May be used without removing from case.

The Sonor Horns may be described as an improved and more powerful form of the old and well known London Hearing Horn, and are the result of a long series of experiments by one of the best makers of hearing instruments in France.

Fully Extended.

They are smaller than the London Horns, more finely [illegible] and far superior in acoustic properties. Their unusual power compared with other hearing horns, is due to the special [illegible] metal from which they are constructed and the peculiar [illegible] and design of the inner resonance chamber.

No. 20H3258 Single Sonor Hearing Horn, with one chamber, as shown in illustration. Length, extended, 4 [illegible] closed, 3¼ inches; width, 1⅝ inches; thickness, ⅝ inch. Price, with fine leather case, as illustrated.....

Price, without case.....

No. 20H3259 Double Sonor Hearing Horn, same as 20H3258, but made with two resonance chambers [illegible] side and connecting with a single ear tube. Length, extended, 4½ inches; width, 1¾ inches; thickness, 1⅜ inches.

Price, with fine leather case.....

Price, without case.....

Marchand Opera Glass, $2.75.

No. 20H3407 This opera glass has fine achromatic lenses, 1⅛ inches in diameter. The eyepieces are extra large. The center bar and draw tubes are gold plated. The cross bars and top are finished in black enamel. The covering is dark maroon leather, with two narrow beaded gold plated bands. Shipping weight, 12 ounces.

Price, with case.....$2.75

Pearl Opera Glass, [illegible]

No. 20H3412 This opera glass has achromatic lenses 1 inch in diameter. All metal parts are gold plated, and bodies, eyepieces and focusing screw are of fine Oriental pearl. A very handsome instrument at a very low price. Shipping weight, [illegible]

Price, with case.....

Lemaire Pearl Opera [illegible] $10.35.

This [illegible] from this famous maker, is [illegible] made. Diameter of lenses, [illegible] (lignes). Shipping weight, [illegible] with fine leather case.....

Lemaire Opera Glass, [illegible]

No. 20H3419 This [illegible] strument is of the same quality [illegible] the No. 20H3421 glass, but [illegible] enamel and the barrels are [illegible] morocco leather. The lenses are [illegible] (15 lignes) in diameter. Shipping [illegible] ounces. Price, complete with case.....

Colmont Pearl Opera Glass, $7.90.

No. 20H3417 This genuine Colmont glass is a very high grade instrument. Beautifully made throughout, fitted with the very best achromatic lenses 1 inch in diameter. Exquisitely finished in Oriental pearl and gold plate. No better opera glass made. As handsome as a piece of jewelry. Shipping weight, 14 ounces.

Price, with fine leather case.....$7.90

COLMONT GLASS, $7.95.

No. 20H3445 The name "Colmont" is in itself a guarantee of quality, and we can recommend this instrument to anyone desiring a strictly high class field glass of the best optical qualities. It is strongly and substantially made, good materials and workmanship throughout, insuring strength and durability. All metal parts are finished in bright black enamel, the leather covering is the best quality of morocco, the eyepieces are extra large, making it an easy glass to use, and the fine achromatic lenses are noted for their power and clear definition. This field glass measures 6 inches high when fully extended, hen closed. The object glasses are 26 lignes in diam- the magnifying power is six times. Weight, 25 ounces. weight, 51 ounces.

with leather case and shoulder strap.....**$7.95**

JENA SPECIAL FIELD GLASSES At $12.95 and $15.60

The Jena Special Field Glasses come from the same factory that makes the marvelously perfect Busch Prism Binoculars and the makers put into these field glasses exactly the same high class workmanship and materials that have made their binoculars famous. The lenses are ground from the wonderful Jena special glass, made under the patronage of the German government, and surpassing all other glass in its adaptability to the severe requirements of fine optical instruments. The perfect mechanical construction, combining strength, rigidity and durability, in conjunction with the superb optical qualities, makes these instruments absolutely the finest field glasses that can be manufactured.

No. 20H3454 Jena Special Field Glass, constructed throughout of brass, with all exposed portions beautifully finished in fine black enamel, and bodies covered with best morocco leather. The objective lenses are 26 lignes in diameter. Weight of instrument, 33 ounces. Height, closed, 6 inches; extended, 7⅜ inches. Magnifying power, seven times. Shipping weight, 63 ounces.

Price, with fine velvet lined leather case and shoulder strap.....**$12.95**

No. 20H3455 Jena Special Field Glass, constructed throughout of **aluminum**, otherwise exactly the same as No. 20H3454. All exposed metal parts are finished in fine black enamel, except the highly polished draw tubes, which are left in the natural silvery color of the aluminum, adding much to the attractive appearance of the instrument. **The use of aluminum instead of brass reduces the weight of this instrument to only 19½ ounces.** Shipping weight, 50 ounces. Price, with fine velvet lined leather case and shoulder strap.....**$15.60**

"LOMA" EIGHT-POWER PRISM BINOCULAR - - $22.50

Prism Binoculars, although very well known and very popular, because of their remarkable superiority, are still comparatively new, and have thus far been sold at prices which allow the manufacturer a very large profit. We have, however, succeeded in making so favorable a contract with the maker of the "Loma" Prism Binoculars that we can offer these superb instruments at just about one-half the price asked by others for binoculars of equal merit. The Eight-Power "Loma" Prism Binocular is a very finely made instrument of the most perfect optical qualities, every detail of the distant view being clearly and sharply defined to the very edge of the field of view. They are unusually strong and rigid in construction and beautifully finished, all metal parts in glossy black enamel, and the bodies covered with fine black morocco leather. These binoculars are adjustable for pupillary distance and the right eyepiece is adjustable to allow for any difference in the user's eyes. Height, 4¾ inches; width, 4⅛ inches. Weight, without case, 18 ounces. Diameter objective lenses, ⅞ inch; field of view at 1,000 yards, 110 yards; magnifying power, eight diameters. Shipping weight, 48 ounces.

No. 20H3467 "Loma" Eight-Power Prism Binocular.

Price, with black leather case.....**$22.50**

Price, with tan leather case..... **23.85**

"STEREO-LOMA" SEVEN-POWER PRISM BINOCULAR $24.25

In the "Stereo-Loma" Binocular, the objective lenses are placed much farther apart than in binoculars of the ordinary type, with the result that objects are brought into greater relief and their distances in relation to each other are made more apparent to the observer. The effect, in a way, is similar to the stereoscope and anyone who has looked at a stereoscopic photograph through a stereoscope appreciates the remarkable advantage of stereoscopic effect. Both mechanically and optically the "Stereo-Loma" Binocular is beyond criticism. It is strong and rigid in construction, pleasing in appearance and beautifully finished. The optical perfection of the objective lenses, the prisms and the eyepieces insure a clearness of vision that is unsurpassed by any binocular, regardless of price. All metal parts are finished in glossy black enamel and bodies are covered with fine black morocco leather. They are adjustable for pupillary distance, and the right eyepiece is adjustable for differences that may exist in the user's eyes. Height, 3⅞ inches; width, 5½ inches; weight, without case, 17 ounces. Diameter objective lenses, ¾ inch; field of view at 1,000 yards, 125 yards; magnifying power, seven diameters. Shipping weight, 44 ounces.

No. 20H3468 "Stereo-Loma" Seven-Power Prism Binocular.

Price, with black leather case.....**$24.25**

Price, with tan leather case..... **25.60**

BUSCH "TERLUX" PRISM BINOCULARS, $48.00 TO $73.25

The Busch "Terlux" Binoculars are the highest grade instruments that can be manufactured. The objective lenses are very large, 1⅜ inches in diameter, almost twice the size of ordinary prism glass objectives, resulting in great light gathering power. Optically they are so perfect that it would seem no further improvement could be made in instruments of this type. No expense is spared in the construction of these instruments and they possess the greatest possible solidity and durability, combined with ease of manipulation and comparative lightness of weight. All "Terlux" glasses are adjustable for pupillary distance and the eyepiece of the right barrel is adjustable for possible differences in the user's eyes.

No. 20H3473 Six-Power Busch "Terlux" Binocular. Field of view at 1,000 yards, 110 yards. Height, 5⅞ inches. Weight, 23 ounces. Shipping weight, 58 ounces.

Price, with case and shoulder strap.....**$48.00**

No. 20H3474 Nine-Power Busch "Terlux" Binocular. Field of view at 1,000 yards, 80 yards. Height, 6⅞ inches. Weight, 25 ounces. Shipping weight, 64 ounces.

Price, with case and shoulder strap.**$48.00**

No. 20H3475 Twelve-Power Busch "Terlux" Binocular. Field of view at 1,000 yards, 60 yards. Height, 6⅞ inches. Weight, 25 ounces. Shipping weight, 64 ounces.

Price, with case and shoulder strap.....**$49.85**

BUSCH TEN-POWER "TERLUX" BINOCULAR.

U. S. ARMY AND NAVY MODEL.

Purchasers of Binoculars usually insist upon a glass as small in size and as light in weight as will serve their specific purpose, but in designing this instrument it has been thought best to disregard these limitations in size and weight, in order to provide a binocular affording the broadest field and the greatest possible illumination consistent with the power. The result is a glass, which, in its breadth of field, in the sharp even clearness of its definition and in the light gathering power of its lenses, is absolutely unrivaled either in the European or American market. Because of its large objective lenses, 1¾ inches in diameter, this glass is of special value in marine work, at night, or for use under adverse conditions of light and weather. Because of its power and the exceptional size and brilliancy of the field of view, it has proven of particular interest and value to the amateur astronomer and to nature students. For astronomical work, a tripod with adjustable clamp is practically a necessity and the tripod listed on page 768 is adapted to this or any of the other Busch binoculars.

No. 20H3476 Ten-Power Busch "Terlux" Binocular. U. S. Army and Navy model. Field of view at 1,000 yards, 80 yards. Height, 7¾ inches. Weight, 29 ounces. Shipping weight, 4½ pounds.

Price, with fine leather case and shoulder strap.**$56.00**

HIGH POWER BUSCH "TERLUX" BINOCULARS.

There is a demand for extremely high power prism binoculars despite their greater size and weight, and the increased necessity for holding the instrument perfectly steady. In cases where these objections are not insuperable, and especially under conditions where it is possible to use a suitable tripod and clamp these high power glasses present advantages that are not to be overlooked. In observing signals, in noting the brands of cattle, in the work of rifle range, in picking out the names of steamers, or in following the far distant maneuvers of naval or military forces, they possess a unique efficiency.

Their great power, in conjunction with the exceptional size and brilliancy of the field of view, makes them of great value to the amateur astronomer. The fact that seeing with two eyes is attended with so much greater comfort and pleasure than with one eye gives them a great advantage over the spyglass or small telescope.

No. 20H3480 Fifteen-Power Busch "Terlux" Binocular. Object glass, 1¾ inches. Field of view at 1,000 yards, 50 yards. Height, 8½ inches. Weight, 32 ounces. Shipping weight, 6 pounds. Price, complete.....**$69.80**

No. 20H3481 Eighteen-Power Busch "Terlux" Binocular. Object glass, 1¾ inches. Field of view at 1,000 yards, 40 yards. Height, 10¼ inches. Weight, 36 ounces. Shipping weight, 7 pounds. Price, complete.....**$73.25**

Telescopes and Spy Glasses

$1.68 TO $3.60

High Grade Achromatic Telescopes

THESE FOUR ILLUSTRATIONS showing the telescopes fully extended will give you some idea of the general appearance and construction of these fine Achromatic Telescopes, which we offer at $1.68 to $3.60 each, according to sizes. They are real telescopes, made in Paris, constructed throughout from brass, the bodies covered with fine morocco leather, the brass draw tubes highly burnished, the trimmings all lacquered, and provided with brass cap for front lens and dustproof sliding cover for eyepiece.

Many dealers give telescope diameters in lignes, the French unit of measurement, instead of inches, as we do.

- 7/8 inch equals 10 lignes.
- 1 1/16 inch equals 12 lignes.
- 1 1/4 inch equals 14 lignes.
- 1 7/8 inch equals 16 lignes.
- 1 11/16 inch equals 19 lignes.
- 1 15/16 inch equals 22 lignes.
- 2 5/8 inches equals 25 lignes.

No. 20H3505 Achromatic Telescope, diameter, 7/8 inch; length, extended, 15 1/2 inches; closed, 5 3/4 inches; magnifying power, 8 diameters. Shipping weight, 14 ounces. Price..... **$1.68**

No. 20H3506 Achromatic Telescope, diameter, 1 1-16 inches; length, extended, 17 1/2 inches; closed, 6 1/2 inches; magnifying power, 11 diameters. Shipping weight, 15 ounces. Price... **$1.90**

No. 20H3507 Achromatic Telescope, diameter, 1 1/4 inches; length, extended, 18 1/2 inches; closed, 7 1/8 inches; magnifying power, 13 diameters. Shipping weight, 16 ounces. Price... **$2.35**

No. 20H3508 Achromatic Telescope, diameter, 1 7-16 inches; length, extended, 23 3/4 inches; closed, 8 1/2 inches; magnifying power, 16 diameters. Shipping weight, 24 ounces. Price... **$3.60**

NICKEL CAP POCKET TELESCOPES, $2.30 TO $3.00

These are extra high grade instruments, made by the same Paris manufacturer who makes our famous hinged cap telescopes described below. They are provided with rounded caps at each end, affording perfect protection to both object glass and eyepiece and making them very convenient to carry in the pocket. They are fitted with extra quality double lens achromatic objectives, the draw tubes are of highly burnished brass, caps nickel plated and bodies covered with fine French morocco.

No. 20H3511 Nickel Cap Pocket Telescope, diameter, 7/8 inch; length, extended, 14 1/8 inches; closed, 5 1/2 inches; magnifying power, 10 diameters. Shipping weight, 12 ounces. Price..... **$2.30**

No. 20H3512 Nickel Cap Pocket Telescope, diameter, 1 1-16 inches; length, extended, 16 inches; closed, 6 1/4 inches; magnifying power, 12 diameters. Shipping weight, 14 ounces. Price..... **$2.60**

No. 20H3513 Nickel Cap Pocket Telescope, diameter, 1 1/4 inches; length, extended, 17 inches; closed, 7 1/8 inches; magnifying power, 15 diameters. Shipping weight, 16 ounces. Price..... **$3.00**

HINGE CAP TELESCOPE, $3.95

No. 20H3515 This instrument is made by a Paris maker who is celebrated for the quality of his lenses, which are of higher grade and better quality than those of other telescope makers. This telescope is fitted with a special hinge cap, and sliding cover for the eyepiece. The draw tubes are of highly burnished brass, the trimmings of bronzed brass, lacquered, and the covering is of morocco leather. Diameter, 1 1/4 inches; length, extended, 16 3/4 inches; closed, 6 5/8 inches; magnifying power, 15 diameters. No better telescope of this size is made. Shipping weight, 17 ounces. Price..... **$3.95**

Sunshade Telescopes, $4.75 and $8.50

These are fine achromatic telescopes made from brass throughout with burnished draw tubes and lacquered trimmings, bodies covered with morocco leather and provided with sunshade which can be extended forward in such a manner as to shade the object glass from the direct rays of the sun.

No. 20H3521 Sunshade Telescope. Diameter, 1 11-16 inches; length, extended, 36 inches; closed, 10 inches; magnifying power, 18 diameters. Shipping weight, 40 ounces. Price..... **$4.75**

No. 20H3522 Sunshade Telescope. Diameter, 1 15-16 inches; length, extended, 37 inches; closed, 10 1/2 inches; magnifying power, 23 diameters. Shipping weight, 58 ounces. Price..... **$8.50**

Genuine Bardou & Son Rifle Range Telescope, $17.75

No. 20H3533 This Rifle Range Telescope, made by Bardou & Son, Paris, enjoys the reputation of being the finest instrument of the kind in the world. The high magnifying power and fine definition make it a most desirable instrument for any purpose and for the rifle range it is the best telescope of this kind made. This telescope is 36 inches long when extended, 11 inches when closed. The diameter of the object glass is 1 15-16 inches and the magnifying power is 33 diameters. It comes complete with leather caps for both ends and shoulder strap. There are many imitations of this telescope on the market, but the genuine instruments bear the following words engraved on the first draw: **"Bardou & Son, Paris. Rifle Range Telescope. Power, 33 Times."** Look for this engraving when you buy a Bardou Telescope. Shipping weight, 62 ounces. Price..... **$17.75**

No. 20H3534 Astronomical Eyepiece for Bardou Rifle Range Telescope, increasing the power to 56 diameters, making a fine instrument for astronomical work. Shipping weight, 12 ounces. Price..... **$2.70**

Extra High Grade Telescope, $19.85

No. 20H3547 This is the most powerful telescope that we handle, a much higher grade telescope than is to be found in the best optical stores in the United States. **It is the lenses** which make this instrument so much superior to ordinary telescopes, these lenses being especially ground from the finest optical glass, very carefully centered and accurately adjusted. They are made to combine to the greatest possible extent the finest definition and highest magnifying power. **For astronomical work** this telescope forms an ideal instrument, showing clearly and distinctly the interesting changes and mysterious spots on the surface of the sun, the wonderful mountain ranges and apparently extinct craters of the moon, the satellites and the surface markings of the planet Jupiter, the wonderful rings of Saturn, interesting features of the planet Mars, double stars, etc. **For the observation of the sun** a dark glass is mounted in the slide cover of the eyepiece. **The magnifying power is 45 diameters. The draw tubes, trimmings,** and all exposed metal parts are made with fine gunmetal finish, the very best and most expensive finish known for optical instruments. This fine steel blue gunmetal finish will never tarnish nor rust and the draw tubes slide smoothly and easily. The body of the instrument is covered with a fine grade of morocco leather. **This telescope is made with sunshade,** and instead of the ordinary provided with a hinged metal cover which affords perfect protection to the object glass when extended, is 41 1/2 inches; when closed, 13 3/4 inches. Weight, 56 ounces. The diameter of the object glass is 2 3-16 inches and the magnifying power 45 diameters. Shipping weight, 4 pounds. Price.....

No. 20H3548 Celestial Eyepiece, to fit telescope No. 20H3547, for astronomical work, increasing power to 68 diameters. **With all celestial eyepieces** the image is inverted, a matter of no consequence in astronomical observations, but which renders such eyepieces unsuitable for terrestrial work. Shipping weight, 12 ounces. Price.....

OCKET COMPASSES

Watch Style, 18 Cents.

No. 20H3800 Pocket Compass, watch style, open face, bevel edge glass, paper dial, brass case. Diameter 1½ inches. Shipping weight, 2 ounces. Price...**18c**

Good Compass for 43 Cents.

3803 This Watch Style pass is made with silvered rotected by heavy bevel edged ntial brass case and provided stop. Diameter, 1¾ inches. ight, 3 ounces. Price..**43c**

eled Compass, 98 Cents.

No. 20H3809 Our Watch Style Jeweled Pocket Compass is made with finely finished strong brass case with hinged cover, heavy beveled edge glass, silvered metal dial with full circle divisions and sliding stop. The needle is very sensitive and mounted with jeweled cap. Diameter, 2 inches. A compass that will last a lifetime and give perfect satisfaction under any conditions. Shipping weight, 5 ounces. Price **98c**

Jeweled Compass, $1.65.

813 An extra ocket compass, ghout in the and accurate ly made lac- case, 2⅝ inches with cap cover, beveled glass, top and best mounted Eng- le. Bottom of idized in black, lettering, and e divisions are engraved on a silvered metal dial l of needle. Shipping weight, 6 ounces. **$1.65**

Grade Compass, $2.15.

No. 20H3816 This is a very fine compact compass, very convenient for carrying in pocket, made like a watch with nickel plated dustproof case, spring hinged cover, opened by pressing on stem, best jewel mounted English bar needle, automatic stop and heavy beveled glass. The full circle divisions are engraved on a silvered metal dial. Diameter, 2 inches. Shipping weight, 4 ounces. Price.....**$2.15**

olorers' Compass, $1.25.

3824 This Com- with a special hand tating the bottom of can be caused to direction. The user, his bearings, re- ottom of the compass d points exactly in which he desires to t a very practicable instrument in every se is made of solid trong and substan- ith a heavy beveled ilvered metal dial, le divisions, jeweled e and sliding stop. inches. Shipping ces. Price..**$1.25**

THERMOMETERS

Tin Case Outdoor Thermometers.

No. 20H3700 Japanned Tin Case Thermometer, ordinary grade, black figures on light metal scale; mercury tube. Length, 7½ inches. Shipping weight, 7 ounces. Price.....**12c**

No. 20H3703 Japanned Tin Case Thermometer, extra quality, heavier, better made and more accurate than the preceding style; seasoned tubes of standard size, mercury only; a good reliable thermometer for ordinary use. Length, 7½ inches. Shipping weight, 8 ounces. Price.....**25c**

No. 20H3706 Guaranteed Tin Case Thermometer, best grade made ("Accuatus" trade mark), white figures and graduations upon black oxidized scale, thoroughly seasoned tubes of large size, good material and workmanship throughout, and guaranteed absolutely accurate; mercury only. Length, 10 inches. Retails everywhere at $1.50. Shipping weight, 17 ounces. Price.....**85c**

No. 20H3710 Polished Copper Case Thermometer for indoor or outdoor use. Red spirit tube graduated to 60 degrees below zero, in large, easy reading figures. Carefully tested for accurate readings. Length, 10 inches. Shipping weight, 16 ounces. Price.....**55c**

Distance Reading Thermometers.

In the Distance Reading Thermometers the scale and figures are large and very distinct, the tube magnifies the column of red spirit, and the temperature is therefore easily read at a distance of from 15 to 25 feet. They are very convenient and present a handsome appearance.

No. 20H3715 Distance Reading Thermometer, enameled metal case, large black figures, red spirit tube, 7⅝ inches long. Shipping weight, 9 ounces. Price **13c**

No. 20H3716 Distance Reading Thermometer, same style as No. 20H3715, but 2¾ in. wide by 9½ in. long, with extra large and plain figures, easily read at a distance of 25 feet. Shipping weight, 13 ounces. Price..**17c**

No. 20H3720 First Quality Cabinet House Thermometer. Guaranteed seasoned tubes. White figures on black background. Fancy carved oak back. Length, of scale, 8 inches. Can also be used out of doors. Shipping weight, 17 ounces. Price.....**85c**

Storm Glass Thermometers.

No. 20H3730 The Old Original Poole's Barometer, a combined storm glass and thermometer, mounted upon varnished wood case, 3 inches wide by 9 inches long. This storm glass foretells the weather with a fair degree of accuracy for twenty-four hours in advance, and the thermometer shows correct temperature. Shipping weight, 13 ounces. Price.....**15c**

No. 20H3733 Antique Oak Storm Glass and Thermometer combined, mounted upon carved oak back with fancy beaded edge, black oxidized metal scale to thermometer with brass mountings, extra large storm glass with etched lettering. A reliable and handsome instrument. Shipping weight, 18 ounces. Price.....**65c**

No. 20H3736 Copper Case Storm Glass and Thermometer, case made of polished copper, silvered metal scale, high grade thermometer with standard size tube, mercury. A very serviceable instrument for outdoor use. Shipping weight, 15 ounces. Price.....**50c**

Fever Thermometers.

No. 20H3745 Fever Thermometer, 4 inches long, magnifying tube, self registering, in hard rubber case, very accurate and guaranteed. A certificate of accuracy given with each one. Shipping weight, 6 ounces. Price.....**78c**

No. 20H3746 Fever Thermometer, 4 inches long, self registering, in hard rubber case, magnifying tube, very carefully tested and guaranteed. Registers in one minute. Each thermometer accompanied by certificate of accuracy. Shipping weight, 6 ounces. Price.....**98c**

No. 20H3747 Fever Thermometer, 4 inches long, self registering; in black enameled case with gold trimmings, chain and clasp; cannot be lost out of pocket; magnifying tube; very carefully tested and certificate of accuracy with each one. Shipping weight, 6 ounces. Price.....**89c**

Dairy Thermometers.

No. 20H3760 All Glass Dairy Thermometer. Length, 8 inches. New, easy reading style, made with extra large plain figures, special red lettering at scalding, cheese, churning and freezing points. Red spirit column, easy to see. Bulb weighted with shot, stands upright in cream. Very accurate. Shipping weight, 10 ounces. Price.....**13c**

No. 20H3763 Dairy Thermometer, all glass. Length, 9¾ inches. This thermometer floats in the cream in upright position. Scale is hand graduated and very accurate. Red spirit magnifying tube, making it very easy to read. Shipping weight, 12 ounces. Price.....**39c**

Incubator Thermometers.

No. 20H3770 Incubator Thermometer on legs, extra large bulb and tube, very sensitive, white graduations on black oxidized metal plate. Absolutely accurate; 4 inches long. Shipping weight, 10 ounces. Price **35c**

No. 20H3772 Incubator Thermometer, same quality in preceding style, but triangular in shape, 4 inches long, will stand upright among the eggs with scale showing plainly. Shipping weight, 10 ounces. Price.....**32c**

No. 20H3774 Standard Incubator Thermometer. A certificate of accuracy with each instrument. Graduations engraved on both tube and metal back. Absolutely guaranteed. Four inches long, triangular in shape, to stand upright among the eggs. Shipping weight, 10 ounces. Price...**83c**

No. 20H3776 Brooder Thermometer, straight pattern, 4 inches long. Shipping weight, 10 ounces. Price.....**23c**

20H3770

Incubator Hygrometer.

No. 20H3778 This is a wet bulb thermometer graduated with humidity percentages. It shows by direct reading the exact humidity, and is much superior to the ordinary hygrometer because it is scientifically accurate. The common moisture gauge is not accurate. During the first week the moisture in an incubator should be 65 per cent, the second week about 60 per cent, the third week about 55 per cent, and at the time of hatching about 53 per cent. This hygrometer enables you to maintain the proper degree of moisture with absolute certainty. Shipping weight, 14 ounces. Price.....**$1.25**

No. 20H3779 Extra Wicks for Incubator Hygrometer. In use the wicks finally become hard, and new ones should be supplied to insure accurate readings. Shipping weight, 1 ounce. Price, each.....**7c**

MANN DRAINAGE LEVEL, $21.95

3950 Genuine Beckmann Drainage Level, a thoroughly practical, accurately vel, designed especially for the use of farmers and ditchers. As shown in n, this level is provided with tripod and leveling head, by means of which the instrument can be perfectly leveled up and kept so when revolved.

ation shows No. 20H3951, ontal circle.

H3950 is ex- same except not provided ontal circle.

95

The telescope is a powerful high grade achromatic instrument, 12 inches long with adjustable eyepiece, and made with fixed cross-hairs inside which cannot get out of adjustment. With this telescope, which has a magnifying power of 15 diameters, a leveling rod can be read at a distance of 500 feet. The telescope carries a carefully ground spirit level, adjustable by two nuts and so sensitive that a difference of ⅛ of an inch in 100 feet can be easily determined. The entire instrument is constructed of bronze metal, finely finished, with best workmanship throughout. Shipping weight, 19 pounds.

Price, complete, with tripod and box **$21.95**

BECKMANN ARCHITECTS' LEVEL, $37.80

No. 20H3955 This genuine Beckmann Level exactly meets the requirements of architects, builders, millwrights, engineers, surveyors and others engaged in construction, sanitary work, drainage, road leveling, etc. This level is provided with an extra high grade perfectly achromatic telescope, 12 inches long, magnifying power 20 diameters, fitted with fine crosshairs, and adjustable eyepiece for precise focusing of the crosshairs. With this telescope a leveling rod can be read at a distance of 600 feet. The instrument revolves upon a horizontal circle 4¼ inches in diameter, graduated from 0 to 90 each way and is read to five minutes by vernier fixed to spindle. The level, ground absolutely true with very sensitive bubble, is graduated and securely mounted under the telescope. We furnish this level complete with metal trivet, substantial tripod, instruction book and fine mahogany case with lock and strap. Shipping weight, 35 pounds. Price, complete....**$37.80**

$37.80

Drainage Level with Horizontal Circle, $26.00

No. 20H3951 Beckm. ... Drainage Level, as shown in illustration, same as No. 20H3950, but fitted with horizontal circle so that angles reading to single degrees can be turned off, thus making a very suitable instrument for builders. Shipping weight, 19 pounds. Price, complete, with tripod and carrying case.....**$26.00**

SPECIAL CATALOG OF SURVEYING INSTRUMENTS

Besides the two instruments illustrated above, we handle a complete line of Surveyors' instruments, including imported compasses with hooked sights, at prices ranging from $8.40 to $18.95; also Beckmann's fine Surveyors Vernier Compass at $33.90. We sell Beckmann's Transit Compass, an ideal instrument for county surveyors, at $69.00, or with level and clamp to telescope, adapting it to regular leveling work, $82.00. At $69.00 we furnish Beckmann's Engineer's "Y" Level, and at $98.00, Beckmann's Engineer's and Mining Transit. If you are ny of these instruments, or in any of our surveyors' goods, including chains and tapes, marking pins, plumb bobs, leveling rods, poles, etc., send for our special Optical Catalog of these goods are fully illustrated and described.

WE CAN SAVE YOU MONEY ON ANYTHING IN THIS LINE AND CATALOG IS SENT FREE UPON REQUEST.

Shipping weight, Compact Telephones, 43 pounds.

BATTERY PHONES, $3.75 A PAIR.

These telephones give perfect service on short lines between house and barn, office and residence, near neighbors, or between any two points not over 500 feet apart. They are made entirely of metal, so they are not affected by extremes of dampness or dryness, and the receivers and transmitters are remarkably efficient. All that is required in putting up a pair of these phones is four batteries (any kind, either wet or dry) and the necessary wire.

No. 20H5565 Battery Phones. Price, per pair, without batteries.....$3.75
Shipping weight, 5 pounds.

No. 20H5566 Battery Phones. Price, per pair, with four cells of Red Label Dry Battery.....$4.25
Shipping weight, 16 pounds.

MAGNETO PHONES, $9.90 A PAIR.

No. 20H5570 This Magneto Call Telephone is built for use on short lines of from 50 feet to 5 miles. It can be used with copper or iron wire or even with fence wire. It is equipped with a high grade transmitter, receiver and three-magneto pony generator. It is put up in a handsome oak case, and all parts are heavily nickel plated. Shipping weight, 46 pounds.

Price, per pair (two telephones).....$9.90
Four batteries are included with each pair.

HOW OUR TELEPHONES ARE MADE.

FIRST, they are made complete from start to finish, under one roof, in one factory. The generators, switch hooks, ringers, transmitters, receivers, cabinets, everything, even the smallest screws and washers which enter into the construction of our telephones, are made in one factory. Every part is interchangeable, and we can furnish at any time in the future, ten, fifteen or twenty years from now, exact duplicates of every part. Every part is interchangeable and we can replace, at any time, any part that may wear out in service or become damaged in any way.

TRANSMITTER. We equip all telephones with our latest improved solid back long distance transmitter, a transmitter that will talk farther and louder and plainer than any other transmitter made. The framework is built of heavy brass castings, making it absolutely solid, and the carbon cup is turned from a solid brass bar. The carbon diaphragm and the granulated carbon are the very finest grade of carbon that we can import from Europe, and before going into the transmitter are subjected to a special process of polishing which still further improves the quality.

RECEIVER. We equip all our telephones with our latest improved bi-polar receiver, a receiver that is the result of years of study, experiment and constant improvement. It is made with concealed connections, the coils are wound with **double silk** insulated magnet wire, the magnets are made from the highest grade **imported** magnet steel, and the cords, which are made extra heavy to prevent any possibility of cord trouble, are attached with a special wide contact which cannot break loose.

GENERATOR. Our generators are made from the best imported magnet steel, and are guaranteed to retain their magnetism and power longer than any other generator made. There is more steel, more wire and more power in our five-magnet generator than in any five or six-magnet generator on the market. The steel is the best imported magnet steel. The wire on the armature is the best double silk insulated magnet wire. Our five-magnet generator weighs 10½ pounds, and this weight is made up of the best imported magnet steel, the most expensive steel that can be bought, and the best double silk insulated copper magnet wire, the best magnet wire we can buy. **There is plenty of reserve power in this generator,** more power than you will ever need in actual practice. The resistance of an ordinary line, 25 or 30 miles in length, with thirty bridging telephones installed, **even if poorly constructed and put up with small wire,** is less than 60,000 ohms, and we absolutely guarantee our five-magnet generator to ring through 125,000 ohms resistance, more than double the work which it will **ever** be called upon to do, and from three to four times the work which it will ordinarily be required to perform. The gear wheels are solid brass castings with milled gears and reinforced spokes, made extra wide to insure strength and durability, and the shunt springs are of heavy German silver.

SWITCH HOOK. We equip all our telephones with our special long lever switch hook made with heavy German silver springs and pure platinum contacts. This hook is so constructed that no current whatever passes through the frame and there is no chance of a shock when removing the receiver from the hook. The greatest attention is paid to securing perfect connections, every joint being soldered, and the general construction and design of this switch hook is such as to prevent any possibility of trouble from this source.

RINGER. Our telephones are all equipped with the latest improved ringers, made with adjustable armatures, the coils wound with **double silk** insulated magnet wire, and with magnets of the best **imported** magnet steel, heavily nickel plated and polished.

LIGHTNING ARRESTER. Our New Two-Path Carbon Lightning Arrester is the most perfect protection from lightning, as well as sneak currents, that has ever been devised. This lightning arrester is made up of three heavy brass punchings, the binding posts sweated on to insure perfect contact, the carbon extra large, presenting ample surface to the ground plate, and the mica insulated washers carefully perforated so that the shortest possible air gap is maintained between the carbon and the ground plates.

PUSH BUTTONS AND CONDENSERS.

FOR 20 CENTS extra per telephone, we will equip any of our bridging telephones with a simple push button attachment, by means of which you can ring any subscriber on your line without ringing central, or you can ring central without ringing the bell of any other subscriber, provided every telephone on the line is equipped with push button. The push buttons can be used only on metallic lines; they will not work on grounded lines.

FOR 40 CENTS extra per telephone, we will equip any of our bridging telephones with condensers, which enable you to ring any party you want, no matter how many receivers are off their hooks. Condensers can be used on either metallic or grounded lines.

FOR 55 CENTS extra per telephone, we will equip any of our bridging telephones with both push button and condenser.

SERIES PHONES, $7.80 AND $8.20.

No. 20H5530

Series Telephones are made for use on lines where only two instruments are to be installed or for use on lines having a switchboard and an operator at a central office. Our Series Telephones are made throughout in the same perfect manner as our Bridging Telephones; every detail has exactly the same rigid inspection and exactly the same high standard of excellence is maintained throughout the instrument. They are equipped with three-magnet generators and 80-ohm ringers, will talk over lines of any length, and the generators are guaranteed to ring a bell over a 30-mile single line.

Glass Insulators.

No. 20H5800 Pony Glass Insulator, for telephone, telegraph and fire alarm work. Packed 400 in barrel. Weight, per barrel ready for shipment, 300 pounds.
Price, per barrel, 400 insulators.....$6.27
Price, each, in less than barrel lots.....1¾c
No. 20H5805 Double Groove Pony Glass Insulator, for telephone transposition work, packed 400 in a barrel. Weight, per barrel, ready for shipment, 300 pounds. Price, per barrel, 400 insulators.....$6.05
Price, each, in less than barrel lots.....1¾c

Porcelain Insulators.

No. 20H5810 Porcelain Insulator No. 4½, new code; requiring 1 inch space between bottom and groove. Height, 1⅞ inches; diameter, 1½ inches; hole, 5-16 inch; groove, 7-16 inch.
Price, per 100 (Shipping wt., 25 lbs.).....$0.70
Price, per standard package of 1,000 (Shipping weight, 215 pounds).....6.65
Order a few more than actually required to allow for breakage in putting them up.
No. 20H5815 Porcelain Insulator No. 5½, new code requiring 1 inch space between bottom and groove. Height, 1 3-16 inches; diameter, 1 inch; hole, ¼ inch; groove, 5-16 inch.
Price, per 100 (Shipping weight, 12 pounds).....$0.42
Price, per standard package of 1,000 (Shipping weight, 95 pounds).....3.90

Pony Oak Brackets.

No. 20H5820 Pony Oak Telephone Brackets, for telephone and telegraph line construction. Can be fastened to side of pole or house. Do not require the use of cross arms. Painted and dipped, weight, ½ pound each.
Price, per sack, containing 100 brackets (Shipping weight, 50 pounds).....90c
Price, each, in less than sack lots.....1c

Pony Oak Pins.

No. 20H5825 1¼-Inch Pony Oak Pins, for telephone and telegraph line construction. Best quality. For use on cross arms, etc. Painted and dipped.
Price, per sack, containing 250 pins.$1.44
Price, each, in less than sack lots.....¾c

Insulating Friction Tape.

No. 20H5835 Black Insulating Friction Tape, will not vulcanize with heat, nor crack nor harden and become defective by exposure and use; ¾ inch wide.
Price, per roll (½ pound).....13c

10 Pounds Wire Solder for $2.70.

No. 20H5855 Wire Solder, best grade, for all electrical work. Price, per pound.....$0.28
Per 5-pound coil, $1.38; per 10-pound coil.....2.70

Tackle Block Wire Stretcher.

No. 20H5900 Tackle Block Wire Stretcher. Self locking at any point. This stretcher is provided with all malleable iron grapples for stretching barbed wire strands and woven wire fencing and telephone wire. It is also a complete safety rope hoist for ordinary use with which one man can raise 500 pounds. Weight, 4½ pounds. Price, complete, with 16 feet of ⅜-inch rope....75c

75c

Bull Dog Wire Grip.

No. 20H5905 Bull Dog Wire Grip. The more you pull the tighter it grips. Used with a tackle block with an ordinary wire stretcher, or with a hand spike and chain. It never slips, and does not injure the wire. Price.....19c

Linemen's Climbers.

We guarantee these climbers to be made of the very best steel, perfectly tempered, finely finished, the very best, strongest and safest climbers made. We carry these climbers in standard lengths, namely, 15, 15½, 16, 16½, 17 and 17½ inches.
No. 20H5945 Linemen's Climbers, Eastern Pattern. Price, per pair, without straps.....$1.73
No. 20H5946 Extra Spurs, for Eastern Pattern Climbers. Price, per pair, without straps.....50c
No. 20H5950 Climber Straps. These straps are furnished with a large leather pad, which prevents the climber from digging into the knee. Can be used with any make of climber, either Eastern or Western.
Price, per set of four.....95c

Iron Box Bells at 23 Cents.

No. 20H6000 3-Inch Iron Box Bell for door and call bell use. The box is made of stamped sheet metal, has cast gong and German silver contacts. Guaranteed to ring clearly through 300 feet of No. 18 annunciator wire (150 feet, bell to battery) on one cell of battery; but to get the maximum sound at this distance two cells should be used. Add one extra cell for each additional 500 feet of wire. Where less than 200 feet of wire is used, one cell is amply sufficient. Shipping weight, 13 ounces.
Price, each.....23c
No. 20H6002 4-Inch Iron Box Bell. This bell is larger and heavier than the 3-inch and is intended for use where a louder call is necessary. Shipping weight, 16 ounces. Price, each....32c

Ecco Buzzers.

No. 20H6006 Ecco Buzzer No. 0. A very small buzzer. Size, 1⅝x1½x⅛ inches. Dust and bug proof, with spring cover, fully nickel plated, finely finished throughout. Platinum contact points. Will operate equally well on one or ten cells of battery. Shipping weight, 2 ounces. Price, each....38c
No. 20H6008 Ecco Buzzer No. 4. Same as above, but larger. Size, 3½x2⅞x1⅛ inches. Japanned finish. Shipping weight, 10 ounces. Price.....38c

Electric Bell Outfits.

For Door and Call Bell Service.

No. 20H6022 Electric Bell Outfit, consists of one Red Label dry battery, one brass push button, one 3-inch iron box bell, 75 feet of annunciator wire and necessary staples. Weight, 4¼ pounds when packed.
Price 60c

No. 20H6024 Electric Bell Outfit, consists of one Special wet battery, one brass push button, one 3-inch iron box bell, 75 feet of annunciator wire and necessary staples. Weight, 11 pounds when packed.
Price 75c

Our Special Wet Battery.

No. 20H6040 Our Special Wet Battery is a strictly first class open circuit battery for door bells, telephones, surgical and dental outfits, etc., easily recharged when exhausted, consists of round carbon, square zinc and jar and one charge of sal ammoniac. Shipping weight, 4 pounds.
Price, complete.....28c
No. 20H6041 Square Zinc, for battery No. 20H6040.
Price, per dozen, 35c; 3 zincs.....10c
No. 20H6043 Carbon, for our Special Wet Battery. Price.....15c
No. 20H6044 Sal Ammoniac.
Price, per pound.....10c
No. 20H6045 Sal Ammoniac. Price, per package, sufficient for one charge 4c

Gravity Battery.

The Gravity Battery is a closed circuit battery used almost entirely for telegraph work. It can be used for operating electric bells, small motors, etc. Each battery requires about 3 pounds of blue vitriol or blue stone to charge it. Full directions for charging are given in the Manual of Telegraphy, sent with each telegraph instrument.
No. 20H6060 Gravity Battery. Size, 5x7 inches, consisting of jar, copper and zinc. Weight, 4 pounds.
Price, complete.....42c
No. 20H6061 Gravity Battery. Size, 6x8 inches; consisting of jar, copper and zinc. Weight, 6½ pounds.
Price, complete.....55c
NOTE—Blue Vitriol is not furnished with these batteries. It is always sold extra. Gravity batteries cannot be sent by mail.

No. 20H6062	Battery Jar, glass, 5x7.	Price.....13c
No. 20H6063	Battery Jar, glass, 6x8.	Price.....15c
No. 20H6064	Zinc, for 5x7 battery.	Price.....25c
No. 20H6065	Zinc, for 6x8 battery.	Price.....34c
No. 20H6066	Copper, for 5x7 battery.	Price.....7c
No. 20H6067	Copper, for 6x8 battery.	Price.....7c
No. 20H6068	Blue Vitriol.	Price, per pound.....10c

Red Label Dry Battery, 13c.

No. 20H6085 Our Red Label Dry Battery is suitable for telephone use, door bells, annunciators, burglar alarms, medical batteries, small motors or other similar work. It is made with high internal resistance and low amperage, averaging from 10 to 13 amperes. Owing to its high internal resistance it has unusual lasting qualities. Size, 2½ inches in diameter by 6 inches high.
Price, each.....$ 0.13
Shipping weight, 2¼ pounds.
Price, per dozen..... 1.50
Shipping weight, 30 pounds.
Price, per barrel (125 batteries)..... 15.00
Shipping weight, 265 pounds.

Stand-By Batteries.

The Stand-By Dry Cell is an extra high grade battery adapted to practically any kind of open circuit work, including door bells, annunciators, telephones, medical batteries, etc. It is a battery of medium internal resistance and besides the ordinary work mentioned above may also be used for ignition purposes, although for this work it is not equal to the **Stand-By "Special"** described below. The amperage of the Stand-By batteries averages from 16 to 20 amperes.

Catalog No.	Size, Inches	Shipping Weight	Price, Each
20H6090	1½x4	10 oz.	16c
20H6091	2 x5	20 oz.	18c
20H6092	2½x6	36 oz.	19c
20H6093	3 x7	48 oz.	38c
20H6094	3½x8	72 oz.	52c

Special Prices in Barrel Lots.

Catalog No.	Size, Inches	Quantity in Barrel	Shipping Weight	Price, per Barrel
20H6090	1½x4	100	80 lbs.	$15.00
20H6091	2 x5	100	160 lbs.	17.50
20H6092	2½x6	125	300 lbs.	21.88
20H6093	3 x7	75	315 lbs.	27.19
20H6094	3½x8	50	315 lbs.	23.38

Stand-By "Special" Dry Batteries.

The Stand-By "Special" is a dry battery of low internal resistance and is designed especially for ignition work. This battery gives an unusually heavy discharge and a correspondingly hotter and faster spark. It is suitable for use with stationary gasoline engines, automobiles and launches. It may also be used for operating small motors, lighting miniature incandescent lamps, etc. The Stand-By "Special" is without question the very best ignition battery on the market. Each cell is guaranteed to test from 22 to 25 amperes.

Catalog No.	Size, Inches	Shipping Weight	Price, Each

Stand-By Multiple Batteries:

For Automobile or Stationary Engine Ignition.

The Stand-By Multiple Batteries consist of a number of 2½x6-inch Stand-By Special cells connected in series and multiple. The cells, all connected up, are placed in a wooden case, which is then completely filled with a paraffinlike wax, thus hermetically sealing the batteries, which greatly prolongs their life. We furnish these Stand-By Multiple Batteries in two styles, both of which are suitable for either automobiles or stationary engines. One Stand-By Multiple Battery will outlast from two to three ordinary sets of batteries connected in series.

No. 20H6256 Stand-By Multiple Battery, consisting of ten cells, connected five in series, two multiples. This battery is suitable for all ignition systems using standard coils and timers, or using five or six cells to a set. Price.....**$4.00**

No. 20H6266 Stand-By Multiple Battery, consisting of twelve cells connected six in series, two multiples. This battery is suitable for Atwater Kent device, Delco system and all ignition systems on the one-spark method. Price.....**$4.25**

No. 20H6356 Stand-By Multiple Battery, consisting of fifteen cells, connected five in series, three multiples. Suitable for any ignition system now using five cells in series. Price.....**$4.60**

Bulldog Battery Connectors

No. 20H6099 This is the best battery connector made. It dispenses with thumbnuts, is snapped on in a second and as easily removed, and prevents all ignition troubles caused by loose connections, as it always gives perfect contact. Ten connectors in a package. Shipping weight, 5 ounces. Price, per package.....**40c**

Reduced Prices for Voltmeters and Ammeters.

Genuine Ever Ready Instruments. Perfectly calibrated, absolutely dead beat and very accurate. As they are no larger than an ordinary watch, they can be conveniently carried in the vest pocket, and are invaluable in testing batteries, etc.

No. 20H6101 Ever Ready Voltmeter. Reads, 0 to 10 volts. Shipping weight, 7 ounces. Price.....**$1.05**

No. 20H6102 Ever Ready Ammeter. Reads, 0 to 35 amperes. Shipping weight, 7 ounces. Price.....**90c**

No. 20H6103 Ever Ready Volt-Ammeter, two scales, registering either voltage or amperage. Reads, 0 to 10 volts and 0 to 35 amperes. Shipping weight, 7 ounces. Price.....**$1.20**

Push Buttons, 5 and 6 Cents.

No. 20H6115

No. 20H6115 Wood Push Buttons, in oak, ash or walnut, German silver springs, porcelain center. Shipping weight, 3 ounces.
Price, each.....**6c**
Per dozen.....**70c**

No. 20H6120

No. 20H6120 Solid Cap Stamped Brass Buttons. Shipping weight, 3 ounces.
Price.....**13c**

No. 20H6125

No. 20H6125 Anti-Wood Push Buttons. A metal push button cheaper than wood. Very neat and serviceable. Shipping weight, 3 ounces.
Price, per dozen, **50c**; each.....**5c**

Wood Base Switches.

For use on telephones, closed circuit bell systems, burglar alarms and battery circuits in general. Has a hardwood base, with rubbed oil finish. Stamped lever, metal handle, painted with black insulating paint. Shipping weight, 3 ounces.

No. 20H6135	Price, 1-point.....	**7c**
No. 20H6136	Price, 2-point.....	**8c**
No. 20H6137	Price, 3-point.....	**9c**
No. 20H6138	Price, 4-point.....	**10c**

Quick Action Battery Switches.

These knife switches are recommended for use with stationary, portable and marine gasoline engines, telephone, telegraph and bell work, etc. Made with brass contacts, copper lever, composition base and plain handle. Shipping weight, 5 ounces.

No. 20H6139 Single Throw Switch. Price.....**12c**
No. 20H6140 Double Throw Switch. For use with two sets of batteries, or one set of batteries and magneto.
Price.....**31c**

Electric Alarm Clock.

$2.95

No. 20H6177 This instrument consists of a first class clock mounted on a metal base, which forms the container for an ordinary dry cell battery. The alarm is set the same as with any ordinary alarm clock, and the bell will ring until you get up and turn off the switch to stop it. It is also furnished with a pear shaped push at the end of a long cord, which may be left near the bed. By pressing this push a small incandescent electric lamp in front of the clock is lighted, thus showing the time at any hour of the night. Leave the end of the cord where you can reach it from the bed, and when you wake up in the night you can press the button and see what time it is. Copper oxidized finish throughout. Shipping weight, 6 pounds.
Price, complete, with battery.....**$2.95**

WESTINGHOUSE ELECTRIC IRONS

$3.60 TO $4.35

The convenience and comfort of the electric iron as compared with the old fashioned iron is so great that no one who has once used an electric iron would ever go back to the old fashioned method. It heats in just a few moments and stays uniformly hot during the entire time it is in use. We consider the Westinghouse superior to any other iron on the market, and, moreover, the reputation of this manufacturer is such that the name is in itself a guarantee of quality. **Made only for currents of 100 to 107 volts and 108 to 115 volts. Be sure to state voltage.**

No. 20H6181 5-Pound Westinghouse Electric Iron. Shipping weight, 13 pounds. Price.....**$3.60**
No. 20H6182 6-Pound Westinghouse Electric Iron. Shipping weight, 14 pounds. Price.....**$3.75**
No. 20H6183 7½-Pound Westinghouse Electric Iron. Shipping weight, 15½ pounds. Price.....**$4.15**
No. 20H6184 9-Pound Westinghouse Electric Iron. Shipping weight, 17 pounds. Price.....**$4.35**

When ordering state the voltage of the current in your house. If you are not sure about the voltage, you can find out from your electric light company. **All these irons are sent complete** with stand and connecting cord, as shown in illustration.

Menominee Fan Motor.

These electric fans are made with highly efficient motors with laminated fields and armatures, commutators of copper 12 to 13 sections, brushes of ¼ inch special carbon. The shaft is turned from steel and the bearings are of bronze, fitted with compression grease cups. The fan blades and guard are of lacquered brass, the balance of the machine finished in black enamel. They are made with swivel and trunnion base so they may be used as either desk or bracket fans. The 8-inch has three speeds and the 12-inch four speeds.

No. 20H6155 Menominee 8-Inch Electric Fan, complete, suitable for **either** alternating or direct current of 105 to 115 volts. Price.....**$7.50**
No. 20H6154 Menominee 12-Inch Electric Fan, complete, suitable only for alternating current of 105 to 115 volts. Price.....**$9.95**

Westinghouse Electric Fans.

No. 20H6162 Westinghouse Fan Motor, 8-inch fan, four blades. Black oxide finish. These fans are made by the Westinghouse Company, whose name on any piece of electrical merchandise is in itself a guarantee of quality. They are beautifully made, finely finished and are ideal fans for home use. The motor is of the series brush and commutator type. Soft sheet steel laminations are used in both the field structure and in the armature. At the highest speed the current used is less than one-half that consumed by an ordinary 16-candle power incandescent lamp. They can be used either as bracket or desk fans.
Price.....**$9.35**

No. 20H6163 Westinghouse Fan Motor, 12-inch fan, four blades. Black enamel finish. Price.....**$14.15**
No. 20H6164 Westinghouse Fan Motor. Same as No. 20H6163, but with air oscillator. Price.....**$18.15**
No. 20H6165 Westinghouse Fan Motor, 12-inch fan, six blades. Residence type. The quietest running fan made. Finish, black enamel. Price.....**$14.15**
No. 20H6166 Westinghouse Fan Motor. Same as No. 20H6165, but with air oscillator. Price.....**$18.15**

Prices include plug and 6-foot cord. These fans are suitable for alternating current of 100 to 110 volts, sixty cycles.

Remy Magneto, $7.95.

The Remy Magneto is a small electrical generator designed especially for use on stationary engines. With this magneto, starting batteries are used to start the engine and when the engine has attained its normal speed the magneto is then thrown in the circuit by means of a 2-point switch. The batteries used for starting will last for a very long time. These magneto igniters are very strongly and substantially and yet very simply constructed. They require practically no attention, aside from oiling once in two months and a renewal of the brushes about once in twelve or eighteen months.

No. 20H6547 Remy Magneto for make and break ignition. Friction drive. Price.....**$7.95**
No. 20H6548 Remy Magneto for make and break ignition. Belt drive. Price.....**$7.95**
No. 20H6549 Remy Magneto for jump spark ignition. Friction drive. Price.....**$9.60**
No. 20H6550 Remy Magneto for jump spark ignition. Belt drive. Price.....**$9.60**
Shipping weight, any style, about 15 pounds.

NOTE—Make and break ignition is also known as "wiper" or "hammer break." If your engine uses a spark plug, it is jump spark ignition, if not it is make and break.

For suitable coils see Nos. 20H6511 or 20H6515.

Jump Spark Coil, $3.30.

No. 20H6511 [illegible] grade Jump Spark [illegible] suitable for use on [illegible] cylinder engine, [illegible] horse power. It gives [illegible] fat spark with very [illegible] battery consumption, [illegible] it a most effective [illegible] nomical coil. It [illegible] results with [illegible] battery. Shipping weight, 5 pounds. Price.....

Make and Break Spark Coil, $1.[illegible]

No. 20H6514 Make and Break Spark Coil [illegible] coil, 1⅛-inch Norway wire core, copper windings [illegible] No. 14 wire. This is a first class coil, adapted for any make and break engine. Shipping wt., 4½ lbs. Price [illegible]

Make and Break Coil, $1.25

No. 20H6515 This is a special Thordarson [illegible] **able for use with any engine with make and break** [illegible] We recently conducted a series of extensive tests at [illegible] factory and found this coil to be the most efficient [illegible] we were able to secure. It is exceedingly economical [illegible] less current than any other coil we tested. It is [illegible] a strong steel case, 2¾x3¾x4¼ inches. Shipping [illegible] pounds. Price.....

Spark Plugs, 41 and 49 Cents.

No. 20H6521 Quick Action Spark Plug, porcelain. Divided shell so that plug can be readily cleaned. Provision made for expansion and contraction. Shipping weight, 5 ounces.
Price.....**41c**
No. 20H6522 Quick Action Spark Plug, [illegible] ping weight, 5 ounces. Price.....

Electric Engine, 48 Cents.

48c

No. 20H6350 Electric [illegible] This is a dandy little [illegible] will run at a speed of [illegible] 1,000 revolutions per [illegible] speed can be regulated by the [illegible] ling lever. [illegible] starts, [illegible] versus the [illegible] Well made [illegible] ly finished [illegible] out. Operates [illegible] one cell [illegible] Size, [illegible] with 5-inch [illegible] Weight, [illegible] Shipping [illegible]
Price, without battery.....

Electric Engine, 83 Cents.

No. 20H6351 Electric Engine, same as No. [illegible] but larger size, measuring 5¼ inches long, with [illegible] wheel. Gives best results with two batteries. Weight [illegible] Shipping weight, 30 ounces. Price, without battery [illegible]

Type B Motor, $1.98.

No. 20H6380 The Type B Motor is similar in construction to the Little Hustler, but **is much larger and more powerful.** It will drive a 6-inch fan at a high rate of speed and is fitted with grooved pulley for operating small mechanical toys. Nicely finished throughout in black enamel with nickel plated trimmings and mounted on polished baseboard. Height, 4½ inches. Weight, 2 pounds. Shipping weight, 36 ounces.
Price, without battery.....**$1.98**

No. 20H6381 Four-Blade Fan, 6 inches in diameter, to fit Type B Motor. Shipping weight, 6 ounces.
Price.....**38c**

No. 20H6382 Wire Fan Guard to fit Type B Motor only. Shipping weight, 15 ounces. Price.....

Type S High Speed Dynamo-Motor.

MAY BE USED AS EITHER A DYNAMO OR A MOTOR

$3.75

Used as a dynamo, this machine, on speed [illegible] at 3,000 revolutions per minute, has an output [illegible] Under safe maximum load the output [illegible] amperes. As a dynamo, it may be used for lighting miniature electric lamps, operating [illegible] toy trolley cars, and various other appliances [illegible] three four-candle power lamps, or a larger number [illegible] lamps. When used as a dynamo, this machine [illegible] ated by the **hand power described below,** or [illegible] 3-16-inch round belt it may be connected to a [illegible] sewing machine or any other source of power.

Used as a motor, this machine is operated [illegible] giving excellent results on from four to six [illegible] four cells of battery, any kind, wet or dry [illegible] tery will run this motor at a high speed, but [illegible] the best results are obtained by using four [illegible] eight cells, four in series, two multiples. Shipping [illegible] pounds. Price, without battery.....

No. 20H6386 Hand Power Machine for [illegible] Type S Dynamo-Motor when used as a dynamo [illegible] large gears, so that it will drive the dynamo [illegible] with very little effort. Substantial and [illegible] ping weight, 21 pounds. Price.....

Bicycle Riders! America Tires and Peerless Coaster Brakes Are TOP NOTCH!

Enclosed Motors, $1.20 to $2.00.

No. 20H6392 Type K Semi-Enclosed Motor. This motor, as shown in the illustration, is one of the most complete and practical motors ever designed for experimental work. It is furnished with detachable protecting caps on each side of the armature, and these caps may be instantly removed so that every part of the motor can be inspected. It may be started, stopped or reversed with the reversing lever shown in the illustration. The reducing gear, also shown in the illustration, changes the high speed of the motor to low speed and power, when desired. Height, 3½ inches. Shipping weight, 22 ounces.

mplete, ready for 80c

Electric Thriller, 80 Cents.

80c

No. 20H6360 The Electric Thriller will create more fun and amusement than any other electric toy ever built. It gives a shock so strong as to make a strong man tremble, or so mild as not to injure a young child, the strength of the shock depending entirely upon the speed with which the handle is turned. It costs nothing to run and does not require a battery. Finished in bright red enamel with nickel plated trimmings, mounted on a neat wood baseboard. Shipping weight, 21 ounces.
Price, complete, ready for use.....80c

Electrohit, 75 Cents.

75c

No. 20H6355 The Electrohit is a scientific and experimental toy that will delight everybody. Lots of interesting, amusing and instructive experiments may be performed with this apparatus, all of which are explained in the little sheet of instructions which goes with each one. It can be used also as a medical coil in the treatment of nervous and other diseases. The current can be regulated to any desired strength. It works with one cell of dry battery. Shipping weight, 9 ounces. Price, without battery.....75c

Miniature Electric Lamps, 23 Cents.

No. 20H6410 Miniature Electric Lamps. Be sure to state lamp number when ordering. These prices do not include receptacles. Shipping weight, 3 ounces.

ABOUT THE BATTERIES. Any of the motors described on this page may be run with one cell of battery, but to develop the full power of the larger sizes, more should be used. Two cells connected in multiple (carbon to carbon, and zinc to zinc) will run a motor three times as long as one cell. Any battery may be used, wet or dry. See preceding pages for batteries.

Permanent Horseshoe Magnets.

We furnish these magnets in two qualities, the German and the English. The English magnets are much more powerful and will retain their magnetism longer than the German magnets.

Size		No. 20H6396 German Magnets	No. 20H6398 English Magnets	Shipping Weight

Powerful Electro-Magnet, $1.50

No. 20H6406 This Powerful Magnet, operated by batteries, serves not only as a source of amusement, but also as a practical demonstration of the principles of magnetism, as many interesting experiments may be performed with it. With one good cell of dry battery this magnet has a lifting power of 5 pounds; with two cells it will lift about 10 pounds, and with four cells, if carefully handled, it will lift over 20 pounds. Shipping weight, 16 ounces.
Price, with two 3-foot conducting cords, but without batteries.....$1.50

New Model Cigar Lighter, 30 Cents.

No. 20H6244 This lighter is made with a removable torch which lights just like a match when scratched on the end of the case. Its very small size, neat appearance and convenient method of using makes it a most desirable lighter. Size, ⅝ inch thick, 1⅛ inches wide and 2¼ inches high, including torch handle. For lighting a pipe it is much better than the spring cover style. Shipping weight, 1 ounce. Price.....30c
No. 20H6245 Extra Sparking Metal for Lighter No. 20H6244, each piece in threaded brass mounting which screws into end of torch. Price, each.....5c

Ever Ready Lighter, 27 Cents.

No. 20H6239 This remarkable little invention looks like a high power rifle cartridge and the flame is produced instantly by simply striking the edge of the shell lightly with the pyrophorer rod which projects from the inside of the bullet, as shown in the illustration. Used anywhere and for any purpose that a match can be used, and it is always ready. Shipping weight, 3 ounces. Size, 3 inches long by ½ inch in diameter.
Price.....27c
No. 20H6242 Extra Bullets with pyrophorer.
Price, each.....8c

Imported Cigar Lighter, 48 Cents.

No. 20H6233 This is one of the best pocket cigar lighters yet made. It is simple and compact, measuring only ¾ inch thick, 1 inch wide and 2¾ inches long. Beautifully finished in full nickel plating, with fancy embossed surface. It is operated by simply pressing the button, which causes the cover to fly open and automatically ignites the wick. The spark is produced by a special metal called cereisen. This piece of metal of course wears away in use, but will last for a long time, and new pieces are very easily inserted when required. Shipping weight, 1 ounce. Price.....48c
No. 20H6234 Extra Cereisen Metal for sparking. Shipping weight, 1 ounce.

$2.95 BUYS THIS ONE-CELL MEDICAL BATTERY

A FAVORITE BATTERY FOR HOME USE

THIS OUTFIT is shipped complete, all ready for operation as soon as it arrives. The dry cell is encased in a nickel plated cylinder, and the case is made of polished hardwood, fitted with strong clasp and handle for carrying. All metal parts are richly nickel plated, and the contact screw has a platina point, firmly held in place by locknut. We include with this outfit a complete equipment consisting of one pair silk battery cords, one pair metal handles, one pair sponge electrodes, two wooden insulating handles, one nickel plated foot plate, directions for operating the battery, and our special instruction book, "Medical Electricity at Home." Everything is complete, so that you have only to connect the cords with the machine, turn on the switch, and the battery is in instant operation, and you can begin treatments immediately. This is by far the most popular outfit that has ever been placed upon the market. Shipping weight, 8 pounds.

No. 20H6300 Our Special One-Cell Medical Battery. Price, complete.. **$2.95**

$6.80 BUYS THIS BIG TWO-CELL MEDICAL BATTERY

BEST VALUE FOR THE MONEY ever offered by any dealer.

Our sales on this battery have been enormous, and we have received the most gratifying letters from our customers expressing their entire satisfaction with the operation of this machine. It has a beautiful appearance, the case being made of hardwood, highly polished, and fitted with strong metal clasps and handle for carrying. The two dry batteries are concealed in the lower part of the cabinet, and the cover is provided with a compartment for carrying the various electrodes. All metal parts are nickel plated, and the entire outfit finished in the very best possible manner. The battery has a regulator for controlling the strength of the current, a pole changer for reversing the poles from positive to negative when desired, and a three-point switch which allows the use of either one or both batteries at the same time. We also include the complete equipment of one pair silk battery cords, one pair metal handles, one pair sponge electrodes, two wooden insulating handles, one electric hair brush, one metal foot plate, directions for operating the battery, and our special instruction book, "Medical Electricity at Home." For a moderate priced machine, one adapted for professional use as well as home treatment, this outfit stands absolutely without an equal. Shipping weight, 15 pounds.

No. 20H6305 Improved Double Cell Medical Battery.
Price, complete..... **$6.80**

THREE-CELL MEDICAL BATTERY

THIS BATTERY is the most powerful and completely equipped machine on the market. It presents the acme of perfection in medical batteries. It is furnished with three dry cell batteries concealed in the lower part of the cabinet and connected by a switch so that either one, two, or three of the batteries can be used at one time. It has a pole changer for reversing the current from the positive to negative and there is also a circular carbon rheostat for regulating the strength of current, gradually increasing it from the very mildest vibrations to any strength desired. A special feature not found in other batteries is the wheeled rheotome which allows the interval between vibration to be regulated to any speed required. This feature is of the greatest importance in the treatment of many diseases by electricity. The outfit has a full equipment of one pair silk battery cords, two metal handles, one pair of sponge electrodes, two wooden insulating handles, one electric hair brush, one metal foot plate, complete directions for operating the battery, and our special instruction book, "Medical Electricity at Home." Size, 8x8x11 inches. Shipping weight, 23 pounds.

GENUINE EVER READY ELECTRIC FLASH LIGHTS, 58c TO $1

INSTANT LIGHT WHENEVER AND WHEREVER YOU WANT IT.

Just Press the Button. No Smoke—No Dirt—No Oil—No Danger. The Handiest Thing You Ever Had Around the

Flash lights are not only great conveniences, but practical necessities in every home. They are absolutely safe; they can be carried into a cellar where gas is leaking, or put into a keg of gunpowder without danger. They cannot possibly start a fire, and they are clean, convenient and easy to handle.

Everybody finds use for them. Doctors need them. Farmers find a thousand uses for them. Watchmen use them. Railroad men use them. On a camping trip they are indispensable. Automobilists avoid danger by using them around the car at night.

When you go to bed put one where you can reach it and there will hunting for matches if you are called up in the night. There are to go wrong, no smoke, no dirt, no oil, no danger, but a brilli simply by pressing the button.

THIS NEW MAZDA LAMP EVER READY FLASH LIGHT WITH NEW TUNGSTEN BATTERY,

THIS LARGE ILLUSTRATION SHOWS OUR SMALL TUBULAR FLASH LIGHT IN EXACT SIZE.

It is the most efficient flash light of its size ever made, measuring only 1¼ inches in diameter by 5⅜ inches long. Fo also with Merchlor Battery at $1.08. (See Nos. 20H6207 and 20H6208 below.)

THE NEW MAZDA LAMP

Nearly everyone nowadays is familiar with the Tungsten Metallic Filament Lamps, which are a tremendous improvement over the old style carbon filament lamps, and the **Mazda lamp** is an improved form of the Tungsten lamp, designed especially for flash light use with the new Tungsten batteries. **They give 500 per cent more candle power** than the carbon lamp and, in addition, **they greatly increase the life of the battery,** as they draw less current than the old style lamps. The wonderfully bright light thrown out by the Mazda lamps when used with the new Tungsten battery is almost incredible.

THE WONDERFUL NEW TUNGSTEN BATTERY

We furnish three grades of Ever Ready Flash Light Batteries, the Regular, the Merchlor and the Tungsten.

The "Regular" battery is the lowest priced and is the battery that we have furnished with flash lights for several years. It is a good, long lived battery, comparing favorably with the very best dry batteries of other makes.

The Merchlor battery is the next grade better, a battery possessing unusually long life, lasting fully 50 per cent longer than the Regular battery. It is in every way much superior to the dry batteries sold by other makers for flash light use.

The Tungsten battery is a new battery, just placed on the market, and ahead of any dry battery ever made before that there is practically no comp guaranteed to give 400 per cent more service than any other dry battery The usefulness of the flash light has been quadrupled by this new Tungste while we still furnish the Merchlor batteries, which, until the Tungsten ca the market, were the best flash lights made, we recommend the Tungsten bec of its slightly higher price, it is more economical in the end by reason of its

These new Tungsten batteries can be used with any of the flash lights on page, except No. 20H6243, and also with any of the "Osram" Tungsten flash we have sold since May 1, 1911, as we have, in anticipation of this new batte all the flash lights sold since that date with the new Mazda lamp, so that the batteries could be used when they were ready for the market. If these batteries are used with an old style lamp, they will burn out the filament; so, flash light purchased from us prior to May 1, 1911, you must order a new for it if you wish to use the new Tungsten batteries. If you bought your fla us since May 1, 1911, then you can use the Tungsten batteries without makin If you do not wish to buy a new lamp for your old flash light, you mu Merchlor batteries which do not require any change in the lamp.

EVERY PRICE WE QUOTE FOR FLASH LIGHTS IS FOR THE INSTRUMENT COMPLETE, INCLUDING THE BATTERY AND LAMP. The flash light is ready for use when you receive it, without purchasing any extra or additional parts of any kind.

Just below each flash light we quote prices for extra batteries which are necessary when the original battery becomes exhausted or worn out. We advise purchasers of flash lights to include one or more extra batteries in the same order, instead of waiting until the battery which comes with the flash light is worn out.

We also quote prices below each flash light on extra lamps, but these are only necessary when the lamp is accidentally broken, which sometimes happens.

In selecting a flash light, bear in mind that the larger longer the battery will last. For example, the battery of Tubular Light, No. 26H6212, will last two and one-half times as our Small Tubular, No. 20H6208.

Vest Pocket Flash Lights, $1.00 and $1.09.

crease Your Salary By LEARNING TELEGRAPHY

THIS BIG 264-PAGE "TELEGRAPH INSTRUCTOR" covers every branch of telegraphic work and is full of the most useful hints and suggestions that have ever been put into printers' ink. It contains complete instructions for setting up the instruments, line construction, installation of switchboards, care of batteries, etc. It gives the Morse code in full, with hundreds of abbreviations that are in general use. The duties of every railroad employe, from the superintendent down to the engineer, conductor and switchman, are fully explained in this big book. There is information regarding switchboards that is worth money to any operator.

THE AUTHOR OF "THE TELEGRAPH INSTRUCTOR," Mr. G. M. Dodge of Valparaiso, Ind., is an old and expert telegraph operator with years of varied experience in both railroad and commercial telegraph service. He is now holding a responsible position with the Western Union Telegraph Company, and is president of the largest school of telegraphy in America. He is also an associate member of the Association of Railroad Superintendents of Telegraphy. Mr. Dodge is an authority on all matters pertaining to the telegraph.

YOU CAN BECOME A STATION AGENT, equipped with all the knowledge of an old time railroad man, as soon as you have mastered the contents of "The Telegraph Instructor." The various train signals and interlocking switch devices are fully explained and illustrated by diagrams. Much other valuable information, such as the Block system for handling trains, and many other modern systems and devices used in railroading are fully explained in this big book.

BIG SALARIES are paid to telegraph operators who become expert. Twenty years ago there were less than 25,000 operators in the country. Today they number more than 75,000, as compared with 120,000 lawyers, 115,000 preachers and 150,000 doctors. The demand for telegraph operators is rapidly increasing every day and the beginner usually receives a salary of $50.00 to $60.00 per month. Positions with commission houses on the Board of Trade, where accuracy and speed are absolutely necessary, pay as high as $4.00 and $5.00 per day, and the chief dispatchers of many railroads receive an annual salary of thousands of dollars and have the very best opportunity for promotion to the highest executive offices of the company.

No. 20H6477 "The Telegraph Instructor," just as illustrated and described above. Price.....(If mail shipment, postage extra, 7 cents)..... **65c**

OUR IMPROVED
Learner's Telegraph Outfit

PROVED 4-OHM LEARNER'S INSTRUMENT, as included in this outfit, consists of quarter sawed oak base. The key is made with nickel bar, latest thumbnut adjustment, composition switch handle, platina contact points and cast frame finished in black. The sounder has covered nd to 4 ohms resistance. The sounding bar and sounder frame are lacquered brass and made with nut adjustments. The sounder frame and key base are each cast, which insures an easy working, rument which cannot get out of adjustment.

PERATOR'S MANUAL" which we include free of charge with this outfit, is a sixteen-page book, containing full instructions for setting up and operafit. It also contains instructions for telegraphing, explaining the Morse code fully, gives a number exercises and a lot of general information.

H6451 Learner's Telegraph Outfit, with improved instrument, complete as illustrated herewith. Shipping weight, 5 pounds. Price..... **$1.48**

H6453 Our Special Learner's Telegraph Outfit, consisting of 4-Ohm Learner's Instrument with necting wires, etc., just exactly the same as outfit No. 20H6451 except that instead of the small Manual," we include a copy of our big 264-page book, "The Telegraph Instructor," as d described above. Shipping weight, 5¾ pounds. Price..... **$2.10**

H6455 Our Double Learner's Telegraph Outfit. This outfit consists of two of our 4-ohm instrucells of dry battery, 300 feet of insulated copper wire and operator's manual. With this outfit the can be installed in two different rooms in the house, and two operators can practice the et, sending and receiving messages from each other. Shipping wt., 19 lbs. Price, complete **$3.90**

H6463 Improved 20-Ohm Learner's Instrument. This is exactly the same as our regular 4-Ohm trument, except that the magnets are wound to 20 ohms resistance, making the instrument suitable any length up to 15 miles. No connecting wire or battery is included. Shipping nces. Price..... **$1.65**

TIONAL AUTOMATIC TELEGRAPH TRANSMITTER

$14.60 AND $18.25

The National Automatic Telegraph Transmitter consists of a high grade sounder and key, together with a clockwork motor mounted on a polished oak base, one copy of "The Telegraph Instructor," as illustrated above, and a complete series of twenty-seven records. This outfit constitutes an automatic teacher by which one may become an expert telegraph operator in a comparatively short time. It is mechanism that a child can operate it, and it is of equal value to one who knows nothing of telegraphy and to who is well advanced in the work.

CORDS consist of long strips of paper tape which contain perforations corresponding to the dots and dashes of the Morse alphabet. As the tape is drawn through the apparatus by the clockwork cuit is broken and closed in accordance with the perforations of the tape, causing the sounder to reproduce the exactly as though an expert operator were working the key. The complete series of twenty-seven records comng exercises, newspaper reports, train orders, commercial and railway messages, wire conversation, market messages and many miscellaneous exercises tending to make the student proficient in every field of telegraphy. may be reproduced at any desired speed from five to forty words per minute, and they are superior to all records because they are exact reproductions of messages sent by the human hand. Each record was origy an expert operator sending into the recording perforator by means of an ordinary telegraph key. Experienced tell you that this human quality is a very important factor in mastering telegraphy.

EXPERTS. The National Automatic Telegraph Transmitter will make you an expert operator. You learn to send accurately by listening to records which have been made by an expert telegraph which reproduce the characters just exactly as they were sent by him. Each record contains from 300 to there are twenty-seven different records in the outfit, making a total of more than 10,000 words.

6490 The National Automatic Telegraph Transmitter complete, including key and sounder, clock work motor, records, "The Telegraph Instructor" and two Stand-by dry batteries. Shipping weight, 21 **$18.25**

6491 The National Automatic Telegraph Transmitter, exactly the same as No. 20H6490, but sounder or batteries. Shipping weight, 14¾ pounds. Price..... **14.60**

this outfit without key, sounder or batteries, because many of our customers already own first class keys and any high grade key and sounder can be used in place of the ones which are ordinarily supplied.

WIRELESS TELEGRAPH HAND BOOK, 67c

OPERATORS' WIRELESS TELEGRAPH AND TELEPHONE HAND BOOK. By Victor H. Laughter.

No. 20H6478 The most complete treatise on the subject yet published. Gives the historical work of early investigators up to the present day. Describes in detail the construction of an experimental wireless set. How to wind spark coils and dimensions of all size coils. The tuning of a wireless station is fully explained with points on the construction of the various instruments. A special chapter on the study of wireless telegraphy is given and the rules of the naval stations with all codes, abbreviations, etc., and other matters interesting to one who takes up this study. The most difficult points have been explained in nontechnical language and can be understood by the layman. Wireless telephony is given several chapters and all the systems in use are shown with photographs and drawings. By some practical work and a close study of this treatise one can soon master all the details of wireless telegraphy. Size, 5½x7¾ inches, bound in cloth. 180 pages. Fully illustrated, and with six additional full page halftone illustrations showing the installation of Wireless on the U. S. warships and ocean liners. Price.....**67c**

If mail shipment, postage extra, 10 cents.

PRIVATE LINE SET, $2.48.

$2.48

No. 20H6474 4-Ohm Private Line Combination Set. This instrument consists of our Aluminum Lever Giant Sounder described under No. 20H6480 and our Standard Legless Steel Lever Key No. 20H6485 mounted together on a fine polished oak base board. Special attention is directed to the improved method of mounting the sounder by which an open space is left between the baseboard and the metal, resulting in an unusually loud, clear sound. This instrument is beautifully finished in lacquered brass with the exception of the steel lever, which is nickel plated, and the sounder bar, which is aluminum. The magnets are covered with polished hard rubber and the contact points of the key are hardened platina. All adjustments are made by thumbscrews and materials and workmanship throughout are strictly high class. No better telegraph instrument is made. Suitable for private practice or for use on lines up to ¼ mile in length. Shipping weight, 45 ounces. Price.....**$2.48**

No. 20H6475 20-Ohm Private Line Combination Set. Same as No. 20H6474, except that the sounder magnets are wound to 20 ohms resistance, making the instrument suitable for use on lines of any length up to 50 miles. Shipping weight, 45 ounces. Price.....**$2.65**

LEVER KEY, 98 CENTS.

No. 20H6485 Standard Steel Lever Key, legless. This is one of the handsomest and best working keys on the market, made with strong nickel plated steel lever and hardened platina points. Finished throughout in lacquered instrument. Shipping weight, 10 ounces. **98c**

$1.10

GIANT SOUNDER, $1.60.

No. 20H6480 4-Ohm Giant Sounder. This instrument is handsomely finished in lacquered brass and mounted on a polished oak base. The sounding bar is aluminum and the magnets are specially wound to insure perfect insulation and covered with polished hard rubber. A special feature is the open space between the wood base and the metal which acts as a resonance box, resulting in an unusually loud, clear sound. No better sounder is made. Suitable for lines ¼ mile or less in length. Shipping weight, 24 ounces. Price.....**$1.60**

No. 20H6481 20-Ohm Giant Sounder. Same as No. 20H6480, but with magnets wound to 20 ohms resistance. Suitable for lines of any length up to 50 miles. Shipping weight, 24 ounces. Price.....**$1.75**

GENUINE EVER READY ELECTRIC FLASH LIGHTS, 58c TO $1

INSTANT LIGHT WHENEVER AND WHEREVER YOU WANT IT.

Just Press the Button. No Smoke—No Dirt—No Oil—No Danger. The Handiest Thing You Ever Had Around the H

Flash lights are not only great conveniences, but practical necessities in every home. They are absolutely safe; they can be carried into a cellar where gas is leaking, or put into a keg of gunpowder without danger. They cannot possibly start a fire, and they are clean, convenient and easy to handle.

Everybody finds use for them. Doctors need them. Farmers find a thousand uses for them. Watchmen use them. Railroad men use them. On a camping trip they are indispensable. Automobilists avoid danger by using them around the car at night.

When you go to bed put one where you can reach it and there will hunting for matches if you are called up in the night. There are to go wrong, no smoke, no dirt, no oil, no danger, but a brilli simply by pressing the button.

THIS NEW MAZDA LAMP EVER READY FLASH LIGHT WITH NEW TUNGSTEN BATTERY,

THIS LARGE ILLUSTRATION SHOWS OUR SMALL TUBULAR FLASH LIGHT IN EXACT SIZE.

It is the most efficient flash light of its size ever made, measuring only 1¼ inches in diameter by 5⅜ inches long. Fu also with Merchlor Battery at $1.08. (See Nos. 20H6207 and 20H6208 below.)

THE NEW MAZDA LAMP

Nearly everyone nowadays is familiar with the Tungsten Metallic Filament Lamps, which are a tremendous improvement over the old style carbon filament lamps, and the **Mazda lamp** is an improved form of the Tungsten lamp, designed especially for flash light use with the new Tungsten batteries. **They give 500 per cent more candle power** than the carbon lamp and, in addition, **they greatly increase the life of the battery,** as they draw less current than the old style lamps. The wonderfully bright light thrown out by the Mazda lamps when used with the new Tungsten battery is almost incredible.

THE WONDERFUL NEW TUNGSTEN BATTERY

We furnish three grades of Ever Ready Flash Light Batteries, the Regular, the Merchlor and the Tungsten.

The "Regular" battery is the lowest priced and is the battery that we have furnished with flash lights for several years. It is a good, long lived battery, comparing favorably with the very best dry batteries of other makes.

The Merchlor battery is the next grade better, a battery possessing unusually long life, lasting fully 50 per cent longer than the Regular battery. It is in every way much superior to the dry batteries sold by other makers for flash light use.

The Tungsten battery is a new battery, just placed on the market, and ahead of any dry battery ever made before that there is practically no comp guaranteed to give 400 per cent more service than any other dry battery The usefulness of the flash light has been quadrupled by this new Tungsten while we still furnish the Merchlor batteries, which, until the Tungsten was the market, were the best flash lights made, we recommend the Tungsten because of its slightly higher price, it is more economical in the end by reason of its

These new Tungsten batteries can be used with any of the flash lights page, except No. 20H6243, and also with any of the "Osram" Tungsten flash we have sold since May 1, 1911, as we have, in anticipation of this new batt all the flash lights sold since that date with the new Mazda lamp, so that the batteries could be used when they were ready for the market. If these batteries are used with an old style lamp, they will burn out the filament; so flash light purchased from us prior to May 1, 1911, you must order a new for it if you wish to use the new Tungsten batteries. If you bought your flash us since May 1, 1911, then you can use the Tungsten batteries without making If you do not wish to buy a new lamp for your old flash light, you must Merchlor batteries which do not require any change in the lamp.

EVERY PRICE WE QUOTE FOR FLASH LIGHTS IS FOR THE INSTRUMENT COMPLETE, INCLUDING THE BATTERY AND LAMP. The flash light is ready for use when you receive it, without purchasing any extra or additional parts of any kind.

Just below each flash light we quote prices for extra batteries which are necessary when the original battery becomes exhausted or worn out. We advise purchasers of flash lights to include one or more extra batteries in the same order, instead of waiting until the battery which comes with the flash light is worn out.

We also quote prices below each flash light on extra lamps, but these are only necessary when the lamp is accidentally broken, which sometimes happens.

In selecting a flash light, bear in mind that the larger the longer the battery will last. For example, the battery of our Tubular Light, No. 26H6212, will last two and one-half times as our Small Tubular, No. 20H6208.

Vest Pocket Flash Lights, $1.00 and $1.09.

Increase Your Salary By LEARNING TELEGRAPHY

THIS BIG 264-PAGE "TELEGRAPH INSTRUCTOR" covers every branch of telegraphic work and is full of the most useful hints and suggestions that have ever been put into printers' ink. It contains complete instructions for setting up the instruments, line construction, installation of switchboards, care of batteries, etc. It gives the Morse code in full, with hundreds of abbreviations that are in general use. The duties of every railroad employe, from the superintendent down to the engineer, conductor and switchman, are fully explained in this big book. There is information regarding switchboards that is worth money to any operator.

THE AUTHOR OF "THE TELEGRAPH INSTRUCTOR," Mr. G. M. Dodge of Valparaiso, Ind., is an old and expert telegraph operator with years of varied experience in both railroad and commercial telegraph service. He is now holding a responsible position with the Western Union Telegraph Company, and is president of the largest school of telegraphy in America. He is also an associate member of the Association of Railroad Superintendents of Telegraphy. Mr. Dodge is an authority on all matters pertaining to the telegraph.

YOU CAN BECOME A STATION AGENT, equipped with all the knowledge of an old time railroad man, as soon as you have mastered the contents of "The Telegraph Instructor." The various train signals and interlocking switch devices are fully explained and illustrated by diagrams. Much other valuable information, such as the Block system for handling trains, and many other modern systems and devices used in railroading are fully explained in this big book.

BIG SALARIES are paid to telegraph operators who become expert. Twenty years ago there were less than 25,000 operators in the country. Today they number more than 75,000, as compared with 120,000 lawyers, 115,000 preachers and 150,000 doctors. The demand for telegraph operators is rapidly increasing every day and the beginner usually receives a salary of $50.00 to $60.00 per month. Positions with commission houses on the Board of Trade, where accuracy and speed are absolutely necessary, pay as high as $4.00 and $5.00 per day, and the chief dispatchers of many railroads receive an annual salary of thousands of dollars and have the very best opportunity for promotion to the highest executive offices of the company.

No. 20H6477 "The Telegraph Instructor," just as illustrated and described above. Price.....(If mail shipment, postage extra, 7 cents)..... **65c**

OUR IMPROVED Learner's Telegraph Outfit

PROVED 4-OHM LEARNER'S INSTRUMENT, as included in this outfit, consists of a full size key and sounder, mounted quarter sawed oak base. The key is made with nickel bar, latest thumbnut adjustment, composition ed switch handle, platina contact points and cast frame finished in black. The sounder has covered and to 4 ohms resistance. The sounding bar and sounder frame are lacquered brass and made with hut adjustments. The sounder frame and key base are each cast, which insures an easy working, trument which cannot get out of adjustment.

PERATOR'S MANUAL" which we include free of charge with this outfit, is a sixteen-page book, containing full instructions for setting up and operatutfit. It also contains instructions for telegraphing, explaining the Morse code fully, gives a number xercises and a lot of general information.

H6451 Learner's Telegraph Outfit, with improved instrument, complete as illustrated d herewith. Shipping weight, 5 pounds. Price..... **$1.48**

H6453 Our Special Learner's Telegraph Outfit, consisting of 4-Ohm Learner's Instrument with nnecting wires, etc., just exactly the same as outfit No. 20H6451 except that instead of the small Manual," we include a copy of our big 264-page book, "The Telegraph Instructor," as nd described above. Shipping weight, 5¾ pounds. Price..... **$2.10**

H6455 Our Double Learner's Telegraph Outfit. This outfit consists of two of our 4-ohm instrucells of dry battery, 300 feet of insulated copper wire and operator's manual. With this outfit the can be installed in two different rooms in the house, and two operators can practice the bet, sending and receiving messages from each other. Shipping wt., 19 lbs. Price, complete **$3.90**

H6461 Improved 4-Ohm Learner's Instrument, without battery or connecting wire. ight, 42 ounces. Price..... **1.35**

H6463 Improved 20-Ohm Learner's Instrument. This is exactly the same as our regular 4-Ohm strument, except that the magnets are wound to 20 ohms resistance, making the instrument suitable any length up to 15 miles. No connecting wire or battery is included. Shipping unces. Price..... **$1.65**

TIONAL AUTOMATIC TELEGRAPH TRANSMITTER

$14.60 AND $18.25

The National Automatic Telegraph Transmitter consists of a high grade sounder and key, together with a clockwork motor mounted on a polished oak base, one copy of "The Telegraph Instructor," as illustrated above, and a complete series of twenty-seven records. This outfit constitutes an automatic teacher by which one may become an expert telegraph operator in a comparatively short time. It is echanism that a child can operate it, and it is of equal value to one who knows nothing of telegraphy and to o is well advanced in the work.

CORDS consist of long strips of paper tape which contain perforations corresponding to the dots and dashes of the Morse alphabet. As the tape is drawn through the apparatus by the clockwork uit is broken and closed in accordance with the perforations of the tape, causing the sounder to reproduce the actly as though an expert operator were working the key. The complete series of twenty-seven records comg exercises, newspaper reports, train orders, commercial and railway messages, wire conversation, market messages and many miscellaneous exercises tending to make the student proficient in every field of telegraphy. may be reproduced at any desired speed from five to forty words per minute, and they are superior to all records because they are exact reproductions of messages sent by the human hand. Each record was origan expert operator sending into the recording perforator by means of an ordinary telegraph key. Experienced ell you that this human quality is a very important factor in mastering telegraphy.

XPERTS. The National Automatic Telegraph Transmitter will make you an expert operator. You learn to send accurately by listening to records which have been made by an expert telegraph hich reproduce the characters just exactly as they were sent by him. Each record contains from 300 to there are twenty-seven different records in the outfit, making a total of more than 10,000 words.

490 The National Automatic Telegraph Transmitter complete, including key and sounder, clock work motor, ecords, "The Telegraph Instructor" and two Stand-by dry batteries. Shipping weight, 21 **$18.25**

491 The National Automatic Telegraph Transmitter, exactly the same as No. 20H6490, but ounder or batteries. Shipping weight, 14¾ pounds. Price..... **14.60**

this outfit without key, sounder or batteries, because many of our customers already own first class keys nd any high grade key and sounder can be used in place of the ones which are ordinarily supplied.

WIRELESS TELEGRAPH HAND BOOK, 67c

OPERATORS' WIRELESS TELEGRAPH AND TELEPHONE HAND BOOK. By Victor H. Laughter.

No. 20H6478 The most complete treatise on the subject yet published. Gives the historical work of early investigators up to the present day. Describes in detail the construction of an experimental wireless set. How to wind spark coils and dimensions of all size coils. The tuning of a wireless station is fully explained with points on the construction of the various instruments. A special chapter on the study of wireless telegraphy is given and the rules of the naval stations with all codes, abbreviations, etc., and other matters interesting to one who takes up this study. The most difficult points have been explained in nontechnical language and can be understood by the layman. Wireless telephony is given several chapters and all the systems in use are shown with photographs and drawings. By some practical work and a close study of this treatise one can soon master all the details of wireless telegraphy. Size, 5½x7¾ inches, bound in cloth. 180 pages. Fully illustrated, and with six additional full page halftone illustrations showing the installation of Wireless on the U. S. warships and ocean liners. Price.....**67c**

If mail shipment, postage extra, 10 cents.

PRIVATE LINE SET, $2.48.

$2.48

No. 20H6474 4-Ohm Private Line Combination Set. This instrument consists of our Aluminum Lever Giant Sounder described under No. 20H6480 and our Standard Legless Steel Lever Key No. 20H6485 mounted together on a fine polished oak base board. Special attention is directed to the improved method of mounting the sounder by which an open space is left between the baseboard and the metal, resulting in an unusually loud, clear sound. This instrument is beautifully finished in lacquered brass with the exception of the steel lever, which is nickel plated, and the sounder bar, which is aluminum. The magnets are covered with polished hard rubber and the contact points of the key are hardened platina. All adjustments are made by thumbscrews and materials and workmanship throughout are strictly high class. No better telegraph instrument is made. Suitable for private practice or for use on lines up to ¼ mile in length. Shipping weight, 45 ounces. Price.....**$2.48**

No. 20H6475 20-Ohm Private Line Combination Set. Same as No. 20H6474, except that the sounder magnets are wound to 20 ohms resistance, making the instrument suitable for use on lines of any length up to 50 miles. Shipping weight, 45 ounces. Price.....**$2.65**

LEVER KEY, 98 CENTS.

No. 20H6485 Standard Steel Lever Key, legless. This is one of the handsomest and best working keys on the market, made with strong nickel plated steel lever and hardened platina points. Finished throughout in lacquered strument. Shipping weight, 10 ounces. **98c**

6 Standard with legs, is of the nstruction as is made with through the amped from ter key is rice. Shipounces. **$1.10**

GIANT SOUNDER, $1.60.

No. 20H6480 4-Ohm Giant Sounder. This instrument is handsomely finished in lacquered brass and mounted on a polished oak base. The sounding bar is aluminum and the magnets are specially wound to insure perfect insulation and covered with polished hard rubber. A special feature is the open space between the wood base and the metal which acts as a resonance box, resulting in an unusually loud, clear sound. No better sounder is made. Suitable for lines ¼ mile or less in length. Shipping weight, 24 ounces. Price.....**$1.60**

No. 20H6481 20-Ohm Giant Sounder. Same as No. 20H6480, but with magnets wound to 20 ohms resistance. Suitable for lines of any length up to 50 miles. Shipping weight, 24 ounces. Price.....**$1.75**

Watches Diamonds Jewelry

OLD GOLD ACCEPTED BY US **in exchange at the highest market price for any article in our Jewelry Department.** We allow 72 cents per pennyweight for 18-karat gold, 56 cents per pennyweight for 14-karat gold and 40 cents per pennyweight for 10-karat gold. In all cases we hold the old metal until we are instructed by our customers that the value is satisfactory

OLD SILVER ACCEPTED **in exchange at the rate of 45 cents per** [illegible] **jewelry, watches, diamonds, etc.** In all [illegible] hold the old metal until we are instructed by our customers that the value is satisfa[illegible]

ENGRAVING. **Cash in full must accompany all orders where goods are to be** [illegible] **with engraving. We charge for engraving in script on** [illegible] **watches, etc., 2½ cents per letter; in Old English, small, 5 cents per letter.**

INTERSTATE CHRONOMETER.

If you want the most accurate running watch manufactured in the United States, be sure to buy our Interstate Chronometer. It has our unqualified approval. We make these statements only after years of experience, many experiments and comparisons with the most expensive watches and watches of the highest degrees of perfection sold by others. We describe and illustrate the Interstate Chronometer in gold filled cases on page 784. **Our prices, according to grade, are little more than half what inferior watches are sold for elsewhere.** Our money saving prices are simply due to the fact that we are not controlled by any trust or fixed price license and are satisfied with a small profit rather than the usual profits of the watch market. We do not place a fictitious value on a name; we put the entire value in the watch—accuracy in running, perfection in construction, fineness of finish.

WHY WE CAN GUARANTEE OUR WATCH MOVEMENTS FOR FIVE YEARS.

Accuracy in timekeeping is a most valuable feature in a watch. We therefore consider this delicate piece of mechanism of unusual importance. We buy every movement listed in this catalog from regularly appointed distributing agents or direct from the manufacturer according to the make.

We investigate every detail. We have a large force of skilled watchmakers who carefully examine, time and regulate every movement. When we receive your order we take the movement from its original dust and damp proof box used by the factory; we then adjust and regulate it properly and carefully place it in the case you select. In regulating a movement we [illegible] time it with a chronometer—an instrument for measuring [illegible] accurately. If we find the rating according to its [illegible] pass it as a watch that will give satisfaction according [illegible] guarantee. If found inaccurate according to grade, we [illegible] it so it will run accurately.

We pack each watch for shipment by our own special [illegible] pronounced the very best by the various express companies [illegible] leading watch manufacturers who have visited our [illegible] investigate it. Our system absolutely protects the [illegible] against injury by jars, shaking or dropping.

We make it as certain as possible that every risk is [illegible] **nated** and as a result we rarely have a complaint [illegible] of our watches. Our extraordinary care should [illegible] that this is one of the safest places in the world [illegible] watch.

OUR GUARANTEES AND WHAT THEY MEAN TO YOU

In offering you our stocks of watches, diamonds and jewelry we are not only giving you the opportunity of selecting from the best assortments in the country at prices that mean a substantial saving on every transaction, but we are at the same time assuring you of absolute protection against disappointment—a protection that every experienced purchaser of watches, diamonds and jewelry knows how to appreciate. Without attempting any lengthy explanation of the widely different qualities and values offered in jewelry, we simply publish a [illegible] fitting introduction to this department of our catalog our ABSOLUTE GUARANTEES [illegible] our various lines of watch cases, watch movements, diamonds and jewelry. We [illegible] when you order from us, you will receive EXACTLY WHAT OUR CATALOG DESC[illegible] and in each case a LARGER MEASURE OF VALUE FOR YOUR MONEY THAN [illegible] COULD POSSIBLY OBTAIN FROM ANY OTHER FIRM.

WATCH CASE GUARANTEE.

Where a watch case in this catalog is described as guaranteed for life, twenty-five, twenty, ten, or five years, it applies to gold filled watch cases, and means that the case is covered by plates of solid gold over an inner plate of hard composition metal, and the gold is guaranteed to wear and retain its perfect color for the time stated, and if the gold in any piece or part of the case wears through within the time mentioned in the description and in the guarantee, the case will be replaced with a new case free of cost to you.

WHAT WE MEAN BY OUR LIFE GUARANTEE IS SIMPLY THIS:

Any watch case warranted and accompanied by our life guarantee can be returned to us at any time should the gold wear off exposing the inner composition metal, and we will, immediately upon its receipt, exchange it for a brand new case, free of all charge and return the transportation charges. This is in reality insuring your watch case for the term of your natural lifetime.

WATCH MOVEMENT GUARANTEE.

Where we guarantee a watch movement for five years, the guarantee is absolute and binding upon us to replace or repair, free of cost to you, any piece or part of the watch movement that may become defective by reason of imperfect material or workmanship at any time within five years; and while this guarantee does not include removing dirt, cleaning of movement or repairing, free of cost, any piece or part that may be broken or damaged through careless or improper handling, it is the widest and strongest watch movement guarantee ever made, and if you buy any movement from us and on the last day of the fifth year the watch stops or fails to keep accurate time, and this failure is in any way due to imperfect material or workmanship, it will be repaired by us or replaced with a new movement free of any cost to you.

TARNISHED JEWELRY.

Jewelry, like any metal, to be kept bright must be washed and polished from time to time. Solid gold, gold filled and rolled plate jewelry will sometimes tarnish, especially when it is allowed to lie unused in boxes or bureaus, etc. Coal gas, the contact of matches, sulphur, rubber and acids will cause tarnish or oxidization on gold and silver. All good jewelry can be made like new by the application of hot water, soap and a little ammonia in the water. Scrub the article with a brush, rinse off, submerge in alcohol, then dry in boxwood sawdust, polish by a rub up with a piece of chamois, a piece of Canton flannel or any soft cotton fabric. We can supply you with a box of boxwood sawdust for 10 cents; it will last for years. **Order by number.**

No. 4H500 Boxwood Sawdust. Price, per box..... **10c**

WATCH CLEANING AND OILING AT ONE-HALF THE PRICE ASKED BY OTHERS.

A watch should not run longer than fifteen to eighteen months without having the oil cleaned off and fresh oil supplied. An engine or sewing machine is oiled several times a day, but we have known people to carry a watch for ten years without having it cleaned or fresh oil applied. Usually a movement thus treated **is of no value, being entirely worn out.** Our charge for cleaning and oiling is 75 **cents.** The regular price is **$1.50.**

BIG SAVINGS IN WATCH REPAIRING.

Our Watch Repair Department offers wonderful economy, our charges being about half the usual charge.

We employ only skilled watchmakers and our Watch Repair Department is thoroughly equipped in every way.

When we receive your watch with instructions to put it in good running order we first examine it thoroughly and write you the cost of repairs. When we receive your reply with your approval of the charge we at once proceed with the work and do everything necessary to put the watch in perfect condition. There will be no delay, for we have all materials and findings. We can replace worn or broken parts at once without sending away for the pieces.

When you ship us a watch be sure to pack it carefully, leaving plenty of space between the watch and the sides of the box; fill this space with some soft material, such as cotton batting or tissue paper. Ship the watch by registered mail, marking on the outside of the package your name and address. Write us at the same time that you have done so, also without fail include in your letter the **movement number and case number,** giving us a full explanation regarding the trouble with the watch.

SHIPPING DIRECTIONS.

When shipping watches or jewelry for repairs [illegible] **mark plainly as follows: "Sears, Roebuck and Co.,** [illegible] **Repair Department, Chicago, Ill.,"** and in upper corner put your own name and address, preferring [illegible] "From." Also enclose a card in the package with [illegible] name and address and stating that the watch is to [illegible] If you send a watch or small piece of jewelry by mail [illegible] to put letter postage (2 cents an ounce) on it, [illegible] writing on the card put inside the package makes [illegible] to first class mail charges. It is safer to send it [illegible] mail anyway, and it would be better to register it [illegible] additional. The government guarantees safe delivery [illegible] tered mail. At the same time you send the package [illegible] a separate letter, stating that you have sent a watch [illegible] or express) for repairs, what repairs you want made [illegible] you wish us to quote cost of repairing.

MERCHANDISE ENGRAVED ACCORDING TO INSTRUCTIONS.

We must caution you that under no circumstances [illegible] **exchange or return money on any merchandise that** [illegible] **engraved according to instructions with letters, dates** [illegible] **grams.** The merchandise is of no value to us after [illegible] so marked. Our goods are as shown and we have [illegible] them as carefully and as accurately as we could [illegible] should you desire any article engraved you must do [illegible] own risk. But remember, we guarantee the quality [illegible] article in our catalog to be exactly as described [illegible] willing at any time to return your money, together [illegible] portation charges both ways, whether the goods are [illegible] not when the quality proves different than is claimed.

MAIL AND EXPRESS SHIPMENTS.

After many years of experiments and keeping a [illegible] them, we have perfected a box for shipment of watches for practical purposes is perfect, as explained in [illegible] above. We can ship your watch by mail or express [illegible] antee its arrival in perfect condition.

Express shipment is the safer method because you are [illegible] tected against loss. Values of less than $25.00, [illegible] safely be shipped by registered mail. In fact, we [illegible] to have small articles of jewelry shipped by registered [illegible] value does not exceed $25.00.

POSTAGE AND EXPRESS CHARGES. Postage [illegible] ounce plus 10 cents a package if registered. A watch [illegible] for shipment weighs 6 to 8 ounces; chains and [illegible] jewelry items about 2 ounces each; 16 cents to 24 [illegible] postage and registration fee for any watch. Express [illegible] are 25 cents on any watch to any part of the [illegible]

REGARDING THE LIFE OF THE AVERAGE AMERICAN MADE WATCH.

American made movements, such as the Interstate Chronometer, Elgin, Hampden, Waltham and others, according to the recognized authorities, have a life of twenty years' service giving good time, though watches that are carefully handled and when out of repair, repaired by experts, will give a service of no less than thirty to forty years.

A watch movement is an intricate and carefully constructed piece of mechanism, and like all machinery, must be properly oiled, adjusted and regulated from time to time. Every watch should be reoiled, cleaned and regulated at least every fifteen months. Unless this is done the life of the watch as an accurate timekeeper will be much reduced.

About incompetent watch repairers. Statistics show that incompetent watch repairers, of which there are thousands scattered throughout the United States, do more damage to watches on account of their incompetency, lack of proper tools and genuine watch material, than the actual wear and tear by use.

As a protection to our customers, and to secure for them an actual trial of any watch they purchase from us and insure their getting a watch that will give entire satisfaction for a term of no less than twenty years, we guarantee every watch movement we send to our customers to run well and continually for five years. Any watch that will run well and continually for one year to a year and one-half, and is then cleaned and reoiled will according to the best authorities give good time for no less than twenty years.

A surprising situation exists. We have received watches in our thoroughly equipped Repair Department which, when examined by our experts, were found to have been so damaged by bad work on the part of incompetent jewelers that general repairs of the entire watch were necessary and many parts had to be replaced. These experiences prove to us that the best advice we can give you is to be sure when you have your watch cleaned, regulated or repaired that you have the work done only by those who are recognized as skillful repair experts.

Accidents will happen. The most careful of us will sometimes injure a watch and not know how it happened. Should any of our customers require a watch repaired, we advise for their own protection, to send it to us. We guarantee to return the watch perfectly repaired, with damaged parts replaced with brand new material, and make the watch as nearly new as skill is able to do it. You will find our charges from 35 to 50 per cent less than others ask and the work perfectly, as well as very speedily done. In every instance we guarantee our [illegible] to give entire satisfaction.

This is a copy of our diamond certificate of guarantee in [illegible]

HORSE TIMER AT A CUT PRICE.

$3.88

No. 4H12057

New, up to date, solid nickel, Bassene style, stem wind, jeweled Horse Timer. This timer is operated from the crown by merely pressing down. It has start, stop and fly back arrangements; also, as illustration shows, has a minute register. The escapement is jeweled. The case is solid nickel. Bright polish. The movement is imported from Switzerland, straight line cylinder escapement.

The lever movement, however, is the one we advise you to select. This principle, that is, **the lever escapement principle,** in watch making is accepted as the most accurate and most dependable. We always advise purchasing lever escapement movements.

LADIES' NICKEL WATCH

REDUCED PRICE
$1.59

Send us $1.59 and postage (8 cents), making a total of $1.67, and we will send you this very handsome small size thin model nickel American watch, exactly as the illustration shows. Each one comes in a handsome lined box.

The case is nickel. The movement is American made. The dial is porcelain, not paper. For a school girl, school teacher or a young person desiring a cheap unpretentious watch that will give satisfaction, we advise this one. It is a good timekeeper and we guarantee it to run well and accurately for a year; with proper care it will wear five, ten and even fifteen years.

No. 4H12282 Price.....$1.59

LADIES' SOLID SILVER 0-SIZE WATCHES

$5.50

An American made watch in this small size, made of silver, has been wanted by thousands of ladies. We show here the smallest silver American watch made. These cases are solid silver. Hand engraved with any Old English initial free of charge. The entire case is perfectly finished in every respect. Stem wind and pendant set. We guarantee the movement for a term of five years, and the case will last your natural lifetime. We can fit this case with any movement, in either open face or hunting style, at prices quoted.

VERLIKE ALASKA METAL 18-SIZE WATCHES

metal is a compound, a silverlike composition which resembles solid silver closer than etal or compound. It is a white metal through and through, takes a hard bright ot easily scratched or defaced and is tougher and more closely grained, and has a sting power than silver; therefore it protects your timepiece perfectly. The principal ingredient in Alaska metal compound is nickel, a metal which very rarely tarnishes or corrodes. We believe that the Alaska metal compound will give greater satisfaction as an imitation of solid silver than any other compound created.

Open Face 7-Ounce Genuine Alaska Metal Screw Back and Screw Bezel Stem Wind and Stem Set Watches.

$2.80 and up

The Case Alone Weighs 5½ oz.

This case is manufactured especially for us. It is one of the heaviest and most serviceable cases made; an absolute protection to the movement. See the small illustration to the right of this watch, showing the three parts of the case, the bezel, center and back, which screw into place, thus securing for the movement absolute protection. Take our advice and select from the list, below, a high grade movement. A case of this superior style and strength and all the protection it gives to the movement merits the selection of a high grade movement.

No. 4H12336

Size Lever Set Open Face Railway Watches at a Wonderful Saving

Y PASS RAILWAY INSPECTION AND ARE GUARANTEED BY THE MANUFACTURERS

ASES we show are considered by the greatest authorities the most perfect style of watch cases manufactured for the purpose intended. They offer the greatest protection to a high grade movement against dust, dampness, temperature and strain, just what railroad men hey are called solid back cup cases.

IRST ILLUSTRATION shows the front view of the watch as it appears with the movement fitted and the bezel screwed into place. The second illustration shows the bezel unscrewed with the swing ring slightly lifted up fitted with the t. It likewise illustrates the patent screw nut and stem attachment. We supply this type of case in Alaska metal, gold filled guaranteed ty years, solid silver or solid gold.

PECIALLY RECOMMEND the railway watches manufactured by the Dueber-Hampden Watch Co., of Canton, Ohio.

HREE MOVEMENTS we quote of this celebrated make, the John Hancock, 21-Jeweled Special Railway and the 23-Jeweled Special Railway, are the very latest productions, all pass railway inspection, have double roller escapement, adjusted, and every improvement for accurate timekeeping that is possible to get into a watch, are incorporated in these watches. Don't confuse them with obsolete and discontinued types. We guarantee them to be perfect in every detail. We also guarantee them accurate running watches and guarantee safe delivery. We offer you wonderful savings when you consider the fixed prices on these watches. Retail jewelers are forced to ask you exorbitant prices. Look at our quotations, then compare them with what your local merchant asks, and convince yourself.

Fixed prices on the following so called license grade movements are:

19-Jeweled Crescent Street Movement Without Case. Price, $30.00.

21-Jeweled Vanguard Movement Without Case. Price, $37.50

21-Jeweled Crescent Street Movement Without Case. Price, $31.50.

See the wonderful reduction from these prices that we offer.

25 CENTS will carry any watch to any part of the United States by express.

ALASKA METAL CASE is made of a compound metal. Its principal ingredient is nickel, and it is made especially for us. The solid silver case weighs 3 ounces and is of solid silver, 925-1000 fine. The gold filled case, guaranteed for twenty years' continual service, is manufactured by the Illinois Watch Case Co. of Elgin, Ill. They guarantee the case to you as well as to ourselves. The twenty-five-year case likewise is manufactured by the Illinois Watch Case Co. of Elgin, Ill., and guaranteed for twenty-five years. The solid gold case is manufactured by the Brooklyn Watch Case Co. of Brooklyn, N. Y., is solid gold 14-karat and stamped with the quality mark. When a gold case is so marked the United States' laws protect you. This case is solid gold through and through with the exception of the swing ring. It is not practical to have this device made of gold.

The above illustrations merely give you an idea of the movements quoted on this page of Railway Watches at $19.75 to $55.25, according to the case you select.

MONEY RETURNED, together with transportation charges, if you receive an unsatisfactory watch from us. When your watch arrives, examine it carefully, and if you do not find it in absolutely perfect condition, in every way exactly what you wanted, return it, and as soon as we receive it we will return your money, together with any transportation charges you may have paid.

$8.06 AND UP For a 4-Ounce Solid Gold Inlaid in Silver Elgin Watch

It is dust and damp proof; has solid back, with screw bezel and swing ring attachment, gold reflector and patent screw nut. The most perfect watch case made. $8.06 for this watch complete.

THE CASE IS SILVER FILLED, the silver sheets are of sufficient thickness to last your natural lifetime. The gold used in the inlaid work is solid. The case weighs 4 ounces. This case is stronger than the same style solid silver cases costing considerably more money used by railway men whose work requires the greatest protection to the movement, and where dust and damp proof protection is necessary. See the illustration. Illustration shows exactly how this case is constructed with heavy sheets of solid sterling silver, 925-1000 fine, over an inner composition nickel metal. Nickel is known to be much tougher and more durable than solid silver. This combination of metals, that is, nickel and solid silver, makes it possible to produce the case with a tensile strength unmatched and unequaled. Money cannot buy a more perfect protection to a movement. The movements we furnish in this watch, and the ones we advise if you are looking for a high grade accurate timekeeper, are as follows:

IF YOU ARE LOOKING for a 17-jeweled movement, and we advise 17 jewels or better, we can furnish the Dueber Grand Movement manufactured by the Dueber-Hampden Watch Co., at Canton, Ohio, for $13.27 fitted in this case. It has 17 fine jewels and is adjusted.

THE 21-JEWELED MOVEMENT is the one we advise your buying, if you are looking for the highest possible perfection in watch making. If you want a movement that will not vary, that is adjusted to all positions, isochronism and temperature, then select the 21-Jeweled Special Railway Hampden Movement.

PLEASE REMEMBER that this watch is guaranteed in every way; our five-year sweeping guarantee goes with the movement and we guarantee the case for the term of your natural lifetime. So to avoid possible mistakes, be sure to order by number.

$33.98 For This Twenty-Five Year Guaranteed, Gold Filled 21-Jeweled Railway Watch, or $55.98 in Solid 14-Karat Gold Case.

THE CASE according to your choice is 18-size hunting style, gold filled or solid 14-karat gold, beautifully engraved, similar to what the illustration shows, heavy box type, heavy box joints, heavy style antique non-pull out French style stem and crown, heavy, durably and perfectly constructed. Both cases are made by the Illinois Watch Case Co., at Elgin, Ill., one of the finest watch case makers in the United States.

THE MOVEMENT is a guaranteed railway movement, passes railway inspection, called the 21-Jeweled Special Railway, manufactured by the celebrated Dueber-Hampden Watch Co., at Canton, Ohio. Has 21 extra fine ruby and sapphire jewels in solid gold settings, double roller escapement, steel escape wheel, patent center pinion, patent micrometer regulator, adjusted to temperature, isochronism and five positions; in fact, contains everything that a watch should have for durability and accurate timekeeping.

OUR INTERSTATE CHRONOMETER

THE BEST WA
MANUFACTURE

We Recommend It Because It Is the Most Accurate Running, Simplest In Construction, Finest Finished and Most Durable Made. Comes In the Popular Sizes, Both Open Fa and Hunting Style. Sold Only By Sears, Roebuck and Co.

Interstate Chronometer Movements are manufactured solely for us by one of the greatest and best watchmakers in the United States. This line of movements, built expressly for us and named "Interstate Chronometer," will revolutionize watch construction. Simplicity is what we have succeeded in obtaining; not a part or piece used in these watches but what performs a duty necessary for accurate timekeeping and durability; no fragile parts, no unfinished pieces; each part and piece perfect. All weak parts eliminated, resulting in the most accurate running, finest finished, yet most simple, high grade watch manufactured in the United States.

Most high grade watches sold elsewhere embody a number of useless, unessential parts and valueless improvements that do not improve, all of which weaken the watch and result in frequent repairs, inconvenience and expense.

We especially recommend the Interstate Chronometer. We named it the Interstate Chronometer because it is the most perfect measurer of time manufactured. Buy one and you are owning a watch that is superior to any on the market at 50 per cent less than other high grade watches.

The handsome cases illustrated on this page are gold filled, beautifully engraved and guaranteed for twenty years. They are manufactured by the John C. Dueber Watch Co. of the representative and well known makers in the United States. The engra are simply exquisite, joints splendidly perfectly made, close fitting lids, antique bow and stem; in fact, all details, all perfect in construction. They come in open face and hunting style, according to choice. The prices of watches quoted on page are for the complete watch, movement and case.

Ladies' and gentlemen's sizes. You restricted in the assortment of sizes Interstate Chronometer. The models new extra thin types. The engravings latest products from the most able des

Ladies' Small 0-Size Interstate Chronometer

$14.00

Prices quoted are for complete watch, movement and twenty-year guaranteed John C. Dueber case. $14.00 for the 15-jeweled grade. This grade has fifteen fine jewels, Breguet hairspring, exposed winding wheels and gold finished center wheel. Jewels are extra fine, highly polished. $19.00 for the 17-jeweled grade. This grade is adjusted, has seventeen fine highly polished jewels, steel escape wheel, beveled and polished gold center wheel, concaved and polished winding wheels, damaskeened in the latest approved pattern.

No. 4H12558 15-Jeweled Interstate Chronometer. In case. Price $14.00

No. 4H12560 17-Jeweled Interstate Chronometer. In case. Price $19.00

WE GUARANTEE every one of our Interstate Chronometer Watches. This is a most important factor if you consider the protection and insurance we offer. It will be impossible for you to get a defective watch from us; if the watch fails to perform its duties in any way if handled properly and given the attention a watch should receive, you are at liberty to return it and have it exchanged for a brand new one or repaired free of all cost to you. Was there ever such a guarantee given before? Was there ever such an insurance offered? It would be impossible for us to make this offer unless we knew the workmanship and material in these watches to be perfect.

Gentlemen's Regulation 12-Size Interstate Chronometer.

$17.50

NTLEMEN'S GOLD FILLED WATCHES, The KINGSTON MAKE

anteed for 20 years. **New designs copied after solid gold cases.** The brand gold filled cases are manufactured especially for us by one of celebrated and best known case manufacturers in the United States. them made under our own brand because we do not pay an exorbitant he manufacturer for his name only, and are therefore able to sell our gold filled watches at about the same price that inferior watches are on the market. **We have worked out for you a tremendous saving.** We watches to you cheaper than the average gold filled watch and give r merchandise than is offered at a higher price.

GUARANTEE. You cannot get a stronger insurance than this you: "If our gold filled Kingston watches do not give you entire satisfaction for a period of twenty years, you are at liberty to return the case and have it exchanged for a new one, free of all charge, including transportation charges both ways."

The open face watches, as well as the hunting style, are offered to you at ridiculously low prices on this page. The open face cases are screw back and screw bezel, beautifully ornamented, as illustration shows. The hunting style cases all have inside protecting cap, well made, tightly closing lids. Any one of the designs shown come in both open face or hunting style, according to your choice. **Be sure to order by number and mention the kind and grade of movement desired, quoted in the price list below.**

COVENTRY LEVER WATCHES

Genuine English Watches.

WE SHOW AND QUOTE ONLY OPEN FACE HERE.
SEE PAGE 792 FOR HUNTING STYLE.

So as to be able to offer to our customers what we consider the finest 7-Jeweled 16-size watch manufactured in the world, we sent our buyer direct to Coventry, England, and then and there bought and contracted for a large number of the celebrated world renowned Coventry English Lever movements.

The Coventry movement is manufactured in a great factory in Coventry, England, owned by the celebrated jewelers, H. Williamson, Ltd., on Farringdon Road, London, E. C.

This movement is a rated movement; by that we mean that every movement is accompanied by a card showing its rating. The manufacturer guarantees that it will not vary on the average over 5 or 6 seconds a day. No other 7-jeweled movement occupies this enviable position. See the illustration of the rating card below.

It has 7 Jewels, is ¾ plate damaskeened solid nickel; solid adjustable balance wheel with brass timing screws, patent Perret nickel steel Breguet hairspring, compensated for errors of temperature, absolutely non-magnetic, double roller lever escapement, stem winding and stem setting, blued screws and richly gilt train, giving the movement a handsome appearance. Timed in two positions.

You can have your choice of cases. Be sure to order by number.

MANAGER'S ECTION OF SOLID GOLD 14-Karat ELGIN WATCHES That Represent the Best Value for the Money

Many of our customers have written to the manager of our Watch and Jewelry Department for his opinion as to the best solid gold watch to buy at a medium price. Therefore, he has selected the four watches illustrated below, as representing the best values, the most artistic, most accurate timekeeping watches on the market, considering the price. Each one is guaranteed solid 14-karat gold. The movements are protected by our guarantee for a term of 5 years against defective material or workmanship. They are all hunting style, all stem wind and pendant set. We have selected the 15-jeweled Elgin as the biggest value for the price. This Elgin name stands for perfection in the watch world. These movements have 15 jewels, nickel plates, beautifully finished and all accurate timepieces. We know they will give entire satisfaction. The cases are solid 14-karat gold, hand engraved, each one stamped 14-karat gold, all good weight and will give ample protection to the movement, heavy enough to wear a lifetime.

12-Size. 0-Size

E SOLID SILVER AND ALASKA METAL WATCHES

Illustrations show the open back and bezel and the furnished in Alaska metal er.

are made of solid silver or Alaska metal through and through.

ALASKA METAL COMPOUND. This metal is the nearest approach in appearance to solid silver yet discovered. It looks like silver and will not tarnish. In fact, an ideal metal compound for the use of case making. We cannot tell you the ingredients. That part is secret, known only to the manufacturer. We can tell you only that a large percentage of pure nickel enters into its composition. Experts have been deceived in our Alaska metal compound, it so much resembles silver.

DESCRIPTION OF THE SWISS LEVER MOVEMENT. 12-size open face or hunting; polished damaskeened plates; 7 fine jewels. Straight line lever escapement. Breguet hairspring, cut balance, patent pinions, beveled screw heads, exposed winding arrangement, double sunk dial, moon hands and red marginal figures.

We fit these cases with the following 12-size movements. Prices quoted are for the complete watch, movement and case.

	No. 4H12890 12-size Alaska Metal Open Face	No. 4H12892 12-size Alaska Metal Hunting Style	No. 4H12894 12-size Solid Silver Open Face	No. 4H12896 12-size Solid Silver Hunting Style

A 12-SIZE WATCH AT AN UNHEARD OF PRICE

Boys' or Gentlemen's Hunting Style Genteel, Thin, 12-Size Gold Filled Watches. Illustrations show the watch partially opened and also side view of watch, showing extreme thinness of same.

$6.36 — GUARANTEED FOR 20 YEARS

A SMALL, thin, genteel, high grade, twenty-year gold filled watch, the coming size, thickness, shape and style for boy or gentleman; the neatest, most perfect watch made. All the movements we fit in this case are 6-size. The case is made especially for that size movement. Plenty large enough for any gentleman, not a load in the pocket, but a thin, light, neat watch and more convenient than a heavy watch, also a very popular size for boys.

THIS CASE IS GOLD FILLED warranted for twenty years, a certificate of guarantee accompanying each case. It is hunting style, fine engine turned in perfect imitation of solid gold, has gold antique bow and crown.

No. 4H12898 12-Size Hunting Style.

We fit in this case the following 6-size movements:

7-Jeweled American Made Movement. Has cut balance and Breguet hairspring $6.36

7-Jeweled Elgin, Hampden or Waltham Movement.. 8.65

15-Jeweled Elgin, Hampden or Waltham Movement.$10.85

Gentlemen's Solid 14-Karat Gold 17-Jeweled 18-Size Watches

$38.00

Solid 14-Karat Gold Hunting Style Watches.

No. 4H12961 Engine Turned. | No. 4H12965 Plain Polished. | No. 4H12971 Hand Engraved.

$38.00 For your choice of any one of these 18-Size Solid 14-Karat Gold Hunting Style Watches with any 17-jeweled movement you select, Elgin, Hampden or Waltham. A wonderful purchase made by us at a wonderfully reduced price enables us to make this astonishing offer.

OUR GUARANTEE. The cases are guaranteed to be 14-karat solid gold, of good substantial weight, beautifully engraved, as the illustration shows. Each case is stamped 14-karat, and the stamp alone is a protection to you. For an all around watch, a watch that will give good satisfaction, and a size that has been used for generations, we recommend the 18-size.

THE 17-JEWELED MOVEMENT is the one we have selected, considering the price, to give the best all around satisfaction. The Elgin, Hampden or Waltham are built on similar lines. They have seventeen jewels, nickel plates, are stem wind and stem set, and cost about the same price.

OUR ADVICE, however, to you is to select the Interstate Chronometer, quoted at $3.50 more. This movement has seventeen jewels, is adjusted to temperature and three positions, has steel escape wheel, Breguet hairspring, and double sunk dial; in fact, we know of no watch better manufactured in the United States that represents a more wonderful saving to you. If you are looking for an accurate timepiece and do not want to pay for the maker's name, by all means select the one we advise. In ordering be sure to give number of case and make of movement desired.

17-Jeweled Elgin, Hampden or Waltham Movement $38.00
17-Jeweled Interstate Chronometer Movement, adjusted 41.50

$7.12

No. 4H12993

$7.12 For this Gentleman's Open Face 15-Jeweled Watch. See the very latest style, extra thin model, finished. For the discriminating watch simply ideal. The movement is jeweled, American made, has full nickel stem wind and pendant set, beautifully Breguet hairspring and straight line ment. The case is gold filled, guaranteed for twenty years, screw back dust and damp proof. Made by the Case Co. Their latest production.

No. 4H12993 Price .....

18-Size Open Face, Screw Bezel, Solid Back, Swing Ring, Gold Filled Watches.

$9.03 AND $11.13 Our Cut Prices

GUARANTEED for twenty and twenty-five years' continuous wear. The Illinois Watch Case Co., of Elgin, Ill., manufacturer of these cases, agrees to replace with a brand new gold filled case of same style and grade any one of these cases worn through to the base metal within twenty or twenty-five years. The swing ring, a new improvement on gold filled cases, makes it possible to produce an absolutely dust and damp proof watch case. You can examine the movement in a swing ring case without difficulty. See illustration. The front or bezel screws off. The back is solid, made of one piece. The movement is fastened in the center ring, which is securely joined to the case by a strong hinge. To examine the works lift up the swing ring (illustration shows the ring partially lifted); to replace in case, let ring drop back in first position and screw on bezel.

THE ILLUSTRATION of the Elgin movement is the one that we will fit in this case for $10.70, if you select the twenty-year guaranteed case, or $12.80 if you select the twenty-five-year guaranteed case. This movement has 15 fine jewels in settings, exposed pallets, cut expansion balance, mean timing screws, patent detachable balance staff, patent Breguet hairspring, hardened and tempered in form, patent micrometer regulator, tempered steel safety barrel, hard white enamel dial, and exposed winding wheels. A watch for the price that is a marvel of value, and we conscientiously recommend it to those who want a good timepiece for little money.

No. 4H12983 Gold filled. Guaranteed for twenty years. Plain polished or engine turned.
No. 4H12987 Gold filled. Guaranteed for twenty-five years. Plain polished or engine turned.
No. 4H12989 Gold filled. Guaranteed for twenty-five years. Hand engraved.

14-KARAT SOLID GOLD, CHOICE FOR $17.78

No. 4H12995 12-Size | No. 4H12997 16-Size

See how thin these models are.

Gentlemen's Elgin or Waltham Watches. Solid Gold 14-Karat Guaranteed New Extra Thin Model 12 and 16-Size Open Face. $17.78 for your choice of these watches fitted with a stem wind and pendant set, Elgin or Waltham movement. If you are looking for a good solid gold open face watch, the new gentlemen's nobby size in solid gold, 14-karat, quality guaranteed, either one of these watches will suit you.

GUARANTEED SOLID GOLD

The Sizes. See the illustration. You will observe that one is the small extra thin model 12-size, the other is the small extra thin model 16-size. They are solid gold through and through. Solid back with inside movement ring. The weight of the cases will be found sufficient to give them a wearing quality for your natural lifetime, sufficiently heavy to be an ample protection to the movement. The finish is in bright plain polish, Bassene style, no rough edges to collect dust and mar their rich appearance.

A monogram similar to the illustration, in two or three letters, we will engrave on any one of these cases for $1.25 extra. The illustration merely gives you a faint idea of the type of monogram we will engrave.

These watches are guaranteed for a term of five years.

Be sure to order by number and state plainly the size of watch you want.

Either one of these solid gold 14-karat cases, the 12-size or 16-size, fitted with a 7-jeweled Elgin or Waltham movement. Price $17.78

Either one fitted with the 15-jeweled Elgin or Waltham movement. Price $20.25

Either one fitted with the 17-jeweled Elgin or Waltham movement. Price $22.45

$12.85 For this Extra Thin, 16-Size Gold Filled 15-Jeweled Lever Watch, means prices cut in half. This watch, as illustration shows, is extra thin; in fact, the thinnest 16-size lever watch we know of.

GUARANTEED FOR 25 YEARS

THE CASE is gold filled and guaranteed to wear for a term of twenty-five years; manufactured by the celebrated Joseph Fahys Watch Case Co. Plain polished, no unseemly joints, all smooth and attractive to the touch and eye.

THE MOVEMENT, the principal feature of this watch, has 15 jewels, flat overstrung Breguet hairspring, lever escapement, exposed polished winding wheels, high polished regulator bar, cut expansion balance, is stem wind and pendant set. We guarantee against defective material and workmanship for a period of five years.

THE DIAL, another very attractive feature, is made of metal, gilded in Roman yellow satin finish with damaskeened center, plain Arabic numerals and fine blue moon style hands.

'ARTLING VALUES IN AMERICAN WATCHES

15 A Cut Price in Genuine Alaska Metal 16-Size Swing Ring Cup Case Watch

d silver and Alaska metal, extra thin model, 16-size, swing ring dust and damp proof Perfection has arrived at last; $3.15 for a watch with an absolutely dust and ot case means that you have a watch that will last a lifetime. Dampness and dust ames of watches. It is from these two causes that most watch troubles arise.

15 and up

Our $3.15 OFFER

Send us $3.15, together with the mail charges of 16 cents extra, and we will ship you, upon receipt, one of these solid Alaska metal watches, the nearest approach to solid silver yet discovered, fitted with a thin model, stem wind and pendant set 7-jeweled American made movement. It has a cut balance and Breguet hairspring.

Buy the Swing Ring Case. It is the best. Note the illustration, which shows the front bezel unscrewed and the swing ring slightly raised. When the watch is closed this swing ring falls back and the bezel is tightly screwed on. This makes the front and back of the watch absolutely dust and damp proof. The watch is protected from above by a new patent screw nut stem; the extra nut being used for filling the crevices on the inside of the watch between the crown and the stem makes it impossible for the dust and damp to filter through. No part has been overlooked to bring about this perfect dust and damp proof arrangement.

$5.25 For the Same Watch in Solid Silver. Think of it! $5.25 for this absolutely dust and damp proof solid silver watch. Competition defied when prices of such astonishing figures are being made.

$6.15 For a Genuine Elgin, Hampden or Waltham movement fitted in one of these swing ring solid Alaska metal cases. A genuine 17-jeweled Elgin movement, adjusted grade, fitted in the same case for $14.10.

Solid silver swing ring cases, complete with American made movements for $5.25 to $30.00.

$2.75 or $3.25 For a Genuine Alaska Compound Metal 16-Size Extra Thin Model Watch

$2.75 for the open face, screw back and screw bezel, antique crown, stem and bow, or $3.25 for the hunting style case, inside protecting cap, especially made crystal bezel holder, either one representing values for which the competitor asks double our price. We want you to be the judge. Either of these watches quoted at $2.75 to $27.50, according to movement. Enclose with your remittance 16 cents extra to defray the registered mail charges. Upon receipt of your order we will make shipment of the watch at once. Examine it carefully, especially look at the movement that we send you, or offered by any other catalog firm, or compare it with the watch owned by your neighbor or friend, and if our watch, considering all factors, does not show you a saving of 20 to 33⅓ per cent, in other words from $1.00 to $5.00 on the purchase, by all means return the watch to us and we will, upon receipt, return your money, together with the transportation charges that have been incurred both ways.

$2.75 and up

See Illustration. They are both bright polish. No. 4H13004 shows open face, screw back and screw bezel watch. No. 4H13006 shows hunting style watch. Both extra thin models, the very latest up to date style, new antique crown, stem and bow. They are stem wind and pendant set, snappy, up to date watches in every respect.

No. 4H13004 16-Size, open face, Alaska Metal Back and Screw Bezel.
No 4H13006 16-Size, Alaska Metal, Hunting Style Case.

Why We Are Able to Make This Offer. All efforts to make low prices have been surpassed. We own these watches at prices as low as the prices would be if we owned the factory, for the factory makes the cases for us at actual cost. We purchased a great quantity of cases from this factory and this special concession was made on this lot of cases to keep their workmen busy in dull seasons, thus enabling them to keep their organization of expert workmen together. This contract, in connection with our contract for movements, results in this wonderful offer to you.

We fit these 16-size Alaska metal cases with the following 16-size movements. Prices quoted are for complete watch, movement and case.	No. 4H13004 Open Face Alaska Metal	No. 4H13006 Hunting Style Alaska Metal

GERMAN SILVER.

$3.95 for this solid German silver oxidized open face, screw back and screw bezel antique crown, bow and stem novelty watch. The case is made of genuine German silver through and through with raised floral work, oxidized dark to bring out the design; the illustration shows both front and back views. The movement is American made, stem wind and pendant set, is 16-size, has 7 jewels, lever escapement, nickel plates very prettily damaskeened; our five-year guarantee goes with each one. As a timekeeper this watch will give fine satisfaction; each one has been tried and tested. This case is a good protection to the movement. German silver is a composition metal, it resembles solid silver; the process of making was first discovered in Germany, and is considered one of the best substitutes of solid silver.

No. 4H13014 With 7-jeweled American made movement, cut balance and Breguet hairspring. Price $3.95

16-Size, Open Face, Screw Back and Bezel.

GUARANTEED FOR 5 YEARS

$3.75 AND UP

No. 4H13018 Illustration shows dial and thickness of watch.

Gentlemen's Polished Gunmetal Watch.

$3.75 BEAUTY $3.75 for this mechanical wonder; it's a perfect beauty; the case is oxidized polished gunmetal, extra thin model; see the illustration. We show you a side and front view so that you can get a correct idea of its graceful lines. The movement is imported from Switzerland, straight line lever, is jeweled and a mechanical wonder because instead of showing the escapement balance, hairspring, etc., in the back of the watch, the mechanism has been reversed. You can see the watch operating when you look at the time, the action being visible from the dial as shown. $5.45 for the same movement fitted in a solid silver engine turned case.

No. 4H13018 Gunmetal. Price $3.75
No. 4H13020 Solid silver, engine turned design. Price 5.45

Gentlemen's Solid 14-Karat Gold 17-Jeweled 18-Size Watches

$38.00

$38.00 For your choice of any one of these 18-Size Solid 14-Karat Gold Hunting Style Watches with any 17-jeweled movement you select, Elgin, Hampden or Waltham. A wonderful purchase made by us at a wonderfully reduced price enables us to make this astonishing offer.

OUR GUARANTEE. The cases are guaranteed to be 14-karat solid gold, of good substantial weight, beautifully engraved, as the illustration shows. Each case is stamped 14-karat, and the stamp alone is a protection to you. For an all around watch, a watch that will give good satisfaction, and a size that has been used for generations, we recommend the 18-size.

THE 17-JEWELED MOVEMENT is the one we have selected, considering the price, to give the best all around satisfaction. The Elgin, Hampden or Waltham are built on similar lines. They have seventeen jewels, nickel plates, are stem wind and stem set, and cost about the same price.

OUR ADVICE, however, to you is to select the Interstate Chronometer, quoted at $3.50 more. This movement has seventeen jewels, is adjusted to temperature and three positions, has steel escape wheel, Breguet hairspring, and double sunk dial; in fact, we know of no watch better manufactured in the United States that represents a more wonderful saving to you. If you are looking for an accurate timepiece and do not want to pay for the maker's name, by all means select the one we advise. In ordering be sure to give number of case and make of movement desired.

18-Size Open Face, Screw Bezel, Solid Back, Swing Ring, Gold Filled Watches.

$9.03 AND $11.13 Our Cut Prices

GUARANTEED for twenty and twenty-five years' continuous wear. The Illinois Watch Case Co., of Elgin, Ill., manufacturer of these cases, agrees to replace with a brand new gold filled case of same style and grade any one of these cases worn through to the base metal within twenty or twenty-five years. The swing ring, a new improvement on gold filled cases, makes it possible to produce an absolutely dust and damp proof watch case. You can examine the movement in a swing ring case without difficulty. See illustration. The front or bezel screws off. The back is solid, made of one piece. The movement is fastened in the center ring, which is securely joined to the case by a strong hinge. To examine the works lift up the swing ring (illustration shows the ring partially lifted); to replace in case, let ring drop back in first position and screw on bezel.

THE ILLUSTRATION of the Elgin movement is the one that we will fit in this case for $10.70, if you select the twenty-year guaranteed case, or $12.80 if you select the twenty-five-year guaranteed case. This movement has 15 fine jewels in settings, exposed pallets, cut expansion balance, mean timing screws, patent detachable balance staff, patent Breguet hairspring, hardened and tempered in form, patent micrometer regulator, tempered steel safety barrel, hard white enamel dial, and exposed winding wheels. A watch for the price that is a marvel of value, and we conscientiously recommend it to those who want a good timepiece for little money.

14-KARAT SOLID GOLD, CHOICE FOR $17.78

No. 4H12995 12-Size | No. 4H12997 16-Size

See how thin these models are.

Gentlemen's Elgin or Waltham Watches. Solid Gold 14-Karat Guaranteed New Extra Thin Model 12 and 16-Size Open Face. $17.78 for your choice of these watches fitted with a stem wind and pendant set, Elgin or Waltham movement. If you are looking for a good solid gold open face watch, the new gentlemen's nobby size in solid gold, 14-karat, quality guaranteed, either one of these watches will suit you.

GUARANTEED SOLID GOLD

The Sizes. See the illustration. You will observe that one is the small extra thin model 12-size, the other is the small extra thin model 16-size. They are solid gold through and through. Solid back with inside movement ring. The weight of the cases will be found sufficient to give them a wearing quality for your natural lifetime, sufficiently heavy to be an ample protection to the movement. The finish is in bright plain polish, Bassene style, no rough edges to collect dust and mar their rich appearance.

A monogram similar to the illustration, in two or three letters, we will engrave on any one of these cases for $1.25 extra. The illustration merely gives you a faint idea of the type of monogram we will engrave.

These watches are guaranteed for a term of five years.

Be sure to order by number and state plainly the size of watch you want.

Either one of these solid gold 14-karat cases, the 12-size or 16-size, fitted with a 7-jeweled Elgin or Waltham movement. Price $17.78

Either one fitted with the 15-jeweled Elgin or Waltham movement. Price. $20.25

Either one fitted with the 17-jeweled Elgin or Waltham movement. Price $22.45

$12.85 For This Extra Thin, 16-Size Gold Filled 15-Jeweled Lever Watch, means prices cut in half. This watch, as illustration shows, is extra thin; in fact, the thinnest 16-size lever watch we know of.

GUARANTEED FOR 25 YEARS

THE CASE is gold filled and guaranteed to wear for a term of twenty-five years; manufactured by the celebrated Joseph Fahys Watch Case Co. Plain polished, no unseemly joints, all smooth and attractive to the touch and eye.

THE MOVEMENT, the principal feature of this watch, has 15 jewels, flat overstrung Breguet hairspring, lever escapement, exposed polished winding wheels, high polished regulator bar, cut expansion balance, is stem wind and pendant set. We guarantee against defective material and workmanship for a period of five years.

THE DIAL, another very attractive feature, is made of metal, gilded in Roman yellow satin finish with damaskeened center, plain Arabic numerals and fine blue moon style hands.

TARTLING VALUES IN AMERICAN WATCHES

$15 A Cut Price in Genuine Alaska Metal 16-Size Swing Ring Cup Case Watch

silver and Alaska metal, extra thin model, 16-size, swing ring Perfection has arrived at last; $3.15 for a watch with an case means that you have a watch that will last a lifetime. of watches. It is from these two causes that most watch dust and damp proof absolutely dust and Dampness and dust troubles arise.

FACE SWING RING.
13000 16-Size, Solid Sil- Face, Swing Ring.
13002 16-Size, Alaska Face, Swing Ring.

Our $3.15 OFFER

Send us $3.15, together with the mail charges of 16 cents extra, and we will ship you, upon receipt, one of these solid Alaska metal watches, the nearest approach to solid silver yet discovered, fitted with a thin model, stem wind and pendant set 7-jeweled American made movement. It has a cut balance and Breguet hairspring.

Buy the Swing Ring Case. It is the best. Note the illustration, which shows the front bezel unscrewed and the swing ring slightly raised. When the watch is closed this swing ring falls back and the bezel is tightly screwed on. This makes the front and back of the watch absolutely dust and damp proof. The watch is protected from above by a new patent screw nut stem; the extra nut being used for filling the crevices on the inside of the watch between the crown and the stem makes it impossible for the dust and damp to filter through. No part has been overlooked to bring about this perfect dust and damp proof arrangement.

$5.25 For the Same Watch in Solid Silver. Think of it! $5.25 for this absolutely dust and damp proof solid silver watch. Competition defied when prices of such astonishing figures are being made.

$6.15 For a Genuine Elgin, Hampden or Waltham movement fitted in one of these swing ring solid Alaska metal cases. A genuine 17-jeweled Elgin movement, adjusted grade, fitted in the same case for $14.10.

Solid silver swing ring cases, complete with American made movements for $5.25 to $30.00.

CUT PRICE

$2.75 or $3.25 For a Genuine Alaska Compound Metal 16-Size Extra Thin Model Watch

$2.75 for the open face, screw back and screw bezel, antique crown, stem and bow, or $3.25 for the hunting style case, inside protecting cap, especially made crystal bezel holder, either one representing values for which the competitor asks double our price. We want you to be the judge. Either of these watches quoted at $2.75 to $27.50, according to movement. Enclose with your remittance 16 cents extra to defray the registered mail charges. Upon receipt of your order we will make shipment of the watch at once. Examine it carefully, especially look at the movement that we send you, or offered by any other catalog firm, or compare it with the watch owned by your neighbor or friend, and if our watch, considering all factors, does not show you a saving of 20 to 33⅓ per cent, in other words from $1.00 to $5.00 on the purchase, by all means return the watch to us and we will, upon receipt, return your money, together with the transportation charges that have been incurred both ways.

$2.75 and up

No. 4H13004 16-Size, open face, Alaska Metal Back and Screw Bezel.

No 4H13006 16-Size, Alaska Metal, Hunting Style Case.

See Illustration. They are both bright polish. No. 4H13004 shows open face, screw back and screw bezel watch. No. 4H13006 shows hunting style watch. Both extra thin models, the very latest up to date style, new antique crown, stem and bow. They are stem wind and pendant set, snappy, up to date watches in every respect.

Why We Are Able to Make This Offer. All efforts to make low prices have been surpassed. We own these watches at prices as low as the prices would be if we owned the factory, for the factory makes the cases for us at actual cost. We purchased a great quantity of cases from this factory and this special concession was made on this lot of cases to keep their workmen busy in dull seasons, thus enabling them to keep their organization of expert workmen together. This contract, in connection with our contract for movements, results in this wonderful offer to you.

We fit these 16-size Alaska metal cases with the following 16-size movements. Prices quoted are for the complete watch, movement and case.	No. 4H13004 Open Face Alaska Metal	No. 4H13006 Hunting Style Alaska Metal

GERMAN SILVER.

$3.95

$3.95 for this solid German silver oxidized open face, screw back and screw bezel antique crown, bow and stem novelty watch. The case is made of genuine German silver through and through with raised floral work, oxidized dark to bring out the design; the illustration shows both front and back views. The movement is American made, stem wind and pendant set, is 16-size, has 7 jewels, lever escapement, nickel plates very prettily damaskeened; our five-year guarantee goes with each one. As a timekeeper this watch will give fine satisfaction; each one has been tried and tested. This case is a good protection to the movement. German silver is a composition metal, it resembles solid silver; the process of making was first discovered in Germany, and is considered one of the best substitutes of solid silver.

16-Size, Open Face, Screw Back and Bezel.

GUARANTEED FOR 5 YEARS

No. 4H13014 With 7-jeweled American made movement, cut balance and Breguet hairspring. Price.....$3.95

Gentlemen's Polished Gunmetal Watch.

$3.75 BEAUTY $3.75 for this mechanical wonder; it's a perfect beauty; the case is oxidized polished gunmetal, extra thin model; see the illustration. We show you a side and front view so that you can get a correct idea of its graceful lines. The movement is imported from Switzerland, straight line lever, is jeweled and a mechanical wonder because instead of showing the escapement balance, hairspring, etc., in the back of the watch, the mechanism has been reversed. You can see the watch operating when you look at the time, the action being visible from the dial as shown. $5.45 for the same movement fitted in a solid silver engine turned case.

Solid Silver, 3-Ounce 16-Size Open Face Swing Ring Patent Screw Nut Crown Cup Case.

No. 4H13110 Solid Silver Dust and Damp Proof Cup Case.

$7.75 to $32.50 for this marvel of perfection in a high grade solid silver watch. The cup case is ideal, it is positively dust and damp proof. The front unscrews, allowing the movement which is set in a swing ring to be lifted out; the back is solid, no joints, no catches, no rough edges. You can have your choice of movements, according to the list below. We would advise, if you want a wonderfully accurate watch and wish to save 25 to 33 per cent, to select our 17-Jeweled Interstate Chronometer quoted complete at $18.00, or our 23-Jeweled Interstate Chronometer at $32.50.

$4.28

CUT PRICE

Your choice for $4.28 either one of these two, open face or hunting style, whichever you desire, gold filled guaranteed cases, manufactured by one of the most representative case makers in the United States. On account of this cut price we cannot mention the maker's name, but each one carries a five-year guarantee. The movement, as illustrated and exactly as described, is manufactured by one of the largest watch movement factories in the world. The cases (be sure to order by number) are made of two solid plates of gold overlaying an inner composition metal, and by the warrant and contract that we send they are guaranteed to wear for a term of five years. Regarding the engraving, we aim always to have on hand the exact same design as illustration shows; if not, we send some very similar design, with the understanding, of course, that the grade of the case is the same. The movement used in these cases is stem wind and pendant set, has cut balance and Breguet hairspring, full protecting dust bands, 7 fine ruby jewels, latest model straight line lever escapement, and unlike any other movement placed on the market and offered at double what we ask.

THE WONDERFUL ENGLISH LEVER WATCH.

The movement is imported direct from Coventry, England. We consider it the finest 7-jewel, 16-size movement manufactured. Each movement carries with it the manufacturer's rating and adjustment card, showing the variation of the movement. It is adjusted to two positions, made of solid nickel, has adjustable balance wheel, patent perret nickel steel Breguet hairspring, which means it is practically non-magnetic, double roller escapement, stem wind and stem set, is compensated for errors of temperature and is guaranteed not to vary over six to eight seconds in twenty-four hours.

YOU CAN HAVE YOUR CHOICE OF CASES.

We show the cases made by the celebrated Illinois Watch Case Co., Joseph Fahys & Co., and the Dueber Watch Case Co., in both hunting style and open face. The open face is screw back and screw bezel, dust and damp proof. Be sure to order by number.

AN IDEAL SOLID GOLD WATCH FOR A PARTICULAR BUYER

Your choice for $29.28 or $33.28, according to the weight of case you desire of our solid 14-karat gold, hunting style, plain polished, 16-size, Bassene type Monogram Watches. We would advise the heavier weight case, as being the most elegant, although either case is of sufficient weight to be an ample protection to the movement.

Engraving free with this watch. We will engrave free, any monogram in ribbon style similar to what the illustration shows, either two or three letters, as you desire. **Be sure to order by number, and mention grade of movement wanted, selected from the table below.**

Genuine HAMILTON 16-SIZE WATCHES

The Celebrated 992 Open Face or the 993 Hunting Style Grade.

$35.00 is the price of the movement alone in any retail store. We sell you the complete watch in open face for $28.87, or the hunting style for $31.92.

The movement is nickel, ¾ plate, has 21 fine ruby jewels in settings, steel escape wheel, double roller escapement, micrometric regulator, Breguet hairspring, double sunk dial, compensation balance, adjusted to temperature, isochronism and five positions. It passes railway inspection.

The cases, either open face or hunting style, are gold filled, guaranteed for twenty years, beautifully engraved, every latest improvement embodied in either style. Manufactured by the celebrated John C. Dueber Watch Company.

The open face is screw back and screw bezel, dust and damp proof; the hunting style has inside protection cap, solid gold hinges, extra strong joints, close fitting lids. Each part and each piece perfect in every detail.

GENTLEMEN'S SOLID GOLD 14-KARAT THIN MODEL 16-SIZE HUNTING STYLE ELGIN WATCHES

$38.00 For your choice of either one of these solid gold 14-karat fine guaranteed cases, fitted with a 17-jeweled Elgin stem wind and pendant set movement.

Never before has such an offer been made. We intend to do the biggest solid gold watch business in the civilized world, if high grade merchandise at reduced prices will do the business. We purchased these cases cheap and are offering them at the greatly reduced price of $38.00 for the complete watch. If you wish to spend a few dollars more, we would advise your buying either one of these two cases fitted with a 17-jeweled Interstate Chronometer Movement. This movement is made expressly for us, and is a marvel for accurate running, has 17 fine jewels, is adjusted to temperature and positions, useless appendages and complicated mechanism that do not influence its accuracy or strength being entirely eliminated. If this is the kind of a watch that you desire, and one that you know we conscientiously recommend and advise, then send us $42.00, and we will send you your choice of cases, fitted with the Interstate Chronometer Movement.

Be sure to order by number and state movement wanted.

$14.98 IMPORTED GENEVA WATCH

READ THIS WONDERFUL OFFER

DO YOU WANT SOMETHING MOST EXTRAORDINARY IN AN ESPECIALLY FINE WATCH FOR A LADY OR GENTLEMAN? ARE YOU WILLING TO PAY AS MUCH AS $14.98 FOR SUCH A WATCH, WITH THE ASSURANCE THAT YOU WILL GET SOMETHING MUCH BETTER THAN YOU ARE LIKELY TO FIND IN ANY JEWELRY STORE IN YOUR PART OF THE COUNTRY? IF SO, THIS PAGE OFFERS YOU THE OPPORTUNITY TO GET ONE OF THE FINEST AND BEST WATCHES MADE.

GENEVA, SWITZERLAND, turns out the very finest watch movements of the world. Go into the very finest jewelry store in Chicago, New York, or any other large American city and you will find such stores get very fancy prices for Geneva watches. Scarcely one Geneva watch is offered for less than $50.00 and from that figure they run up into the hundreds.

THESE GENEVA MOVEMENTS in all three sizes, 16, 12 and 0, are all alike, except for size, all made from very finest decarbonized nickel, all are full 17-jeweled, red hand turned ruby jewels in gold settings, jeweled both sides throughout, including centers, all adjusted to heat, cold, position, isochronism; patent regulators, patent escapement, patent pinion, patent dust protector, quick train cut balance wheel, Breguet hairspring, compensating balance, Geneva compensating system (all hand polished parts), all the movements the very best in every respect.

THE SIZES OF THESE GENEVA WATCHES

THE PICTURES HERE show the exact sizes of these watches. The largest, 16-size gentlemen's watch, just as illustrated, is 2 inches wide. The 12-size gentlemen's watch, just as illustrated, is 1⅞ inches wide. The ladies' 0-size, just as illustrated, is 1⅝ inches wide. All are made especially thin, neat and dainty, and all have unique antique bows. They are all smaller, thinner, lighter, neater and in every way handsomer and finer than what you can buy in American made watches, the 12 or 16-size, the ideal size, shape and style for the carrying timepiece of a real gentleman, and the 0-size is just the watch in size, thickness and weight for the most exacting, most fashionable lady to wear, and as for timekeeping dependability they are unequaled. The three illustrations in this group will give you just a little idea of the appearance of our Geneva watch and the several sizes in which it comes. The largest size, the 16-size for gentlemen, we offer for the first time in the history of the watch making industry with a genuine imported Geneva movement for only $14.98. One of the pictures in the group of three shows the front of the watch with its handsome Geneva special dial or face and gilded hands. Another picture shows the back of the watch, detailing the gold filled case with its beautiful engraving and elaborate finish. The third picture in the group shows the wonderful Geneva movement.

THE LIFE GUARANTEED gold filled cases in all three sizes, 16, 12 and 0-size, are all American made and the highest grade gold filled cases manufactured. Cases are made of heavy thick plates of fine solid gold over inner plates of hard composition metal and are guaranteed to wear and retain their pure gold color for a lifetime. They are most elaborately engraved, finished and decorated, wonderfully well finished, all fitted with genuine antique bows, all stem wind and patent pendant setting. The gentlemen's watches, the 16 and 12-sizes, are open face only, the 0-size ladies' watches are double or hunting case.

GUARANTEED FOR LIFE

No. 4H13511 pictures are

0-Size, Hunting Style. Guaranteed

FANCY DIALS, or faces. These Geneva watches all have very fancy dials (see illustrations), the most beautiful dials made, finished with gold and colored ornamentations and fancy gilded hands.

Gentlemen's Plymouth Gold Filled, Guaranteed for Life, Open Face and Hunting Style, 12-Size Watches.

The life guaranteed case named Plymouth, according to our opinion the finest, most durable and most perfectly made case, illustrated on this page, is the one that we recommend and the one we advise you to purchase. It costs but a few cents more, and you are getting a watch case that we guarantee for the term of your natural lifetime. Our life guarantee means simply this: Should the gold on any one of our life cases wear off and expose the inner composition metal, you are at liberty at any time within the period of your entire life to return it to us, and we will instantly exchange it for a brand new case, free of all cost and transportation charges. This is what we mean by guaranteeing a case for the term of your natural lifetime.

$9.95 to $35.60, according to the style of case and grade of movement you select. Be sure to order by number and mention grade and make of movement desired.

15-Jeweled Elgin Watch. Price
17-Jeweled Interstate Chronometer Watch. Price

$43.00 and Upward for This Gentlemen's Genuine Diamond Set Highest Grade Solid 14-Karat Gold 12-Size Hunting Style Watch.

Never before has a truly high grade exquisitely built watch been offered within 25 per cent of this price. The diamond set in this case is regular cut, of good size, and glittering; not a chip or rose diamond, but a regular cut brilliant diamond. The case is ornamented by raised gold in variegated colors, representing leaves and sprays of flowers; hand engraved and hand chased.

$43.00 for this watch fitted with a 15-Jeweled Elgin or Waltham Movement. $45.00 for this watch fitted with a 17-Jeweled Elgin or Waltham Movement. $55.50 for this watch fitted with a 19-Jeweled Elgin or Waltham Movement, adjusted grade.

The one that we advise you to select, however, is either the 17 or the 21-Jeweled Interstate Chronometer Movement.

$48.50 for this watch fitted with a high grade 17-Jeweled Adjusted Interstate Chronometer Movement. $62.00 for this watch fitted with the 21-Jeweled Interstate Chronometer Movement.

The latter watch is the best of them all and will last your natural lifetime. It is adjusted to temperature, five positions and isochronism; in fact, we know of no improvements or finishes of essential importance that have not been embodied in this movement.

No. 4H13980 15-Jeweled Elgin or Waltham, Price, $43.00

No. 4H13982 19-Jeweled Elgin or Waltham, Price, 55.50
No. 4H13983 17-Jeweled Interstate Chronometer, 48.50
No. 4H13984 21-Jeweled Interstate Chronometer, 62.00

Gentlemen's Raised Gold Ornamented Solid 14-Karat Gold 12-Size Hunting Style Watch

$42.00 to $47.50

according to your selection of movement. The case is 12-size, solid gold, with beautiful variegated raised gold ornamentation in sprays, flowers, shield, etc. Nothing handsomer, nothing more unique in solid gold watch case making. Good substantial weight, hand chased and hand engraved; every detail splendidly executed.

$42.00 for this handsome watch case fitted with a 15-Jeweled fine running Elgin Movement.

$44.00 for the same case fitted with a 17-Jeweled Elgin Movement. Our advice, however, is to have this watch fitted with our 17-Jeweled Interstate Chronometer Movement. It is adjusted, has patent regulator, and is made especially for us by one of the biggest watch companies in the United States.

$47.50 for the Interstate Chronometer, complete in this case, represents the biggest measure of value. **Be sure to order by number and state the grade and make of movement desired.**

$6.98 AND UP FOR LADIES' HIGH CLASS GOLD FILLED WATCHES

GUARANTEED FOR 20 YEARS

No. 4H14010 This illustration shows the bird design, full engraved with vermicelli work, ornate leaves and scrolls.

7-Jeweled American Made Movement, cut balance and Breguet hairspring $6.98

7-Jeweled Elgin, Hampden or Waltham Movement $9.80

15-Jeweled Elgin, Hampden or Waltham Movement $10.80

16-Jeweled Lady Waltham Movement, adjusted grade $13.00

GUARANTEED FOR TWENTY YEARS' CONTINUAL WEAR

Beautifully Engraved, Hunting Style, All With Inside Protecting Cap, Antique Crown and Pendant.

THE SIZE is not the exceedingly small ladies' size, nor the large cumbersome out of date 6-size, but the new small compactly made 6-size, to our idea the proper size for accurate timekeeping in ladies' watches, when a small sum of money is to be expended. Six beautiful designs, the very latest creations.

$6.98 seems a ridiculously small sum for a good watch, still for this sum we are able to send you your selection of any one of these six handsome cases, according to your own selection, fitted with a genuine American made stem wind and stem set 7-jeweled movement, true copies of solid 14-karat gold watches worth from $30.00 to $50.00. We believe that a gold filled watch, if properly made, should be an exact reproduction of solid gold in every particular. This idea has been carried out in every one of the designs shown here. Guaranteed for twenty years' continual service; with every one sold we send our circular guarantee placed on the inside of each case. We illustrate on this page a copy of the circular guarantee.

21 cents for this handsome velvet lined, leatherette covered Presentation Watch Box. When ordering, be sure to state size of watch case is intended for.
No. 4H1112 Price.....21c

Read This Guarantee

The illustration shows a facsimile of the guarantee that goes out with each case, which protects you for a term of twenty years. When you select a watch in one of these six cases, you will receive a watch that has every appearance of being solid gold, perfectly finished in every detail. Special attention has been given to the joints, no rough edges and no unsightly parts, the latest ideas only embodied in this line, such as the thin model effect, the antique crown, bow and pendant, the non-catching joint pendant set stem wind device, and up to date gold style centers. The wearing quality is of the greatest importance in a gold filled case; in the Kingston brand you certainly have wearing quality guaranteed for twenty long years' continual service. You are doubly protected in purchasing a watch from us. We guarantee it also to reach destination in absolute perfect running order.

No. 4H14012 This illustration shows the conventionalized wild rose pattern and basket effect, together with scrolls and engine turning; a type of engraving that does not mar or show scratches.

GUARANTEED FOR 20 YEARS

Ladies' Genuine Diamond Set, 20-Year Guaranteed Gold Filled Hunting Style Watch

The case as illustrated (showing back view with diamond) is guaranteed high grade twenty-year gold filled, stem wind and pendant set, plain polished.

SET WITH A DIAMOND

This case is set with a genuine diamond, brilliant and scintillating, in a very handsome raised solid gold star setting. The movement that we fit in this watch complete for $8.26 is a good 7-jeweled Swiss lever movement imported from Chaux de Fonds, Switzerland, the home of watch making. It is a good timekeeper, will give good satisfaction, and, considering the price, is a rare bargain.

STOP HERE AND CONSIDER. A genuine diamond set gold filled watch for $8.26! The like has never been heard of before. However, we advocate high grade watches, and we advise, considering the beauty and value of this case, that it be fitted with a higher grade movement. We suggest the 15-jeweled Elgin Watch Co. movement quoted at $14.45. Observe the size of this watch; the very latest small 0-size. Not a large, heavy, unsightly old style one, but the very latest model for ladies' use. Be sure to order by number, and write plainly the movement you desire fitted in the case.

No. 4H14062 0-SIZE HUNTING CASE. Genuine Diamond Set, Small 0-Size, Gold Filled, Twenty-Year Guaranteed Watch, Complete in Leatherette Case. The Interstate Chronometer will give you the most accurate time and will outlast any other watch. We recommend it.

LADIES' GOLD FILLED HUNTING STYLE WATCH

EXTRA SMALL SIZE CALLED THE O-SIZE, GUARANTEED FOR TWENTY YEARS' CONTINUAL WEAR

WHAT WE MEAN by saying guaranteed for twenty years' continual wear: You can at any time within this period, twenty years, return this watch and exchange it for a brand new one of same grade should any piece or part on account of wear, defective material or workmanship expose the inner composition metal to view. A solid gold case for little money contains a very little more gold than these, our Kingston gold filled cases, but ha strength and durability. As a protection to your watch movement, money cannot buy these cases. These cases should and will wear like solid gold for twenty years; we know it sure of it that we back it up with our 20-year guarantee.

IF YOU MAKE THE $13.90 SELECTION, this amount of money expended on one of these watches would give you the best moderate priced gold filled case manufactured, containing the greatest amount of gold as compared with any competing twenty-year case fitted with a 15-jeweled Elgin or Waltham movement. This watch is one you could well be proud of; its accurate timekeeping and solid gold appearance make it a marvel of value.

THE KINGSTON GOLD FILLED CASE leads them all as the greatest value for the money. We know of no case illustrated in this catalog that effects a better saving. The Kingston cases are manufactured with a view to duplicating a case that resembles solid gold in every way; in fact, even the designs have been copied from solid gold watches that bring on the market $75.00 to $100.00.

FIVE MODELS OF PERFECTION, five of the most beautiful moderate priced ladies' small size watches selected from hundreds of designs as the very best, and a large variety of movements. You have quite a range of choice in watches, $6.98 to $28.75, if you prefer to select a movement that we advise as the best value for the money, then, select our 15 or 17-Jeweled Interstate Chronometer.

MAKE IT YOUR DUTY to examine closely all the details of the watch you are buying, look carefully at the designs we show and particularly observe the models, see the new antique crown, bow and stem, note the very thin model, examine the beautiful floral and conventionalized designs, the substantial appearance, close fitting lids and the entire general appearance.

SO AS TO HELP YOU MAKE A DECISION, we illustrate these watches in such a manner that you can picture them in your mind's eye.

21c for this handsome velvet lined leatherette covered presentation Watch Box. When ordering be sure to state size of watch case is intended for.

No. 4H14690 Scalloped edge vermicelli and floral engraving.

No. 4H14691 Solid 14-karat gold, set with genuine brilliant regular cut diamond, hand engraved, Roman yellow satin finish, heavy weight.

$27.98 OR $27.68 for your choice of any one of these four heavy weight solid gold 14-karat cases fitted with a 15-jeweled stem wind and stem set Elgin movement.

The cases are manufactured by a watch case company whose reputation stands second to none as expert manufacturers. They are all the latest model 15-jeweled stem wind and pendant set Elgin movements. These are watches that we conscientiously recommend, beautifully engraved, perfect in every detail and artistic in every sense, yet not overdone so as to be shoddy or flashy. A watch that any lady would be proud to possess.

The watch, however, that we recommend for $27.68 is our 15-jeweled Interstate Chronometer. In this watch (you can have your choice of cases) you have the best of all modern improvements with all defects eliminated, a watch that we recommend for accuracy and durability and one that we guarantee against defective material or workmanship.

SOLID GOLD AND GOLD FILLED EMBLEM PINS AND BUTTONS

WARRANT THEM TO GIVE ENTIRE SATISFACTION. TO AVOID MISTAKES PLEASE GIVE NUMBER AND STATE EMBLEM WANTED.

TAKE NOTICE. Any one of these pins will be carried to any part of the United States of America by mail for 2 cents postage; insurance or registry, see page 17. Please understand that the heads and tops of the emblem pins and buttons illustrated here are of solid gold only and that the pin, joint and catch on the emblem pins and the shoe, that part of the emblem button that screws into the buttonhole, are made of extra toughened rolled gold plated stock. It is not practical to make these parts of solid gold, and we know of no manufacturer who makes them, nor of any line where the entire pin or button is of solid gold.

HOW TO FIND CORRECT SIZE OF RING YOU WA

It is very important when you order a finger ring from us that you send us the correct size, and to help you find the correct measurement so that we can send a will exactly fit your ring finger, we give you the following information. We give five different methods below, and we would recommend that you use two of the method and we further recommend that you send us your measurements according to Method No. 1 or No. 2, which we believe to be the best.

METHOD No. 1. If you now own a ring which fits the finger on which you purpose to wear the new ring, or if you do not own a ring yourself and can borrow one from a friend or a neighbor which fits your ring finger, you can ascertain the size you will need by following these directions. The circles which we show herewith numbered from 00 to 13 represent standard ring measurements. Place the ring you own or the one you have borrowed which fits your finger over these circles until you find the one that just fits inside the ring, and the number of that circle is the size ring you will require. If one circle should be slightly smaller and the next one slightly larger than the inside of the ring which fits your finger, this would indicate that you want a size between the two. For example: If size 6 is just a little small and size 7 just a little large, you will want the size between these two, or No. 6½. This is a most satisfactory method of getting your ring size and we recommend that you use it.

Illustration of METHOD No. 1

METHOD No. 2. Cut a narrow strip of paper about one-eighth inch wide, as shown in the illustration Fig. 1, wrap this narrow strip of paper around the finger at the joint (illustration Fig. 2 shows the correct position) and cut it off with the scissors so that the ends of the paper will exactly meet (illustration Fig. 3). Pin this little piece of paper to your order or enclose it in a little envelope and attach this envelope to your order and say in your letter that you have enclosed the slip of paper in the envelope and attached it to your order.

METHOD No. 3. If you own or can borrow a ring which fits you, a flat or plain band ring, that is to say a ring that has no setting in it, lay it on a piece of white paper, and with a pen, or better still, a very sharp pointed pencil, draw the inside circle of the ring and send this drawing to us, either pinned to your order or in a separate envelope pinned to your order.

METHOD No. 4. Take a soft piece of thin copper wire, or even a hairpi the purpose, and wind it around the finger at the middl twist it together, making a complete ring with the wire and enclose this wire i attaching it to the paper to prevent its becoming lost.

ILLUSTRATION OF METHOD No. 2.

METHOD No. 5. If you have time to wait a few us and ask us to send you our and upon receipt of your letter we will at once mail it, full instructions, free of charge.

SPECIAL NOTICE. In ascertaining the fin using the strip of paper m is Method No. 2, or the wire ring method, which is M be sure to remember that very frequently the middle jo fingers are larger than the finger between this point and and therefore you should be sure to use the middle joint of the finger as the place to measurement. If you will be very careful in taking the measurements by any one of the we will be sure to have your correct ring size and the ring we send you will be ex finger. It is very easy to get the ring size by any of these methods, and if you wi instructions carefully, we guarantee that the ring you order will fit you.

GENUINE GLITTERING WHITE TOPAZ STONE SET IN SOLID GOLD RING, STUD AND EARRING MOU

WE GUARANTEE THEM

Genuine white topaz, mined in Europe, the nearest approach to a brilliant diamond yet discovered. This topaz is a genuine stone cut in facets the same as a diamond; it has no foil to increase its brilliancy. It will scratch glass and cannot be marred even with a hard tempered file. A gem of this sort has been in demand for years. It will wear your natural lifetime. The illustrations show exact size of stone set in mountings. The mountings as used for genuine diamonds. Own a genuine white and you will have a gem to be proud of. It is the genuine article; genuine gem factured, but mined, not cast as glass is cast, but cut as a crystal or diamond.

Postage on any one of the articles on this page, 2 cents; 10 cents extra for regist

GOLD FILLED AND SOLID SILVER RINGS.

GOLD FILLED RINGS and how they are made. It will be interesting to you and much more satisfactory before making a purchase of a gold filled ring to know just how they are made. To start with, a piece of solid gold tube 1½ inches in diameter is taken and the hole on the inside is made perfectly smooth, after which a piece of hard, fine composition metal is placed on the inside of the tube so as to fit the opening perfectly. Some fine gold solder is now placed in the crevice and the whole is inserted in the furnace. As soon as the two pieces are heated sufficiently the solder flows into the crevice, after which it is removed from the furnace and after it is cold the two original pieces are one. One end of this piece is then hammered and drawn out, so as to make it a little smaller, after which it is inserted in what is called the draw plate, which is a long steel plate with a number of holes in it of such shape as the pieces which it is desired to make. These holes are graduated in size, at one end being very large and at the other end small. The piece of material to be worked on is inserted in the large hole first, and with a pair of tongs it is drawn through; this reduces the piece, when it is again hammered at the end to make it small enough to be inserted in the next smaller hole and in turn drawn through this.

THE EDGES OF THE HOLES are all polished so as not to scrape but to press the metal. This drawing hardens the metal to such an extent that after drawing it through several times it would break easily. It is then annealed by inserting it in the fire and allowing it to cool gradually. After the piece has been drawn out to the required shape and size, one end is bent around a steel mandrel until it has formed a circle of the size the ring is to be made. It is then cut off at the proper place and both ends are carefully surfaced in order to bring them together and make a perfect joint, and on this joint is placed some fine gold solder and the ring inserted in a furnace sufficiently heated to cause the solder to flow into the joint. The ring is then polished carefully on a cotton buff wheel with tripoli and rouge, after which it is ready for the market. If mail shipment, postage on rings, extra, 2 cents; 10 cents extra if by registered mail.

Unless otherwise stated, the stones used in the various settings on this page are the finest imitations, the same as are generally used in high grade jewelry.

GOLD WEDDING RINGS, FINEST MADE, GUARANTEED SEAMLESS

Price 25 Per Cent Cheaper Than Sold Generally, and Engraved Free of Charge With Any Letter or Date You Desire.

We sell the finest quality manufactured in 10, 14, 18 and 22-karat, and guarantee them in every respect, positively the finest and purest gold used, made from one piece. No discolorations or marring as in other methods of making when the ring is soldered. The true wedding ring should be a continuous circlet without joint or seam. We cannot fill your order for ring unless you let us know the size wanted. See page 820 for how to ascertain the exact size you want. If mail shipment, postage on rings, 2 cents extra, plus 10 cents if by registered mail.

ES' FINE SOLID GOLD SET RINGS. ALL RINGS ON THIS PAGE ARE FURNISHED IN SIZES 5 TO 10.

WHAT DOUBLETS ARE. So there can be no misunderstanding, we wish to say that doublets are not genuine stones, and where we say ruby doublet, or emerald doublet, or sapphire doublet, we do not mean genuine ruby, or genuine sapphire, or genuine emerald. A doublet is a stone made of two pieces, the top piece or face being a layer of genuine transparent stone or garnet fastened by a certain kind of cement that is unaffected by moisture or wear. High grade solid gold and gold filled jewelry sold by the most representative manufacturers is set with these doublets as described above. **We cannot fill your order for ring unless you let us know size of ring wanted.**

GENUINE Diamonds IN SOLID GOLD SETTI

IF MAIL SHIPMENT, POSTAGE ON RINGS, 2 CENT
CENTS IF BY REGISTERED MAIL.

WITH EVERY DIAMOND WE SEND A PRESENTATION CASE FOR SAME FREE.

WE SEND YOU A WRITTEN BINDING GUARANTEE with every diamond we sell, guaranteeing that it is a genuine diamond, guaranteeing that its weight is exactly as stated, and agreeing absolutely that you can at any time within one year return any diamond you select from this catalog and exchange it for any other diamond or article of jewelry at the same price without sending us any money, or for any other diamond or article of jewelry at a higher price simply by sending us the difference in price.

TO DOUBLY PROTECT YOU, we further agree that you can return any diamond purchased from us within sixty days of the purchase date and have your cash purchase price returned in full, or you can at any time after sixty days and within one year after the date of purchase have your full purchase price returned less 10 per cent. This 10 per cent merely defrays the cost of mounting, handling, etc., but we must caution you that we positively will not exchange, refund or allow credit for any diamond purchased from us unless it is in or with the original setting, and is accompanied by our guarantee and refund certificate that we send with every diamond.

EXCEPTIONS. Where we do not give our refund and exchange certificate with a purchase: This ruling applies to items plainly marked "No Refund Certificate." On most of our diamond mounted jewelry we quote quality and weight. Where quality and weight are not given we do not allow refund or exchange after goods have been worn.

GRADES OF DIAMONDS.

FIRST QUALITY. These stones are perfect in color, proportion, brilliancy and shape. Specially picked with the idea of selecting the best stones from original papers. Best in every way for brilliancy, shape, color and perfection.

SECOND QUALITY. The second quality diamonds are in every particular the same as the first quality, with the exception of a small flaw or because of being off color. We will send you either one you may desire—a perfect, slightly off color diamond, or a very white diamond with an imperfection. Most of the diamond merchants sell this, our second quality diamond, and particularly the ones that have a small imperfection, as first quality.

THIRD QUALITY. A third quality diamond is one that is brilliant and well cut, but has some imperfection or blemish and is not as good as our second quality diamonds. Our own third quality diamonds are practically perfect in cut and shape. The color may be the same as in our first or second quality. Our third quality diamonds, however, never have cracks in them or large, unsightly chunks or pieces knocked out of them. The same quality that we sell for third quality is sold by some monthly payment houses and by small dealers as first quality stones. These people either buy or sell them as first quality because they are unable to judge diamonds, or they are fully aware of the imp are simply misrepresenting the goods.

COMPARE OUR PRICES with what others ask for genuine diamonds, monds on the same basis as we sell the com hold necessity, on the same small percentage of profit. We take advantage of in buying and selling. Do not understand from these reduced prices that depreciated in value; on the contrary, the greatest authorities in the diamond York, London, Antwerp, Paris and Amsterdam tell us that the present diamond lower than any prices likely to prevail in the future, and there is an immed toward much higher prices. The supply is limited, the demand constantly i very soon it may be impossible to fill orders at less than double the prices now you contemplate buying a diamond at all, buy it now.

THE ILLUSTRATIONS of unset diamonds below are slightly exaggerat them merely to give you an idea of the com according to weight, how the facets of the stone are cut, and their shape.

THE MOUNTINGS of the diamond rings are all hand made, solid 14-ka stantial and perfect, according to design. The va receive when you purchase a diamond from us, if you consider the color, perfe absolute guaranteed weight that we always send, will in every instance mean a of 25 to 33⅓ per cent.

WE THOROUGHLY UNDERSTAND our position in making above; we prove it to you with every purchase of a diamond our written binding guarantee and agreement it possible for you to buy a stone from us and keep it sixty days, so that you it with diamonds owned by friends, or where you like, and if dissatisfied f whatever, return it and have your money returned, together with all transport See our guarantee and agreement on diamonds, a copy of which is plainly print or you can return it at any time within a year and have the purchase price of returned less 10 per cent. An offer of this kind could not possibly be mad diamond values were given.

WE MUST IMPRESS UPON YOU that brilliancy is a diamond most important features. When a diamond, particularly observe its brilliancy. A diamond may be perfect in that is, free from flaws, and still be an inferior stone on account of its lack brilliancy. We are particular on the question of brilliancy in a diamond, irre in the various qualities, first, second or third grade. Every one we send out to be a rich, sparkling and attractive gem.

$12.60 FOR YOUR CHOICE OF ANY ONE OF THESE EXQUISITE DIAMOND RINGS.

No. 4H25001 No. 4H25003 No. 4H25004 No. 4H25007

The mountings are 14-karat solid gold, bright polish, latest in design. The diamonds are special quality, very brilliant, beautifully cut and regular in every point and weigh slightly less than 3-16 of a carat and are guaranteed larger than ⅛ carat; beautifully spread. $20.00 would be the regulation accepted retail price anywhere. Our binding guarantee accompanies each one. Be sure to order by number. If you do not find it in every way satisfactory, you are at liberty to return it and have your money returned, together with all transportation charges. Do not fail to give size of ring wanted.

$25.30 FOR YOUR CHOICE OF THESE REGULAR $35.00 DIAMOND RINGS.

No. 4H25550 No. 4H25552 No. 4H25554 No. 4H25556

They weigh slightly more than ¼ carat; we guarantee them not to weigh less than ¼ carat. Our binding guarantee and refund certificate accompanies each one. If the ring is not satisfactory in every way you can return it to us and have your money, together with all transportation charges, returned. The diamond is brilliant and perfectly cut, special quality. A slight imperfection can be found, however, by the use of a strong magnifying glass. The mountings are solid 14-karat gold, perfect in every detail and finish. **Be sure to order by number, and do not forget to give size of ring wanted.** Price, each $25.30

$36.40 FOR YOUR CHOICE OF ANY ONE OF THESE REGULAR $50.00 DIAMOND RINGS.

No. 4H25560 No. 4H25562 No. 4H25564 No. 4H25566

The stone weighs very nearly ⅜ carat, is larger and considerably heavier than ¼ carat, perfect in cut and brilliancy, special quality, really as good as our first quality, but on account of some slight imperfection we are offering your choice of any one of them at this astonishing price. **Be sure to order by number, and do not fail to give size of ring wanted.** Price, each $36.40

$43.00 FOR YOUR CHOICE OF ANY ONE OF EXQUISITE ⅝-CARAT DIAMOND R

No. 4H25570 No. 4H25572 No. 4H25574 No.

The stone weighs ⅝ carat (⅝ carat is only ⅛ carat carat), **is perfect in cut and brilliancy,** and is very nearly equal to our first quality, the only difference being imperfection. You receive with it our binding refund certificate, which entitles you to return the diamond and money returned, together with all transportation charges found in every way satisfactory. The mountings 14-karat gold, good substantial weight, beautifully latest creations. **Be sure to order by number, and do give size of ring wanted.** Price, each.....

GENUINE DIAMONDS IN SOLID GOLD SETTINGS.

The rose cut diamond and the genuine regular brilliant cut diamond. We illustrate both kinds. The rose cut flat bottom with three to possibly ten facets cut on the top. They are larger and more brilliant than cup diamonds do not show rings with chip diamonds. Rose cut diamonds cost less than the regular brilliant cut diamonds per carat.

The regular brilliant cut diamond has a flat top called the table, and a deep base that ends in a point called the cullet. The top or table slopes down to the edge called the girdle. of a regular brilliant cut diamond is above this girdle and about three-fourths of it below. It requires from thirty to fifty-two facets to properly produce this stone.

If mail shipment, postage extra on any Ring or cuff links on this page, 2 cents. If by registered or insured mail, see page 17.

BARGAINS in Ladies' Silver Plated and Solid Silver Mesh Bags

These bags are splendidly silver plated on German silver. They have been selected with a view to having the latest and most artistic designs at a big saving in price. We are showing wonderful values in every item listed on this page, as you will discover by comparing the prices. Twenty-five per cent is the actual saving you are offered. For instance, the bag we offer at $2.98 is sold in the regular way in any first class retail store at $4.00; never less than $3.75; in size, style and finish the bags are identical. All prices are based on the same proportion of value. Each bag is complete with substantial carrying chain. Postage on mesh bags, one cent an ounce; if by registered mail, 10 cents extra.

Furnished in medium or stub pen. **State kind of pen desired.** Price, complete, including detachable patent clip and filler, together with full directions.....

No. 4H35816 "Flash" Self Filling Fountain Pen, strongly made of hard black Para rubber and is endorsed by leading dealers. It is fitted with a solid 14-karat gold pen point, and you can fill it in a flash. The fingers never need to come in contact with ink, merely press the button on top while the pen is inserted in the ink, and the reservoir is filled. The cap is absolutely airtight, prevents the drying up or clogging of ink; it screws on to the barrel and holds it in position, thereby saving the pen point. Full directions regarding the filling of pen go with each one. Price, complete, including detachable clip. **$1.19**

Fountain Pen illustrations on this page show actual sizes.

No. 4H35904 Paul E. Wirt Fountain Pen. Taper case, regular size, chased, fitted with No. 3 fine, medium or stub 14-karat gold pen, with top feed. State kind of pen desired. Price, complete, including detachable patent clip and filler, together with full directions $1.67

No. 4H35910 Paul E. Wirt Extra size case, gold mounted, fitted with No. 4 14-karat gold pen, with top feed. Price, complete, including detachable patent clip and filler, together with full directions 2.28

Gentlemen's Gold Mounted Mother of Pearl Pen.

No. 4H35912 Makes a beautiful gift for anyone, but especially suited for gentlemen. This pen has a hand made hard rubber case. Handsomely decorated with two broad gold filled bands and swell Oriental pearl post. Fitted with No. 3 solid 14-karat gold pen and self feed. These pens usually sell for $7.50. State whether you desire pointed, medium or stub pen. Price, complete, including detachable patent clip and filler, together with full directions $2.84

No. 4H35914 The Professional Fountain Pen is made especially for us, nothing larger made in a fountain pen on the market, constructed with a view of furnishing professional men, those doing a great deal of writing and desiring an extra large fountain pen dependable under all circumstances. It is made of hard vulcanized black Para rubber with a large size No. 8, 14-karat iridium pointed pen, has underfeed principle. We guarantee this pen to suit the most discriminating. We conscientiously recommend it to those who desire a pen so constructed as to stand the most trying usage.
Price, complete, with patent detachable clip, filler and full directions $2.98

Ladies' Gold Mounted Mother of Pearl Pen.

No. 4H35916 Ladies' Fancy Fountain Pen. This pen has a hand made rubber case, handsomely decorated with two gold filled bands and 2¼-inch mother of pearl post, fitted with No. 3 solid 14-karat gold pen. This pen makes a handsome gift. Can be furnished in pointed, medium or stub pen. State kind of pen desired. Price, complete, including detachable patent clip and filler, together with full directions $3.30

Full Gold Mounted Floral Design Fountain Pen.

No. 4H35918 Full Gold Mounted Floral Design Fountain Pen. Mounting is gold filled stock, hand engraved and hand chased in floral effect, something new, ornate and most attractive. Pen, barrel, cap, etc., are made of the very finest hard vulcanized black Para rubber, is fitted with a No. 3 full size iridium tipped 14-karat gold pen, has underfeed principle, the most practical principle in fountain pens used. It is tight jointed, highly polished and guaranteed to give perfect satisfaction. Price, complete, with detachable clip, filler and full directions $3.56

Full Gold Mounted Pen.

No. 4H35920 Gentlemen's Fancy Gold Filled Mounted Fountain Pen, very elaborate and artistic in design, fitted with No. 3 pen. Can be furnished with pointed, medium or stub 14-karat gold pen. State kind of pen desired. Price, complete, including detachable patent clip and filler, together with full directions $4.40

Excelsior Self Filling Fountain Pen.

No. 4H35922 A High Grade Self Filling Fountain Pen at one-half the lowest price ever made by any dealer. The barrel is extra large and made of the best quality hard rubber, fitted with No. 2 solid 14-karat gold pen, with self feed. The simplest self filling pen made. Price, complete, including detachable patent clip, together with full directions 88c

The Ready-Fill Fountain Pen. It's Self Filling.

No. 4H35924 The Ready-Fill Fountain Pen. Its principal merits are these: First, it is self filling, by a simple pressure of the thumb while the pen is dipped in the ink well. Release the thumb and the pen is filled. It is self cleaning, by the filling and emptying of the pen while in the ink all the parts are cleaned without soiling the fingers. The sleeve of the Ready-Fill works on a thread, so that when the pen is filled the sleeve can be turned back until it is closed tightly, thereby protecting the ink sack without clumsy projections. You never need to jar or shake the Ready-Fill to make it write. Price, complete, No. 2 solid 14-karat gold pen 99c

No. 4H35925 Rival Self Filling Fountain Pen, one of the most simple yet effective self filling fountain pens on the market. To fill the pen, merely remove the cap, then insert the pen point up to the edge of the nozzle, turn the button on top of the barrel to right or left four or five times, then release the button, and the reservoir will be filled with ink. Large size barrel, fitted with a solid 14-karat gold No. 3 pen point, easy flowing. Full directions with each pen. Price, complete, including detachable clip $1.42

Patent Safety Fountain Pen for Ladies' or Gentlemen's Use. Non-leakable. The patent device consists of an adjustable inner cap held in place when in contact with section by a spiral spring. When the cap is screwed into place, the inner adjustable cap forms an absolute stopper to the ink fountain when held in any position while carrying. Pen point is always moist and ready for writing. Full directions with each fountain pen sold. Is fitted with a solid 14-karat gold No. 2 pen point.

No. 4H35927 Ladies' size. Price, complete, including detachable clip $1.45

No. 4H35929 Same as above, large size, made for bankers, professional men and those who want a larger fountain pen in every way than the illustration shows, fitted with No. 4 solid 14-karat gold pen point. Price, complete, including detachable clip $1.98

A Self Filling Jewel Fountain Pen for $1.68.

This is the best Self Filling Fountain Pen manufactured, in our opinion, and the one we advise your buying. It is simple; no complicated mechanism; a child can operate it; will not soil any ink. The illustration shows how the fountain pen is filled. Pull up the sliding portion of the pen and press at the place indicated, this fills the fountain pen; slide back the upper portion of the barrel and the trick is done. The outside barrel is made of hard superfine black Para rubber, highly polished and tight jointed. Each holder is fitted with a full size pen of its number, solid 14-karat gold. The cut shows full size No. 4 fountain pen with No. 4 pen nib. Our fountain pens are made in proportion; we never use a small size barrel and fit a large size pen into it. Be sure to order according to the size of fountain pen wanted.

4H35930 Fitted with a No. 2 pen. Price, complete, including patent detachable clip and full directions $1.68

4H35932 Fitted with a No. 4 pen. Price, complete, with detachable clip and full directions 1.98

ASKA SILVERLIKE METAL TABLEWARE

LOOKS LIKE SILVER; IN FACT, IS THE NEAREST APPROACH TO SOLID SILVER YET DISCOVERED. A NEW WARE MADE BY A NEW PROCESS. YOU CAN SCOUR IT WITH A BRICK.

GUARANTEED FOR LIFE.

The standards of quality and finish of the goods on this page are guaranteed by the manufacturers to us, and we guarantee them to our customers. You run no risk purchasing this ware, for if you do not find it to be exactly as represented, it can be returned to us and your money will be returned. Be sure to state catalog number and when you order. WE DO NOT MAKE ANY OTHER PIECES OF ALASKA METAL TABLEWARE THAN THOSE MENTIONED ON THIS PAGE.

HEAPEST AND BEST FLATWARE MADE. Alaska Tableware is not plated, but is the metal through and through, and will hold the same color as long as there is any goods left. Do not be deceived by anyone who undertakes to sell you any imitations of this ware that are sold on the market for more money than we charge. The genuine Alaska Tableware can be had only of us.

E TAKING HOLD OF THIS NEW DISCOVERY we left nothing undone to thoroughly satisfy ourselves the properties of this metal and to test it in every conceivable way. After having made our experiments, and it stood all tests, we made a contract with the factory to furnish us. It has now been about fifteen years since we began to handle this line, and it has not only proved from experiment to be as represented, but with fifteen years of actual service in the hands of many thousands of our customers, who send us the most flattering recommendations in praise of these goods, and with the rapidly increasing sales, we can recommend it most highly.

THE METAL IS VERY DENSE AND TOUGH, is almost as white as genuine silver, takes a beautiful polish and requires much less care than does silver plated ware.

THE FANCY PATTERN and fancy beaded are equal in appearance and artistic finish to any of the best silver plated or solid silver goods on the market. The immense quantities we handle, and the conditions of our contract direct with the factory, put us in a position to furnish this genuine Alaska Tableware at a slight advance over cost of manufacture.
